## DAILY WEATHER REPORT OF THE METEOROLOGICAL OFFICE.

## CHANGE OF UNITS OF MEASUREMENT.

## BAROMETRIC PRESSURE IN PRESSURE UNITS.

In their Eighth Report to the Lords Commissioners of His Majesty's Treasury, the Meteorological Committee intimated their intention to use Absolute Units for pressure in the Daily Weather Report of the Meteorological Office from 1st May, 1914.

The absolute unit of pressure on the Centimetre-Gramme-Second system\* is the dyne per square centimetre. As this unit is exceedingly small a practical unit one million times as great has been suggested. This unit, the megadyne per square centimetre, is called a "bar." In the Daily Weather Report the centibar and the millibar, respectively, the hundredth and the thousandth part of the "bar" are adopted as working units. The relation between the millibar and the inch of mercury is given in the tables overleaf.

## Reasons for the Change.

One of the principal reasons for this change is that it is a step towards the adoption of a system of units which may become common to all nations.

The system was approved by the Meteorological Council in 1904 and by the Gassiot Committee of the Royal Society in 1910. Upon the initiative of Professor V. Bjerknes, formerly professor at Christiania, and now of the Geophysical Institute at Leipzig, it was used in important publications of the Carnegie Institution of Washington, and was adopted by the International Commission for Scientific Aeronautics for the international publication of the results of the investigation of the upper air. Since 1907 the system has been used in the Meteorological Office for the upper air, and since 1911 for the data from the Observatories where Centimetre-Gramme-Second units have been used for many years in connection with magnetism and electricity. The Weather Bureau of the United States has adopted millibars and *absolute temperatures* on the Centigrade Scale for the issue of daily charts of the Northern Hemisphere, which began on 1st January, 1914; the Royal Meteorological Society has decided to use millibars for the expression of the series of pressure normals for the British Isles, which it is now preparing; and the Meteorological Office has followed the example of the Weather Bureau in using absolute units for the daily maps in the Weekly Weather Report, but its isobars are figured in centibars as they were in the specimen issued with the Eighth Annual Report.

## The Scientific Appeal.

The ground of scientific appeal to all nations to adopt the bar, centibar, and millibar is that these units fall naturally into place as members of the Centimetre-Gramme-Second system of units which has already become universal for Magnetism and Electricity and most branches of Physics. Its principles are therefore well known. The inch and the millimetre are really units of length, and to estimate the effect of a pressure measured in terms of height of a column of mercury, it

is necessary to introduce the value of the density of mercury at some particular temperature and the value of the acceleration due to gravity at a particular place. It is well known that the atmospheric pressure at sea level in Britain varies between  $13\frac{1}{2}$  and  $15\frac{1}{2}$  lbs. weight per square inch. The pound weight per square inch is often used by engineers, but it is not a convenient unit because its value depends upon latitude.

## The Upper Air.

The past fifteen years have witnessed the collection of extensive meteorological observations in the upper air made by means of kites and balloons, from which important results have already been deduced. The absolute system of units is the most convenient for the discussion of the data so collected, and it is being generally adopted for the purpose. The rapid development of aviation makes it impossible to draw a line between the academic study of the meteorology of the upper air and the practical meteorology of the Daily Weather Report. The use of two systems of units, one for observations made at the surface, and the other for observations taken at higher levels, could only retard progress.

## Practical Considerations.

It is acknowledged that an accuracy of one thousandth of an inch is not really attainable in practice. For many years the Inspectors of the Meteorological Office have had to be satisfied with agreement within .003 in., and now the National Physical Laboratory has ceased to certify barometers of the Kew pattern to the thousandth of an inch. Consequently, with an instrument graduated to .001 in., observers are being asked to read to an accuracy which is acknowledged to be unattainable. On the other hand an accuracy of the hundredth of an inch is not good enough for scientific purposes.

The practical degree of precision for a mercury barometer of the Kew type is *one-tenth of a millibar*. Graduation in centibars and millibars, with a simple vernier scale for estimating to tenths of a millibar, thus brings the demand for accuracy made upon the observer into harmony with that actually attainable. The new graduation does away with the complications of the conventional vernier scale in use on barometers graduated in inches, and consequently the risk of errors of observation is reduced.

## The Percentage Barometer.

Another advantage is that the Bar, or Centimetre-Gramme-Second atmosphere, differs but little from the standard atmosphere. The equivalent of the adopted normal value at sea level of 29.92 mercury inches is 101.32 centibars, or 1013.2 millibars. The lowest barometer value ever observed for sea level in the British Isles is 925.5 millibars, the equivalent of 27.33 inches. This value was recorded at Ochtertyre on January 26th, 1884. The highest value is 1053.5 millibars, the equivalent of 31.11 mercury inches. It was recorded at Aberdeen on January 31st, 1902.

\* Particulars of the Centimetre-Gramme-Second system are given in the *Observers Handbook*, 1913 edition.

A reading of 100 centibars, or 1,000 millibars, is equivalent to 29.53 mercury inches. It will be remembered that the word "change" is placed opposite the sea-level reading 29.5 in the conventional descriptions engraved on dial barometers. Thus in a barometer graduated in centibars the reading 100 would occupy the position conventionally marked "change."

*Practical Course to be pursued.*

It is evidently impossible at one operation to change all the barometers in use in the various services, and even in the most favourable circumstances there must be for many observers a time when the readings are taken on one scale, and the results quoted or published in another. Tables of equivalents are given herewith for making the necessary conversion.

The barometers issued by the Meteorological Office will be graduated in both scales.\*

RAINFALL DATA IN MILLIMETRES.

As a further step in the direction of international uniformity all rainfall data will be published in the Daily Weather Report in millimetres instead of inches. The occasion for making the change is that modifications are being introduced into the telegraphic code used for the exchange of meteorological information in Europe.

The reading of rainfall in this country has been carried to hundredths, sometimes to thousandths of an inch, but

the readings to the higher degree of accuracy have seldom any practical meaning. The readings on the metric system are carried to 0.1 millimetres, 0.004 inch, which represents satisfactorily the highest degree of accuracy. The range is from .01 to 3, 4, or even more inches in exceptional circumstances, for a day's rain. The telegraphic code hitherto in use has made provision for reporting amounts up to 10 inches, though the large majority of the readings are under 2 inches. The code now to be introduced makes provision for reporting amounts up to 100 millimetres or 4 inches.

As one inch is approximately equivalent to 25 millimetres the conversion from millimetres to inches, or *vice versa*, may be made with sufficient accuracy for most purposes by multiplying or dividing by 4 and appropriately shifting the decimal point. Tables of conversion are given herewith.

WIND VELOCITIES IN METRES PER SECOND.

Wind force will be specified on the Beaufort scale. Occasional reports are received from anemometer stations regarding the extreme wind velocities attained in gales. These data are published on the front page of the report. The unit of wind velocity used in such cases will be the *metre per second*. Tables for converting velocities from miles per hour to metres per second, or *vice versa*, are given below.

