SUNDAY
1 JULY 1984

SUMMARY
OF
BRITISH WEATHER

Most of Scotland and Northern Ireland had a lot of cloud with a few showers, chiefly in the north and east. Parts of southern Scotland and Northern Ireland were sunny at times.

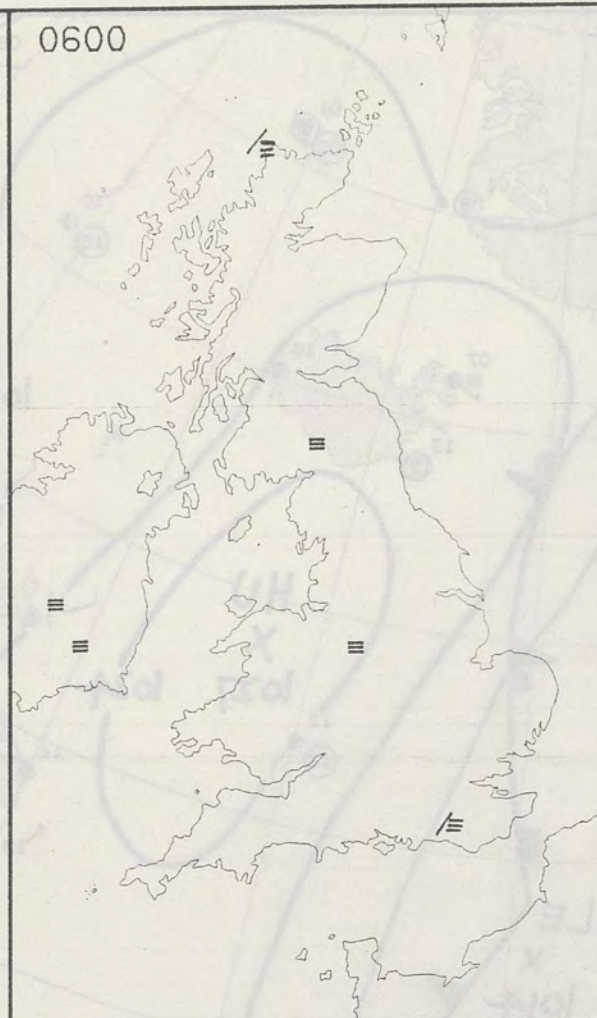

Many parts of England and Wales were sunny, but it was fairly cloudy near northern Irish Sea coasts and in parts of East Anglia. Isolated showers affected east and northeast England during the evening.

Temperatures generally over the British Isles were not far from normal, but it was cool in some of the cloudier northwestern regions, and warm in parts of the southwest.

SUMMARY
OF
BRITISH WEATHER

Much of Britain was dry overnight, but in northeast Scotland, northern England and the Midlands there were some showers.

During the day most places in Scotland had a dry day. In Northern Ireland, the west of England and Wales it was a dry day nearly everywhere and quite sunny.

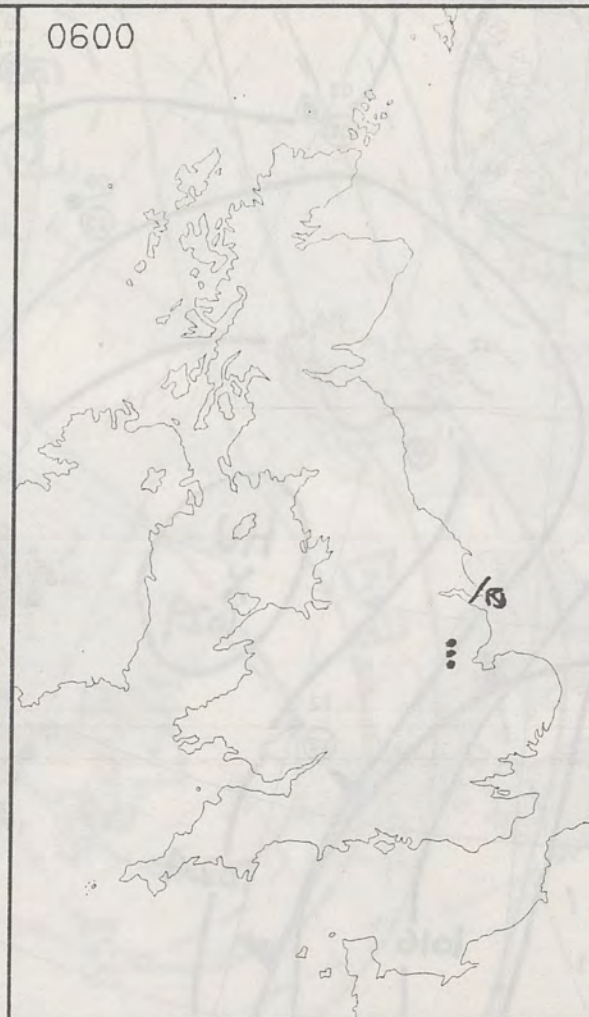

Northeast Scotland and the Northern Isles had showers. In eastern England, East Anglia, the Midlands, southeast and central southern England there were showers too and in the morning some places had an hour or two of more continuous rain.

Most places had a rather cool day and it was particularly cool in East Anglia, eastern England, eastern and northeastern Scotland. Temperatures reached normal values in extreme southern England.

TUESDAY
3 JULY 1984SUMMARY
OF
BRITISH WEATHER

Much of Britain had a dry, clear, cold night but in East Anglia there were a few showers and in northern Scotland it was a cloudy night with light rain and drizzle in a few places.

Most places in the United Kingdom had a dry and sunny day but parts of eastern England were rather cloudy at times.

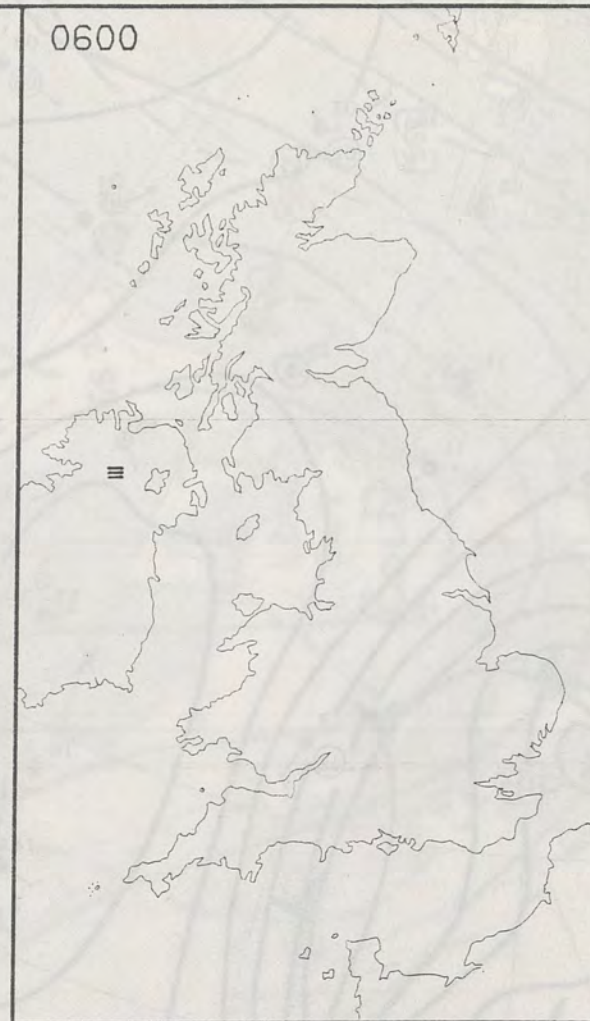

In northern Scotland the morning was cloudy and many places brightened up with some afternoon and evening sunshine. The extreme north of the mainland along with the Western and Northern Isles had a cool, cloudy day and in the Northern Isles there was drizzle at times throughout the day.

In most places temperatures were close to or a little above normal, however much of East Anglia stayed cool and sea breezes kept coasts cooler than inland.

WEDNESDAY
4 JULY 1984

**SUMMARY
OF
BRITISH WEATHER**

After a fine clear cold night it was a dry, warm and mainly sunny day over most of the UK. The extreme exceptions were some of the eastern coastal parts of England, particularly Norfolk and Suffolk and the northern coasts of Scotland along with the Northern Isles. In these coastal regions it was rather cool and cloudy with drizzle in a few places.

FRIDAY
6 JULY 1984SUMMARY
OF
BRITISH WEATHER

Overnight many parts of the British Isles were dry and clear but during the night many areas of eastern England and eastern Scotland became misty with some fog and low cloud. There was also an increase in cloud over Wales and northwest England while in Northern Ireland, northern and western Scotland thickening cloud produced a few spots of rain in places in the extreme west.

During the day many parts of England and Wales were hot dry and sunny but many coastal areas were cooler and the north and west of Wales and northwest England was also a little cooler than most places, and cloudier at times.

Eastern parts of Northern Ireland and much of eastern and southern Scotland was also very warm with some sunshine but in the west of Northern Ireland and in northern and western Scotland there was cloudier weather with some mainly light rain in places and near normal temperatures.

