

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Thursday 02 Jan 2014

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:

A very windy day with gales for many places, severe over exposed western hills and coasts. These strong winds will give a high risk of coastal flooding across much of Southwest England as well as some other southern and western coasts. Blustery showers, with longer periods of rain at times in some northwestern areas.

Outlook for Saturday and Sunday:

Further showers for many on Saturday with perhaps a longer period of rain spreading north across central and eastern areas. Some snow possible on northern hills. Heavy rain spreading northeast on Sunday. Winds becoming somewhat lighter for a time but becoming very strong again on Sunday.
