

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Wednesday 04 Mar 2015

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
Rain across Northern Ireland and north-western Scotland will turn heavy, at times, and persistent over western hills. Further south, there will be brighter and drier conditions, although it will probably become increasingly cloudier later in the day. It will be windy in north with local gales in the northwest. Turning milder through the day.

Outlook for Friday and Saturday:
The rain affecting northwest Scotland will continue throughout both days, it will be persistent and often heavy. Elsewhere, there will be variable amounts of cloud with sunny spells. It will be generally windy with gales at times in the northwest. Mild or very mild for most.