SUMMARY
OF
BRITISH WEATHER

A dry and clear night for many places but most of Northern Ireland, central and northern Scotland had a cloudy night. In the north and west of Scotland there was some mainly light rain and drizzle in places with some patchy hill and coastal fog.

During the day most of England and Wales was again hot, dry and sunny but sea breezes kept many southern and western coasts a little bit cooler. After a cloudy start in places much of Northern Ireland, southern, central and eastern Scotland was quite sunny and very warm. Parts of northwest Scotland also became drier, brighter and warmer as well. On northern and western coasts especially in the Northern and Western Isles the weather remained cloudy with some light rain and drizzle and near normal temperatures.

SUNDAY
8 JULY 1984

SUMMARY OF BRITISH WEATHER

During the night much of Britain was dry with clear skies, but there was rain early in the night in the Shetlands.

It was a dry day nearly everywhere and there was quite a lot of sunshine, but there was a little rain here and there later. Over northern and eastern England and southeast Scotland in the late afternoon and evening there were a few thunderstorms.

It was very hot and dry in most places and even southern and eastern coasts, which were much cooler than elsewhere had temperatures above normal. In Cornwall cloud kept temperatures from rising above normal values.

PLOTTED SURFACE OBSERVATIONS

MONDAY
9 JULY 1984

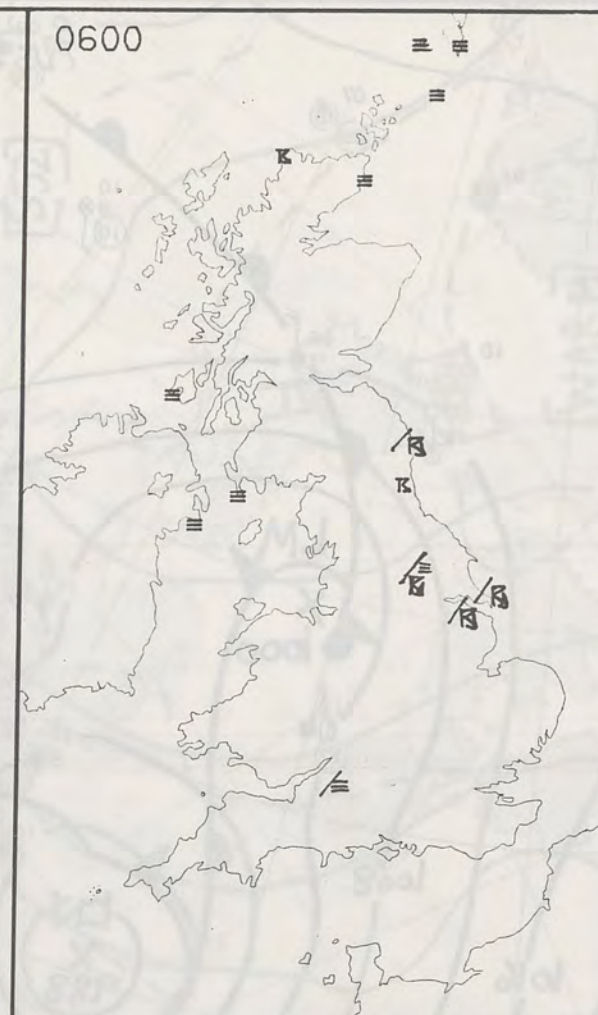

**SUMMARY
OF
BRITISH WEATHER**

Most places in the United Kingdom had a dry night, but in northeast England and northern Scotland there were some showers and thunderstorms, and towards morning more persistent rain reached the Channel Islands, southwest England and South Wales. Scotland had a sunny morning and in the north there was sunshine in the early afternoon, but most places had a cloudy afternoon and evening. There was rain in many places and a few thunderstorms. Northern Ireland, the Isle of Man, and Wales had a mostly cloudy day with rain at times throughout the day. In England, too, most places were cloudy, but there was some sunshine here and there, especially in eastern England in the morning. There was rain in most places too, with some heavy rain, and in the southeast and East Anglia, thunderstorms.

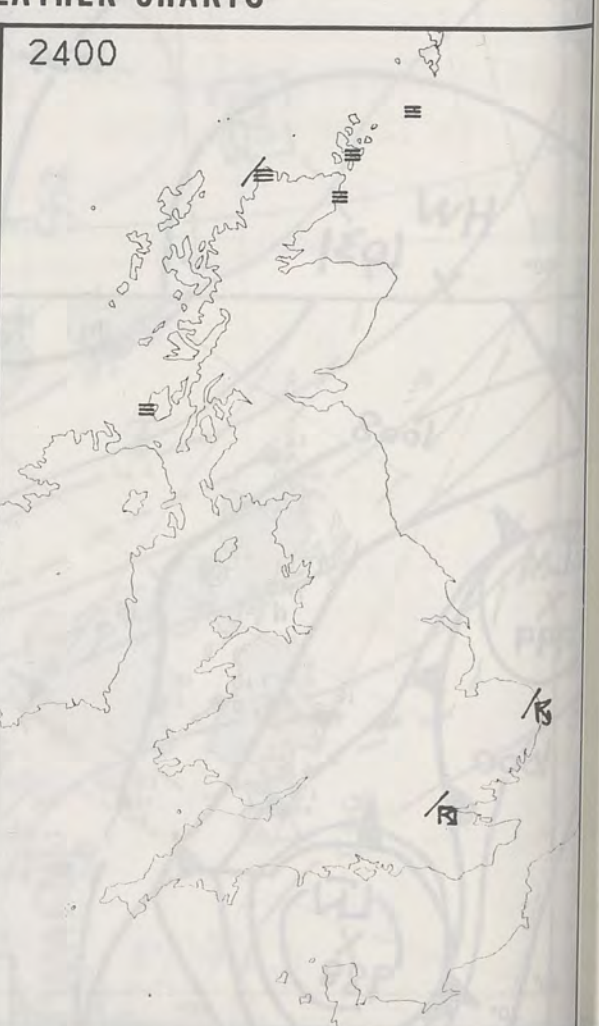

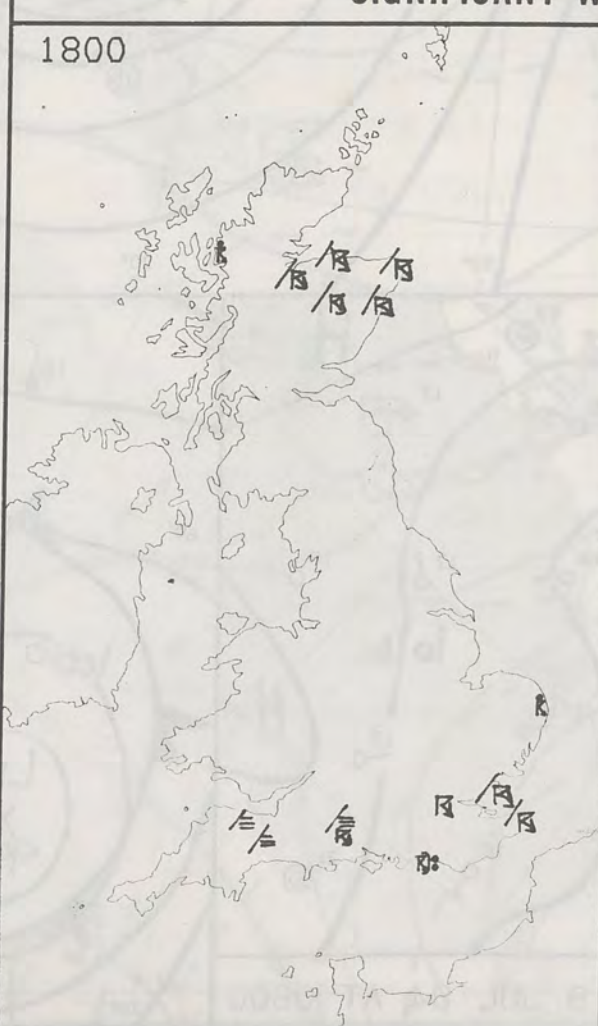

Northern Ireland, southwest England and Wales had near average temperatures. The rest of the UK had a warm day except in central Scotland where it was hot.

TUESDAY 10 JULY 1984

SUMMARY OF BRITISH WEATHER

Orkney and Shetland had a good deal of fog overnight, whilst elsewhere over Britain it remained mostly clear with a few showers in western areas and parts of central southern England.

After dawn the fog cleared from the Orkneys whilst in Shetland it hung on until the afternoon. Northern Ireland and southwest Scotland had fairly frequent showers during the day, elsewhere they were well scattered, with many places staying dry and mainly sunny.

Most places were warm and in northern England and Scotland it became very warm.

WEDNESDAY
11 JULY 1984

SUMMARY OF BRITISH WEATHER

Overnight there were showers in Northern Ireland, western Scotland and southwest Wales. Elsewhere it was a dry and clear night.