\* It should be borne in mind that the inch scale is graduated to be correct at 62° F., the millibar scale at the temperature of the freezing point, 32° F. When both scales are at the same temperature the relation between them is that shown in the conversion tables corrected by the subtraction of 0.3 millibar, e.g., the graduation 28.0 inch should agree with the graduation 948.2-3 or 947.9 millibars.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

The thermometer rose to between 50° and 55° in many parts of the United Kingdom. Very little bright sunshine was registered in the west and north but on the south and east coasts of England the duration amounted to between 8 and 9 hours. Rain fell in all but the extreme northern districts. Wireless reports show that as far west as the 26th meridian ships experienced fresh to strong Westerly and Southerly winds, and fair weather.

NOTE.—The information relating to weather is indicated by the following letters—b, blue sky; bc, sky half clouded; c, sky three parts clouded; d, drizzling rain; e, wet air, without rain falling; f, fog; g, gloom; h, hall; l, lightning; m, mist; o, overcast sky; p, passing showers; q, squalls; r, rain; s, snow; t, thunder; u, ugly, threatening sky; v, visibility, unusual transparency; w, dew; x, hoar frost; z, dust-haze, or smoke.

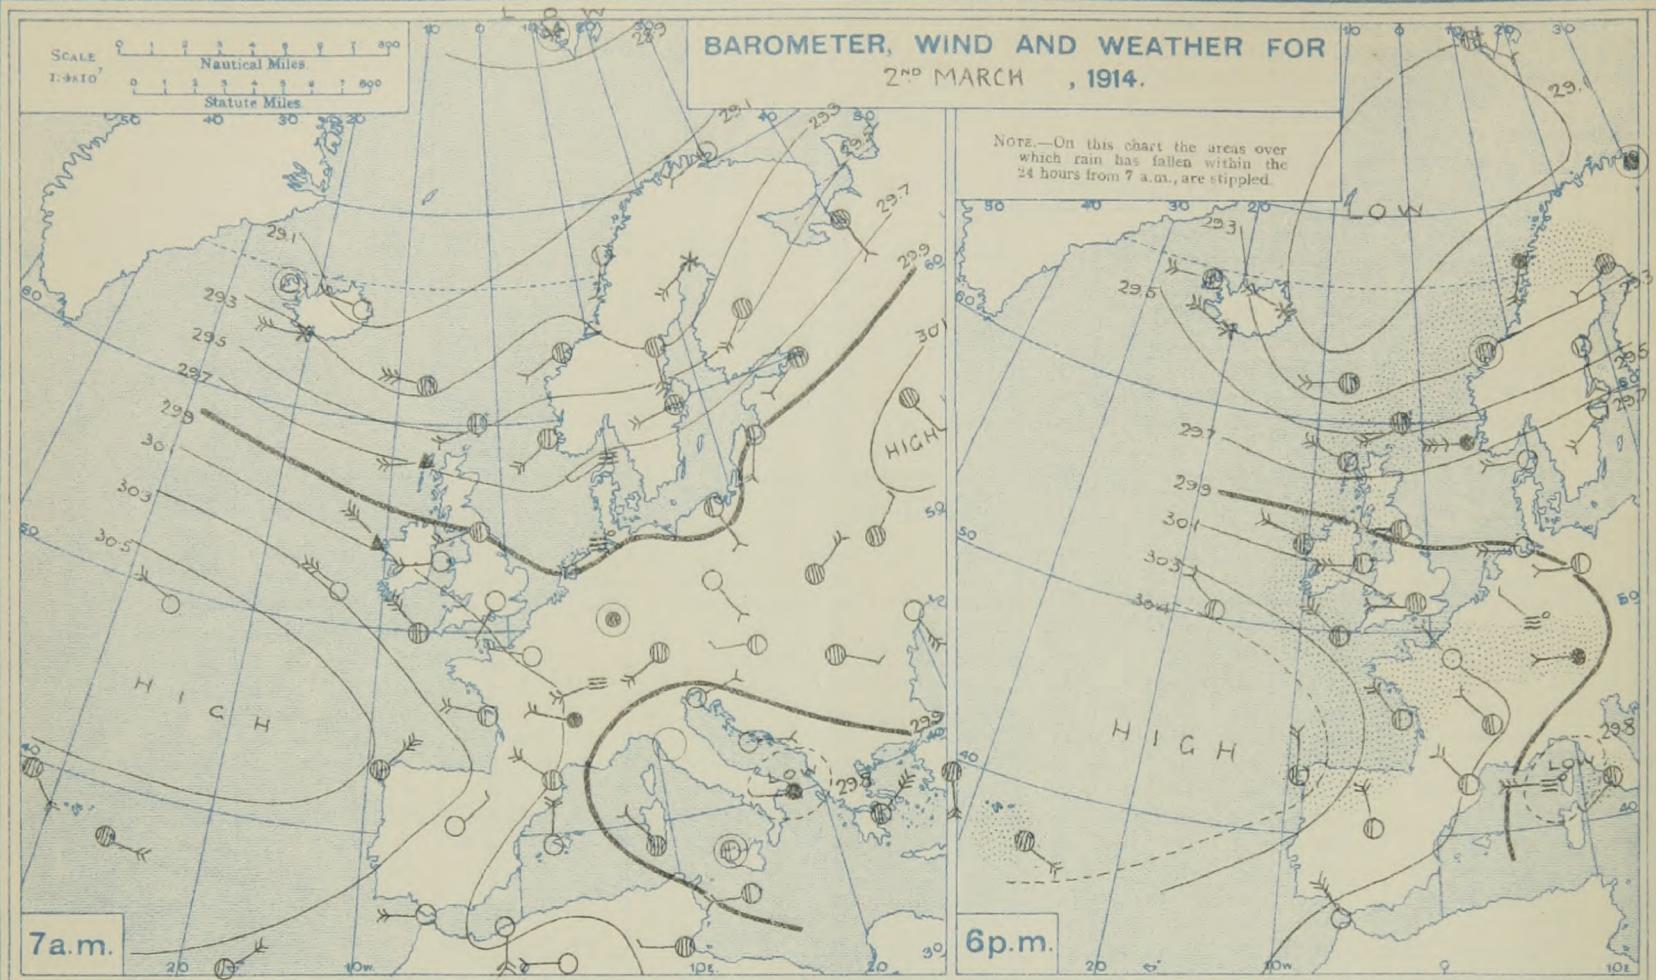

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers.

Temperature rose to 50° or a little higher in many parts of England, and the duration of bright sunshine was very large over the Kingdom generally, more than 8 hours at many stations, and more than 9 hours at some places in the east. Slight to moderate amounts of rain were experienced in most parts of the British Isles.

# SYNOPTIC CHART FOR 7 a.m., Tuesday, 3<sup>rd</sup> MARCH, 1914.

## GENERAL INFERENCE.

The depression in the north seems likely to move eastward or south-eastward, while small pressure irregularities will probably move in a similar direction over the United Kingdom.

## EXPLANATION.

**BAROMETER.**—Isobars are drawn for each tenth of an inch.

**WIND.**—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

**TEMPERATURE.**—Given in degrees Fahrenheit.

Isotherms shown by dotted lines.

**WEATHER.**—Shown by the following symbols:—

○ clear sky. ○ sky + clouded. ○ sky + clouded.

○ sky + clouded. ○ overcast sky. ○ rain falling.

\* slow. ▲ hail. ■ fog. ≡ mist. T, thunder.

T, thunderstorm.

**FURTHER OUTLOOK.**

SYNOPTIC CHART FOR 7 a.m., Wednesday, 4<sup>th</sup>

MARCH, 1914.

