DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 20 November 2020 at 05:29 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Low levels of air pollution are forecast for Friday with air sourced from the Atlantic Ocean. This will bring strengthening winds, cloud and rain to most areas of the UK.

Tomorrow: Westerly winds will continue to cover the UK on Saturday, and this will ensure air pollution levels will remain Low.

Outlook: Further changeable weather conditions will affect all areas and this will keep air pollution levels in the Low category throughout the period.
