

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Friday 07 Sep 2012

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
Early mist, fog and low cloud will steadily clear to leave most of England, Wales, Northern Ireland, southern and eastern Scotland with some sunshine for the rest of the day. The highest temperatures are expected across central, southern and eastern England. Cloudier across northwest Scotland, with occasional light rain and drizzle, and perhaps some more persistent rain for Shetland.

Outlook for Sunday and Monday:
Sunday will see another fine and sunny day across eastern Britain, with temperatures up a touch further in the southeast. Cloudier further west, with outbreaks of showery rain slowly moving eastwards. Rather more unsettled, breezy and a bit cooler on Monday.