#### GENERAL INFERENCE.

The depression which is advancing over Ireland will probably move in an easterly direction over the Kingdom during the ensuing twenty-four hours, causing more or less rain very generally, and an increase in the force of the wind, especially on our south-western and southern coasts.

#### EXPLANATION.

**BAROMETER.**—Isobars are drawn for each tenth of an inch.

**WIND.**—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

Calm (○)

**TEMPERATURE.**—Given in degrees Fahrenheit.

Isotherms shown by dotted lines.

**WEATHER.**—Shown by the following symbols:—

○ clear sky, ○ sky ½ clouded, ○ sky ¾ clouded,

○ sky ¾ clouded, ○ overcast sky, ● rain falling,

\* snow, ▲ hail, ≡ fog, ≡° mist, T, thunder,

T, thunderstorm.

Temperature rose to about 50° on the extreme southwest coasts, but remained as low as 40° at Nairn. Rain has fallen at almost all stations, the quantity being heavy in some parts of Ireland and Scotland. Scarcely any bright sunshine was recorded over the Kingdom generally, but at Falmouth the figure was 3.9 hours.

FURTHER OUTLOOK.

# SYNOPTIC CHART FOR 7 a.m., Thursday, 5<sup>th</sup> MARCH, 1914.

## GENERAL INFERENCE.

The new depression which is causing a brisk fall of the barometer in the north-west of Ireland will extend or move in an easterly or north-easterly direction, and the wind over the United Kingdom is consequently expected to remain between South-West and North-West.

## EXPLANATION.

**BAROMETER.**—Isobars are drawn for each tenth of an inch.

**WIND.**—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

Calm

**TEMPERATURE.**—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

**WEATHER.**—Shown by the following symbols:

○ clear sky. ○ sky & cloudy. (○) sky & cloudy.

(○) sky & cloudy. (○) overcast sky. ● rain falling.

\* snow. ▲ hail. ☛ fog. ☛ mist. T, thunder.

T, thunderstorm.

## NOTES ON YESTERDAY'S WEATHER.

Temperature rose to above 50° in many parts of the Kingdom, and over England and Ireland the night was mild. Scarcely any bright sunshine was recorded, and most localities experienced some rain. As a rule, however, the quantity was very slight. According to wireless reports a moderate to fresh or strong Westerly or South-Westerly breeze prevailed between the Irish coasts and the 25th meridian.

FURTHER OUTLOOK.

SYNOPTIC CHART FOR 7 a.m., Friday, 6<sup>th</sup> MARCH, 1914.

GENERAL INFERENCE.

There are no indications of any great change in the general distribution of pressure, but as the depression centred over Shetland moves away towards Scandinavia the wind will decrease in force on our northern and north-western coasts. Further depressions are likely to arrive from the westward shortly.

## NOTES ON YESTERDAY'S WEATHER.

The wind blew with the force of a gale or strong gale on several parts of our north-western coasts during the night. Rain fell very generally, but the quantity was not large except in Shetland. Scarcely any bright sunshine was recorded at most stations there was none. The thermometer rose to a maximum of 50° or a little higher over a large area, and the night was mild in England and Ireland.