After dawn the showers became fairly widespread over Northern Ireland and western Scotland with a few isolated thunderstorms during the afternoon. One of these thunderstorms gave 18 mm of rain in an hour at Machrihanish (Kintyre). The rest of Scotland was rather cloudy with a little rain and during the evening the Hebrides had some coastal fog.

0600

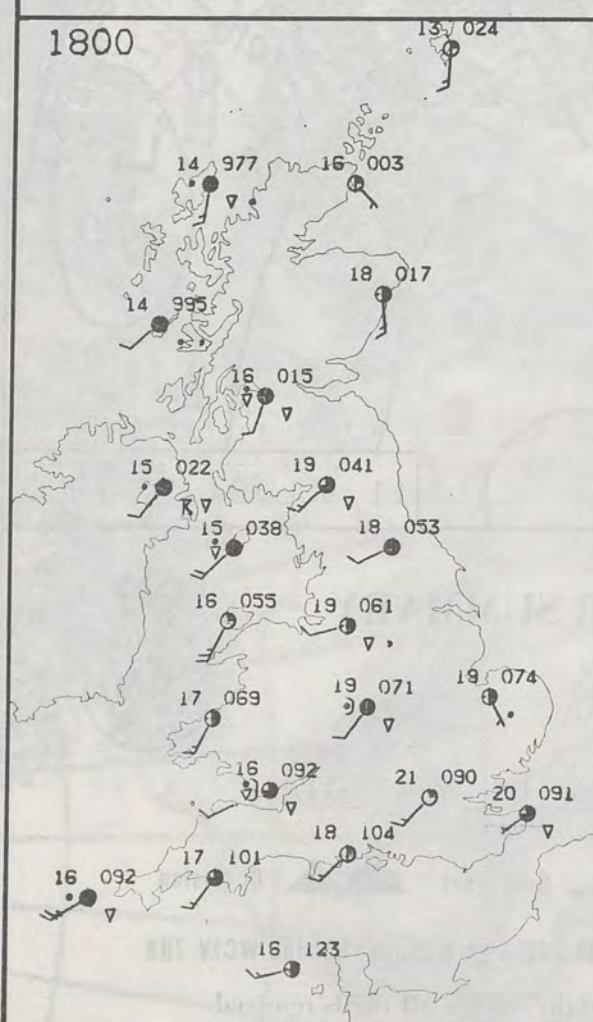

1200

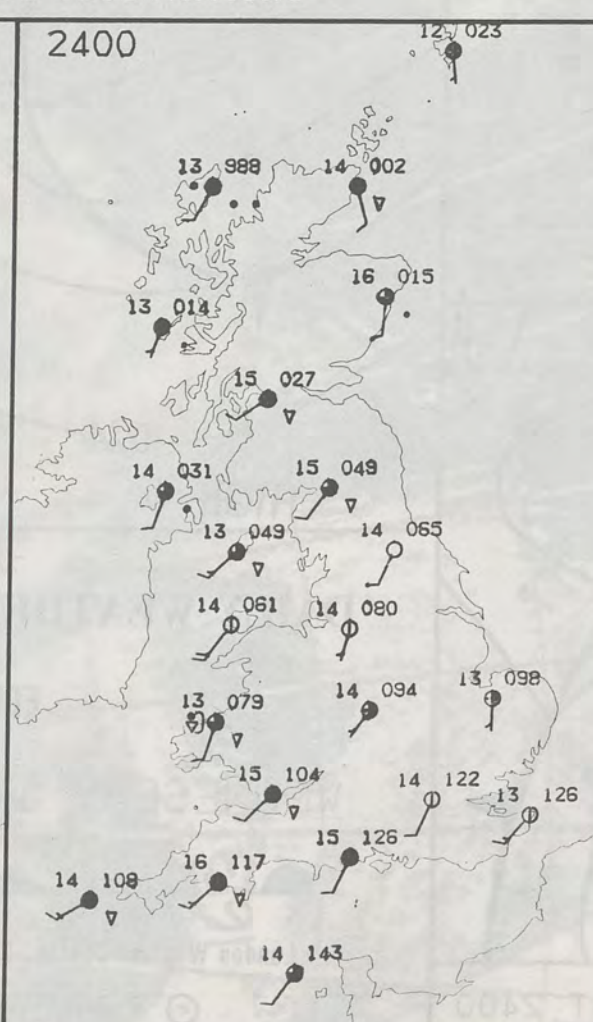

PLOTTED SURFACE OBSERVATIONS

1800

2400

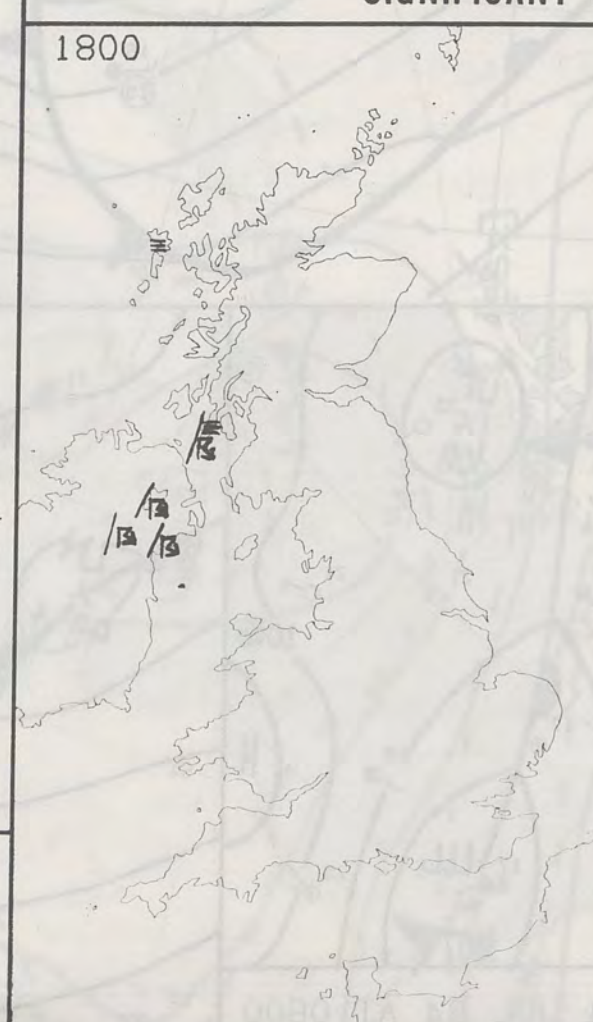

In southeast England it became cloudy with some occasional rain. This rain belt moved away northwards giving a few isolated thunderstorms during the evening in Lincolnshire. The cloud broke over the southeast during the afternoon giving a sunny late afternoon and evening.

The remainder of England and Wales had a mostly sunny day with only isolated showers.

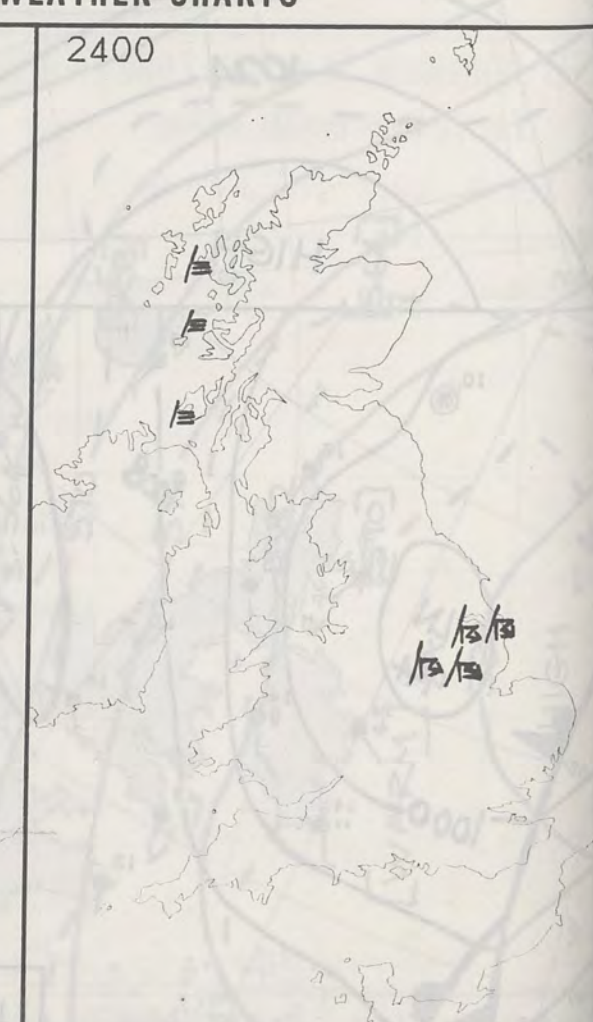

The temperatures of the UK were near or just below normal.

THURSDAY
12 JULY 1984SUMMARY
OF
BRITISH WEATHER

Central and eastern areas of the British Isles had a mainly dry night with clear spells but in western areas of Britain and Northern Ireland the weather remained mostly cloudy and in any places there were some showery outbreaks of rain. There were also a few showers in northern Scotland with misty weather in the Shetlands.

