DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Sunday, 06 December 2020 at 03:08 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels will be mostly Low across the UK. There is a chance of some local Moderate levels in central parts of Britain as winds fall light here, perhaps limiting the dispersal of locally-generated pollutants.

Tomorrow: Air pollution levels will again be mainly Low across the UK. Areas of fog and light winds may lead to local Moderate levels in larger urban centres in southern Britain.

Outlook: Air pollution levels should become generally Low through this period as breezier and more changeable weather conditions come to dominate.