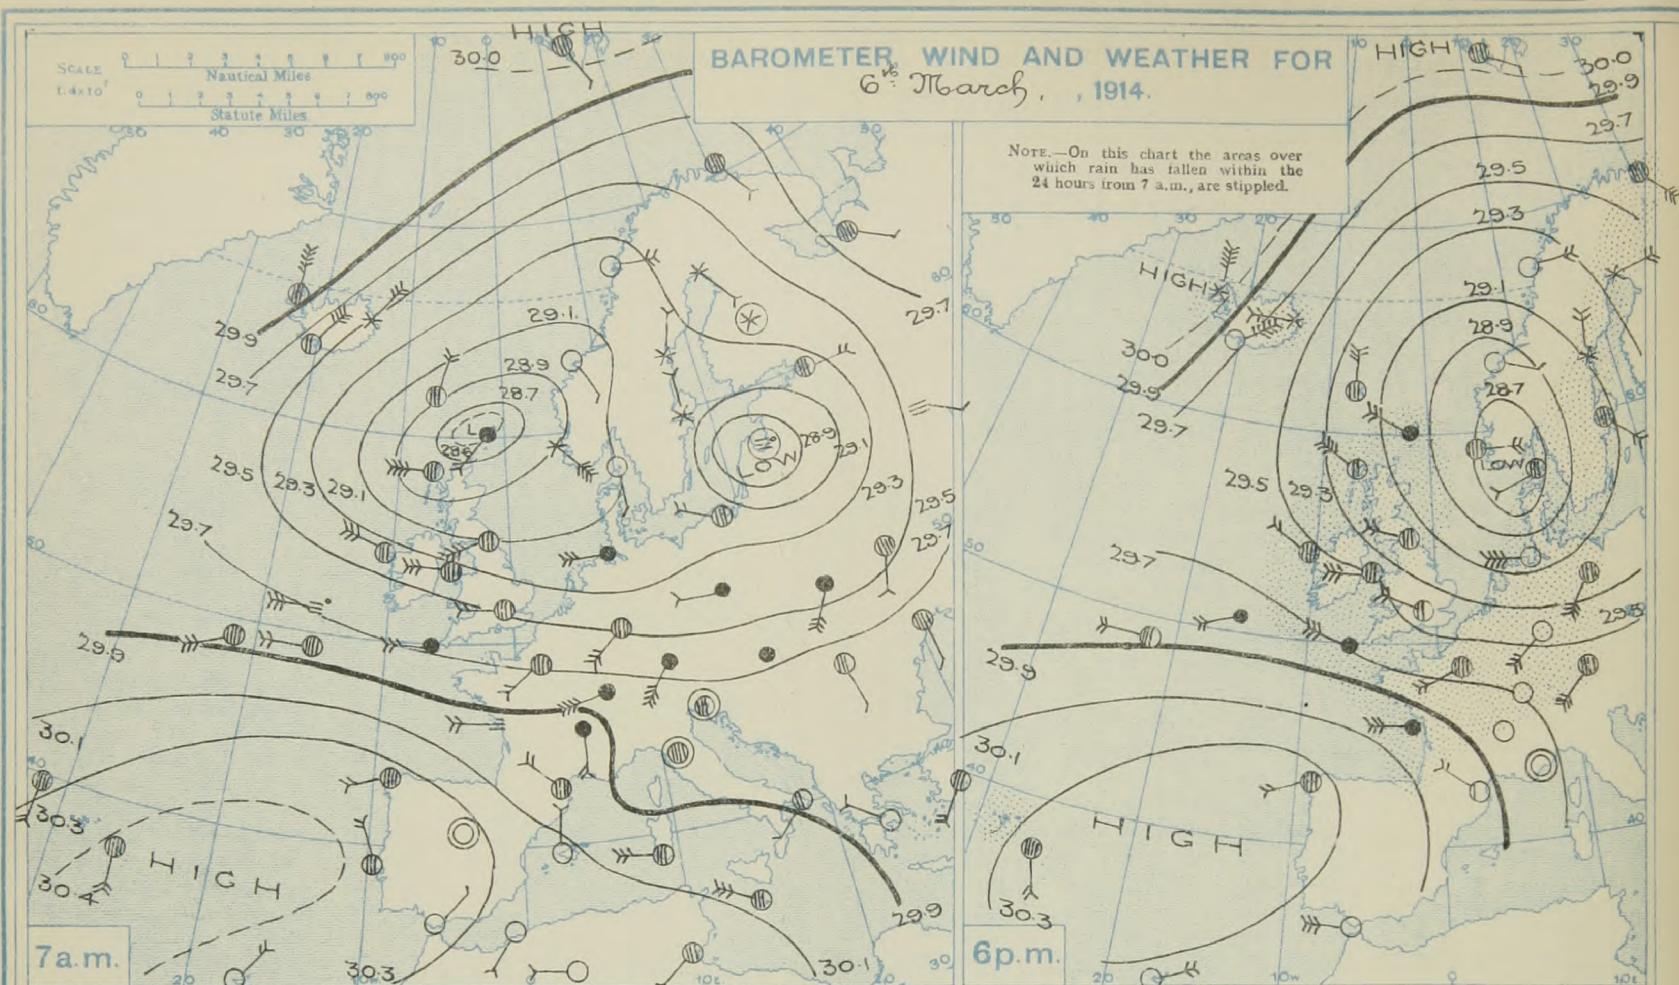

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky half clouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hail; l. lightning; m. mist; o. overcast sky; p. passing showers; q. squalls; r. rain; s. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

# SYNOPTIC CHART FOR 7 a.m., Saturday, 7<sup>th</sup>

MARCH, 1914.

## GENERAL INFERENCE.

The shallow secondary depression now over Wales will move eastward, and be accompanied by rain during to-day in many parts of England, followed by an improvement at night or to-morrow. The changes in pressure and wind at the Azores seem to indicate that further depressions are travelling in an easterly direction on the Atlantic.

## EXPLANATION.

**DAROMETER.**—Isobars are drawn for each tenth of an inch.

**WIND.**—Direction is shown by arrows dying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

**TEMPERATURE.**—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

**WEATHER.**—Shown by the following symbols:

## NOTES ON YESTERDAY'S WEATHER.

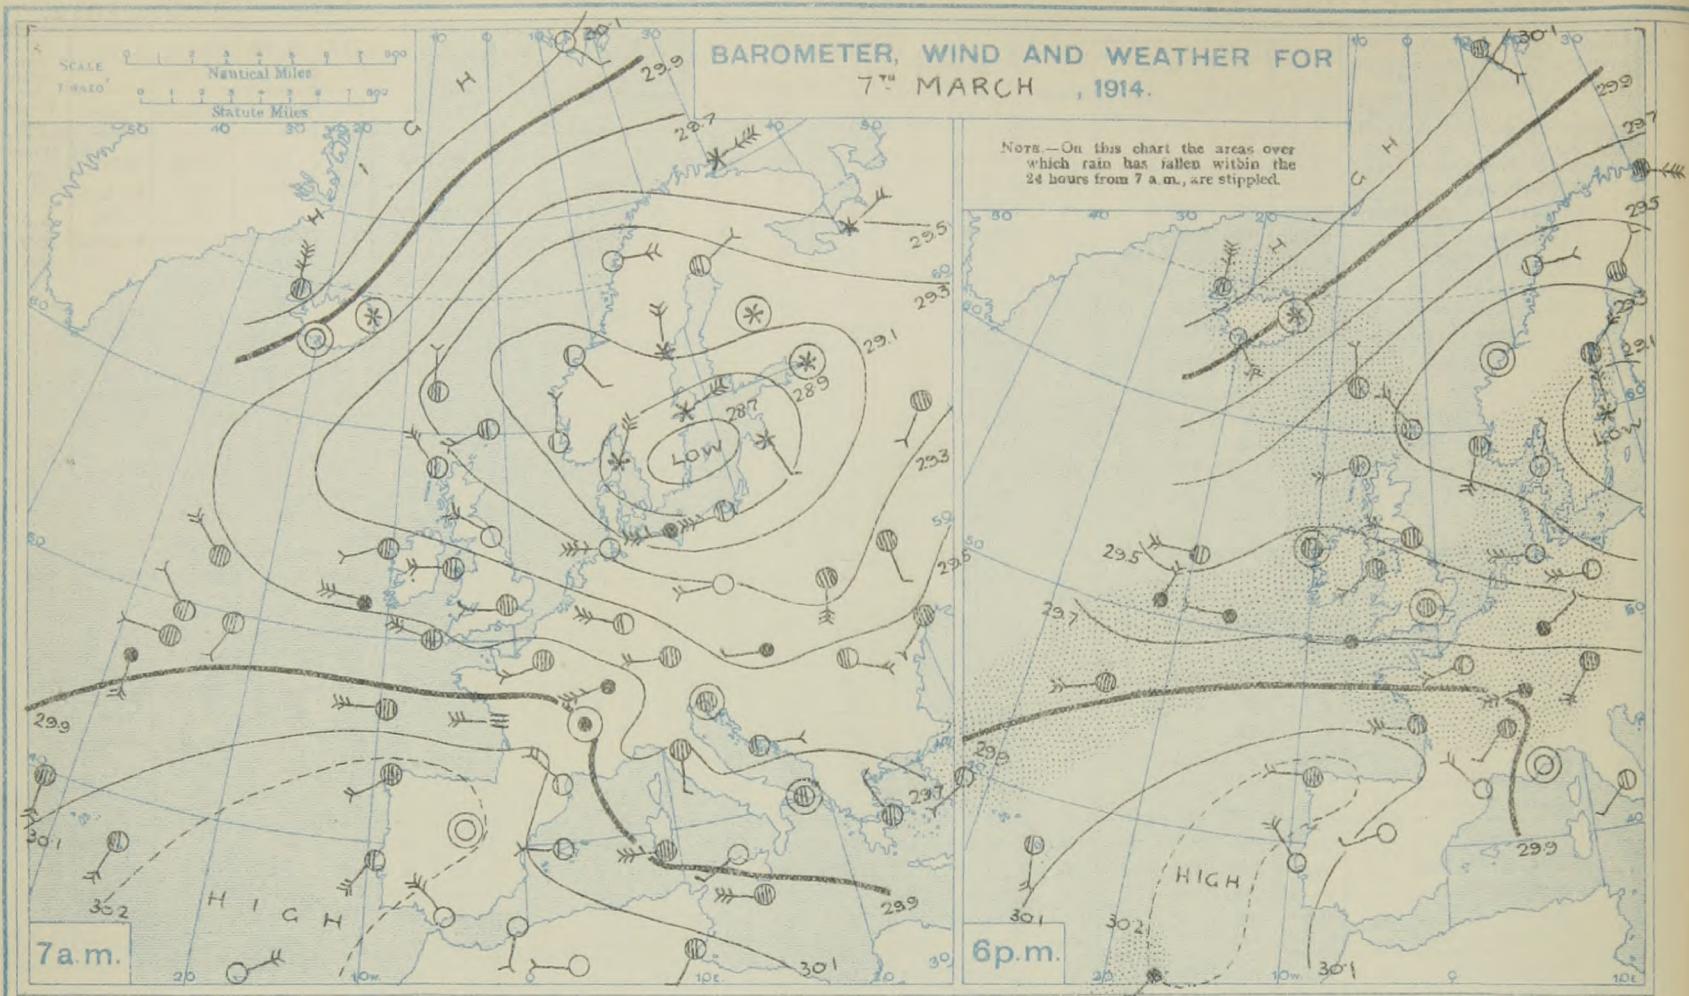

Gales, mainly from the Westward, were experienced yesterday or in the night on most parts of our coasts. Rain fell at most stations in the west and north, but the amount was not large. Temperature rose to a maximum of 55° or a little higher over a considerable portion of England, the highest figure reported being 58° at Southsea. In most parts of the Kingdom the sun shone for several hours; at Weston-super-Mare the record was 7 hrs., at St. Andrews 7.7 hrs., and at Scarborough 8 hrs.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

TEMPERATURE, WEATHER AND SEA DISTURBANCE.

