Daily Weather Summaries for September 2022

If you have any questions or feedback about this product or wish to obtain further data please contact the Met Office.

This document contains daily weather summaries for each day of September 2022. The Met Office National Meteorological Library and Archive holds a continuous record of daily weather summaries or daily weather reports from 1860, and these daily weather summaries form a continuation of that series.

The purpose of each summary is to provide an overview of the weather conditions across the UK on that day, with the historical emphasis mainly based on observations from surface network of weather stations, although the format has varied over the decades. While the emphasis remains on observations from the surface network, the current daily weather summaries supplement these by including satellite and rain-radar imagery to provide a more complete overview. The current format of the daily weather summaries is as follows:

1. Text summary of the main characteristics of the weather during the day, written by an operational meteorologist in the Met Office operations centre.
2. Table of daily extremes for the UK for key climate variables including temperature, rainfall, sunshine and gust speeds.
3. Overview of the synoptic situation at 00 and 12 UTC comprising: analysis charts showing the surface pressure pattern and associated weather fronts; North Atlantic and European infra-red satellite images showing cloud-cover; combined infra-red and rain-radar images of the UK; maps of wind speed and direction at 00 and 12 UTC; observations of pressure, wind speed and direction, cloud cover, air and dewpoint temperature at selected UK and European stations in data tables.
4. UK maps of key climate variables from observing stations including maximum, minimum and grass minimum temperature, rainfall, sunshine, gust speed and snow.
5. Further guidance notes

If you spot any data errors or omissions in this product please contact the Met Office.

This issue of the daily weather summary provides data for the following UK and European locations (Reykjavic (5) also included):

Daily Weather Summary for Thursday 01 September 2022

This day's summary created 29/09/2022 12:55

Summary of the UK Weather for Thursday 01 September 2022

Fine and dry conditions dominated for most this morning as a high pressure system sat to the northeast of the UK. Parts of northern England and the far southeast saw the odd shower develop in the small hours. Despite a generally cloudy start, most areas experienced clear intervals through the early morning. As dawn broke a heavy shower moved in to the southeast, but this soon eased as it headed towards London. Elsewhere it was a mainly dry morning, with some clear skies for Scotland and northwest England. Into the afternoon showers broke out in central and southwest England, as well as some in the south east which were thundery at times. Scotland and the north of England remained dry with sunny spells. The showers continued into the evening, with some locally heavy in the midlands.

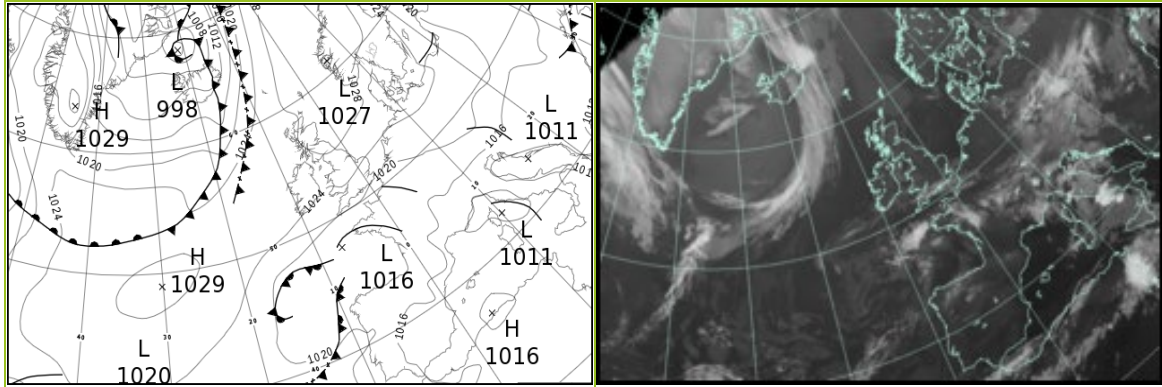

Daily Extremes

| | |
|--|--|
| <i>Highest Maximum</i> | 27.2°C Ringmer, Bishops Lane (East Sussex, 23mAMSL) |
| <i>Lowest Maximum</i> | 13.8°C Lerwick (Shetland, 82mAMSL) |
| <i>Highest Minimum</i> | 18.4°C Manston (Kent, 49mAMSL) also Manston No 2 (Kent, 54mAMSL) |
| <i>Lowest Minimum</i> | -0.6°C Kinbrace, Hatchery (Sutherland, 103mAMSL) |
| <i>Lowest Grass Minimum</i> | -4.9°C Durris (Kincardineshire, 107mAMSL) |
| <i>Most Rainfall</i> | 20.8mm Shoreham Airport (West Sussex, 2mAMSL) |
| <i>Most Sunshine</i> | 12.4hr Strathy East (Sutherland, 68mAMSL) |
| <i>Highest Gust</i> | 29Kt 33mph Holbeach No 2 (Lincolnshire, 3mAMSL) also Berry Head (Devon, 58mAMSL) |
| <i>Highest Gust (mountain)</i> | 27Kt 31mph Great Dun Fell No 2 (Cumbria, 847mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

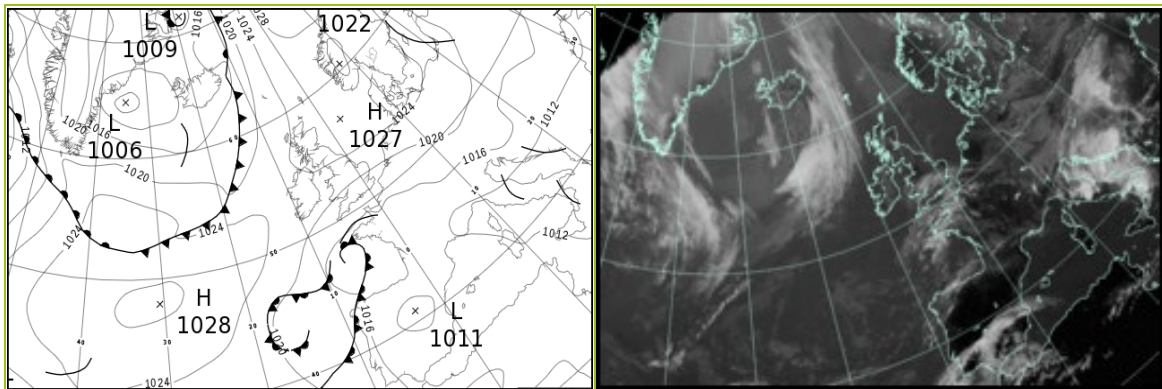

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 01 September 2022

Daily Weather Summary for Thursday 01 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 02 September 2022

This day's summary created 09/09/2022 03:03

Summary of the UK Weather for Friday 02 September 2022

Two low pressure systems sat either side of the UK in the early hours of the morning, one to the northeast and the other to the southwest. The latter brought several rain-bearing troughs and an occlusion to the south of England, which produced scattered showers over many in this area. Elsewhere, it was mostly dry, with some areas also experiencing long clear spells with patchy cloud. Showers in England soon died out, and a band of occasionally heavy rain moved into Northern Ireland and western Scotland, but this did not penetrate much further than coastal areas. Elsewhere some heavier localised showers broke out in Devon and Cornwall in the morning and lasted for most of the day. There were also some heavy showers, thundery at times, in Sussex and Hampshire, west Wales and the Midlands this afternoon, while most of Scotland and northern England remained dry. Many places became drier into the evening, with just western Scotland and Northern Ireland consistently staying wet, and the odd shower in central England.

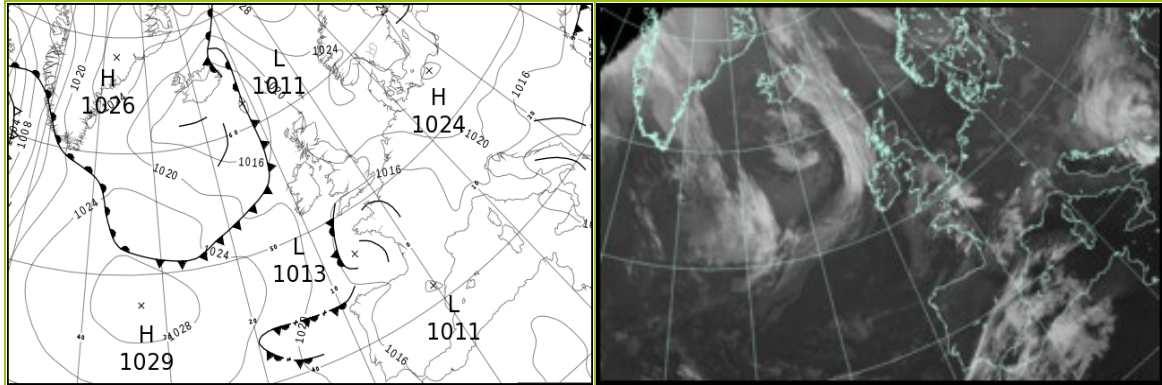

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 26.4°C Santon Downham (Suffolk, 6mAMSL) |
| <i>Lowest Maximum</i> | 15.2°C Tiree (Argyll (in Strathclyde Region), 9mAMSL) |

Daily Weather Summary for Friday 02 September 2022

Daily Weather Summary for Friday 02 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 03 September 2022

This day's summary created 10/09/2022 03:03

Summary of the UK Weather for Saturday 03 September 2022

A deep low pressure system slowly edged towards the UK during the night, bringing several complex fronts and troughs with it. Several bands of persistent rain passed over Northern Ireland and reached the Western Isles of Scotland by dawn. Elsewhere in the country, it was mostly dry with patchy cloud, and only some scattered showers over central England, central Scotland and south Wales. Mist and fog were reported over much of the central belt of England towards dawn. Winds were light in the south, but stronger further north. Low pressure to the west brought a wet and windy day for many, though mild in temperature. Rain continued across the far west, slowly edging northeastwards throughout the day, it brought some heavy bursts of rain. Northern Ireland and western Scotland saw the worst of the heavy rain throughout the day, with a yellow warning for rain in force for both regions. Elsewhere, it was a mostly bright and dry morning, with sunny spells among occasional light showers, but overcast in places. On a northeastwards path, in the afternoon the low brought locally heavy showers to Leeds, with reports of sferics, and thunderstorms in Newcastle. The southwest saw a mostly dry but overcast day with bursts of light rain in the afternoon and into the evening. Rain persisted over the north and west throughout the afternoon, easing into the evening as the low continued travelling northeastwards.

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 26.3°C Lingwood, Strumpshaw Hill (Norfolk, 33mAMSL) |
| <i>Lowest Maximum</i> | 13.9°C Derrylin, Cornahoule (Fermanagh, 68mAMSL) |
| <i>Highest Minimum</i> | 18.3°C Cromer (Norfolk, 37mAMSL) |
| <i>Lowest Minimum</i> | 8.9°C Ravensworth (North Yorkshire, 124mAMSL) |
| <i>Lowest Grass Minimum</i> | 4.0°C Copley (Durham, 253mAMSL) |
| <i>Most Rainfall</i> | 56.7mm Trassey Slievenaman (Down, 220mAMSL) |
| <i>Most Sunshine</i> | 10.9hr Lerwick (Shetland, 82mAMSL) |
| <i>Highest Gust</i> | 38Kt 44mph Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL) |
| <i>Highest Gust (mountain)</i> | 78Kt 90mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

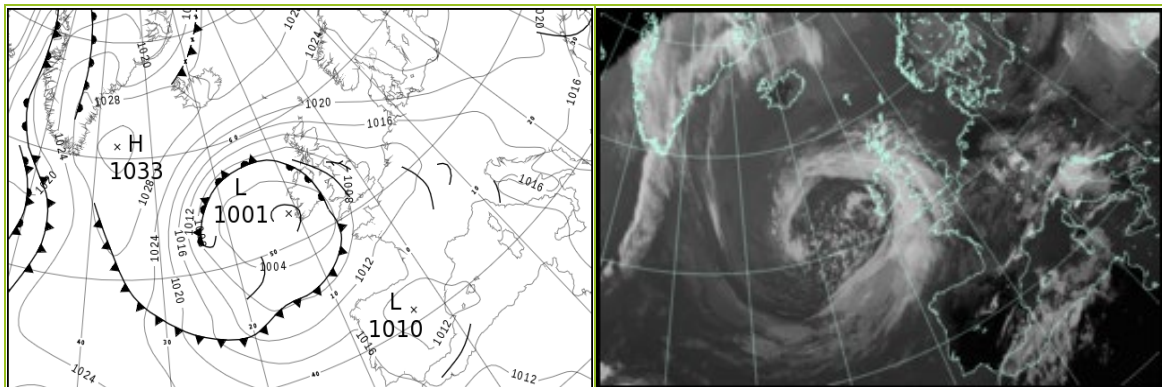

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 03 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 04 September 2022

This day's summary created 11/09/2022 03:03

Summary of the UK Weather for Sunday 04 September 2022

Under the influence of a deep low pressure, it was a wet and windy day across the UK. Heavy rain edged northeastwards across Scotland overnight, bringing some high rainfall totals, especially in the northeast. This rainfall quickly became confined to the Northern Isles in the early hours but was followed by another band of rain. This brought some locally heavy rain across Northern Ireland and into western parts of England and Scotland. Elsewhere, it was a misty and foggy start, with generally overcast skies and occasional showers. By dawn, western Scotland was seeing most of the heavy rain and breezy conditions, with gusts up to 42 knots on the Kintyre Peninsula. Meanwhile southern and central areas saw thick cloud cover and some showers, with the southwest and Wales seeing fairly persistent rainfall throughout the day. Into the afternoon, the heavy rain cleared into the North Sea, making way for a drier evening over Scotland. But showers and overcast conditions persisted for many across the UK into the afternoon. Heavy showers moved across central areas meanwhile heavy rain, hail and thunder developed in the southwest, edging northeastwards overnight.

