

METEOROLOGICAL OFFICE.

GEOPHYSICAL MEMOIRS
VOLUME I.

1911-1913.

COMPRISING MEMOIRS NUMBERED 1 TO 10.

Published by the Authority of the Meteorological Committee.

LONDON:
PRINTED UNDER THE AUTHORITY OF HIS MAJESTY'S STATIONERY OFFICE,
By NEILL & CO., LIMITED, BELLEVUE, EDINBURGH.

And to be purchased from
THE METEOROLOGICAL OFFICE, EXHIBITION ROAD, LONDON, S.W.

Price (paper covers) Seven Shillings.

The individual memoirs are also on sale separately.

1914.

1 Volume

Blue cloth.

Lettering on back edge :-

" Meteorological Office
Geophysical Memoirs
VOL. I. 1911 - 1913 "

Return to :-

Meteorological Officer,
Meteorological Office,
R.A.F. (Cadet) College,
Cranwell, Sleaford,
Lincolnshire.

G

TABLE OF CONTENTS.

PART I., FOR 1911.

	PAGE
No. 1. The Effect of the Labrador Current upon the Surface Temperature of the North Atlantic; and of the latter upon Air Temperature and Pressure over the British Isles. By M. W. CAMPBELL HEPWORTH, C.B., R.D., Commander R.N.R., Marine Superintendent of the Meteorological Office. (Concluded in No. 10.)	1
No. 2. The Free Atmosphere in the Region of the British Isles. Second Report. Further contributions to the investigation of the upper air; comprising the vertical temperature distribution in the atmosphere over England, with some remarks on the general and local circulation, and total and partial correlation coefficients between sundry variables of the upper air. By W. H. DINES, F.R.S., Meteorologist in Charge of investigations of the upper air, for the Meteorological Office; with a Preface by W. N. SHAW, Sc.D., F.R.S., Director of the Meteorological Office	11
No. 3. Graphical Construction for the Epicentre of an Earthquake. By G. W. WALKER, M.A., A.R.C.Sc., Superintendent of the Observatory, Eskdalemuir	51

PART II., FOR 1912.

No. 4. On the Radiation Records obtained in 1911 at South Kensington, together with a comparison between them and the corresponding absolute observations of Radiation made at Kew Observatory. By R. CORLESS, M.A., Secretary to the Director of the Meteorological Office	55
No. 5. The International Kite and Balloon Ascents. A dissertation which obtained the first prize awarded in 1912, by the German Meteorological Society in the competition announced at the Society's 25th Annual Congress at Hamburg in 1908. By ERNEST GOLD, M.A., Superintendent of the Statistical and Library Division of the Meteorological Office	62A
No. 6. The Free Atmosphere in the Region of the British Isles. Third Report. The Calibration of the Balloon Meteorograph and the Reading of the Traces. By W. H. DINES, F.R.S., Meteorologist in charge of investigations of the upper air, for the Meteorological Office	145
Wt. 19640/91 (387)—625—10/14.—N. & Co. Ltd. Gp. XV.	

	PAGE
No. 7. A Comparison of the Electrical Conditions of the Atmosphere at Kew and Eskdalemuir, with notes on observations of Atmospheric Electricity made in other countries. By GORDON DOBSON, B.A., Graduate Assistant at the Meteorological Office	153
No. 8. Lag in Marine Barometers on Land and Sea. By CHARLES CHREE, Sc.D., LL.D., F.R.S., Superintendent of Kew Observatory	171

PART III., FOR 1913.

No. 9. On the Relation between the Velocity of the Gradient Wind and that of the Observed Wind. By J. FAIRGRIEVE, M.A.; with a Preface by W. N. SHAW, Sc.D., F.R.S., Director of the Meteorological Office	187
No. 10. The Effect of the Labrador Current upon the Surface Temperature of the North Atlantic; and of the latter upon Air Temperature and Pressure over the British Isles (Part II., concluded from No. 1). By M. W. CAMPBELL HEPWORTH, C.B., R.D., Commander R.N.R., Marine Superintendent of the Meteorological Office	209

GEOPHYSICAL MEMOIRS

VOLUME I.

INDEX.

