

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Tuesday 01 Sep 2009

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
Mainly dry in the east at first, but showers in the south and west spreading east across all areas during the morning, with more persistent and heavy rain spreading northeast across England and Wales during the afternoon and evening. Becoming windy later in parts of the south.

Outlook for Thursday and Friday:

Outbreaks of rain will continue across northern and eastern parts on Thursday whilst the south and west have a mixture of sunshine and showers. The showers may become more frequent across the southwest later on Thursday. Rain persisting across northeast Scotland on Friday, with scattered showers elsewhere. Remaining windy throughout the period.