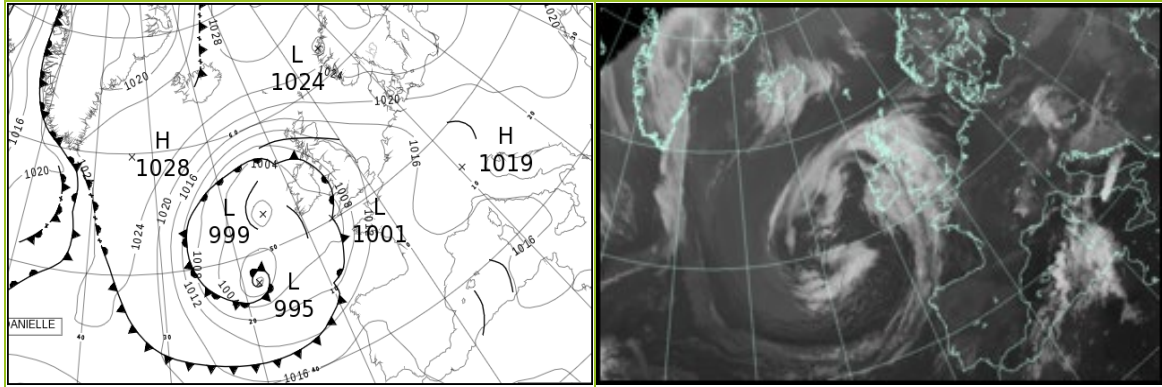

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 27.7°C Felsham (Suffolk, 92mAMSL) |
| <i>Lowest Maximum</i> | 15.5°C Fair Isle (Shetland, 57mAMSL) |
| <i>Highest Minimum</i> | 18.5°C Swanage (Dorset, 10mAMSL) |
| <i>Lowest Minimum</i> | 8.8°C Derrylin, Cornahoule (Fermanagh, 68mAMSL) |
| <i>Lowest Grass Minimum</i> | 7.0°C Castlederg (Tyrone, 49mAMSL) |
| <i>Most Rainfall</i> | 57.4mm Princetown, Prison No 2 (Devon, 420mAMSL) |
| <i>Most Sunshine</i> | 9.8hr Aldergrove (Antrim, 63mAMSL) |
| <i>Highest Gust</i> | 50Kt 58mph Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL) |
| <i>Highest Gust (mountain)</i> | 61Kt 70mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

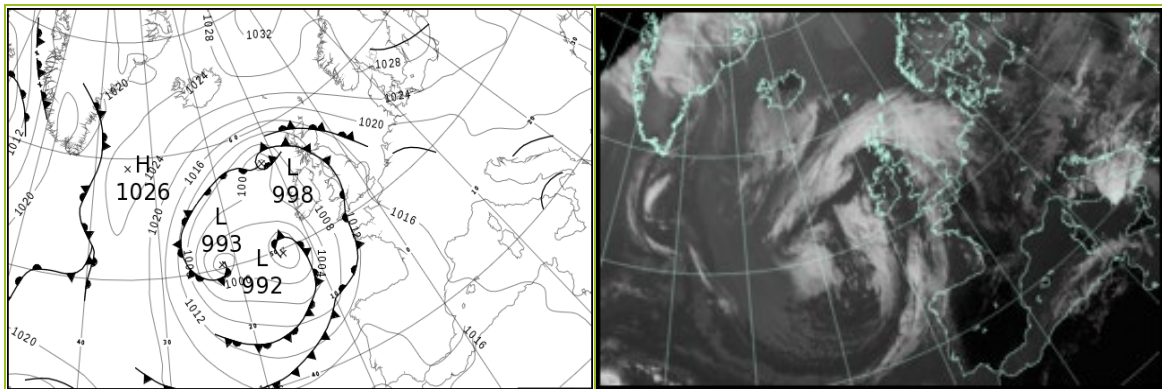

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 05 September 2022

This day's summary created 12/09/2022 03:03

Summary of the UK Weather for Monday 05 September 2022

A line of thunderstorms over southern England slowly eased as they moved north but reinvigorated over the east of England around 2am. The sferics had mainly stopped by around 3am, with the band of rain approaching the east coast. Elsewhere in England it was mainly dry, but Wales, Scotland and Northern Ireland all had a wet start to the day. Rain lingered over Scotland through the morning but subsided by midday, except over the Northern Isles where it was also quite breezy. Further south, there was a mixture of sunny spells and showers, these becoming more widespread through the afternoon. Meanwhile, a large area of low pressure to the west of the UK drifted slowly eastwards, bringing heavy showers and some longer spells of rain across the southwest by mid-afternoon. Thunder and lightning were reported here, and a yellow thunderstorm warning was issued for the overnight period for parts of western England and Wales. Winds were warm and southerly.

Daily Weather Summary for Monday 05 September 2022

Daily Weather Summary for Monday 05 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 06 September 2022

This day's summary created 13/09/2022 03:03

Summary of the UK Weather for Tuesday 06 September 2022

Low pressure continued to bring showery and breezy conditions across the UK. A band of rain stretching from northwest to southeast England brought locally heavy and thundery showers in the early hours, with a yellow thunderstorm warning issued until 6 am in the southeast. The rain eased closer to dawn, leaving scattered showers, and generally overcast conditions for many. Mist, fog, and haze were seen across the UK, widely in the southeast. The unsettled weather persisted throughout the day, with organised bands of showers forming again across the far southwest, north of England and Scotland in the mid-morning. It was quite humid, particularly in the east where there were some intermittent sunny spells. Heavy and thundery showers pushed further eastwards through the afternoon and into the evening. While persistent precipitation across parts of Scotland, including Angus and Aberdeenshire, triggered another thunderstorm warning, active until 11 pm. Lightning was reported continuously across the country, and showers continued widely across the UK into the night.

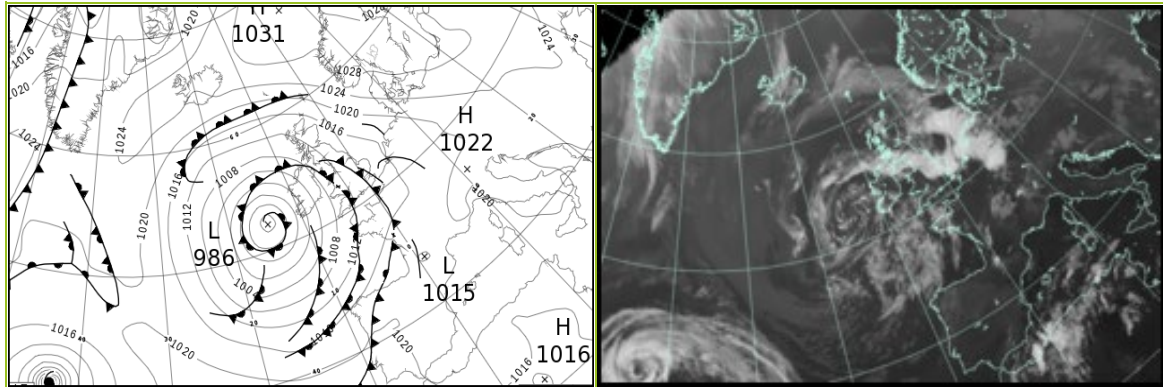

Daily Extremes

| | |
|--|--|
| <i>Highest Maximum</i> | 24.8°C Faversham (Kent, 46mAMSL) |
| <i>Lowest Maximum</i> | 14.8°C Fair Isle (Shetland, 57mAMSL) |
| <i>Highest Minimum</i> | 17.3°C Hastings (East Sussex, 45mAMSL) also Shoeburyness, Landwick (Essex, 2mAMSL) |
| <i>Lowest Minimum</i> | 8.2°C Braemar No 2 (Aberdeenshire, 327mAMSL) |
| <i>Lowest Grass Minimum</i> | 5.9°C Urquhart, Northwood (Ross & Cromarty, 17mAMSL) |
| <i>Most Rainfall</i> | 75.6mm Balmoral (Aberdeenshire, 283mAMSL) |
| <i>Most Sunshine</i> | 7.6hr Slapton (Devon, 32mAMSL) |
| <i>Highest Gust</i> | 45Kt 52mph Fair Isle (Shetland, 57mAMSL) |
| <i>Highest Gust (mountain)</i> | 49Kt 56mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

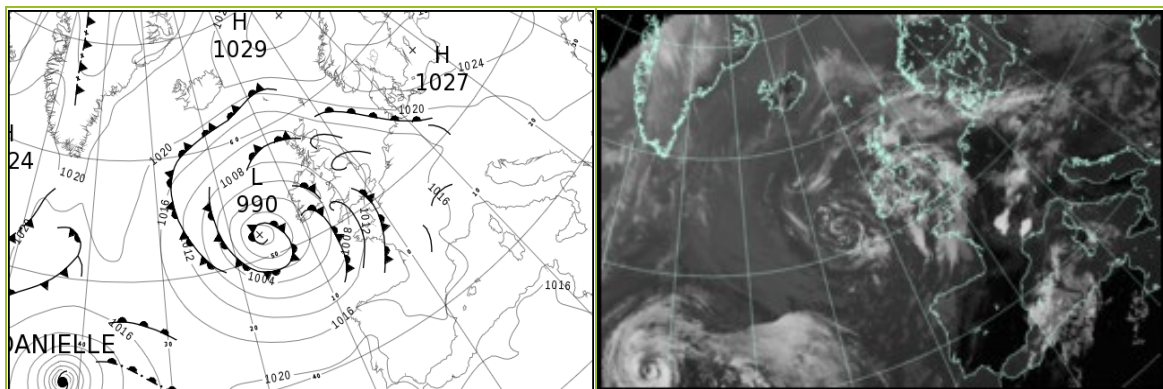

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 06 September 2022

Daily Weather Summary for Tuesday 06 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 07 September 2022

This day's summary created 14/09/2022 03:03

Summary of the UK Weather for Wednesday 07 September 2022

With deep low pressure gradually edging eastwards, the UK saw another showery and breezy day. Although overnight heavy rain eased over Scotland, a yellow warning for thunderstorms was issued from 3am until 10am, and rain lingered over the Northern Isles through the morning. The rest of the UK saw a showery start, with coastal fog, haze, and mist along eastern areas. The showery theme continued through the afternoon and evening across most of the country. Widespread thunderstorms developed across the midlands and spread northwestwards. More isolated thunderstorms broke out over East Anglia, southern Scotland and Northern Ireland during the afternoon.

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 24.5°C Felsham (Suffolk, 92mAMSL) |
| <i>Lowest Maximum</i> | 14.8°C Lerwick (Shetland, 82mAMSL) |
| <i>Highest Minimum</i> | 16.6°C Swanage (Dorset, 10mAMSL) |
| <i>Lowest Minimum</i> | 8.5°C Redesdale Camp (Northumberland, 211mAMSL) |
| <i>Lowest Grass Minimum</i> | 5.4°C Pitsford (Northamptonshire, 114mAMSL) |
| <i>Most Rainfall</i> | 50.0mm Plumpton No2 (East Sussex, 75mAMSL) |
| <i>Most Sunshine</i> | 9.8hr Oxford (Oxfordshire, 63mAMSL) |
| <i>Highest Gust</i> | 46Kt 53mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL) |
| <i>Highest Gust (mountain)</i> | 41Kt 47mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

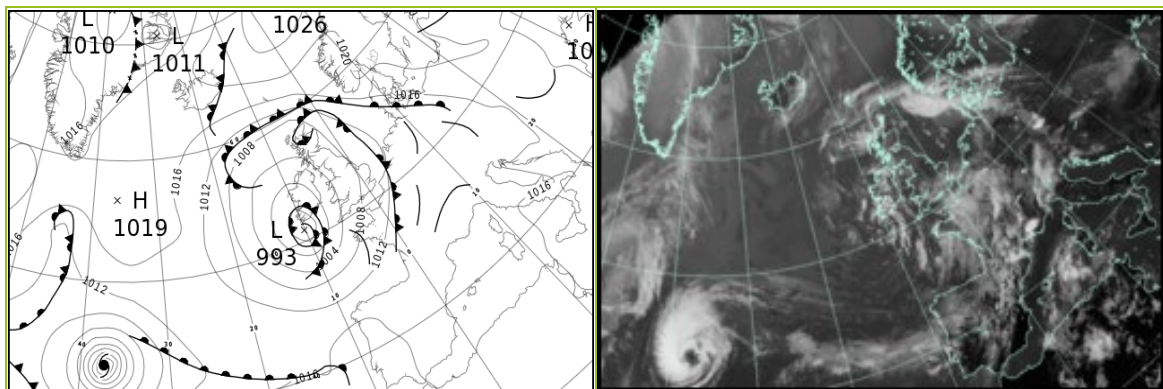

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 08 September 2022

This day's summary created 15/09/2022 03:03

Summary of the UK Weather for Thursday 08 September 2022

Low pressure over the Celtic Sea continued to make slow progress eastwards through the early hours. A series of occlusions surrounding the low-pressure centre brought gusts into the mid-thirties of knots for the far southwest of England and Wales, along with patchy rain. Showers from the previous night persisted under a trough to the east of Southampton and in Scotland, though the latter were less organised. Mist and fog patches developed where it was drier in the Midlands, north of England, and in the south of Northern Ireland closer to dawn. Widespread scattered showers continued through the day with thunderstorms developing away from the southwest and northern Scotland during the afternoon.