- Advection, 109.
 Anticyclones in Relation to Equatorial Current (5), 125.
 Archibald, E. Douglas, 137.
 Assmann, R., 109.
 Atlantic Ocean, Distribution of Temperature, Ice, etc. Memoirs No. 1 and No. 10.
 Atmosphere, Advection, 109.
 — Angular Momentum, 28.
 — Circulation round the North Pole, 16, 19.
 — Convection in, 70, 127.
 — Humidity, 129.
 — Ions, Mobility of, 164.
 — Ionisation, 162, 169.
 Atmospheric Variables, H , T , etc.
 — Correlation Coefficients of, 33, 37, 40, 45.
 — Regression Coefficients of, 38.
 — Seasonal Variations of, 34.
 — Units for Measuring, 38, 41.
 Balloon Ascents. See Memoirs No. 2, 5, 6.
 Balloon Meteorograph, calibration of. Memoir No. 6.
 Balloons, Drift of, 47, 134, 135.
 Barometer, Kew Marine Pattern, 173.
 Barometric Gradient and Wind-force, History, 189.
 — Gradients over Short Distances, 194.
 Berson, A., 69, 70, 74, 131, 137, 143.
 Bezold, W. Von, 131.
 Bjerknes, V., 68.
 Brounow, P., 79.
 Buchan, Alexander, on barometers at Land Stations, 175.
 Callendar, H. L., 57.
 Callendar Radiation Recorder, 57.
 Cave, C. J. P., 21, 23, 138.
 Chree, C., 158, 159, 168. Memoir No. 8, 171–185.
 Circulation of Air round North Pole, 16, 19.
 Cirrus Cloud, False, 18.
 — Formation of, 18, 133.
 Clayton, H. H., 106.
 Cloud Changes, Photography of, 18.
 — Formation, 17.
 — Mammato-cumulus, 19.
 — Upper, Direction of Motion of, 16, 20.
 Condensation of Water Vapour—Effect upon Vertical Temperature Gradient, 101.
 Conductivity, Electrical, of the Air, 162, 169.
 Convection in the Atmosphere, 70, 127.
 Corless, R. See Memoir No. 4.
 Currents, Vertical, 28.
 Cyclones and Anticyclones, Centrifugal Force in, 133.
 — — Pressure and Temperature in, 28.
 — Ascending Current in, 49.
 — Explanation of, 15.
 — Influence of Sea Temperature on the Paths of, 4.
 Dines, W. H., 66, 70, 108, 133. See Memoirs No. 2 and No. 6.
 Diurnal Temperature Variation at Different Altitudes, 26.
 Dobson, Gordon. See Memoir No. 3.
 Earthquake epicentre, 51.
 Ebert, H., 163.
 Egnell's Law, 15, 138.
 Electric Potential Gradient, 155.
 — — — Annual Variation of, 160.
 — — — Diurnal Variation of, 159.
 Equatorial Current in Upper Atmosphere, 124.
 Fairgrieve, J. See Memoir No. 9.
 Fenyi, J., absorption of solar radiation, 126.
 Field, J. H., Kite Ascents in India and Arabian Sea, 69.
 Galitzin, B., Seismograph, 53.
 Gold, E., 28, 40, 69, 70, 126, 133, 135, 137. See Memoir No. 5.
 Greenland Current, 5.
 Grenander, S., 130.
 Guilbert, G., 197.
 Gulf Stream, 4.
 Hann, J. von, 69, 72, 77, 101, 130, 133.
 Hanzlik, S., 79, 131.
 Helmholtz, H., Atmospheric waves, 124.
 Hepworth, M. W. Campbell. See Memoirs No. 1 and No. 10.
 Hergesell, H., 66, 67, 147.
 Herrmann, E., 79.
 Hildebrandsson, H. H., 15, 16, 19, 133.
 Humidity in the Upper Air, 129.
 Humphreys, W. J., solar radiation, 126.
 Ice in the Atlantic, 4, 5, 212.
 Ions, Mobility of, 164.
 Kleinschmidt, Ernst, 67.
 Klotz, Otto, 53.
 Labrador Current, 3, 4, 5.
 Lempfert, R. G. K., 135.

