DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Wednesday, 05 May 2021 at 03:10 local time

**Air Quality Forecast for the UK**

Issued by the Met Office

Today: While winds will be lighter than yesterday clean Atlantic air covers the UK so air pollution levels are expected to be predominantly Low.

Tomorrow: Light winds at first may allow isolated pockets of Moderate air pollution to develop near busy roads and urban centres however, for most of the UK pollution levels will be Low.

Outlook: The weather will turn very unsettled through this period with strong winds and heavy rain at times, this will result in predominantly Low levels of air pollution.