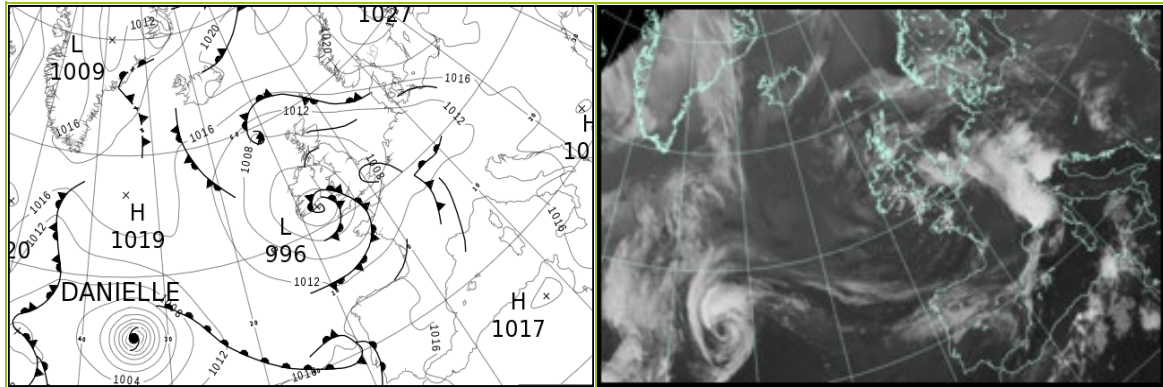

Daily Extremes

Daily Weather Summary for Thursday 08 September 2022

Daily Weather Summary for Thursday 08 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 09 September 2022

This day's summary created 16/09/2022 03:03

Summary of the UK Weather for Friday 09 September 2022

Low pressure centred over Great Britain continued to bring unsettled weather for the UK. Showers across the southern half of the country eased through the early hours inland but persisted in southeastern and western coastal areas. On the western side of the low there was some more persistent rain for Scotland and Northern Ireland. Mist and fog were widespread in central England, and fed into parts of the northeast towards dawn. Showers and thunderstorms continued through the day though were less frequent than recent days. Thunderstorms were mainly confined to the Midlands and the Southeast. More persistent rain continued across southern Scotland through the afternoon and gradually became more fragmented during the evening. Northern Ireland and northern Scotland saw the best of any drier and brighter weather.

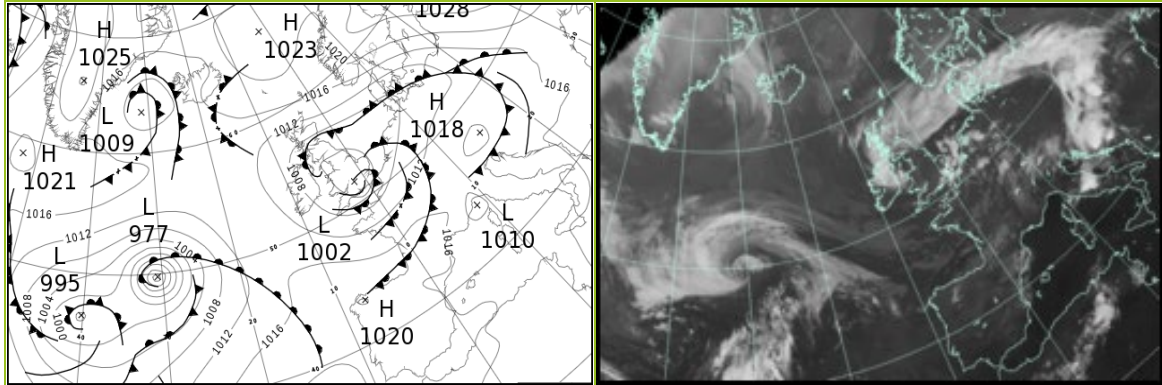

Daily Extremes

| | |
|--|--|
| <i>Highest Maximum</i> | 22.3°C Oxford (Oxfordshire, 63mAMSL) |
| <i>Lowest Maximum</i> | 13.5°C Brizlee Wood (Northumberland, 250mAMSL) |
| <i>Highest Minimum</i> | 16.5°C Achnagart (Ross & Cromarty, 15mAMSL) |
| <i>Lowest Minimum</i> | 7.4°C Shap (Cumbria, 263mAMSL) |
| <i>Lowest Grass Minimum</i> | 6.2°C Shap (Cumbria, 263mAMSL) also Maulds Meaburn (Cumbria, 183mAMSL) |
| <i>Most Rainfall</i> | 35.0mm Goldsclough (Northumberland, 305mAMSL) |
| <i>Most Sunshine</i> | 8.0hr Orkney: Loch Of Hundland (Orkney, 28mAMSL) |
| <i>Highest Gust</i> | 38Kt 44mph Warcop Range (Cumbria, 227mAMSL) |
| <i>Highest Gust (mountain)</i> | 49Kt 56mph Great Dun Fell No 2 (Cumbria, 847mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

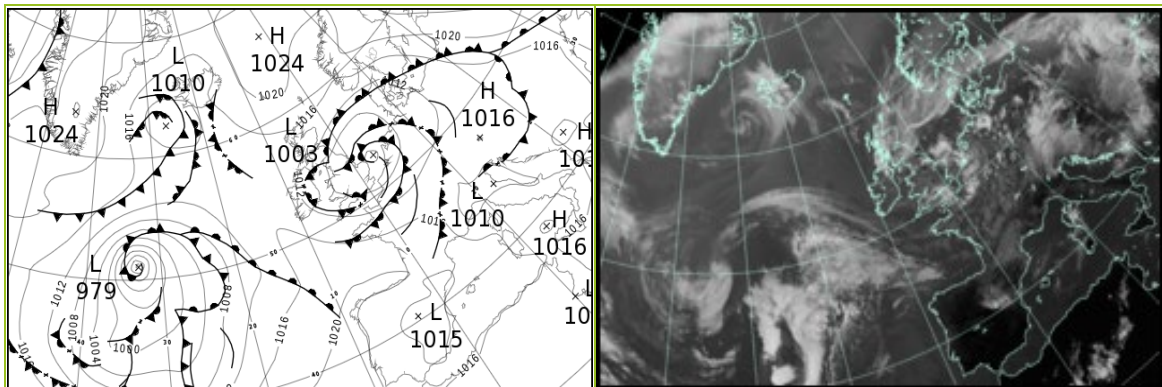

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 09 September 2022

Daily Weather Summary for Friday 09 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 10 September 2022

This day's summary created 17/09/2022 03:03

Summary of the UK Weather for Saturday 10 September 2022

Showers and patchy rain gradually eased across western areas overnight as the low centre of recent days slowly moved eastwards to lie over the Netherlands by dawn. Patchy stratus and showers persisted along eastern coasts. Towards dawn a few mist and fog patches developed. Any early mist and fog quickly cleared, leaving a clear start for Scotland, Northern Ireland and the southwest. Eastern England saw some locally heavy showers develop through the morning, with occasional lightning. These showers became sparser as they moved south, with some becoming heavier over London. It was a dry afternoon for the rest of the UK, with generally light winds. Into the evening many of the showers died out, with just one or two remaining over Kent at midnight.

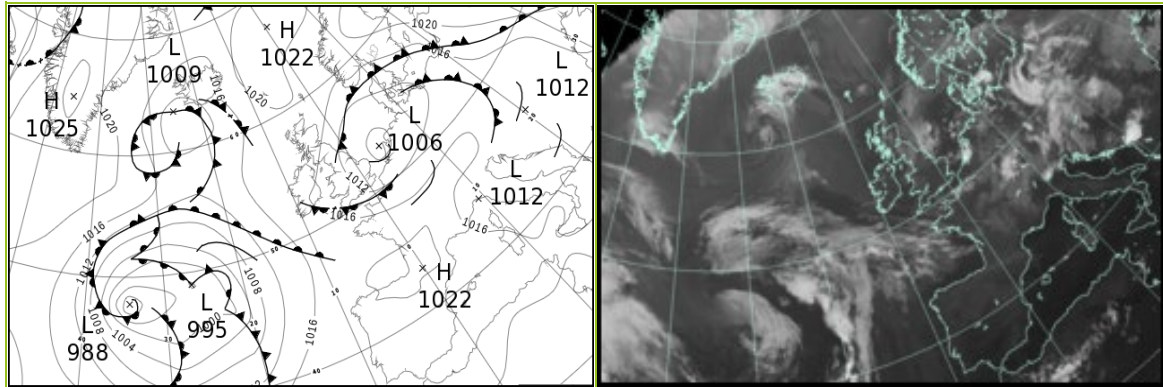

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 23.0°C Charsfield (Suffolk, 49mAMSL) also Lingwood, Strumpshaw Hill (Norfolk, 33mAMSL) |
| <i>Lowest Maximum</i> | 13.6°C Fair Isle (Shetland, 57mAMSL) |
| <i>Highest Minimum</i> | 16.7°C Cromer (Norfolk, 37mAMSL) |
| <i>Lowest Minimum</i> | 0.9°C Tulloch Bridge (Inverness-shire, 249mAMSL) |
| <i>Lowest Grass Minimum</i> | -1.5°C Tulloch Bridge (Inverness-shire, 249mAMSL) |
| <i>Most Rainfall</i> | 20.8mm Frampton S Wks (Lincolnshire, 5mAMSL) |
| <i>Most Sunshine</i> | 12.4hr Tiree (Argyll (in Strathclyde Region), 9mAMSL) |
| <i>Highest Gust</i> | 25Kt 29mph Brizlee Wood (Northumberland, 250mAMSL) also Wight: Needles Old Battery (Isle Of Wight, 80mAMSL) |
| <i>Highest Gust (mountain)</i> | 43Kt 49mph Great Dun Fell No 2 (Cumbria, 847mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

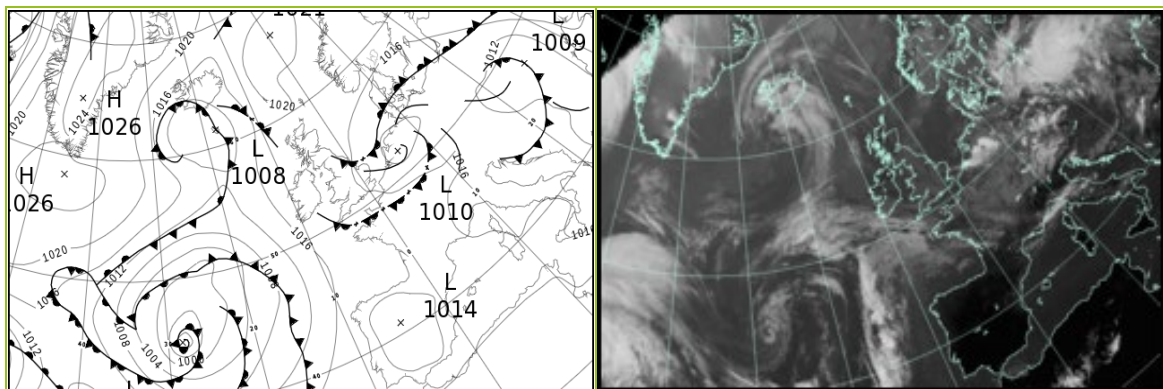

mAMSL refers to station elevation in metres above mean sea level

This day's summary created 18/09/2022 03:03

Summary of the UK Weather for Sunday 11 September 2022

A largely dry night with clear skies for most allowed widespread mist and fog to develop through the early hours. A warm front slowly made its way into the far southwest towards dawn bringing outbreaks of rain and low cloud. Mist, fog, and haze lingered in the southeast, clearing by late morning. Meanwhile, a frontal system travelled northeastwards across the UK under a lower pressure system, and brought rain across Northern Ireland, heavy in parts. It was a dry morning for the rest of the UK, with sunny spells in places. Into the afternoon, the rain continued on a northeastwards path, bringing wet conditions across Wales, the north of England and parts of Scotland, as well as prolonged rain over Northern Ireland. This continued into the early evening, stretching further into Scotland into the night. The rainfall triggered a yellow warning for rain across northwest England and Wales valid from midnight. The rest of the UK saw drier weather and clear skies into the night. Winds were generally light and northeasterly, but fresher on southeastern coasts.

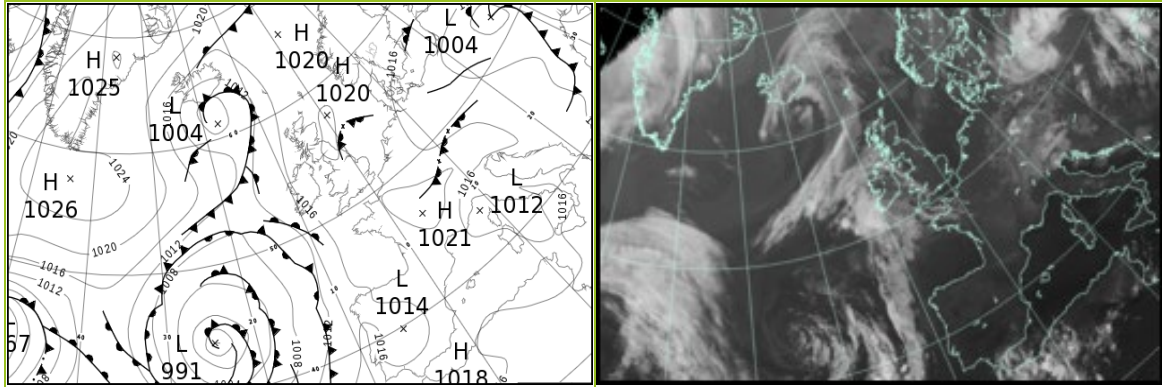

Daily Extremes

Daily Weather Summary for Sunday 11 September 2022

Daily Weather Summary for Sunday 11 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 12 September 2022

This day's summary created 19/09/2022 03:03

Summary of the UK Weather for Monday 12 September 2022

The day began with rain over much of the UK, with a band running from west Wales to northeast England, as well as some in northern Scotland. Much of this cleared quickly to the east, before a heavier band arrived from the west, affecting north Wales and northwest England. It was largely dry elsewhere, with some fog reported in south and southeast England. Any mist or fog cleared in the south by mid-morning, making way for a dry day with some sunny spells. This morning saw a series of fronts bringing bands of scattered showers in belts across northern Scotland, the northwest, and central England. The bands became more organised into the afternoon, congregating to form one thicker rain band over central England. Meanwhile, northeast Scotland saw some scattered showers fading out to the North Sea. It was a dry, albeit cloudy, afternoon elsewhere. Rain faded into the evening as the band of rain over central regions weakened, and edged southwards / southeastwards.