During the day although many northeastern areas were again warm, in many areas it was a slightly cooler day with a fresh south to southwesterly breeze in southern parts of England and Wales. Some eastern parts of Britain had a mainly dry morning with sunny spells but in many other areas despite some sunshine, the weather was cloudy a lot of the time with outbreaks of rain, some quite heavy. During the afternoon and evening showers spread to many eastern districts heavy in places with a few thunderstorms reported from northern England and eastern Scotland.

FRIDAY
13 JULY 1984

SUMMARY
OF
BRITISH WEATHER

Central and eastern areas of England were mostly cloudy overnight with showers, heavy in places. Eastern and northeast England and eastern Scotland were mostly dry but with some patchy fog around the Shetlands. Western parts of Britain and Northern Ireland had clear intervals and occasional showers, most of the showers in western Scotland, South Wales and southwest England. During the day many areas had sunny intervals and occasional showers. Parts of Scotland, however, were mostly cloudy with quite a lot of showers. During the afternoon Wales and southwest England became cloudy and the evening was wet. The cloud and rain moved eastwards into much of central southern England before midnight.

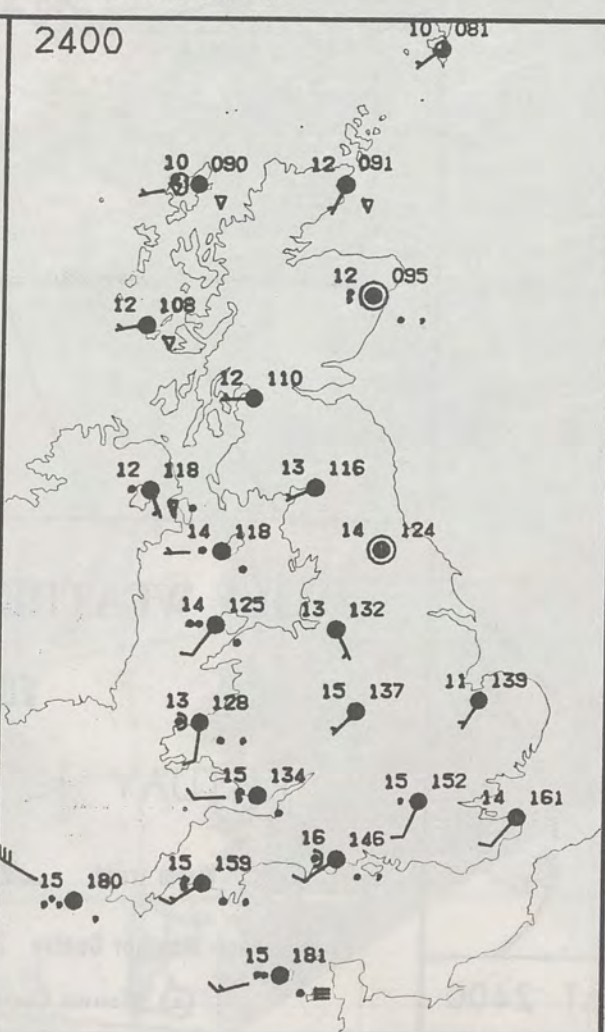

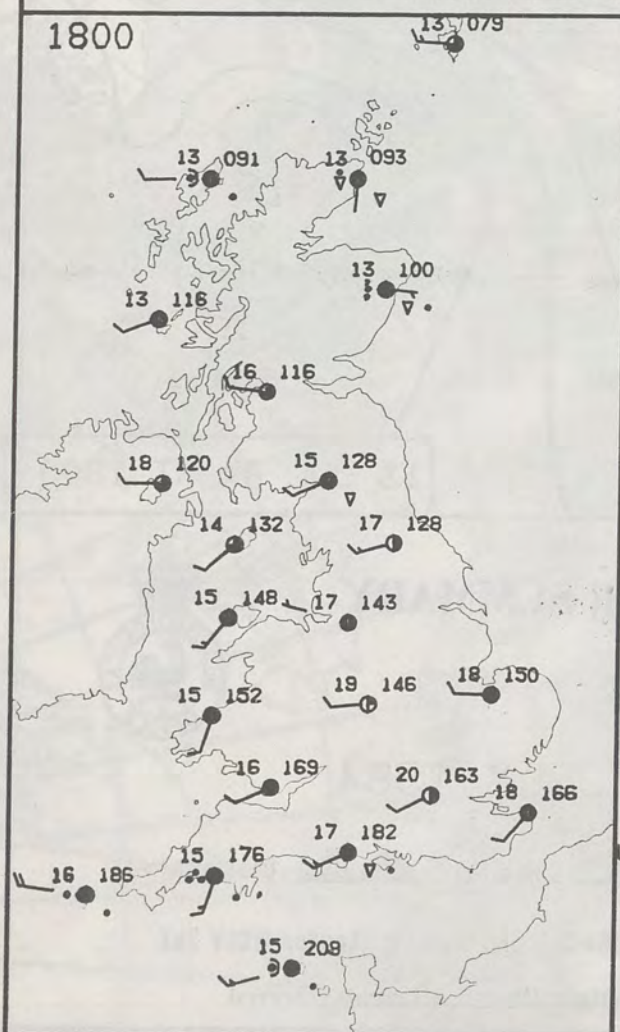

Temperatures in most places were about average for mid-July but much of eastern England and eastern Scotland had a cooler day.

SUMMARY OF BRITISH WEATHER

In Scotland it was a rather cloudy night with some occasional showers. Over the rest of Britain and Northern Ireland the night was cloudy with rain and drizzle.

Scotland continued to be showery during the day. Some of the showers were heavy but there were also sunny intervals between the showers.

Over England, Wales and Northern Ireland the morning was cloudy with outbreaks of rain and drizzle. By the afternoon it had brightened up giving a little sunshine at times. There were also a number of showers some of which were heavy and in the Midlands and East Anglia during the evening a few thunderstorms were reported.

The temperatures were around or just below normal.

SUNDAY
15 JULY 1984

SUMMARY
OF
BRITISH WEATHER

Showers continued overnight in Scotland, Northern Ireland and northern and eastern England with isolated thunderstorms reported from East Anglia. Wales and the rest of England had a dry night with clear periods.

Although remaining showery over Scotland during the day there were some brighter intervals as well. There were a few showers in Northern Ireland and Wales but it was a mostly dry day with a good deal of sunshine.

England also had some showers, most of them in the east where some were heavy especially during the early afternoon. There were reports of thunderstorms in Kent and southwest London. There was also quite a lot of sunshine and much of the southwest, central southern England and the Channel Islands remained dry and sunny.

Temperatures over much of Britain were close to or a little below normal.

MONDAY
16 JULY 1984

SUMMARY OF BRITISH WEATHER

The night was dry with variable cloud; in places where cloud cleared it was a cool night. There were a few showers in coastal areas.

Most of the British Isles had a dry day with sunny spells, the best of the sunshine being towards the coasts of central southern, southwest and northwest England. In many places, though, a good deal of cloud developed and there were one or two showers in the east, whilst a little rain affected some northwestern regions from time to time.

Temperatures were not far from normal.

TUESDAY
17 JULY 1984SUMMARY
OF
BRITISH WEATHER

Rather cloudy weather over Scotland, Northern Ireland, northern England, West Wales and Cornwall in the early hours spread slowly southeast during the day. It was late in the day before the cloud reached south-east England so that many places here were quite sunny, with the sunniest spots along the south coast. Within the cloudy area, there was some drizzle in the northwest, chiefly in western Scotland and Northern Ireland with fog on the hills and near some coasts. One or two other places had a light shower. Brighter intervals developed, mainly where high ground afforded some shelter from the northwest.

It was generally quite warm, especially in the brighter areas.

WEDNESDAY
18 JULY 1984SUMMARY
OF
BRITISH WEATHER

Northern and western Scotland, including the Hebrides, remained cool and overcast with hill and coastal fog and a little drizzle at times.

Remaining regions of Scotland were dry with long periods of sunshine, and many places became very hot.

Northern Ireland was cloudy early and late, with drizzle in the early morning, but much of the day was dry and very warm with some sunshine.

Eastern counties of England were generally cloudy with occasional showers and near normal temperatures.

Wales, and western and central areas of England had sunny intervals and remained dry, becoming rather warm. The Channel Islands and much of Cornwall had long periods of unbroken sunshine.

THURSDAY
19 JULY 1984SUMMARY
OF
BRITISH WEATHER

Eastern counties of England were cloudy for much of the day with sunny intervals in some places during the afternoon. There was drizzle at times early and late, and a few showers during the afternoon. It was rather cool.

Wales, and most central and western areas of England, were warm and dry with long sunny periods. There was patchy sea fog on the west coast of Wales.

