

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Tuesday 19 Dec 2006

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
Fog and frost will only slowly thin and lift, and may linger all day in places again, particularly well inland, and here temperatures will struggle to get above freezing. Most other places should see at least a little brightness, especially around some coasts. NW.Scotland will be milder and breezier, but rather cloudy.

Outlook for Thursday and Friday:

Little change on Thursday and Friday. Frosty and foggy by night, only slowly lifting in the day and continuing to linger in some places. The far northwest though will be breezier, cloudier and milder with a little light rain at times in the W.Isles.