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 27.2°C London, St James's Park (Greater London, 5mAMSL) |
| <i>Lowest Maximum</i> | 13.4°C Strathy East (Sutherland, 68mAMSL) |
| <i>Highest Minimum</i> | 18.2°C Dale Fort (Dyfed, 33mAMSL) |
| <i>Lowest Minimum</i> | 8.7°C Stornoway Airport (Western Isles, 15mAMSL) |
| <i>Lowest Grass Minimum</i> | 5.6°C Harris: Quidnish (Western Isles, 13mAMSL) |
| <i>Most Rainfall</i> | 14.4mm Baltasound No 2 (Shetland, 15mAMSL) |
| <i>Most Sunshine</i> | 11.4hr Dunbar (East Lothian, 23mAMSL) |
| <i>Highest Gust</i> | 35Kt 40mph Fair Isle (Shetland, 57mAMSL) |
| <i>Highest Gust (mountain)</i> | 59Kt 68mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

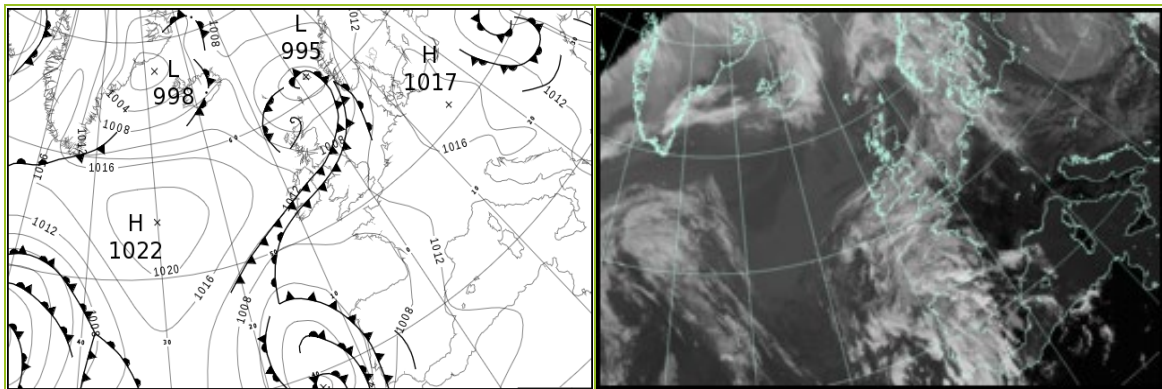

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 12 September 2022

Daily Weather Summary for Monday 12 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 13 September 2022

This day's summary created 20/09/2022 03:03

Summary of the UK Weather for Tuesday 13 September 2022

It was a clear night for much of the UK, with any rain restricted to the south of England and the far northeast of Scotland. Mist and fog were reported for a time in eastern England. Winds across the UK were light and northerly. The day was fine and dry with hazy sunshine for many central and northern regions under a ridge of high pressure, however there were occasional light showers in northern Scotland. Weather fronts across southern Wales and England throughout the day brought rainy and overcast conditions. This precipitation became heavy into the afternoon and persisted into the evening, particularly in the southeast. Cloud also became more extensive in Northern Ireland and western Scotland overnight, causing showers to break out. It was cooler than of late.

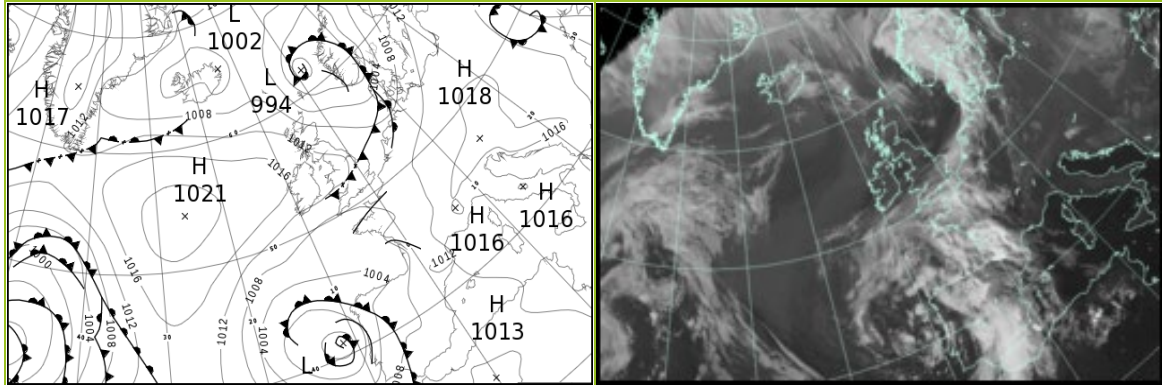

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 21.6°C Holne, Priddons Farm No 2 (Devon, 280mAMSL) |
| <i>Lowest Maximum</i> | 13.3°C Baltasound No 2 (Shetland, 15mAMSL) |
| <i>Highest Minimum</i> | 18.7°C Hastings (East Sussex, 45mAMSL) |
| <i>Lowest Minimum</i> | 3.8°C Bewcastle (Cumbria, 133mAMSL) |
| <i>Lowest Grass Minimum</i> | 2.0°C Kielder Castle (Northumberland, 201mAMSL) |
| <i>Most Rainfall</i> | 41.3mm Wight: Newchurch, Knighton W Wks (Isle Of Wight, 27mAMSL) |
| <i>Most Sunshine</i> | 12.0hr Morecambe No 2 (Lancashire, 7mAMSL) |
| <i>Highest Gust</i> | 39Kt 45mph Fair Isle (Shetland, 57mAMSL) |
| <i>Highest Gust (mountain)</i> | 44Kt 51mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

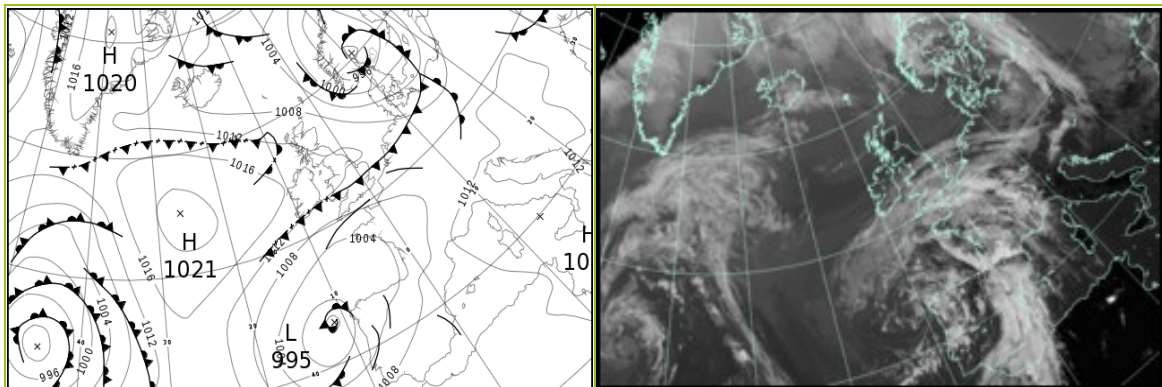

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 14 September 2022

This day's summary created 21/09/2022 03:03

Summary of the UK Weather for Wednesday 14 September 2022

It was a wet start for much of the south with a cold front stretching across southern England. The far north of Scotland also saw some light showers in places. Elsewhere, higher pressure allowed for a clear start to the day. Central, southern, and eastern regions saw mist and fog patches in the early hours, these clearing quickly. Rain persisted across the far south through the morning, and was particularly heavy for English Channel counties, but then cleared away by midday. Parts of northern Scotland and Northern Ireland also saw thicker cloud and some light showers, and it was quite breezy. Fairly benign conditions prevailed for the rest of the UK - there were some sunny spells for southern Scotland and central and northern England throughout the day, and for southern England through the afternoon. A northerly airstream across the UK meant that a bit more cloud developed along North Sea coasts overnight, and it turned quite chilly in northern and central regions.

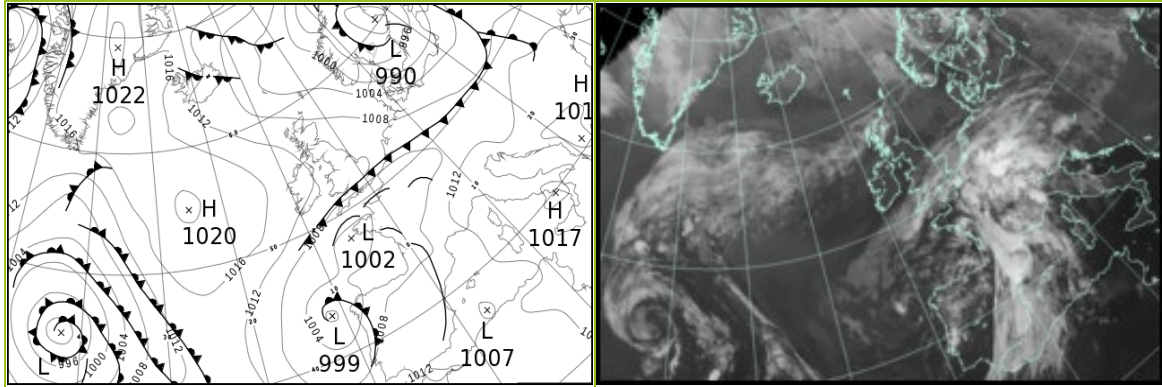

Daily Extremes

Daily Weather Summary for Wednesday 14 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 15 September 2022

This day's summary created 22/09/2022 03:03

Summary of the UK Weather for Thursday 15 September 2022

It was a fresh start for many, feeling less humid than of late. After a clear night, the day started dry for much of the UK. North Scotland, Northern Ireland, and the far south of Wales saw some light showers in the early hours. Light showers continued throughout the morning over Wales and the south coast of England, however Northern Ireland and Scotland saw constant scattered showers, some heavy, throughout the day. Elsewhere remained dry despite extensive cloud cover. There were sunny spells throughout the day and a light breeze, however temperatures remained cooler than of late.

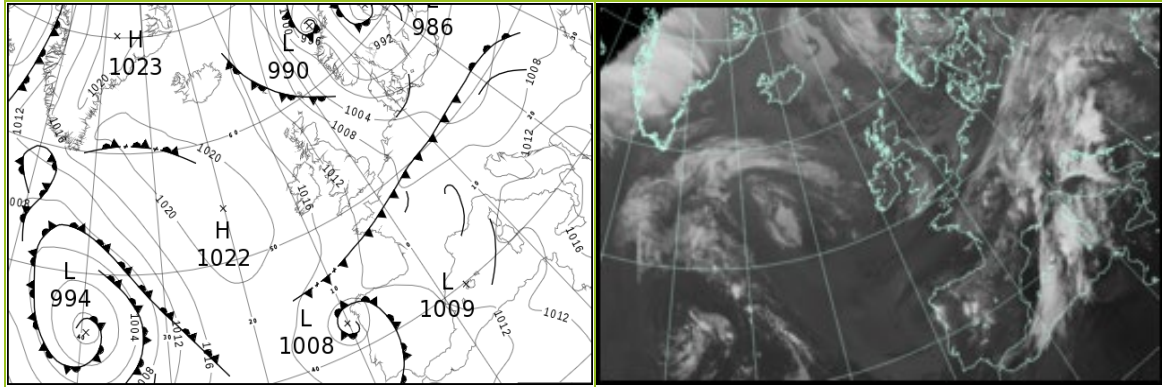

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 20.5°C Pershore (Hereford & Worcester, 35mAMSL) |
| <i>Lowest Maximum</i> | 11.2°C Lerwick (Shetland, 82mAMSL) |
| <i>Highest Minimum</i> | 14.8°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL) |
| <i>Lowest Minimum</i> | 3.2°C Shap (Cumbria, 263mAMSL) |
| <i>Lowest Grass Minimum</i> | -0.8°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL) |
| <i>Most Rainfall</i> | 14.2mm Aviemore (Inverness-shire, 228mAMSL) |
| <i>Most Sunshine</i> | 10.9hr Mylnefield (Angus, 26mAMSL) |
| <i>Highest Gust</i> | 38Kt 44mph Fair Isle (Shetland, 57mAMSL) |
| <i>Highest Gust (mountain)</i> | 43Kt 49mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

Daily Weather Summary for Thursday 15 September 2022

Daily Weather Summary for Thursday 15 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 16 September 2022

This day's summary created 23/09/2022 03:03

Summary of the UK Weather for Friday 16 September 2022

With high pressure building from the west, northerly flow caused temperatures to drop across the UK and brought about some strong winds, particularly in the east of the country. A few light showers fed in across northern Scotland, Northern Ireland and from the Irish Sea across the Midlands but otherwise it was a mainly dry start. It continued to feel rather cool through the day. Scattered showers were seen across the northeast of Scotland, northern and central Wales, and parts of Northern Ireland through the latter part of the morning. These continued into the afternoon across the far northeast, while some locally heavy showers edged into East Anglia. Elsewhere, it was a mainly dry day with sunny spells. The showers became confined to northern Scotland and coastal eastern England in the evening. The winds eased for most towards the end of the day, although it remained breezy across the eastern parts.