- Mobility of Ions, 164.
Mountains, Temperature on, 70.
- Normal Wind, Causes of variation of, 205.
—— corresponding to Gradient Wind, 202.
- Oberbeck, A., Theory of general circulation, 124.
- Pettersson, Otto, 211.
Photography of cloud changes, 18.
Pressure at Atlantic Coast Stations, 6, 213.
—— changes at surface and 9-kilometre Level, 14.
—— gradients at the surface and 9-kilometre Level, 15.
- Radiation, Variation of, in Dull Weather, 58.
—— Effect upon Instruments in Kites and Balloons, 26, 118.
—— of Heat from Upper Air, 108.
—— Observations at Kew, 60.
—— total received in a Day, 59.
- Ryder, Carl, 212.
- Schmauss, A., 70.
Schuster, Arthur, Manchester Observations, 23.
Sea Temperature in the Atlantic, 6, 213.
—— Average Distribution of, 5.
Shaw, W. N., 13, 34, 70, 134, 135, 189.
Statistics, Method of Treating, 32, 201.
Stereographic Projection of Earth's Surface, 53.
Stokes, Sir George Gabriel, lag of barometers, 174.
Stratosphere, 108.
—— Effect of Cyclones and Anticyclones upon, 122.
—— Effect of Humidity upon, 118.
—— Height of, at the Equator, 110.
—— Height of Base, 27.
—— Influence of Ground Pressure upon, 111, 119.
—— Mean Height and Temperature of, 110.
—— Temperature of Base, 27.
—— Theories to account for, 126.
—— Variation of H_c and T_c with Latitude, 128.
—— Wind Velocity in, 126.
- Teisserenc de Bort, Léon, 15, 16, 66, 72, 76, 109, 110.
Temperature, Annual Mean, at Different Heights, 24, 71, 74, 78.
—— at Atlantic Coast Stations, 6, 213.
—— at Different Altitudes and Surface Pressure, 26, 101, 132.
—— Distribution in Cyclones and Anticyclones, 28, 46, 131, 132, 135.
—— Diurnal Variation of, at Different Altitudes, 26.
—— Gradient at Different Altitudes, 25, 26, 68, 88, 92, 100, 106.
—— Mean of Air Column, 31.
—— on Mountains, 70.
—— Monthly Mean at Different Altitudes, 24, 77, 81.
—— of North Atlantic in relation to Weather, 3, 4.
—— and Pressure at Different Altitudes, 44.
—— of Upper Air, Error in determining, 66.
—— Variations in the Upper Air, Analysis of, 76, 107.
—— Vertical Distribution of, 13, 14, 20.
- Thermodynamics of an Air Column, 48.
—— of Upper Air, 39.
- Trabert, W., 126.
- Trade Winds, Effect upon Surface Temperature of North Atlantic, 3.
- Walker, G. T., 39.
Walker, G. W. See Memoir No. 3.
Wilson, C. T. R., 162.
- Wind, Gradient, Modification with Change of Altitude, 21.
—— at Dungeness, Holyhead, Jersey, and London. See Memoir No. 9.
—— Effect of Curvature of Path, 203.
—— Relation to Observed Wind, 202.
—— Rotation of Direction with Altitude, 139, 143.
—— Variation of Velocity with Height in Cloudy Weather, 22.
—— Velocity in Upper Air, 30, 137, 141, 144.
—— Variation with Height, 22.
- Wind-pressure, High Values recorded at Holyhead, 193.
- Wind-velocities of force 10 or upwards on the Beaufort Scale, 195.
- Wundt, W., Diurnal variation of temperature in upper air, 106.

LIST OF ILLUSTRATIONS.

PLATES.

	<i>To face p.</i>
No. 1. Mean Sea Surface isotherms of the North Atlantic (January, April, July, and October) .	10
No. 2. Thermo-isopleths for Surface Temperature. Straits of Florida to Valencia .	10
No. 3. North Atlantic Mean Surface Temperature. The year	10
No. 4. Ice frequency and departure from the normal of meteorological elements, for each month of the year 1903	10
No. 5. Do. do. for each month of the year 1904	10
No. 6. Do. do. do. do. 1905	10
No. 7. Do. do. do. do. 1906	10
No. 8. Do. do. do. do. 1907	10
No. 9. Do. do. for January to October of the year 1911	10
No. 10. Illustrations of the Consecutive Stages in the Formation of Cloud at Aberdeen, February 27, 1907	12
No. 11. Illustrations of the Consecutive Stages in the Formation of Cloud at Sheringham, September 23, 1911	13
No. 12. Diagram showing the normal relations between pressure, temperature, and height, over England in summer and winter	44
No. 13. Diagram illustrating graphical construction for the epicentre of an earthquake (drawn with reference to Turkestan earthquake of January 3, 1911)	54
No. 14. Examples of radiation records obtained at the Meteorological Office, South Kensington, during 1911	59
No. 15. Connection between H_c and pressure p at Mean Sea Level for Berlin, Strassburg, and Vienna	110
No. 16. Connection between T_c and pressure p at Mean Sea Level for Berlin, Strassburg, and Vienna	111
No. 17. Connection between H_c and pressure p at Mean Sea Level for Hamburg, Paris, and Uccle	112
No. 18. Connection between T_c and pressure p at Mean Sea Level for Hamburg, Paris, and Uccle	113
No. 19. Connection between H_c , T_c , and pressure p at Mean Sea Level, corrected for Annual Variation, Hamburg, Paris, Uccle, Berlin, Strassburg, and Vienna	118
No. 20. Connection between H_c , T_c , and pressure p at Mean Sea Level, corrected for Annual Variation, England, and Munich	119
No. 21. Relation between H_c and T_c and distribution of pressure, Summer	122
No. 22. Relation between H_c and T_c and distribution of pressure, Winter	123
No. 23. Annual Variation in H_c , and in Height of Clouds	124

