

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Monday 07 May 2007

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Rain or showers clearing eastwards, with heavy, thundery rain at times across the midlands, north Wales and northwestern England. Brightening up over most of the United Kingdom during the afternoon with sunny spells and a few scattered showers, though cloud and rain will return to the southwest by evening. Generally rather warm.

Outlook for Wednesday and Thursday:  
Sunny spells and showers initially for northern and central areas on Wednesday, but cloud and rain, heavy at times, will spread northeastwards during the day to affect all areas. Rain will persist in northern Scotland and southern England for much of Thursday, with sunny periods and showers elsewhere.