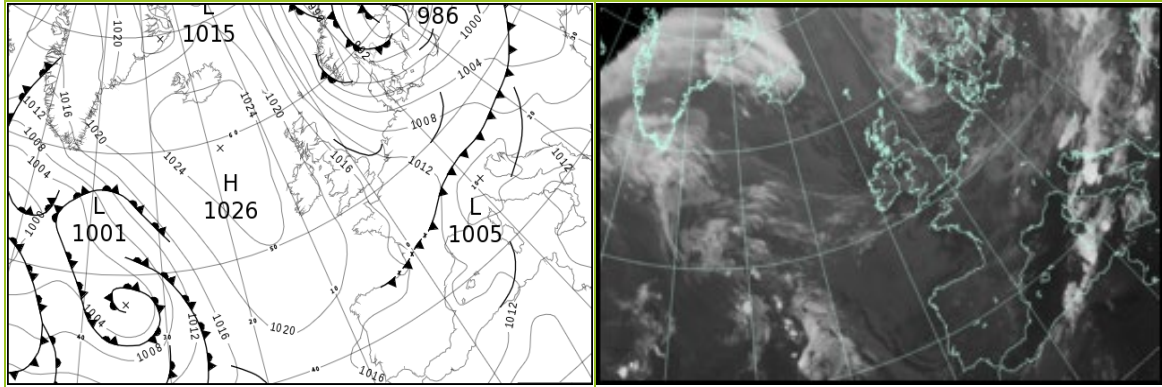

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 19.6°C Kingston Maurward (Dorset, 73mAMSL) |
| <i>Lowest Maximum</i> | 10.0°C Balmoral (Aberdeenshire, 283mAMSL) |
| <i>Highest Minimum</i> | 13.9°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL) |

Daily Weather Summary for Saturday 17 September 2022

This day's summary created 24/09/2022 03:03

Summary of the UK Weather for Saturday 17 September 2022

It was another chilly start to the day with high pressure positioned to the northwest of the UK and northerly winds feeding in. Any cloud or isolated showers were confined to northern Scotland, Irish Sea coasts and the far east of England, where there were gusts of up to 30 knots. Away from these regions it was largely clear with some rural grass frosts. It was a dry day for most of England, Wales and Northern Ireland, with a few showers clipping the far east of East Anglia in the morning. More frequent showers fed through the northern half of Scotland however throughout the day, spreading a little further south later in the afternoon. As a result, the cloudiest conditions were across Scotland, but also northern England. The best of the sunshine was seen in southern England and Northern Ireland. It was a cool feeling day for many, especially on exposed coasts, and it was rather breezy across the eastern areas too.

Daily Weather Summary for Saturday 17 September 2022

Daily Weather Summary for Saturday 17 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 18 September 2022

This day's summary created 25/09/2022 03:03

Summary of the UK Weather for Sunday 18 September 2022

It was a cloudy start for most as an occluded front stretched along the eastern coast of the UK in the small hours. Southern parts saw the best of any clear periods, with local grass frost developing there. Showers affected far northeast Scotland and parts of northwest England. As the occluded front edged southwestwards through the day, cloud persisted across northern and eastern parts, meanwhile it was a bright day for the southwest. Northern Ireland and Scotland saw occasional light showers throughout the day. Into the afternoon, these showers spread into northwest England and eastern parts as the occluded front travelled across the UK. Winds were light and southeasterly, but gusty along the southeast coast.

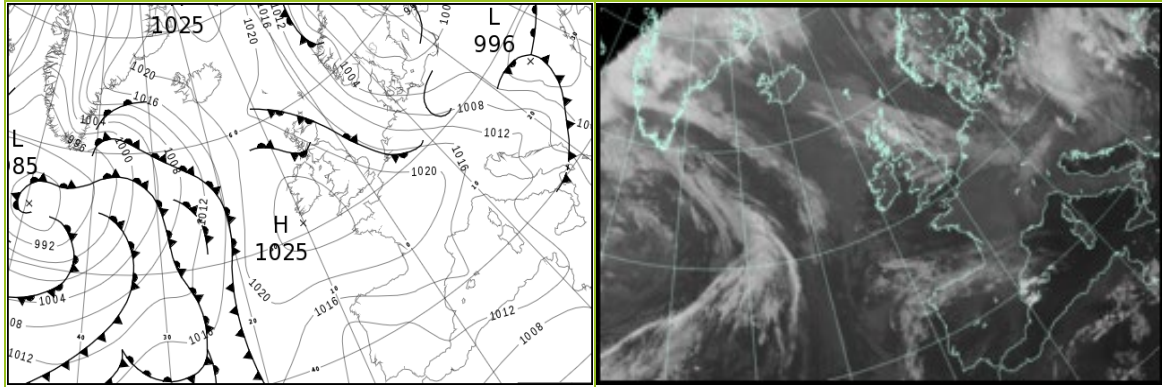

Daily Extremes

| | |
|--|--|
| <i>Highest Maximum</i> | 20.5°C Pershore (Hereford & Worcester, 35mAMSL) |
| <i>Lowest Maximum</i> | 11.4°C Balmoral (Aberdeenshire, 283mAMSL) |

Daily Weather Summary for Sunday 18 September 2022

Daily Weather Summary for Sunday 18 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 19 September 2022

This day's summary created 26/09/2022 03:03

Summary of the UK Weather for Monday 19 September 2022

It was a dry yet rather cloudy start to the day for most. Patchy rain was seen in parts of northern Wales, northern and central England, and western Scotland through the early hours. The best of any clear spells was in the southwest and far southeast England, where local ground frost formed. An occluded front stretched vertically across the UK, producing light showers through the morning across the north. Into the afternoon these occasional showers continued developing across parts of central Scotland and the Hebrides as the occlusion slowly edged southwards, meanwhile showers formed across the northwest of England and north Wales. Elsewhere it was a dry albeit cloudy day. By the afternoon, showers associated with the occluded front had edged into central England, and, on occasion, into east Scotland. In the evening, a good deal of cloud continued to develop over the UK, with breaks in western parts making way for mist and fog patches. Showers generally edged southwards, and light rain persisted in the northwest.

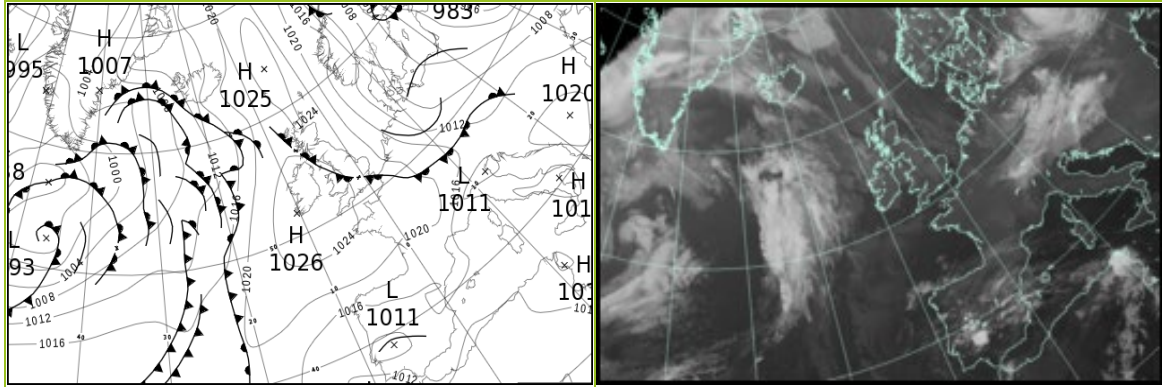

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 20.1°C Plymouth, Mountbatten (Devon, 50mAMSL) |
| <i>Lowest Maximum</i> | 11.7°C Lerwick (Shetland, 82mAMSL) |
| <i>Highest Minimum</i> | 13.8°C Prestatyn (Clwyd, 4mAMSL) |
| <i>Lowest Minimum</i> | -1.6°C Lyth No 2 (Caithness, 24mAMSL) |
| <i>Lowest Grass Minimum</i> | -3.5°C Lyth No 2 (Caithness, 24mAMSL) |
| <i>Most Rainfall</i> | 5.0mm Cholmondeley, Weaver Farm (Cheshire, 91mAMSL) |
| <i>Most Sunshine</i> | 10.8hr Bude (Cornwall, 15mAMSL) |
| <i>Highest Gust</i> | 23Kt 26mph Weybourne (Norfolk, 21mAMSL) |
| <i>Highest Gust (mountain)</i> | 26Kt 30mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

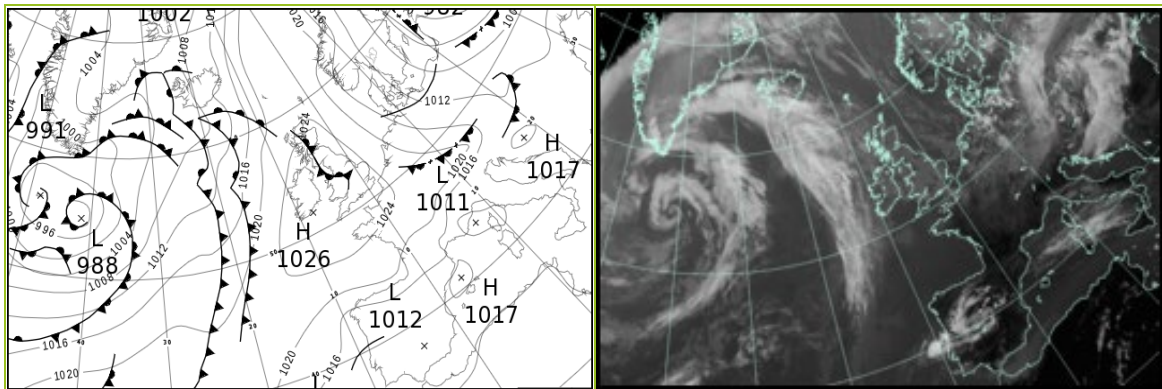

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 20 September 2022

This day's summary created 27/09/2022 03:03

Summary of the UK Weather for Tuesday 20 September 2022

It was a cloudy night for all, with much of the persistent rain across the far northwest, and some light drizzle across other northern areas. A weakening cold front brought a more persistent band of rain towards the Western Isles, but this started to break up as it reached the mainland towards dawn. Some cloud breaks occurred in Wales and southwest England, leading to the lowest temperatures and fog patches in these areas. The day continued cloudy, with the best of any sunny spells in the west, but it was generally dry under high pressure. Frontal systems brought some rain to the northwest of the UK, and this was heavy in parts of northwestern Scotland. Winds were westerly to southwesterly, with some northwesterlies in the southeast, and mostly light, though slightly breezier conditions prevailed underneath the fronts. It became chilly in the evening where skies were clearer in Wales and parts of England.

Daily Weather Summary for Tuesday 20 September 2022

Daily Weather Summary for Tuesday 20 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 21 September 2022

This day's summary created 28/09/2022 03:03

Summary of the UK Weather for Wednesday 21 September 2022

Low cloud covered the country for much of the night, with odd breaks producing clear spells in places. Most areas remained dry throughout, with only some occasional rain and drizzle affecting northern parts of Scotland in the early hours. Winds were generally light, but stronger in these northern areas. Patchy fog formed across large areas of eastern England, and in the southwest towards dawn. The fog cleared fairly readily, though was slower to lift in the southwest and the Vale of York. For the south, it was a mostly dry day under high pressure with some pleasant warm sunshine. For the north, it was cloudier with a cold front approaching the northwest of the country through the morning then slowly edging southeastwards over Northern Ireland and western Scotland through the afternoon. Here, it was breezy with some light rain. The front continued to sink into Borders and more generally across Scotland overnight, bringing some heavy bursts of rain with it.

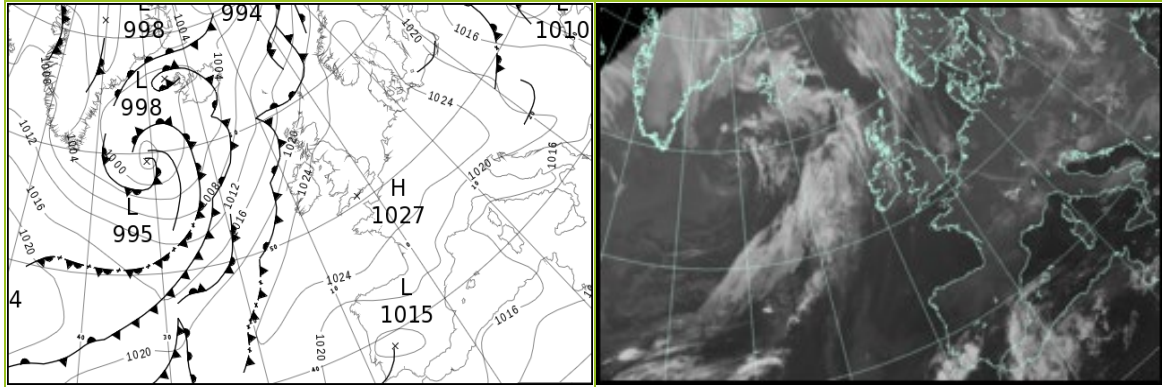

Daily Extremes

Daily Weather Summary for Wednesday 21 September 2022

Daily Weather Summary for Wednesday 21 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 22 September 2022

This day's summary created 29/09/2022 03:03

Summary of the UK Weather for Thursday 22 September 2022

As a cold front followed by an occlusion continued to edge southeastwards across the far northwest overnight, the early hours brought rain and cloud across the northern and western parts. Meanwhile, it was a dry start for the south and east. Early morning mist and fog were reported in southern regions. The cold front and associated vast band of rain and cloud continued to slowly progress southeastwards through the course of the day. The rain cleared Scotland shortly after midday and arrived in northern England and northwest Wales in the afternoon, fragmenting as it progressed. Sunny spells and isolated showers emerged to the northwest of the front. The band of rain continued its southeastward progression through England and Wales into the evening, affecting central and southwestern parts towards the end of the day.