	<i>To face p.</i>
No. 24. Direction of Place of fall of Balloon for different directions of gradient wind, Winter .	136
No. 25. Direction of Place of fall of Balloon for different directions of gradient wind, Summer .	137
No. 26. Diurnal Variation of Potential Gradient in Volts per Metre at Eskdalemuir, 1911 (Diagram for each month of the year)	158
No. 27. Do. do. (Winter, Equinoxes, and Summer)	159
No. 28. Do. do. at Kew and Eskdalemuir, 1911 (Diagram for each month of the year)	158
No. 29. Do. do. for January, February, March, and April, 1912, at Kew and Eskdalemuir	159
No. 30. Do. do. at Kew and Eskdalemuir, 1911 (Winter, Equinoxes, and Summer)	158
No. 31. Annual Variation of Potential Gradient in Volts per Metre at Kew and Eskdalemuir, 1911	159
No. 32. Diurnal Variation of Potential Gradient in Volts per Metre at ten stations	164
No. 33. Annual Variation of Conductivity and Air-Earth Current at Kew, 1909-11	165
No. 34. Annual Variation of the number of Ions at Kew, 1911-12	164
No. 35. Annual Variation of Conductivity and number of Ions at Kew	165
No. 36. Annual Variation of Electrical Conditions at four stations	168
No. 37. Diagram showing relation between gradient winds and observed winds (Holyhead, 1901-12, W.S.W. winds) obtained by averaging Beaufort numbers	208
No. 38. Do. do. obtained by averaging gradient winds	208
No. 39. Comparison of curves illustrated on Plates 37 and 38	208
No. 40. Diagram showing regression lines, and curves obtained by methods of plotting the points which show relation between gradient winds and observed winds (Holyhead 1901-12, N.E. winds)	208
No. 41. Diagram showing relation between gradient winds and observed winds (Holyhead, 1901-12, N.E. winds)	208
No. 42. Do. do. (Dungeness, 1901-12, N.E. and N.W. winds)	208
No. 43. Diagram showing relation of observed wind in Beaufort numbers to gradient wind of 12 metres per second (Dungeness, 1901-06 and 1907-12)	208
No. 44. Do. do. (Dungeness, 1901-12)	208
No. 45. Do. do. (Jersey, 1901-12)	208
No. 46. Do. do. (Holyhead, 1901-12)	208
No. 47. Do. do. (Brixton, 1901-04, and St James Park, 1905-12)	208
No. 48. Do. do. (Dungeness, Summer 1901-12 and Winter 1901-12)	208
No. 49. Do. do. (Jersey, Summer 1901-12 and Winter 1901-12)	208
No. 50. Do. do. (Holyhead, Summer 1901-12 and Winter 1901-12)	208
No. 51. Diagram showing the relation between observed winds and gradient winds of 5, 10, 15, and 20 metres per second (Dungeness, 1901-12)	208
No. 52. Do. do. (Jersey, 1901-12)	208
No. 53. Do. do. (Holyhead, 1901-12)	208
No. 54. Mean surface temperature of the North Atlantic for the year	220
No. 55. Mean sea surface isotherms of the North Atlantic for January, February, March, and April	220
No. 56. Do. do. May, June, July, and August	220
No. 57. Do. do. September, October, November, and December	220

LIST OF ILLUSTRATIONS.