EXPLANATION.

BAROMETER.—Isobars are drawn for each tenth of an inch.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

Calm

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

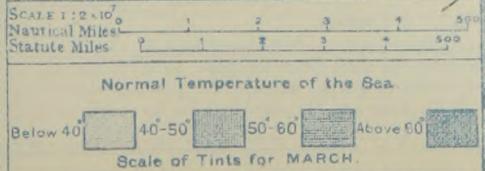

○ clear sky. ( ) sky + clouded. ( ) sky + clouded,

( ) sky + clouded. ( ) overcast sky. ( ) rain falling,

\* snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.

T, thunderstorm.

SEA DISTURBANCE.—Rough ~~~ High seas.

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky half clouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hall; l. lightning; m. mist; o. overcast sky; p. passing showers; q. squalls; r. rain; s. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

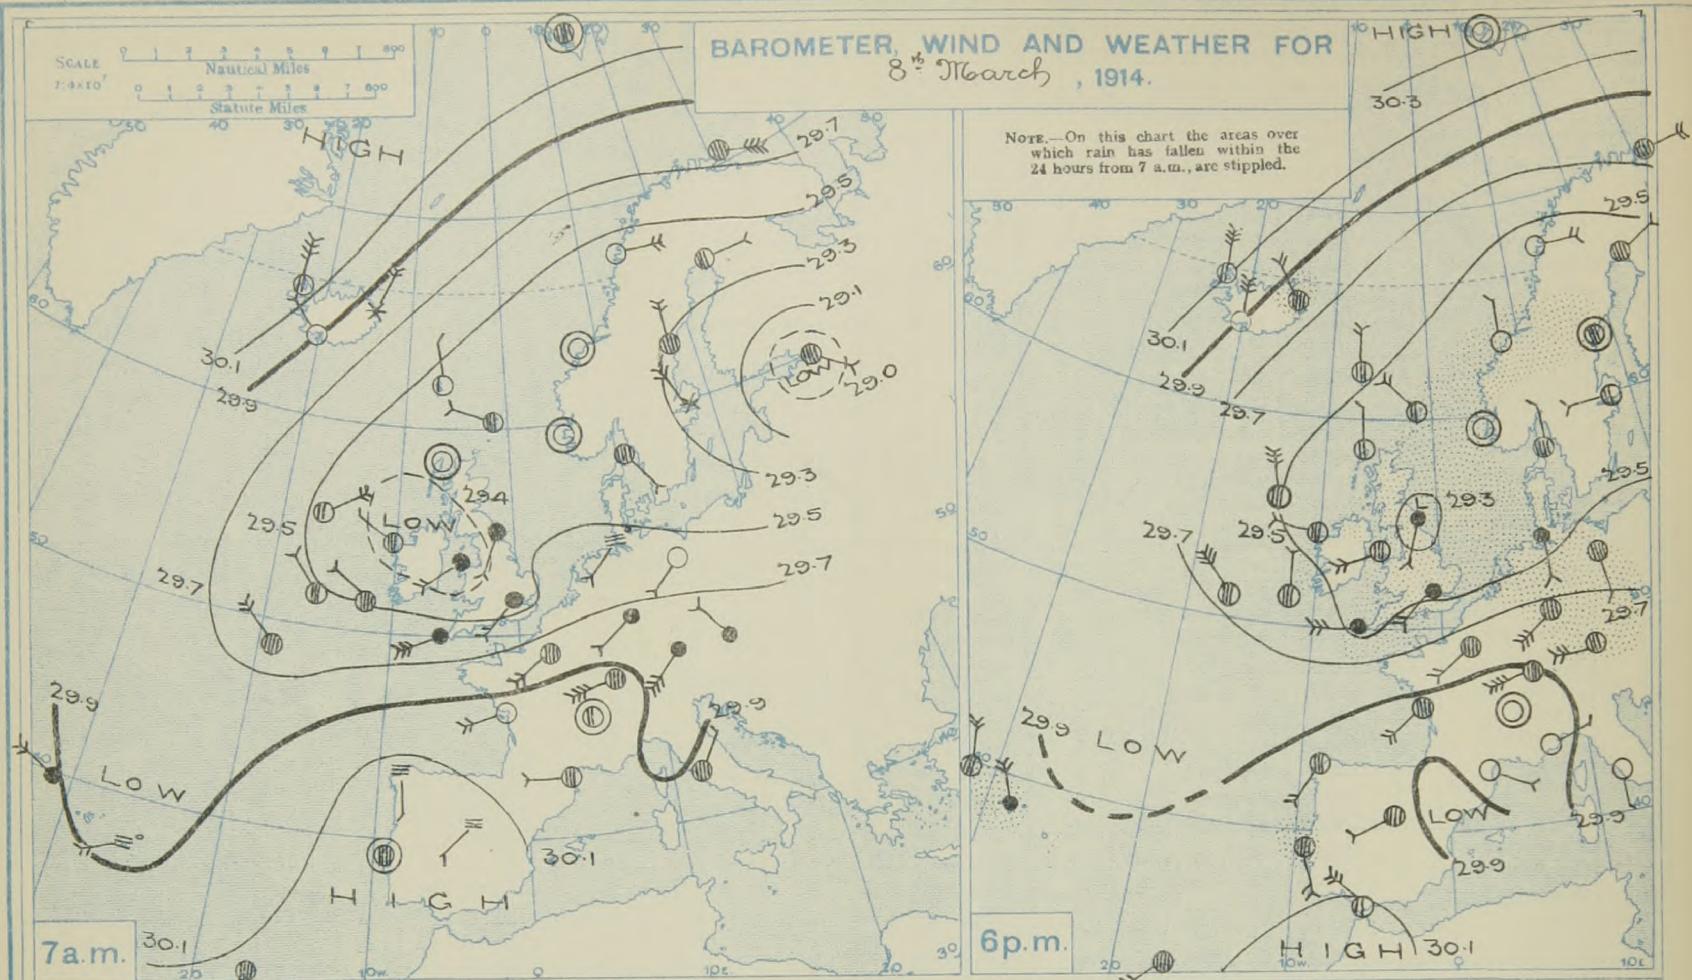

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Terminals in London.

Temperature varied considerably, rising to 57° at some south coast stations, while several localities had maxima below 45°. The weather also was very variable, dull and sunless in many places, fine in others, with sunshine ranging up to 9½ hours at Aberdeen. Small amounts of rain were measured at nearly all stations, and in Scotland there were showers of hail, sleet or snow. As far west as the 30th meridian ships experienced light to strong South-Westerly to North-Westerly winds and changeable weather, rain at times.

