

National Severe Weather Warning Service

Chief Forecasters Assessment

A waving frontal zone will remain slow-moving across the area before slowly clearing east later today. Rain could turn thundery at times with some intense downpours within the longer spells of rain.

This is an update to the warning issued on Sunday to include more of northeast England and to extend the warning until 2100 this evening. However, it should be noted that the rain is expected to clear Wales and southwest England during this afternoon.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **11:25 on Mon, 05th Aug 2013** until **21:00 on Mon, 05th Aug 2013**

Further rain will affect parts of western England, Wales, northern England and southeast Scotland through today before easing away eastwards. Accumulations of 20-40 mm are likely in many parts with the risk of more than 60 mm over parts of southwest England, Wales and northern England. The public are advised to be aware of the risk of surface water flooding.
