

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Tuesday 03 Jun 2008

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Patchy cloud and any rain will soon clear from far eastern parts then much of the United Kingdom will have a dry and fine day with some sunshine. however, Northern Ireland is likely to see thicker cloud with some outbreaks of rain for much of the day which will extend to western extremities of Scotland, England and Wales by evening.

Outlook for Thursday and Friday:

Rain initially in western areas on Thursday will spread east but turn more showery at the same time. This band of patchy rain then becomes slow moving in the east on Friday with sunny spells for many central & western parts.