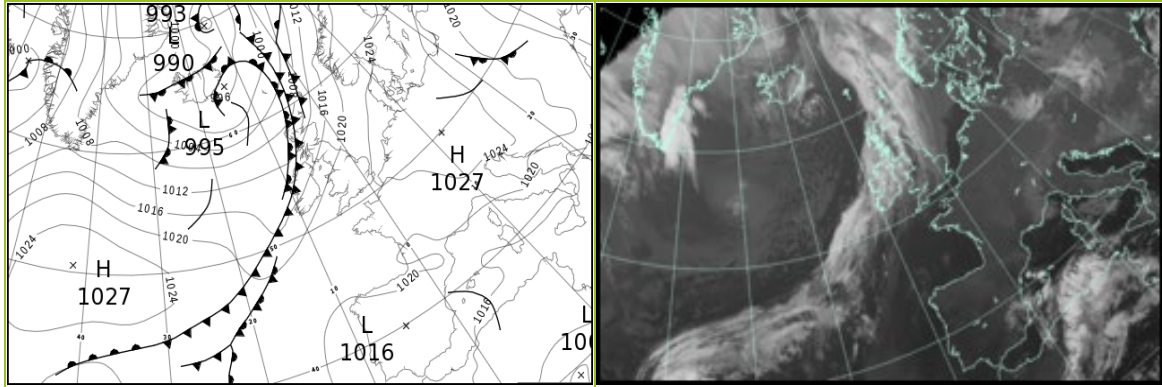

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 21.1°C Felsham (Suffolk, 92mAMSL) |
| <i>Lowest Maximum</i> | 13.9°C Warcop Range (Cumbria, 227mAMSL) |
| <i>Highest Minimum</i> | 15.6°C Valley (Gwynedd, 10mAMSL) |
| <i>Lowest Minimum</i> | 3.4°C South Newington (Oxfordshire, 105mAMSL) |
| <i>Lowest Grass Minimum</i> | -1.1°C South Newington (Oxfordshire, 105mAMSL) |
| <i>Most Rainfall</i> | 35.4mm Seathwaite (Cumbria, 129mAMSL) |
| <i>Most Sunshine</i> | 7.1hr Orkney: Loch Of Hundland (Orkney, 28mAMSL) |
| <i>Highest Gust</i> | 41Kt 47mph Shap (Cumbria, 263mAMSL) |
| <i>Highest Gust (mountain)</i> | 51Kt 59mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

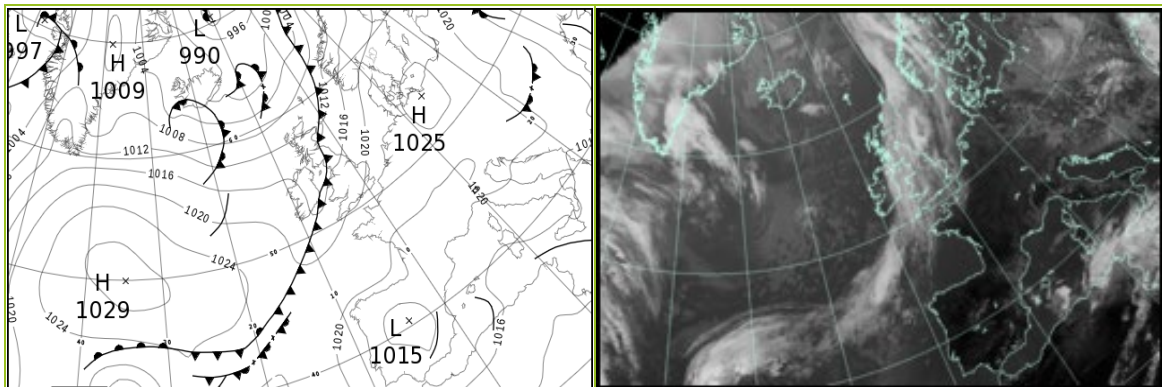

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 22 September 2022

North Atlantic and Europe analysis charts and satellite images at 0000 UTC

North Atlantic and Europe analysis charts and satellite images at 1200 UTC

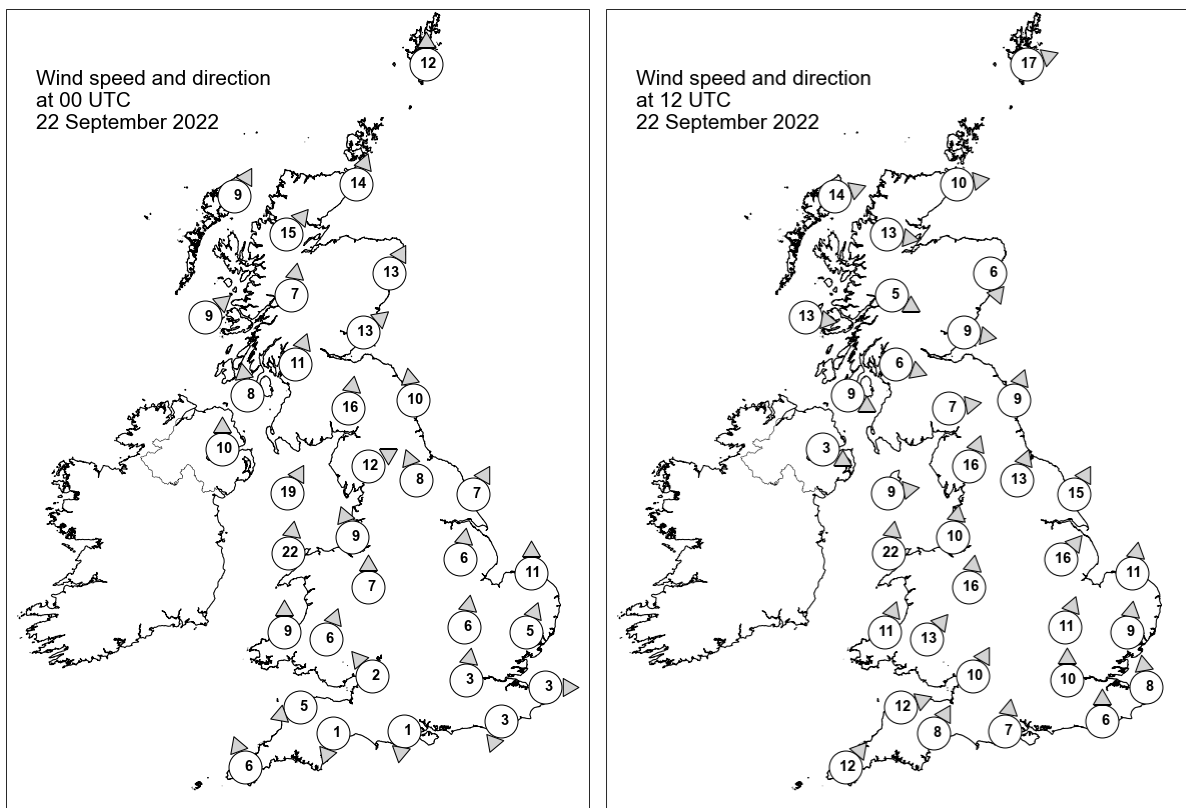

All satellite imagery copyright Met Office and EUMETSAT (European Organisation for the Exploitation of Meteorological Satellites). These show infra-red images from the geostationary MSG satellite. The rainfall rates are derived from both rain-radar and satellite data.

This day's summary created 30/09/2022 03:03

Summary of the UK Weather for Friday 23 September 2022

A waving cold front lying from the southwest of England to the far east of the country brought occasional outbursts of rain through the early hours, with the heaviest rain falling just after midnight in Lincolnshire. Away from the front the day started with a mixture of showers and clear spells, under which there was widespread mist and fog. Locally heavy rain continued to affect the far southeast throughout the day, causing local surface flooding. A band of scattered showers arrived over northwestern parts in the morning and continued to progress southeastwards, reaching Northern Ireland by midday, and northern England and northwest Wales in the afternoon. Elsewhere, it was a mainly dry day with plenty of sunny spells. Showery rain persisted in the far southeast into the evening. Most parts remained dry with clear spells towards the end of the day.

Daily Extremes

| | |
|--|--|
| <i>Highest Maximum</i> | 20.8°C Cardiff, Bute Park (South Glamorgan, 9mAMS�) also Pershore (Hereford & Worcester, 35mAMS�) |
| <i>Lowest Maximum</i> | 13.3°C Strathy East (Sutherland, 68mAMS�) |
| <i>Highest Minimum</i> | 15.0°C Isle Of Portland (Dorset, 52mAMS�) also Wight: St Catherines Point (Isle Of Wight, 20mAMS�) also Swanage (Dorset, 10mAMS�) |
| <i>Lowest Minimum</i> | 0.4°C Eskdalemuir (Dumfriesshire, 236mAMS�) |
| <i>Lowest Grass Minimum</i> | -2.2°C Aboyne No 2 (Aberdeenshire, 140mAMS�) |
| <i>Most Rainfall</i> | 34.6mm Herstmonceux, West End (East Sussex, 52mAMS�) |
| <i>Most Sunshine</i> | 10.8hr Morecambe No 2 (Lancashire, 7mAMS�) |
| <i>Highest Gust</i> | 29Kt 33mph Wight: Needles Old Battery (Isle Of Wight, 80mAMS�) also Orlock Head (Down, 35mAMS�) also Berry Head (Devon, 58mAMS�) |
| <i>Highest Gust (mountain)</i> | 29Kt 33mph Cairngorm Summit (Inverness-shire, 1237mAMS�) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

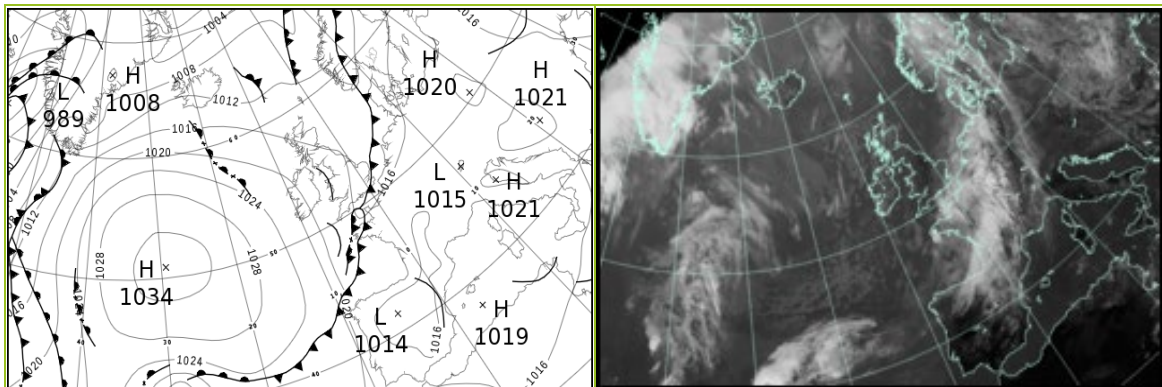

mAMS� refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 23 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 24 September 2022

This day's summary created 01/10/2022 03:03

Summary of the UK Weather for Saturday 24 September 2022

The day started with cloud and showers over County Antrim, the Isle of Man, Anglesey, and parts of Scotland. Elsewhere it was dry with some clear spells and fog reported in Cumbria, Suffolk, and the Scottish Highlands. It was chilly for many under light to moderate northwesterly to northeasterly winds. More rain was reported in Cornwall as a trough approached towards dawn. Several long troughs brought patchy cloud and scattered showers to England and Wales throughout much of the day. The trough in the southwest continued moving southwards, bringing more organized rain with it. Another band of rain in the southeast cleared the coast quite early on to leave a brighter day here. Winds were moderate southerlies along western coasts, and it was also breezy in the southeast. A lot of the showers died out in the evening and become confined to northwestern windward coasts, leaving clear periods and patchy cloud inland.

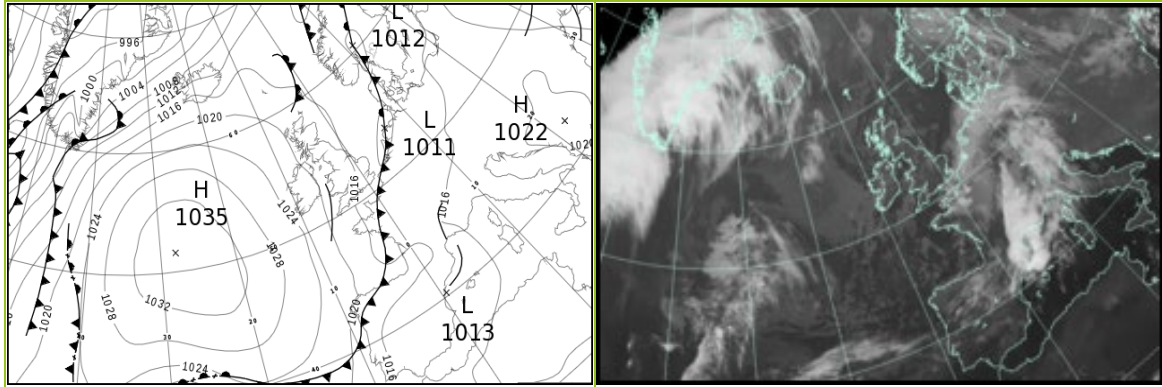

Daily Extremes

Daily Weather Summary for Saturday 24 September 2022

Daily Weather Summary for Saturday 24 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 25 September 2022

This day's summary created 02/10/2022 03:03

Summary of the UK Weather for Sunday 25 September 2022

It was a mostly clear and dry start for many across the UK. However, cloud began moving in from the northwest shortly after midnight. Some scattered showers were reported in East Anglia and the Western Isles of Scotland, while the Orkney Islands saw some more organised rain in the small hours. Early morning felt rather cold under any clear spells. A deep low pressure system sat to the north of Scotland throughout the day, bringing several fronts southwards with it. Cloud continued building throughout the day in the north and northwest, bringing a few light showers along with a band of heavier rain to Scotland by the afternoon. Winds strengthened across Scotland throughout the day, producing gales (including gusts of 60mph) in the far north. Across England and Wales it was calmer with sunny spells in the morning and patchy cloud gradually increasing through the afternoon. Winds remained light or moderate in these areas. By the evening the front had continued to sink southwards over the rest of the UK, bringing the stronger winds and rain to Wales and central England.

