

FPUK86 EGRR 020630  
Forecast for the UK.  
Issued by the Met Office  
at 0700 on Tuesday 2 May 2006

\*\* Valid for Broadcast at 0858 \*\*

Here is the forecast for the United Kingdom until dawn tomorrow :  
England, Wales and eastern Scotland, generally dry and bright, hazy  
sunny spells but patchy light rain affecting western and later  
central parts. Northern Ireland and the rest of Scotland, wet with  
rain, heavy at times. Generally windy, southerly gales in the  
northwest and near Irish Sea coasts. Temperatures, near normal.

Overnight, rain will extend eastwards, some heavy in the north, but  
light and patchy further south, some southeastern parts staying dry.  
A few showers following, heavy and thundery in the northwest.  
Staying quite windy.

Outlook for Wednesday and Thursday:  
Mainly dry, warm sunny spells but heavy, thundery showers in the  
north and west at times.
