

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Tuesday 26 Sep 2017

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
It could be a bit of a murky start again for some but there will warm sunny spells for many during the daytime. However, cloud will increase from the west as a band of rain slowly moves in across Northern Ireland, Wales and southwest England. It will turn windy across the north and west of the UK too.

Outlook for Thursday and Friday:

Rain will clear on Thursday, leaving sunny spells for many, but a band of wet and windy weather will move across the UK from the west on Friday. Scattered, blustery showers will follow, along with some sunshine, but it will feel cooler.
