

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Monday 04 Jun 2012

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
Rather cool across the UK with an early frost possible for Northern Scotland.
Cloud and outbreaks of rain in southwestern parts will slowly spread northeast
across much of the country during the day, this coming after a dry and bright
morning for northern and eastern areas. It will also become quite breezy in the
south later.

Outlook for Wednesday and Thursday:

The rain from Tuesday will linger across Scotland during Wednesday, elsewhere a
mixture of sunshine and scattered heavy, and possibly thundery showers. Then,
persistent rain will return to many areas during Thursday, heaviest in the south
and west with gusty winds likely.