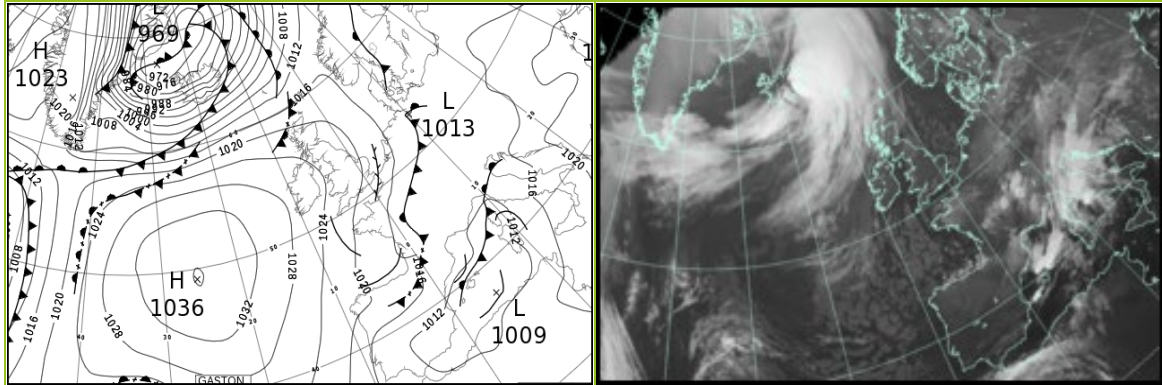

Daily Extremes

| | |
|--|--|
| <i>Highest Maximum</i> | 18.2°C Preston, Cove House (Dorset, 44mAMSL) |
| <i>Lowest Maximum</i> | 12.2°C Buxton (Derbyshire, 307mAMSL) also Spadeadam No 2 (Cumbria, 285mAMSL) |
| <i>Highest Minimum</i> | 12.1°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL) |
| <i>Lowest Minimum</i> | -0.3°C Eskdalemuir (Dumfriesshire, 236mAMSL) |
| <i>Lowest Grass Minimum</i> | -3.7°C Pitsford (Northamptonshire, 114mAMSL) |
| <i>Most Rainfall</i> | 26.0mm Willingale (Essex, 59mAMSL) |
| <i>Most Sunshine</i> | 7.5hr Shoeburyness, Landwick (Essex, 2mAMSL) |
| <i>Highest Gust</i> | 52Kt 60mph Lerwick (Shetland, 82mAMSL) |
| <i>Highest Gust (mountain)</i> | 97Kt 112mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

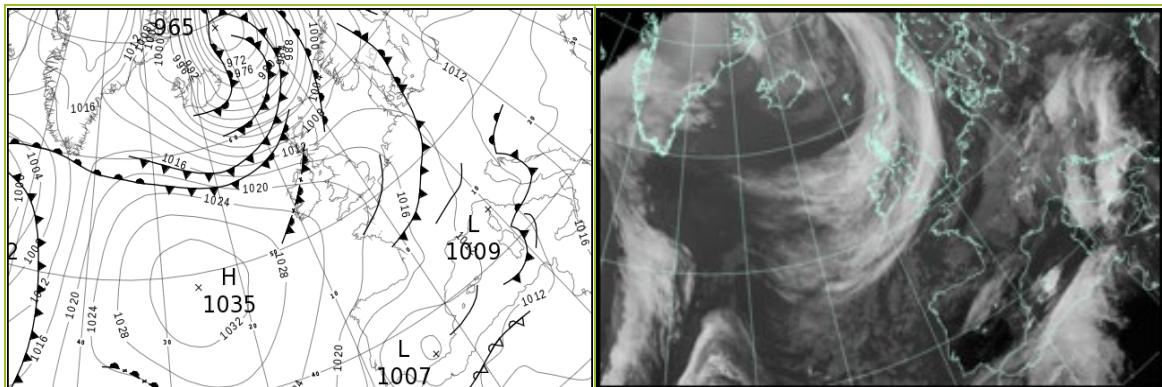

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 25 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 26 September 2022

This day's summary created 03/10/2022 03:03

Summary of the UK Weather for Monday 26 September 2022

A series of fronts, including multiple occlusions and a cold front, moved southwards through the country in the early hours. A band of rain associated with the southernmost occlusion brought locally heavy precipitation to southern England in the early morning. Multiple smaller bands of showery rain followed through central and western parts, fragmenting as they progressed. Northern Ireland and Scotland also saw a wet start as scattered showers were reported there. The fronts continued to travel southwards through the remainder of the morning, clearing the UK by midday. Behind the main band of rain there was a mixture of sunshine and further scattered showers, with the best of the sunny spells being in the south and west and the most frequent and heaviest of the showers occurring across the northwest and North Sea. A northerly to northwesterly flow, which was moderate to strong at times around the coasts, meant that it felt slightly cooler for many through the day but helped keep temperatures closer to average into the night.

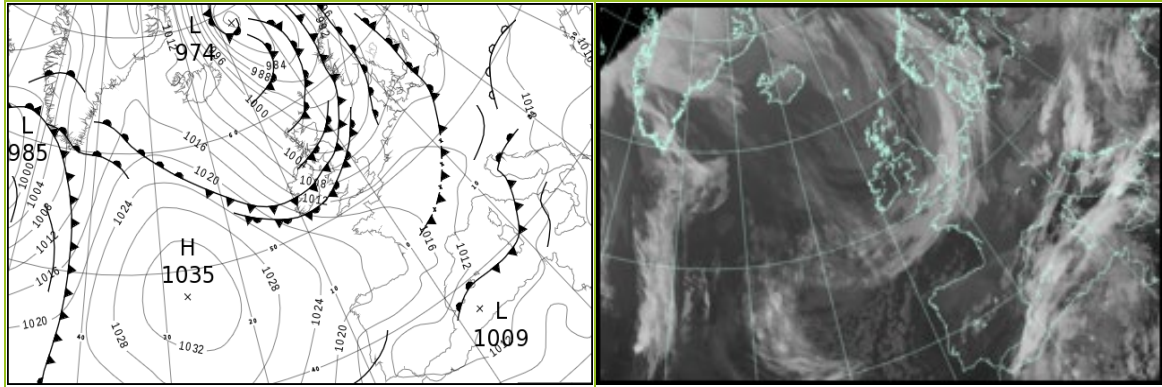

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 17.9°C Preston, Cove House (Dorset, 44mAMSL) |
| <i>Lowest Maximum</i> | 8.6°C Loch Glascarnoch (Ross & Cromarty, 269mAMSL) |
| <i>Highest Minimum</i> | 13.5°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL) |
| <i>Lowest Minimum</i> | 5.3°C Eskdalemuir (Dumfriesshire, 236mAMSL) |
| <i>Lowest Grass Minimum</i> | 1.1°C Dawyck Botanic Garden (Peebleshire, 183mAMSL) |
| <i>Most Rainfall</i> | 25.0mm Loch Glascarnoch (Ross & Cromarty, 269mAMSL) |
| <i>Most Sunshine</i> | 8.3hr Glasgow, Bishopton (Renfrewshire, 59mAMSL) |
| <i>Highest Gust</i> | 51Kt 59mph Orlock Head (Down, 35mAMSL) |
| <i>Highest Gust (mountain)</i> | 62Kt 71mph Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

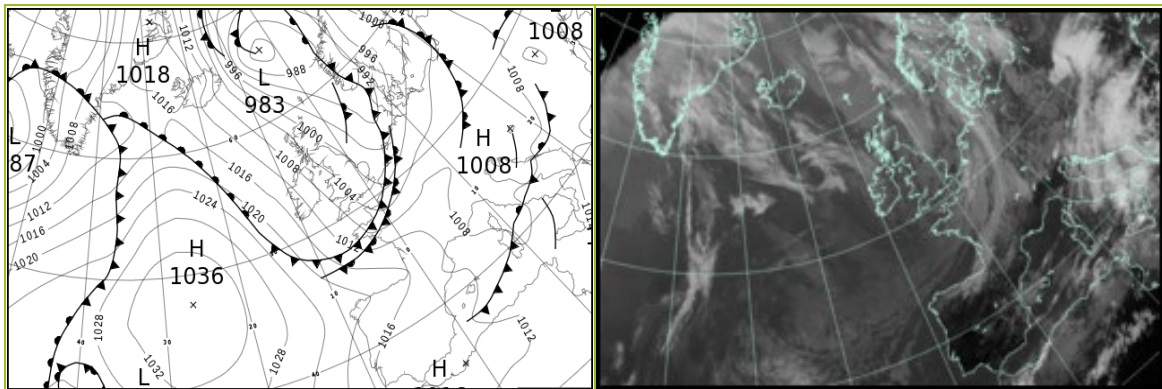

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 27 September 2022

This day's summary created 04/10/2022 03:03

Summary of the UK Weather for Tuesday 27 September 2022

With an area of high pressure to the west, and generally lower pressure to the northeast, a series of fronts travelled southwards across the UK overnight making way for a wet and breezy day. A persistent slow moving trough touched upon Wales and Northern Ireland and brought persistent light rain through the early hours. Northern Scotland also saw a rainy start with gusty conditions, reaching up to 36 knots in places. Showers continued through the day, with the main focus of these across Northern Ireland and into the Midlands as well as northern Scotland. There were some spells of sunshine, mostly in southern Scotland and the north and west of England. A spell of more persistent rain associated with a warm front arrived into Devon and Cornwall in the late morning and continued to affect the far southwest into the evening. Blustery north to northwesterly winds meant that it felt rather cool.

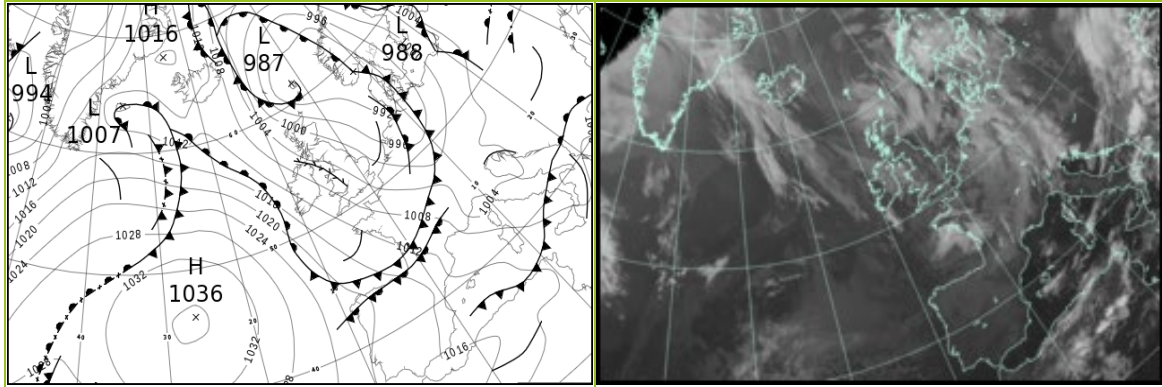

Daily Extremes

| | |

Daily Weather Summary for Tuesday 27 September 2022

Daily Weather Summary for Tuesday 27 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 28 September 2022

This day's summary created 05/10/2022 03:03

Summary of the UK Weather for Wednesday 28 September 2022

An area of low pressure dominated the UK weather throughout Wednesday. The early hours were characterised by light scattered showers on northern, eastern and Welsh coasts. Patchy mist and fog developed in central inland areas close to dawn but these dissipated shortly after, leaving a dry day with a mix of sunshine and cloud for central parts of the country. In western areas and Northern Ireland, the scattered showers grew stronger through the morning moving southwards over some inland areas, whereas they tended to remain near the coast in the east. An occluded front then brought in a larger band of rain from the North Sea, which reached the eastern Border regions by midday. This continued to move southwestwards bringing heavy rain to many parts of southern Scotland and northern England. Meanwhile, scattered showers associated with a warm front were seen in northeast Scotland. By the evening most of the showers had dissipated, but the band of rain continued to push southwestwards, affecting the western coasts of northern England and southern Scotland.

