

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Tuesday 03 Apr 2007

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
A dry, fine day for most. Some areas of cloud are expected, especially across parts of the Midlands and eastern England where it could prove quite stubborn, but elsewhere there should be plenty of sunshine, especially southern Scotland, Northern Ireland, parts of northern England and also the far south. Feeling pleasant in the sunshine, and very warm over southeastern Scotland.

Outlook for Thursday and Friday:

Remaining dry on Thursday with variable cloud and good spells of sunshine for most, making it feel pleasantly warm. Somewhat more cloud is likely on Friday, perhaps with a little rain over parts of Northern Ireland and western Scotland.
