

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 0700 on Wednesday 03 Sep 2014

++ Valid for broadcast at 0858

Here is the forecast for the United Kingdom until dawn tomorrow:  
Areas of low cloud, mist and any fog patches will lift and break during the morning to leave a largely fine and dry day with variable amounts of cloud and some sunny spells. It will feel warm where the sunny spells occur with light winds.

Outlook for Thursday and Friday:

Conditions will remain largely fine on Thursday and Friday, once any early mist and fog patches clear, with variable amounts of cloud allowing some warm sunny spells at times. However, the cloud may occasionally be thick enough for some patchy light rain or drizzle at times.