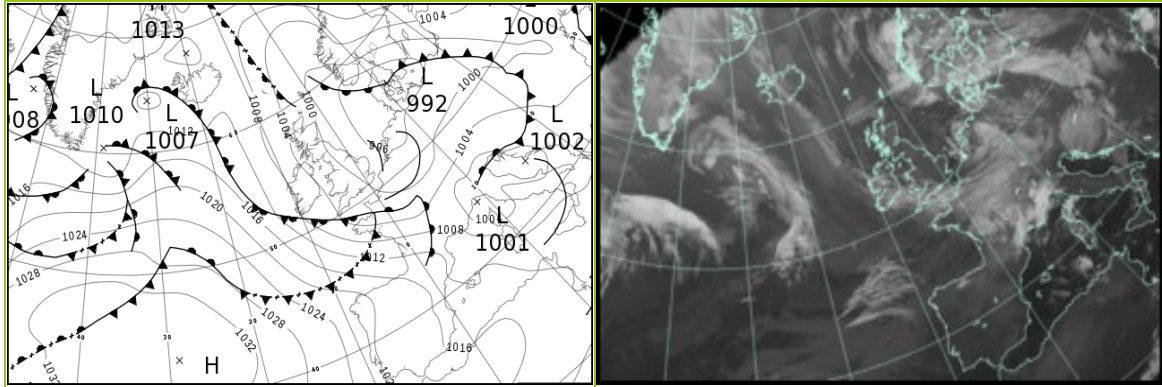

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 17.5°C Preston, Cove House (Dorset, 44mAMSL) |
| <i>Lowest Maximum</i> | 10.8°C Balmoral (Aberdeenshire, 283mAMSL) |
| <i>Highest Minimum</i> | 12.2°C Bude (Cornwall, 15mAMSL) |
| <i>Lowest Minimum</i> | -0.3°C Benson (Oxfordshire, 57mAMSL) |
| <i>Lowest Grass Minimum</i> | -3.0°C Benson (Oxfordshire, 57mAMSL) |
| <i>Most Rainfall</i> | 37.2mm Goldsclough (Northumberland, 305mAMSL) |
| <i>Most Sunshine</i> | 8.9hr Bute: Rothesay No2 (Buteshire, 36mAMSL) |
| <i>Highest Gust</i> | 37Kt 43mph Brizlee Wood (Northumberland, 250mAMSL) |
| <i>Highest Gust (mountain)</i> | 43Kt 49mph Great Dun Fell No 2 (Cumbria, 847mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

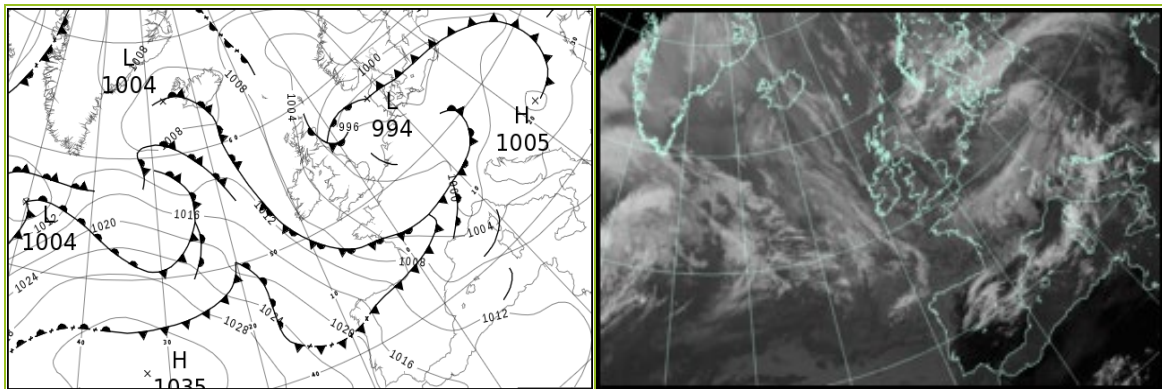

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 28 September 2022

Daily Weather Summary for Wednesday 28 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 29 September 2022

This day's summary created 06/10/2022 03:03

Summary of the UK Weather for Thursday 29 September 2022

A low pressure system brought an occluded front southwards across the country, bringing an area of heavy rain across Wales and the southwest of England in the early hours of the morning. Behind the front, some scattered showers remained but it was also clear in places, where it then turned chilly. Some low cloud and fog developed over parts of the Midlands and south and east England towards dawn. It was a day of sunny spells and scattered showers across many parts of the UK. A more organised band of showers affected Gwynedd, Conwy, Devon and Cornwall in the morning and some light showers were seen over Midlands. Low cloud covering central areas in the early morning broke through by midday, allowing sunny breaks for many through the latter part of the day. Northern England and northeast Scotland saw scattered showers develop in the afternoon. These showers then travelled southwestwards, affecting central England and northern Wales into the evening.

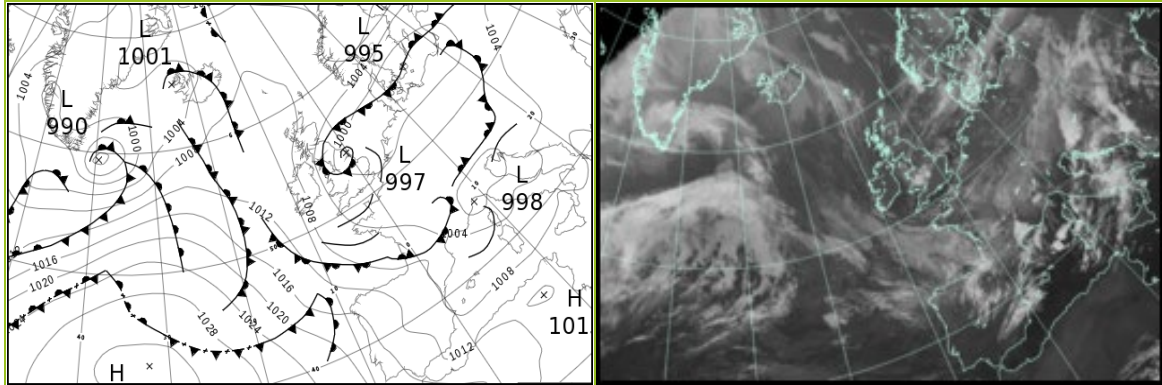

Daily Extremes

| | |
|--|---|
| <i>Highest Maximum</i> | 19.2°C Walney Island (Cumbria, 15mAMSL) |
| <i>Lowest Maximum</i> | 11.7°C Lerwick (Shetland, 82mAMSL) |
| <i>Highest Minimum</i> | 11.8°C Colwyn Bay (Clwyd, 36mAMSL) |
| <i>Lowest Minimum</i> | 0.7°C Writtle (Essex, 32mAMSL) |
| <i>Lowest Grass Minimum</i> | -3.8°C Goudhurst (Kent, 85mAMSL) |
| <i>Most Rainfall</i> | 28.4mm South Uist Range (Western Isles, 4mAMSL) |
| <i>Most Sunshine</i> | 10.5hr Shoeburyness, Landwick (Essex, 2mAMSL) |
| <i>Highest Gust</i> | 38Kt 44mph Aberporth (Dyfed, 133mAMSL) |
| <i>Highest Gust (mountain)</i> | 54Kt 62mph Aonach Mor (Inverness-shire, 1130mAMSL) also Cairngorm Summit (Inverness-shire, 1237mAMSL) |
| <i>Greatest Snow Depth at 0900 UTC</i> | No non-zero values. |

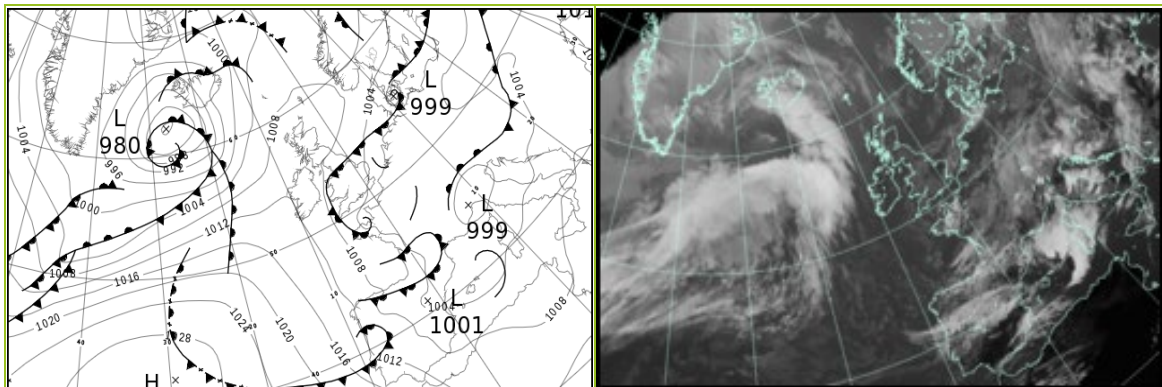

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 30 September 2022

This day's summary created 07/10/2022 13:02

Summary of the UK Weather for Friday 30 September 2022

Overnight, a low pressure system slowly edged towards the UK from the north, bringing a large band of heavy rain into the northwest of Scotland just after midnight. This travelled southeastwards and covered Northern Ireland, most of Scotland and parts of northwest England by dawn. Alongside the rain, strong winds and gales hit the northwest of Scotland, with the strongest winds being in Orkney and Shetland. Elsewhere, extensive mist and fog developed in the slack flow ahead of the fronts, but rose to form low stratus cloud around dawn. Showers reached the southwest by mid-morning and central England and the northeast by noon. Into the afternoon, rain started to ease in western parts of Scotland and Northern Ireland, as the band encroached on the southeast of England. Gusty conditions remained across the UK, particularly in the far north of Scotland, reaching up to 75 knots across the isles, however these eased into the early evening. Rain eased in the southeast into the evening, with clear spells and showers to follow. Meanwhile, heavier rain and coastal gales continued in the northwest.

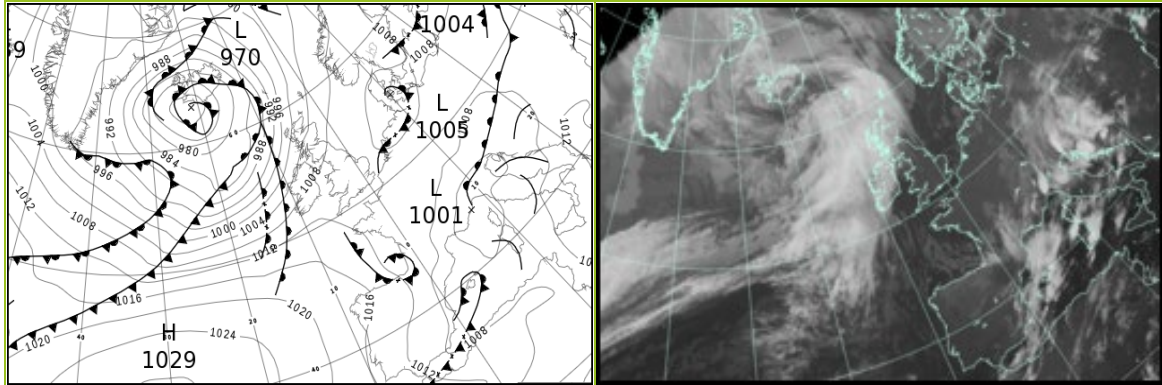

Daily Extremes

| | |
|--|--|
| <i>Highest Maximum</i> | 17.4°C Shoeburyness, Landwick (Essex, 2mAMSL) |
| <i>Lowest Maximum</i> | 11.4°C Fylingdales (North Yorkshire, 262mAMSL) |

Daily Weather Summary for Friday 30 September 2022

Daily Weather Summary for Friday 30 September 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Guidance Notes

UTC = Universal Coordinated Time. For the UK UTC is the same as GMT (Greenwich Mean Time).

National boundaries shown on the European station map are for illustrative purposes only.

Daily extremes

- Daily extremes have been manually confirmed by Met Office Observations Quality Management as valid observations from the live database at the time of checking. However, more extreme values may still be possible if they occur after the time of production.
- Mountain stations above 500 masl are excluded from lowest temperatures, highest gust speeds and greatest snow depths at 0900 UTC. This is because they are not considered representative of low level areas.
- Counties quoted against each station are based on historical county boundaries pre-1974 and may not reflect current administrative boundaries.

Analysis charts and satellite imagery

- The satellite imagery is infra-red imagery from the geostationary MSG satellite.
- The rainfall image is derived from satellite data from MSG and rain-radar data. This represents a snapshot of instantaneous rain-rates at 0000 UTC and 1200 UTC and so does not necessarily reflect daily accumulations in the rainfall station map.
- Any analysis charts or satellite images which are unavailable will be displayed as white space.

Station maps

- The UK maps show station data for the same set of stations presented UK data table. These stations are selected to provide good spatial coverage across the UK; they represent only a fraction of the overall UK observing network.
- Wind speed maps show wind speed in Kt and direction both averaged over the hour up to the time of observation. 1 Kt = 1.151 mph.

Hourly station data

- The data tables provide spot hourly observations from synoptic messages at 0000 and 1200 UTC. Missing data are denoted by '-'.

- Pressures are mean sea level pressure in hPa.
- For UK stations, Gibraltar and Jersey, the wind speeds and directions are both averaged over the hour up to the time of observation. However, for European stations wind speeds and directions are both averaged over a 10-minute period up to the time of observation.
- Wind speeds are in Kt. Wind directions are stored in the database every 10 degrees and have been converted to the nearest point of the compass. These give the direction the wind is blowing from, not to.
- Cloud amounts are in Oktas from 0 (clear) to 8 (overcast). 9 indicates sky obscured (eg by fog).
- Air temperature and dew point temperature are in Celsius.

Temperature maps

- Daily maximum, minimum and grass minimum temperatures are in Celsius.
- The period for the daily maximum temperature on day D is defined from 0900 UTC day D to 0900 UTC day D+1.
- The period for the daily minimum and grass minimum temperatures on day D is defined as 0900 UTC day D-1 to 0900 UTC day D.
- On any given day D the minimum will typically occur in the early hours of the morning and the maximum in early afternoon.

Rainfall, sunshine and max gust speed maps

- Daily rainfall is in mm from 0900 UTC day D to 0900 UTC day D+1.
- Daily sunshine is in hours from Kipp and Zonen CSD1 automatic sunshine records. Bright sunshine is defined as exceeding 120 W/m².
- Max gust speeds are the daily max gust in Kt from 0000-0000 UTC

Snow maps

- The day of snow falling map displays data from present weather sensors, showing stations which have recorded sleet or snow falling at any point in the day (0000-0000 UTC).
- The snow lying map shows level snow depth as recorded by the automatic snow depth sensors at 0900 UTC. These snow depth sensors do not record snow depth if this is less than 1cm.
- Snow depth sensors are normally operational from October to April, in the event of snow falling outside this period data availability may be limited.
- Snow maps will only be displayed if one or more of the selected stations on that date have recorded either snow falling or non-zero snow depths. If snow maps are not

displayed it is still possible that other stations in the network have recorded a day of sleet or snow falling or non-zero snow depth.