Scotland and Northern Ireland started rather cloudy with some drizzle but the cloud broke in central and southern Scotland and Northern Ireland to give some afternoon sunshine and it became warm. Northern Scotland and Orkney and Shetland remained cloudy with drizzle and sea fog and temperatures were near normal.

FRIDAY
20 JULY 1984

**SUMMARY
OF
BRITISH WEATHER**

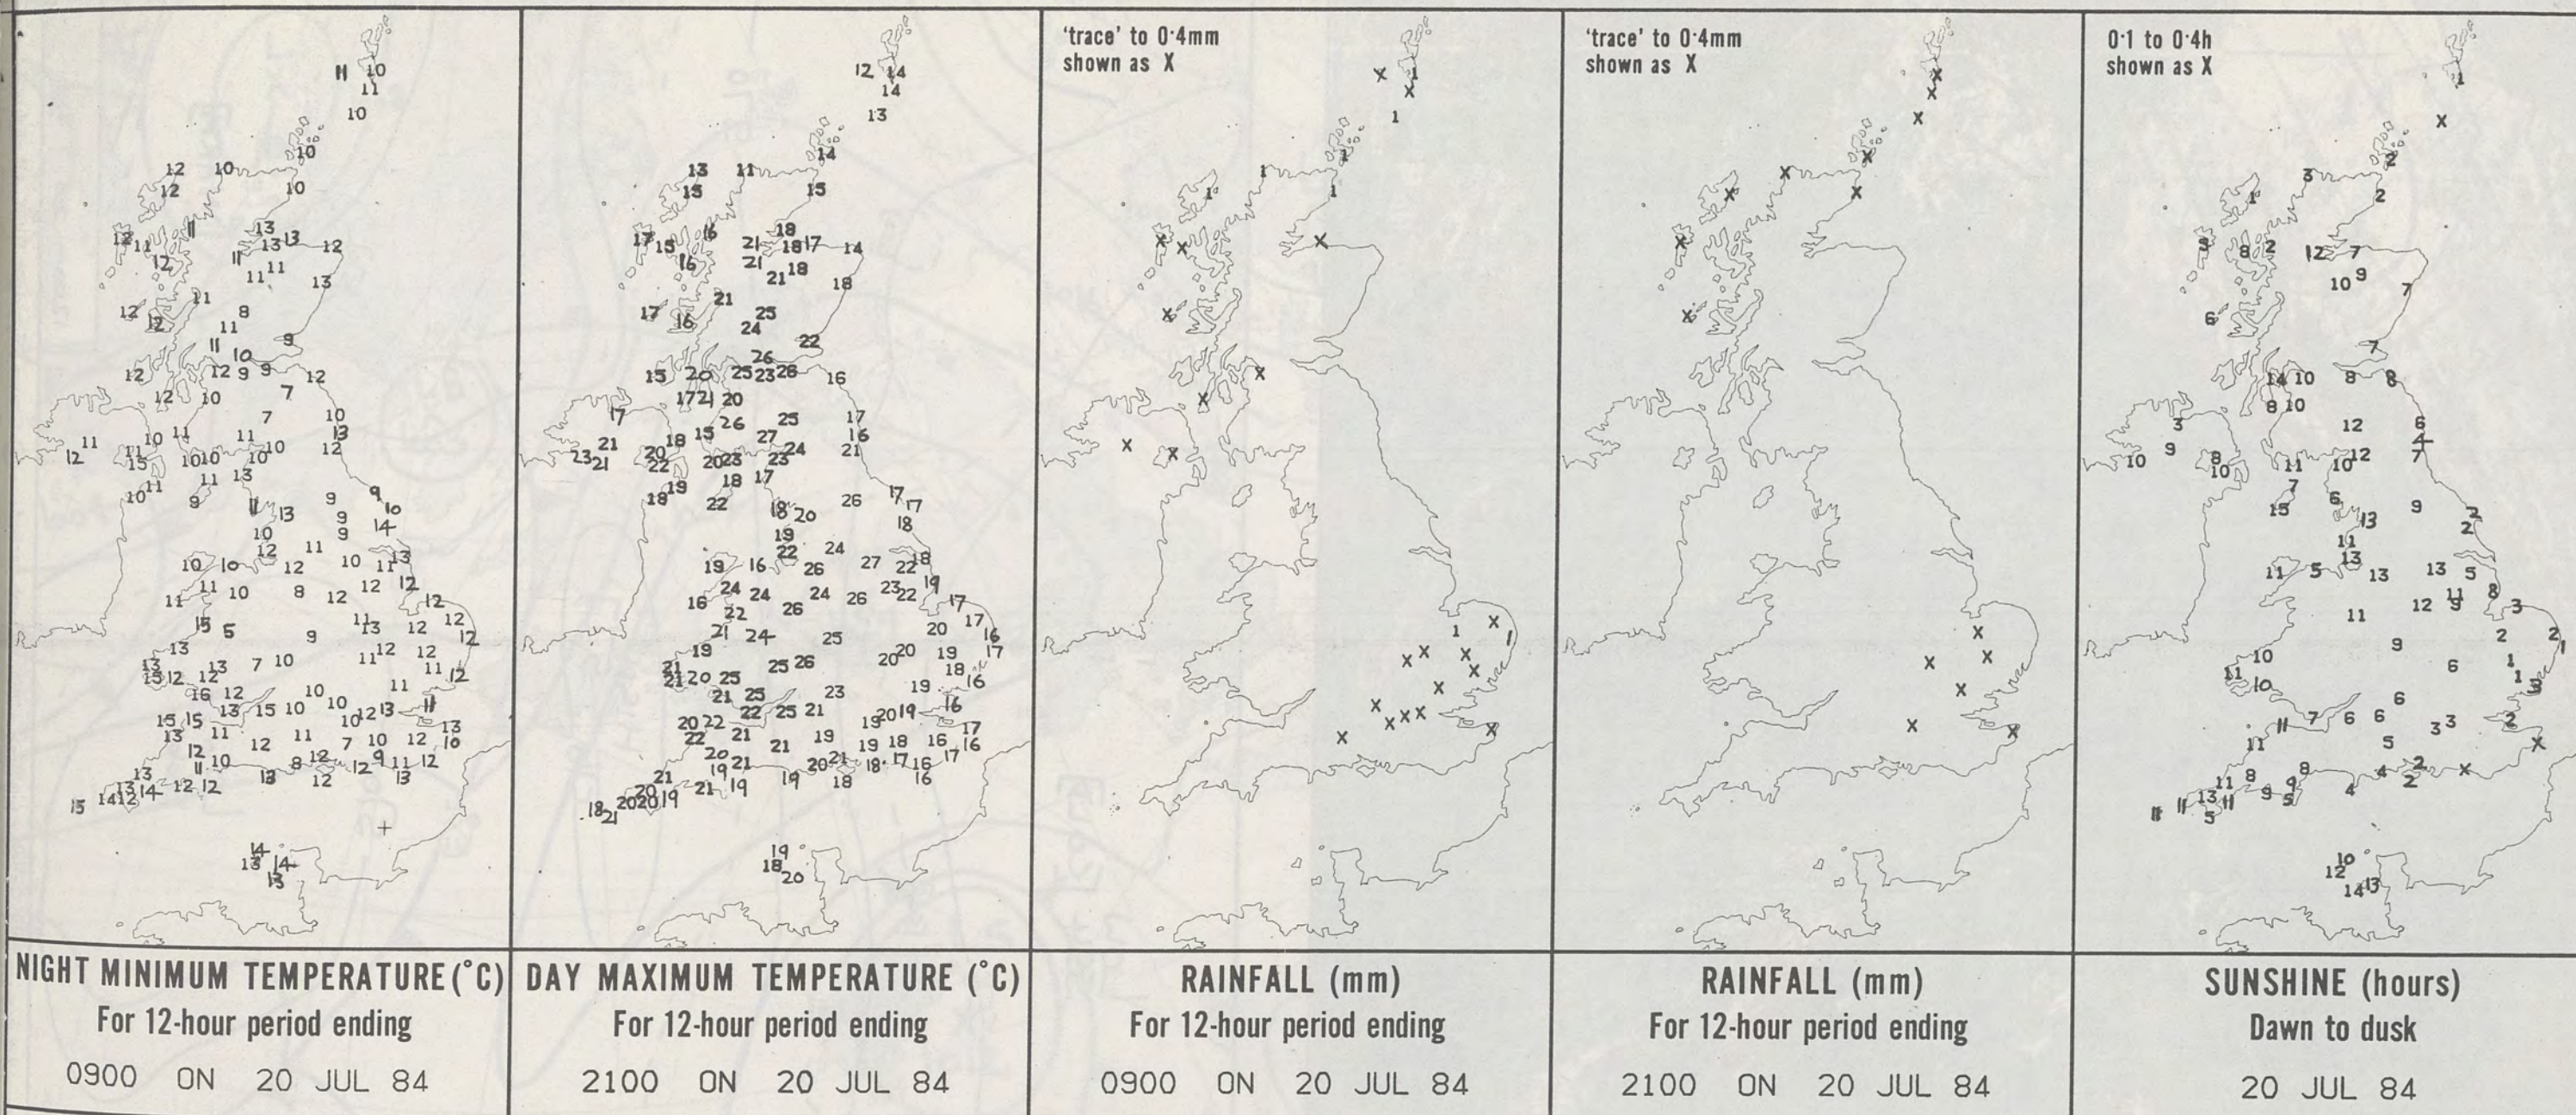

In the extreme north and north-west of Scotland it was mainly cloudy and rather cool with occasional light rain or drizzle. In East Anglia and southeast England there were patches of drizzle in the morning.

