

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Tuesday 06 Sep 2011

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:

A breezy day across the UK but less so than today. Northern and western areas will have a mainly cloudy morning with showers at times, these heaviest in western Scotland. Other areas will have a drier brighter morning, but any cloud breaks will tend to fill in through the afternoon.

Outlook for Thursday and Friday:

Some relief in Scotland on Thursday with brighter conditions and only a few light showers. The rest of the UK will be cloudier with showers or longer periods of rain for most; feeling quite warm in the south. Friday sees further heavy rain pushing into northern areas.