FURTHER OUTLOOK.

**SYNOPTIC CHART FOR 7 a.m., Monday, 9<sup>th</sup> MARCH, 1914.**

## GENERAL INFERENCE.

The barometrical changes in progress are slight and indefinite, but they appear to point to the gradual dispersal of the shallow depressions now over the British Islands and their neighbourhood.

## NOTES ON YESTERDAY'S WEATHER.

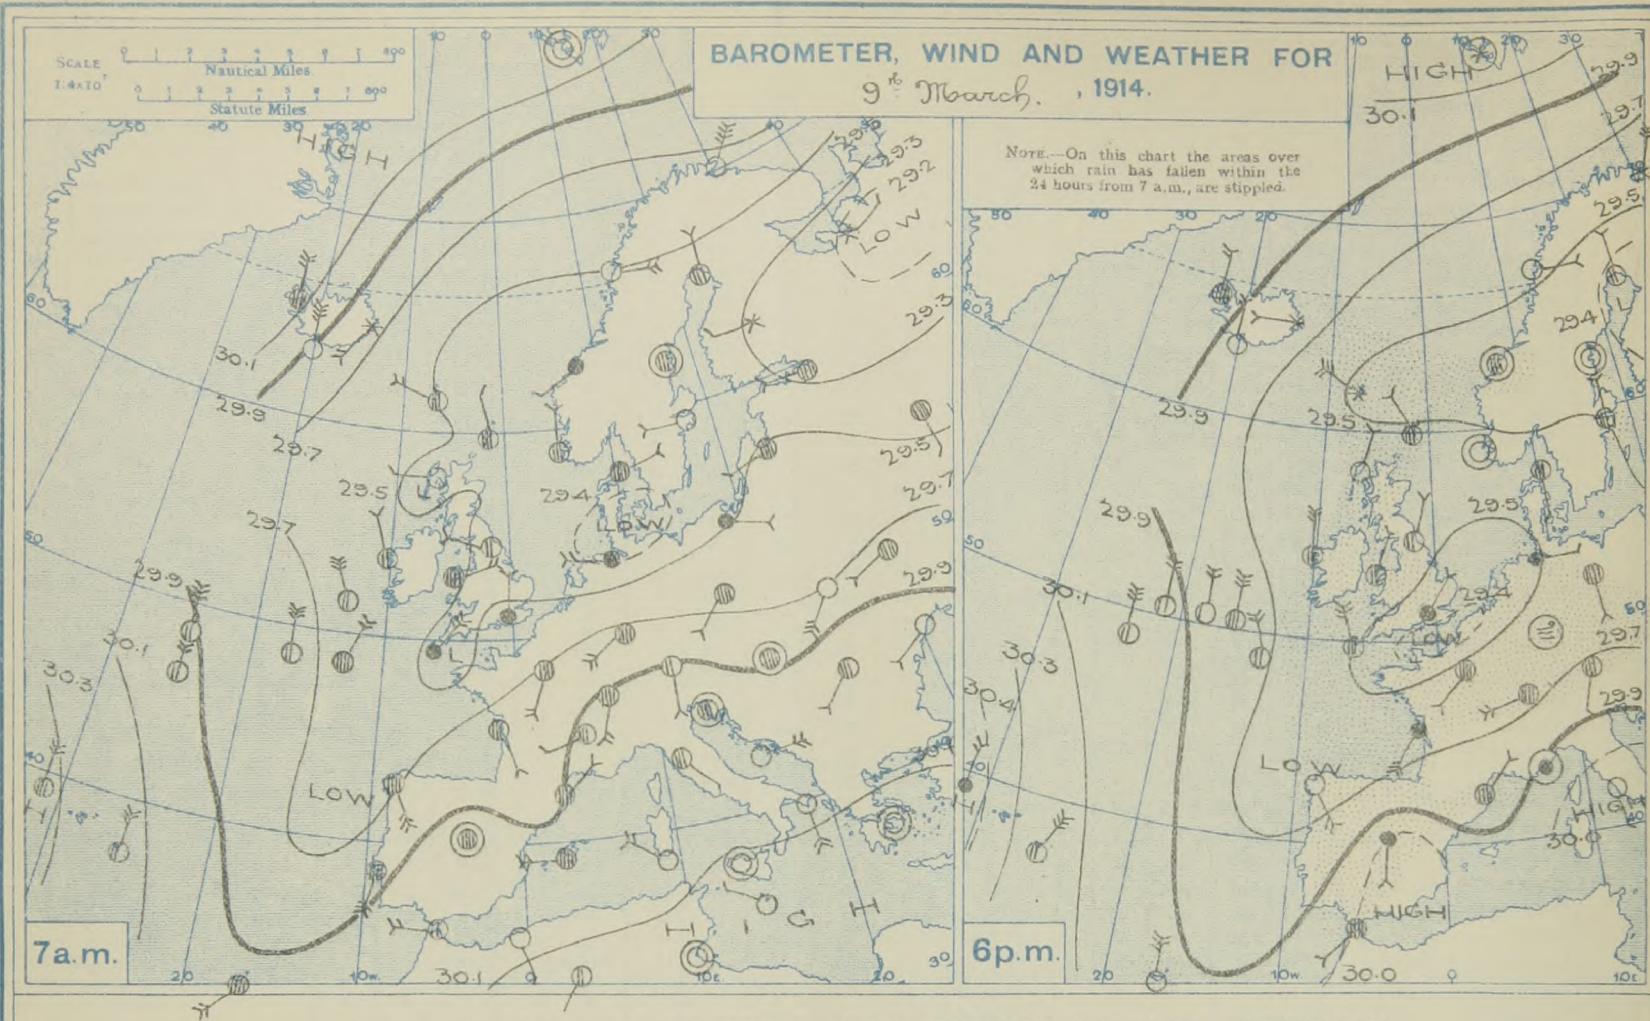

Temperature rose to above 50° in many parts of the Kingdom, to 55° at Great Yarmouth and 56° at Torquay. Much bright sunshine was recorded in the Hebrides and at Nairn, but generally the weather was dull, with rain in many localities, the quantity being large in the south and east. According to wireless reports light to moderate winds from the North-Westward prevailed as far west as the 19th meridian.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

## NOTES ON YESTERDAY'S WEATHER.

Temperature remained below 45° generally, but touched 50° at some stations in the extreme south. A considerable quantity of precipitation, partly consisting of sleet and snow, fell over the greater part of England and Ireland; at several stations in the south of England the figure exceeded 0.5 in. Except in some Irish and Scottish localities and in north Wales the day was very cloudy or quite overcast. Wireless reports show that a moderate to fresh or strong breeze prevailed between the Irish coast and the 22nd meridian.