Elsewhere it remained dry and in the Midlands, northern England, southern and central Scotland and much of Wales it became very warm with a good deal of sunshine. In some coastal regions it was cooler, especially near the northeast coasts of England where cloud was more persistent and around Irish Sea coasts where there were mist patches.

In East Anglia, southeast and central southern England it was mostly rather cool and cloudy for much of the day but the cloud did break in most places during the late afternoon and evening.

SATURDAY 21 JULY 1984

SUMMARY OF BRITISH WEATHER

In northern Scotland and in the Northern Isles it was rather cool and cloudy with scattered light showers.

In Northern Ireland there was drizzle in places at first but most of the day was dry with sunny intervals and near normal temperatures.

In southern Scotland it was mainly sunny and warm.

Over much of England and Wales it was misty at first with patches of low cloud but in most places it became quite sunny from late morning onwards. Exceptions were in parts of east and northeast England where cloud was rather persistent with patches of drizzle, especially in Norfolk, Lincolnshire and East Yorkshire. During the evening there were isolated thundery showers in southern England.

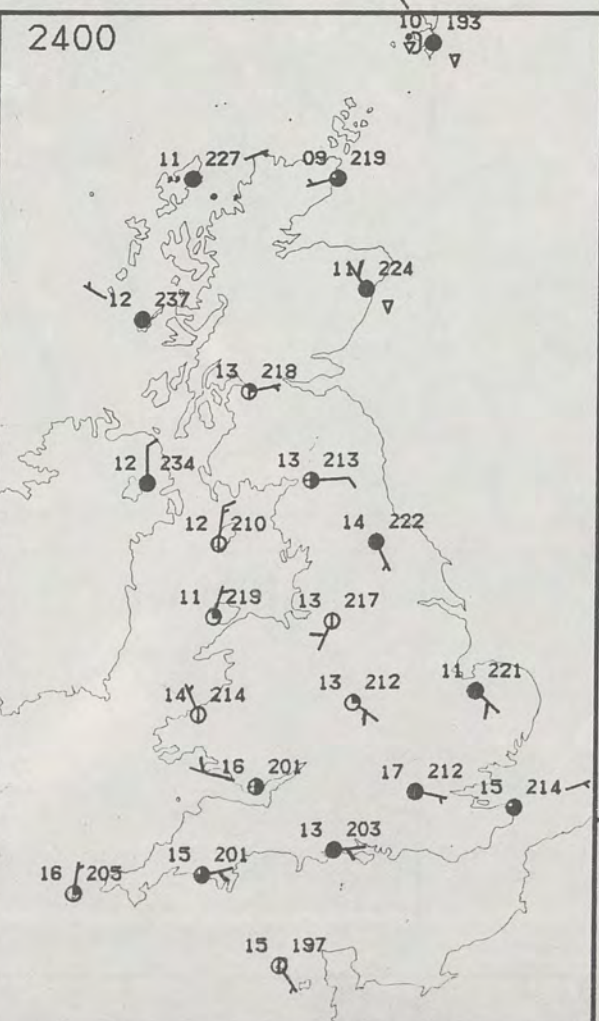

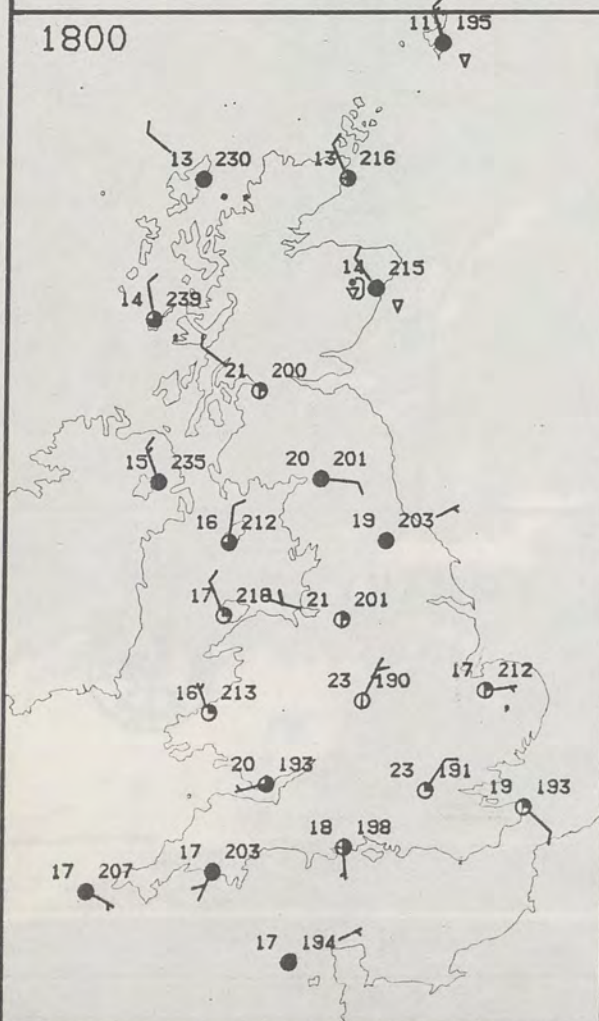

Temperatures ranged from very warm in central and southern counties of England and Wales to near normal in northern England and rather cool on the eastern coasts.

SUMMARY
OF
BRITISH WEATHER

Much of Britain had a dry night, but there was a little light rain and drizzle in northern and western Scotland.

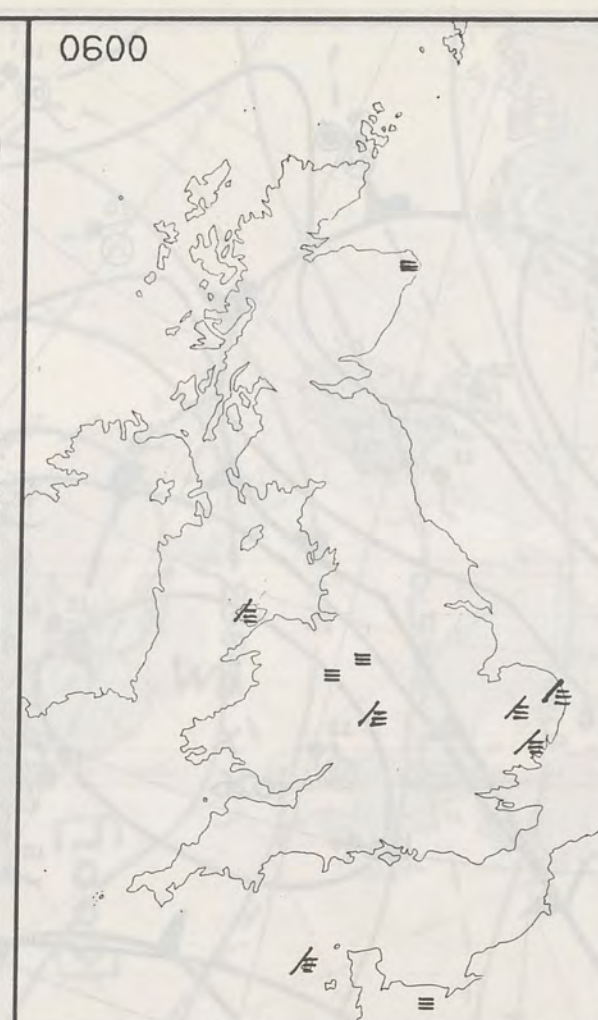

During the day nearly everywhere stayed dry with a fair amount of sunshine. In northern Scotland there were some showers and in the evening in southeast England there were a few thunderstorms with heavy rain - at London Weather Centre 8.2 mm of rain fell in less than half an hour.

Over Scotland and Northern Ireland temperatures were close to or a little above normal in most places. Much of England and Wales had a warm or very warm day, but some coasts were a little colder than normal. In northern England and East Anglia however temperatures were not far from normal.

OF
BRITISH WEATHER

Most places had a dry night, but in northern Scotland and the Northern and Western Isles there was a little rain and drizzle, and in East Anglia there were some thunderstorms early in the night.

