

FPUK86 EGRR 241745
Forecast for the UK.
Issued by the Met Office
at 1945 on Monday 24 April 2006

** Valid for Broadcast at 2159 **

Here is the forecast for the United Kingdom for daytime tomorrow :
Central parts of the UK will have a cloudy start with outbreaks of rain but gradually become drier with some sunny spells developing. Central and eastern England will start dry with some clear spells, but become cloudy with some showery rain. Rather cloudy with some showers over northwestern parts of the UK. Rather warm in eastern England, temperatures around normal elsewhere.

Outlook for Wednesday and Thursday:
Largely fine and dry with sunny spells across England and Wales on Wednesday and Thursday. Some cloud and showers are likely over more northern parts though. Temperatures mostly near normal, rather warm in any sunshine over England and Wales.
