

Guide to our National Severe Warnings Service (NSWWS) Archive

You can view past National Severe Weather Warnings in our [Digital Library & Archive](#).

Warnings for the current year are catalogued at the end of each month once all the warnings have been issued and will be made available as soon as possible, early in the following month. Over the coming months we will be adding more warnings which will take the archive back to 2012. If you require a recent warning which has not yet been added to our Digital Library and Archive please contact our enquiries team on metlib@metoffice.gov.uk who will provide the warning to you if available.

You can also search for specific warnings in our [online catalogue](#).

You can get a full listing of everything catalogued to date by entering "NSWWS" in the search bar or for more specific searches you can combine terms such as "nswws and amber and scotland" as illustrated below.

The screenshot displays the Met Office National Meteorological Library & Archive website. The header features the Met Office logo and the site title. A search bar is prominently displayed with the text "Search our collections" and a search query "nswws and amber and scotland". Below the search bar, there are four main content areas: "Archive Treasures" (showing a photograph of a weather report), "Meteorological Publications" (showing a thermometer), "National Severe Weather Warnings" (showing a weather map), and "Met Office publications" (showing a weather report). The right sidebar contains links to "Archive reference search", "About our archive collections", "Learn about the weather", and "National Severe Weather Warnings".