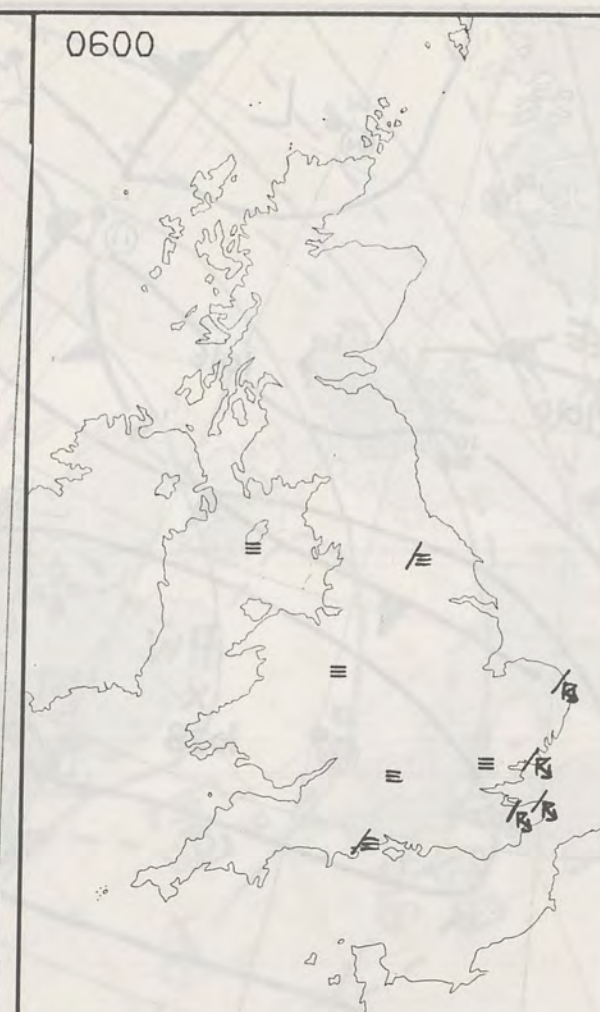

In northern Scotland and the Northern and Western Isles there were some daytime showers and temperatures were close to normal. Over the rest of Britain most places stayed dry with a fair amount of sunshine, but in the late afternoon and early evening there were a few thunderstorms in southern England, with hail and heavy rain in some places. At Sandhurst 41 mm of rain fell in 40 minutes during the late afternoon.

It was a very warm day in many places, even hot in parts of southern England. However, East Anglia and Lincolnshire had temperatures nearer normal.

TUESDAY
24 JULY 1984SUMMARY
OF
BRITISH WEATHER

Thunderstorms affected Cornwall, south Devon, the Channel Islands and parts of the Dorset coast in the early hours, and were accompanied by marked pressure fluctuations and squally winds. Most of the rest of the British Isles had a dry night and skies were clear in many areas. However, northern and eastern Scotland were cloudy and there was a little rain in Shetland. Patchy low cloud and fog also affected a few other areas, especially around dawn.

The day was sunny and warm or very warm in most parts of the UK. However, East Anglia, Kent and the southwest of England had near normal temperatures.

Northern Scotland, the northern Hebrides and Shetland stayed mostly cloudy with a little rain in places. Isolated heavy showers affected southwest Scotland and the Lake District in the evening. Meanwhile, the thunderstorms in the southwest soon died out, but a lot of cloud and some occasional light rain moved slowly northeast across southwest and central southern England and South Wales during the morning, and over southeast England and the south Midlands during the afternoon. The evening was rather cloudy generally in southern Britain with a little rain in places, with more thunderstorms developing over Sussex towards midnight.

THURSDAY
26 JULY 1984SUMMARY
OF
BRITISH WEATHER

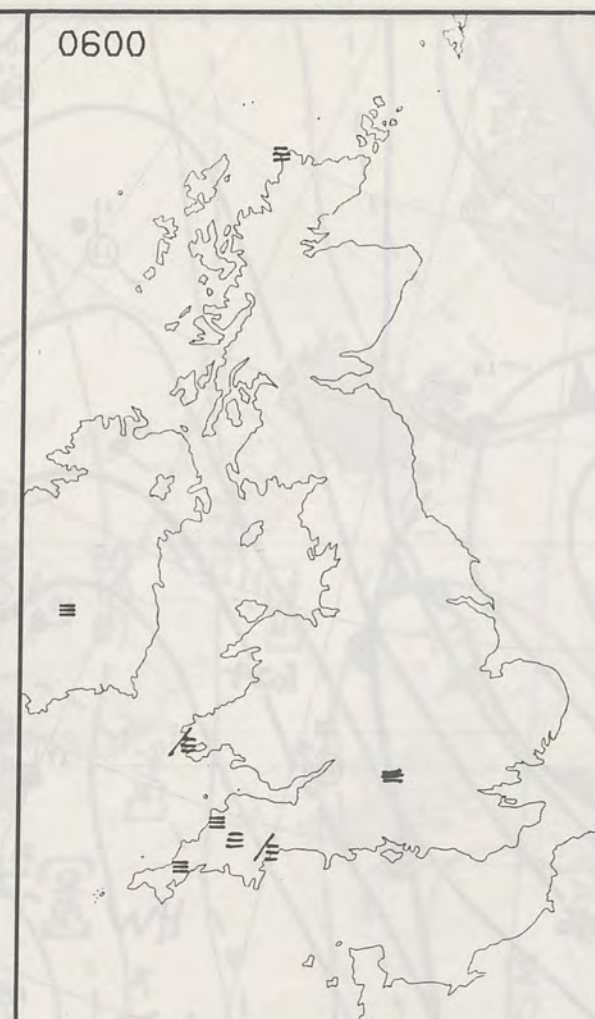

Most parts of the British Isles had a dry night and over much of central Scotland, Northern Ireland, Wales, the Midlands and southwest England the weather was mainly clear. Northern and eastern parts of Britain, however, had a cloudier night and in the north of Scotland and near some eastern coasts of England there was a little light rain or drizzle in places.

During the day northern Scotland remained mostly cloudy and rather cool with some light rain or drizzle here and there. Sheltered and more southern parts of the Central Highlands were dry and quite warm with some sunshine. Eastern counties of England were also rather cloudy but the weather was mostly dry with sunny spells in places and near normal temperatures. Remaining areas, that is central and southern Scotland, Northern Ireland, Wales, western and most southern parts of England were dry and warm with a good deal of sunshine and in parts of South Wales and the South Midlands the weather was very warm or hot and mostly sunny.

FRIDAY
27 JULY 1984SUMMARY
OF
BRITISH WEATHER

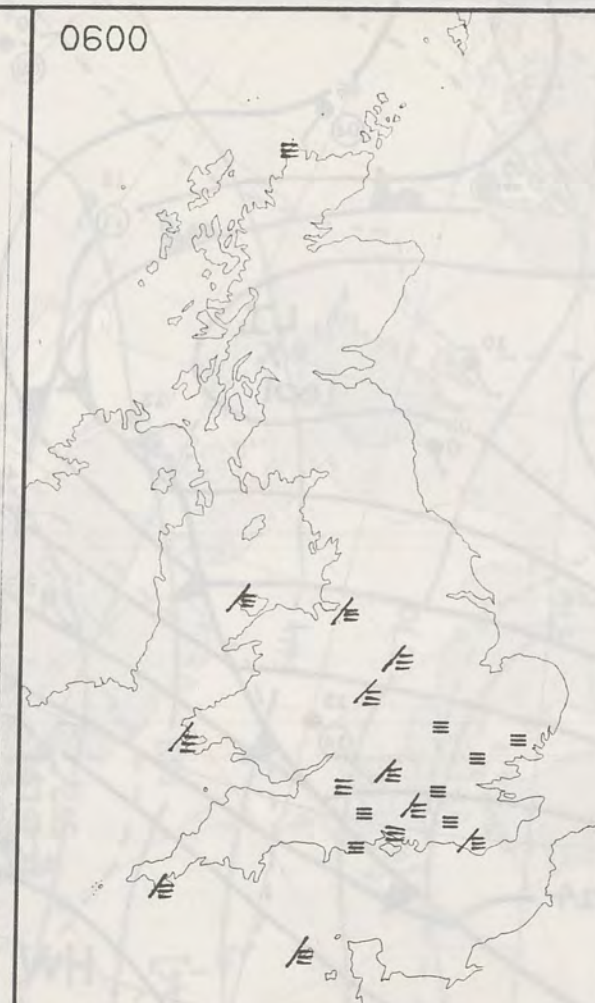

England and Wales had a dry night with long clear spells in many places, but in some areas especially in central and southern counties, the weather became quite misty with thick fog in places. Scotland and Northern Ireland were also mainly dry but many regions were cloudy. There was a little rain in the Northern Isles and by morning persistent and heavier rain spread to parts of northwest Scotland.

Southern counties of England and Wales had a dry day with a good deal of sunshine. North Wales was also mainly dry but cloudy. Over northern England, the Midlands and East Anglia the weather became cloudy with some rain in many places. Southern and eastern Scotland had a cloudy day with rain but in Northern Ireland after some rain in the morning, the afternoon was drier but still cloudy. Northern and western Scotland had a wet and windy day with heavy rain in many places especially over the hills and in northwest Scotland. Southern England had a mainly hot day; the Midlands had temperatures ranging from near normal in the north to very warm in the south. Northern Ireland was warm; northwest Wales, northern England and all of Scotland were in the near or rather below normal category.

