

FPUK86 EGRR 071745
Forecast for the UK.
Issued by the Met Office
at 1945 on Wednesday 7 July 2004

** Valid for Broadcast at 2159 **

Here is the forecast for the United Kingdom for daytime tomorrow :
Rain, heavy and possibly thundery, and windy, cool conditions will
linger over Wales, Northern England and parts of southwest England.
The rest of England will have bright spells, with widespread showers
developing. More persistent rain may affect southern England, pushing
northeastwards across East Anglia later. Scotland and Northern
Ireland will have sunny spells and isolated showers, these most
likely across western Scotland.

Outlook for Friday and Saturday:
Remaining unsettled on Friday and Saturday with cloud and patchy rain
slowly clearing eastwards from England and eastern Scotland. Plenty
of showers will follow in though on a west or northwesterly breeze
and it will be rather cool.
