DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Wednesday, 06 January 2021 at 08:52 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels will be predominantly Low. However higher levels may exist close to busy roads in Scotland, due to light winds allowing the build-up of locally emitted pollution.

Tomorrow: Air pollution levels will continue to be predominantly Low on Thursday. However, a few pockets of Moderate or High may develop near urban centres and industrial sites of northern England and South Wales.

Outlook: Levels of air pollution are expected to remain largely Low over the weekend but may become Moderate locally in northern England on Saturday or Sunday, due to light winds giving poor dispersion of locally emitted pollutants;.