SATURDAY
28 JULY 1984SUMMARY
OF
BRITISH WEATHER

Southern England, Wales and the Midlands had a dry night, followed by a mainly sunny day.

East Anglia was more cloudy for much of the morning and afternoon, with a few spots of rain, but the day ended on a sunny note.

Northern England, Scotland, Northern Ireland and the Isle of Man had a cloudy night with rain at times.

During the day eastern Scotland had quite a lot of sunshine and the afternoon was very warm. The Northern Isles and north Scotland also had some sunshine during the afternoon but were rather cool. Remaining areas of Scotland and Northern Ireland stayed cloudy with rain at times and near normal temperatures.

England and Wales had a hot day, except for northern England, Cornwall and extreme West Wales where temperatures were near normal.

SUNDAY
29 JULY 1984

SUMMARY OF BRITISH WEATHER

The day started rather cloudy in extreme northern counties of England but they gradually cleared during the morning to join the rest of England and Wales in a mainly sunny day. Temperatures rose steadily and it again became very warm or hot.

Scotland was generally cloudy at first with some rain over the Borders and Western Isles. During the morning many places brightened up but some showers developed over the northeast. The Western Isles stayed mostly cloudy with further rain at times until evening. Temperatures were mostly near or rather above normal.

Northern Ireland had a dry day with quite a lot of sunshine which gave them a warm afternoon and evening.

MONDAY
30 JULY 1984

SUMMARY
OF
BRITISH WEATHER

England and Wales were dry during the morning but temperatures rose quickly and it was very humid. Patchy fog affected some southern and western coasts. Outbreaks of rain reached the southwest around midday, then during the afternoon and evening thunderstorms affected East Anglia, central southern and southeast England and Jersey. Outbreaks of rain, some heavy, spread to many other parts of the UK giving over 20 mm in places.

During the day there were sunny periods in many areas, much of England becoming very warm or even hot although southwest England, Wales and northern England stayed warm.

Northern Ireland and western Scotland were cloudy with rain at times, some of the rain in the Hebrides was very heavy and many coastal areas and hills were foggy. Eastern Scotland was dry and very warm with sunny periods. Northern Ireland and the remainder of Scotland had near normal temperatures.

TUESDAY
31 JULY 1984

**SUMMARY
OF
BRITISH WEATHER**

The southern half of England and Wales was affected by rain early in the day. Thereafter it was a day of broken cloud and occasional showers. There were sunny periods, prolonged in some western and southern counties but there was an evening thunderstorm at Southampton.

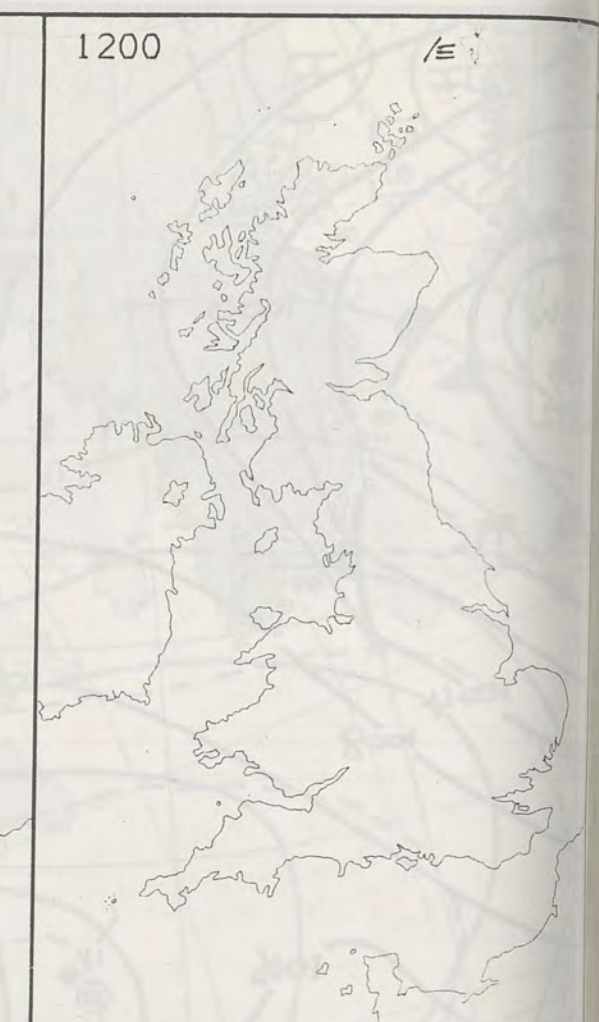

North Wales, northern England and Scotland away from the west coast had prolonged rain, heavy at times, especially near high ground. The rain cleared from the south during the afternoon and evening, to give some late sunshine to many places.

Northern Ireland and the west coast of Scotland were rather cloudy during the morning but with sunny intervals and scattered showers in the afternoon.

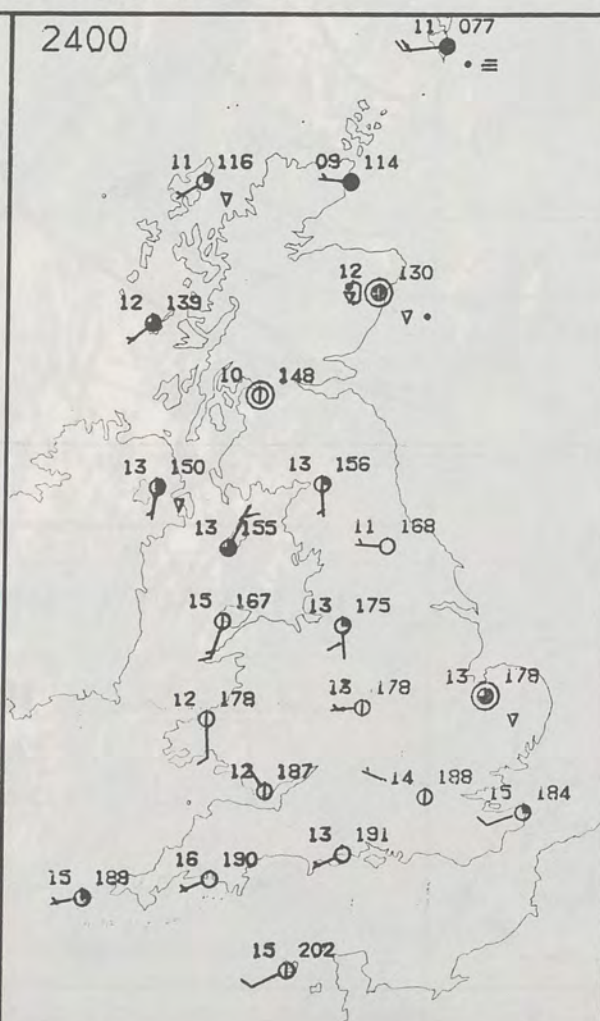

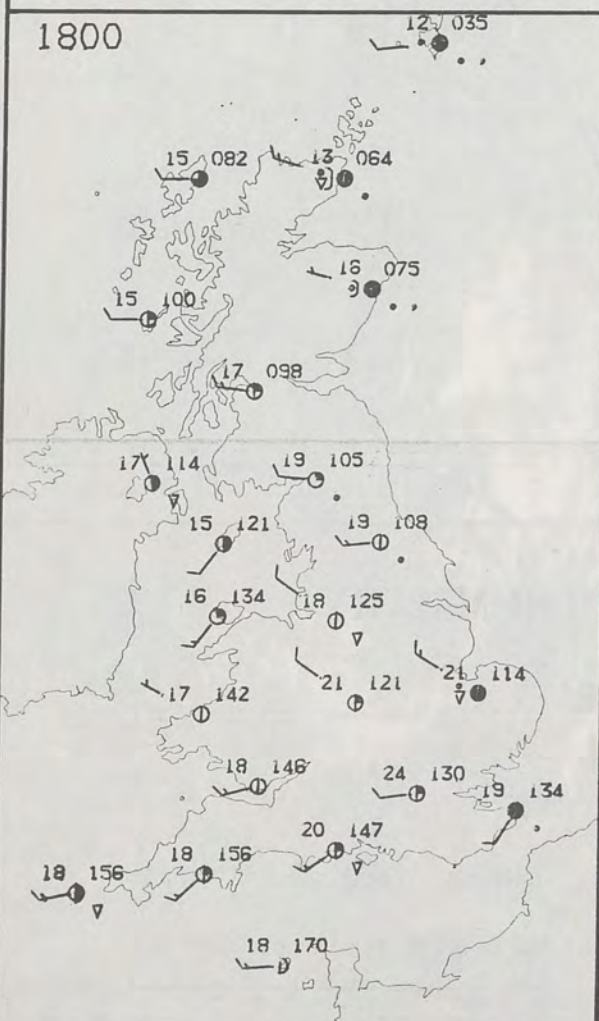

In most areas temperatures were close to the seasonal average, although warm in parts of East Anglia, southeast and eastern England.