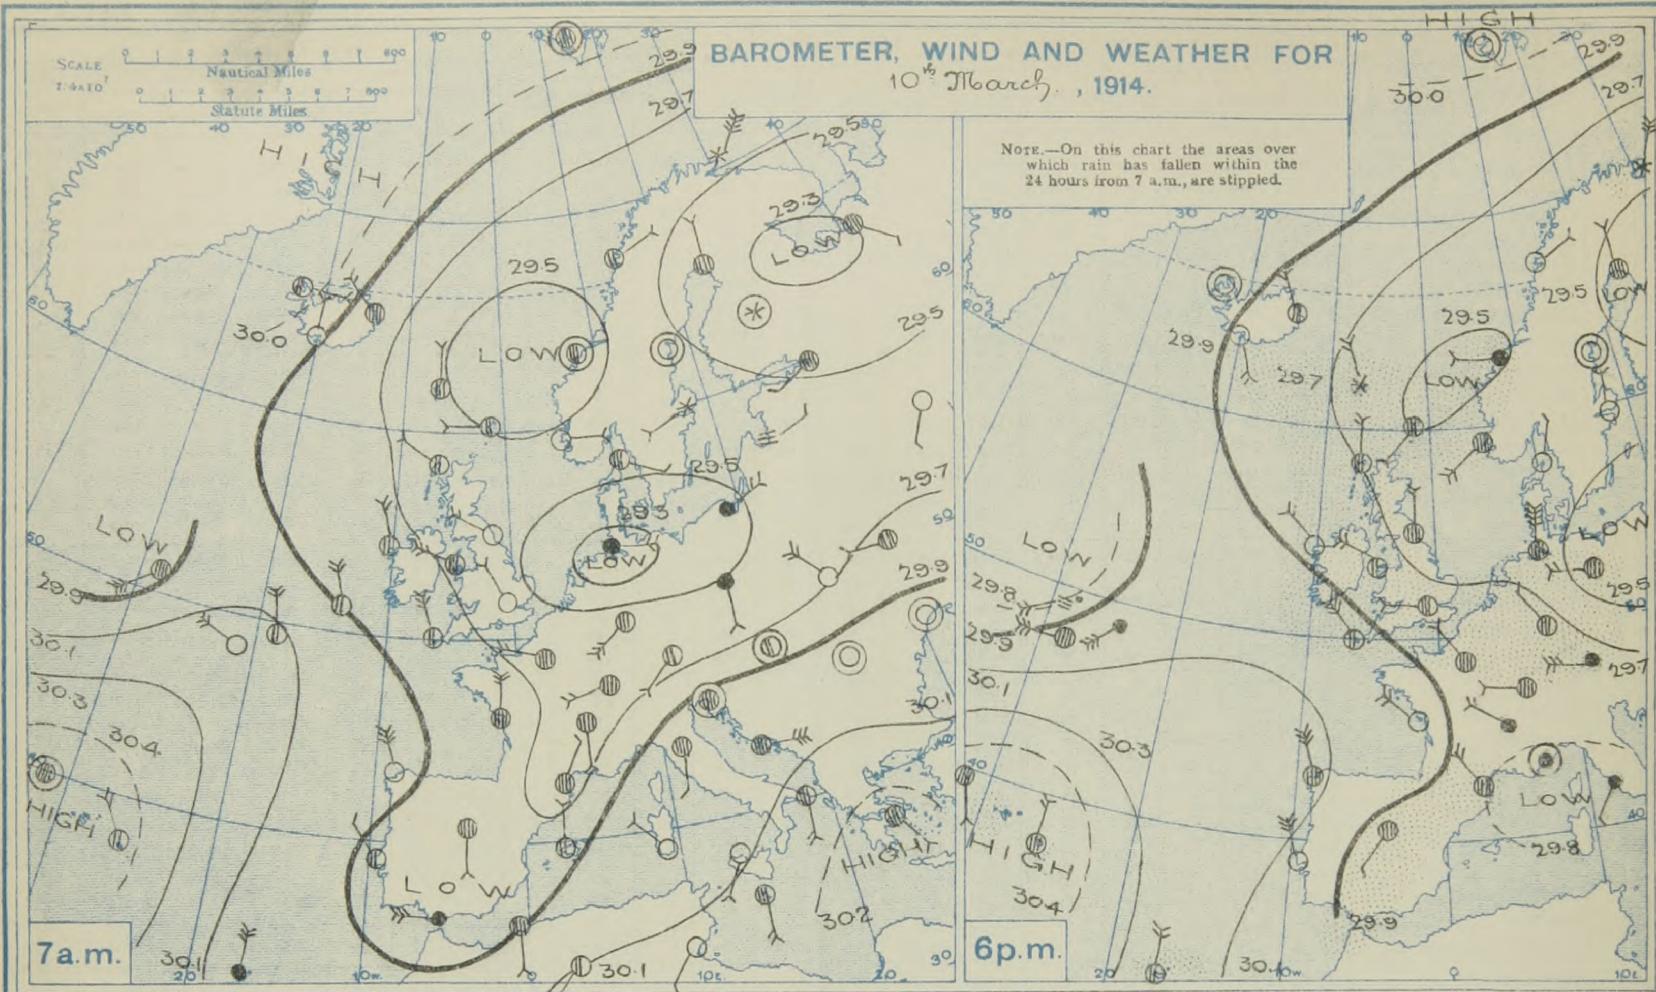

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky half clouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hail; l. lightning; m. mist; o. overcast sky; p. passing showers; q. rain; r. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Terminals in London.

# SYNOPTIC CHART FOR 7 a.m., Wednesday, 11<sup>th</sup> MARCH, 1914.

## GENERAL INFERENCE.

The slight fall of the barometer along the west coast of Ireland probably indicates that a depression on the Atlantic will extend or move in an easterly direction over the United Kingdom and cause the wind to return to the South-Westward or Southward, with a rise of temperature and unsettled weather.

### EXPLANATION.

**BAROMETER.**—Isobars are drawn for each tenth of an inch.

**WIND.**—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

**TEMPERATURE.**—Given in degrees Fahrenheit.

Isotherms shown by dotted lines.

**WEATHER.**—Shown by the following symbols:

○ clear sky. ○ sky & clouded. ○ sky & clouded.

○ sky & clouded. ○ overcast sky. ● rain falling.

\* snow. ▲ hail. ☱ fog. ☱ mist. ☰ thunder.

Thunderstorm.

**SEA DISTURBANCE.**—Rough ~~~ High ~~~

## NOTES ON YESTERDAY'S WEATHER.

Temperature remained below 50° over the Kingdom generally, below 45° at several northern stations. Much bright sunshine was recorded, more than 9 hours in several localities. Rain fell late in the day or at night, and the measurements were considerable or large over the greater portion of England and Ireland. According to wireless reports a moderate to strong wind between West and South-West prevailed on the Atlantic between the 20th and 30th meridians, in latitude 48°.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of 4/- per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

FURTHER OUTLOOK.

SYNOPTIC CHART FOR 7 a.m., Saturday, 14<sup>th</sup> MARCH, 1914.

**GENERAL INFERENCE.**

The depression at present over Ulster seems likely to move rather slowly in a north-easterly or northerly direction, and will continue to affect the winds and weather over the Kingdom generally during the day. A fresh fall of the barometer, with a backing wind, at Valencia indicates the approach of a secondary disturbance which will prolong the generally unstable conditions.

**EXPLANATION.**

**BAROMETER.**—Isobars are drawn for each tenth of an inch.

**WIND.**—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

TEMPERATURE, WEATHER AND SEA DISTURBANCE.

EXPLANATION.

BAROMETER.—Isobars are drawn for each tenth of an inch.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

Calm.

TEMPERATURE.—Given in degrees Fahrenheit.

Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:

○ clear sky. (○) sky  $\frac{1}{2}$  clouded. (○) sky  $\frac{1}{2}$  clouded.

(○) sky  $\frac{3}{4}$  clouded. (○) overcast sky. (●) rain falling.

AND SUNSET FOR STATIONS IN THE UNITED KINGDOM  
TO-DAY AND TO-MORROW.

## NOTES ON YESTERDAY'S WEATHER.

Mildness was general. Temperature mounting to between 50° and 54° in most localities. Rain fell nearly everywhere, but not in large amounts. There were many bright periods, the bright sunshine records ranging up to 7·2 hours at Southport. Over a great part of the country a severe S.Wly. to N.Wly. gale was experienced, with squalls of 72 miles per hour at Warlingham, and of 78 miles per hour at Scilly. As far west as the 30th meridian ships experienced varying Westerly winds, strong to hurricane force, with changeable weather, fine to rainy.

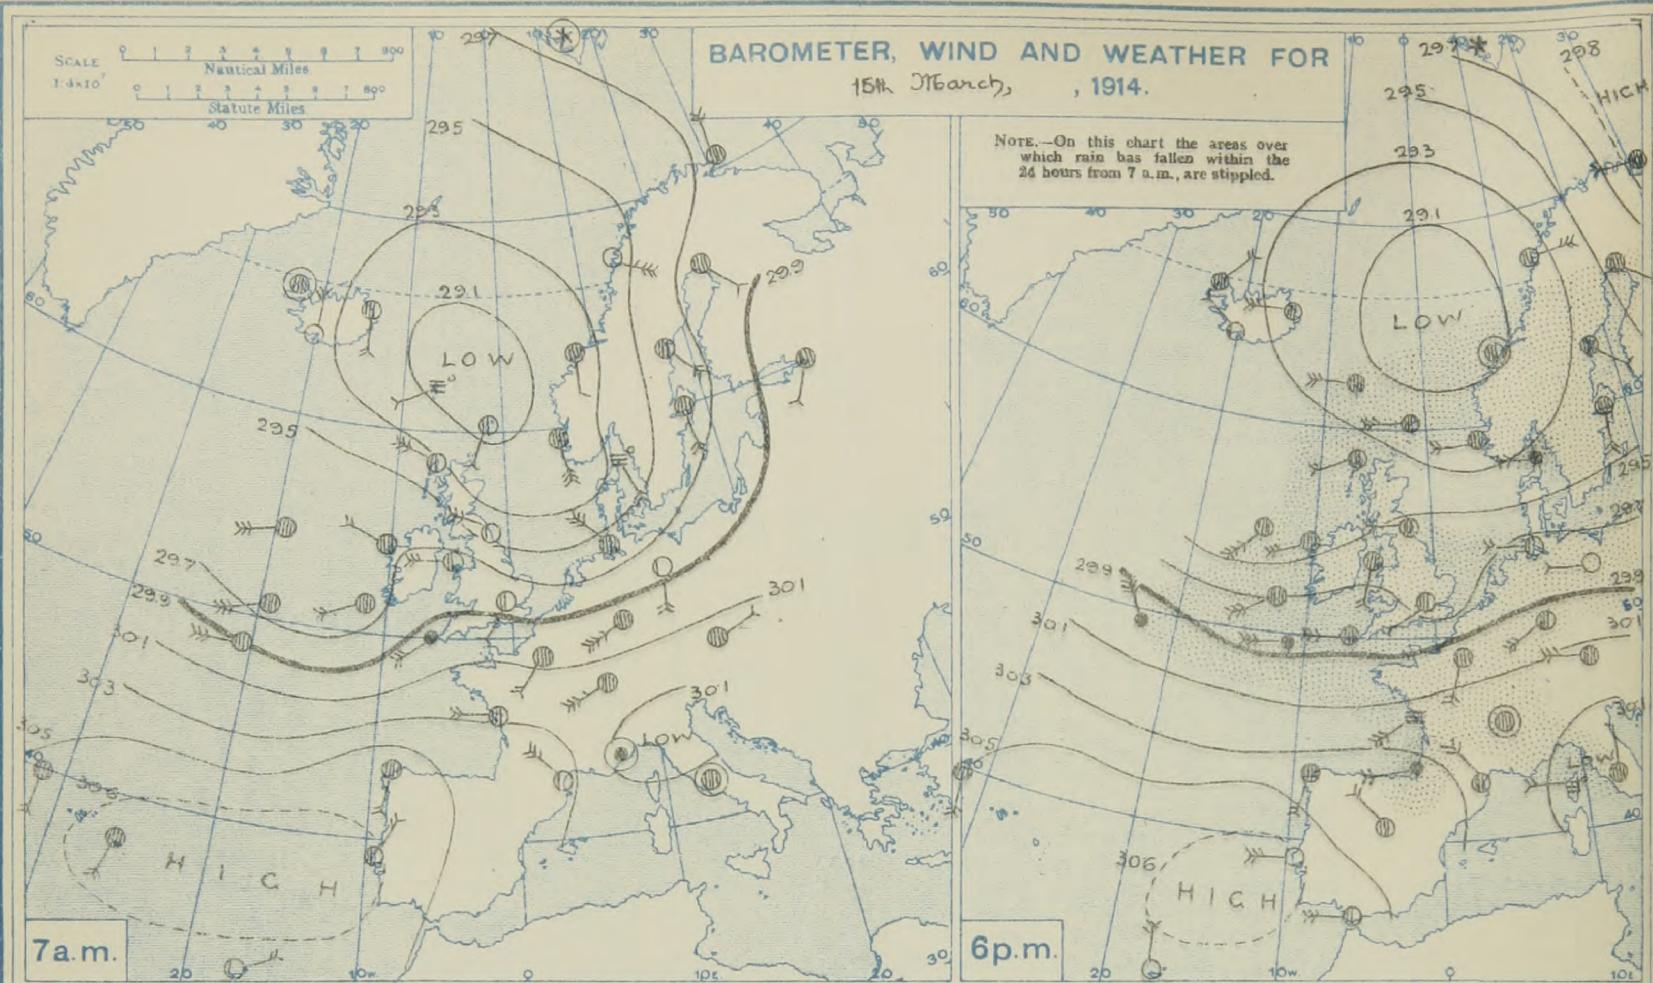

NOTE.—The information relating to weather is indicated by the following letters—**b**, blue sky; **bc**, sky half clouded; **c**, sky three parts clouded; **d**, drizzling rain; **e**, wet air, without rain falling; **f**, fog; **g**, gloom; **h**, hail; **l**, lightning; **m**, mist; **o**, overcast sky; **p**, passing showers; **q**, squalls; **r**, rain; **s**, snow; **t**, thunder; **u**, ugly, threatening sky; **v**, visibility, unusual transparency; **w**, dew; **x**, hoar frost; **z**, dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

## NOTES ON YESTERDAY'S WEATHER.

The thermometer rose to between 45° and 50° in most parts of the United Kingdom. Considerable amounts of bright sunshine were recorded in the western and northern districts. Rain again fell generally, but the quantity was not large. A fresh to strong gale from West and North-West was experienced on the English and Welsh coasts. Wireless reports show that as far west as the 17th meridian ships experienced strong to high winds from the North-Westward, with fair weather.

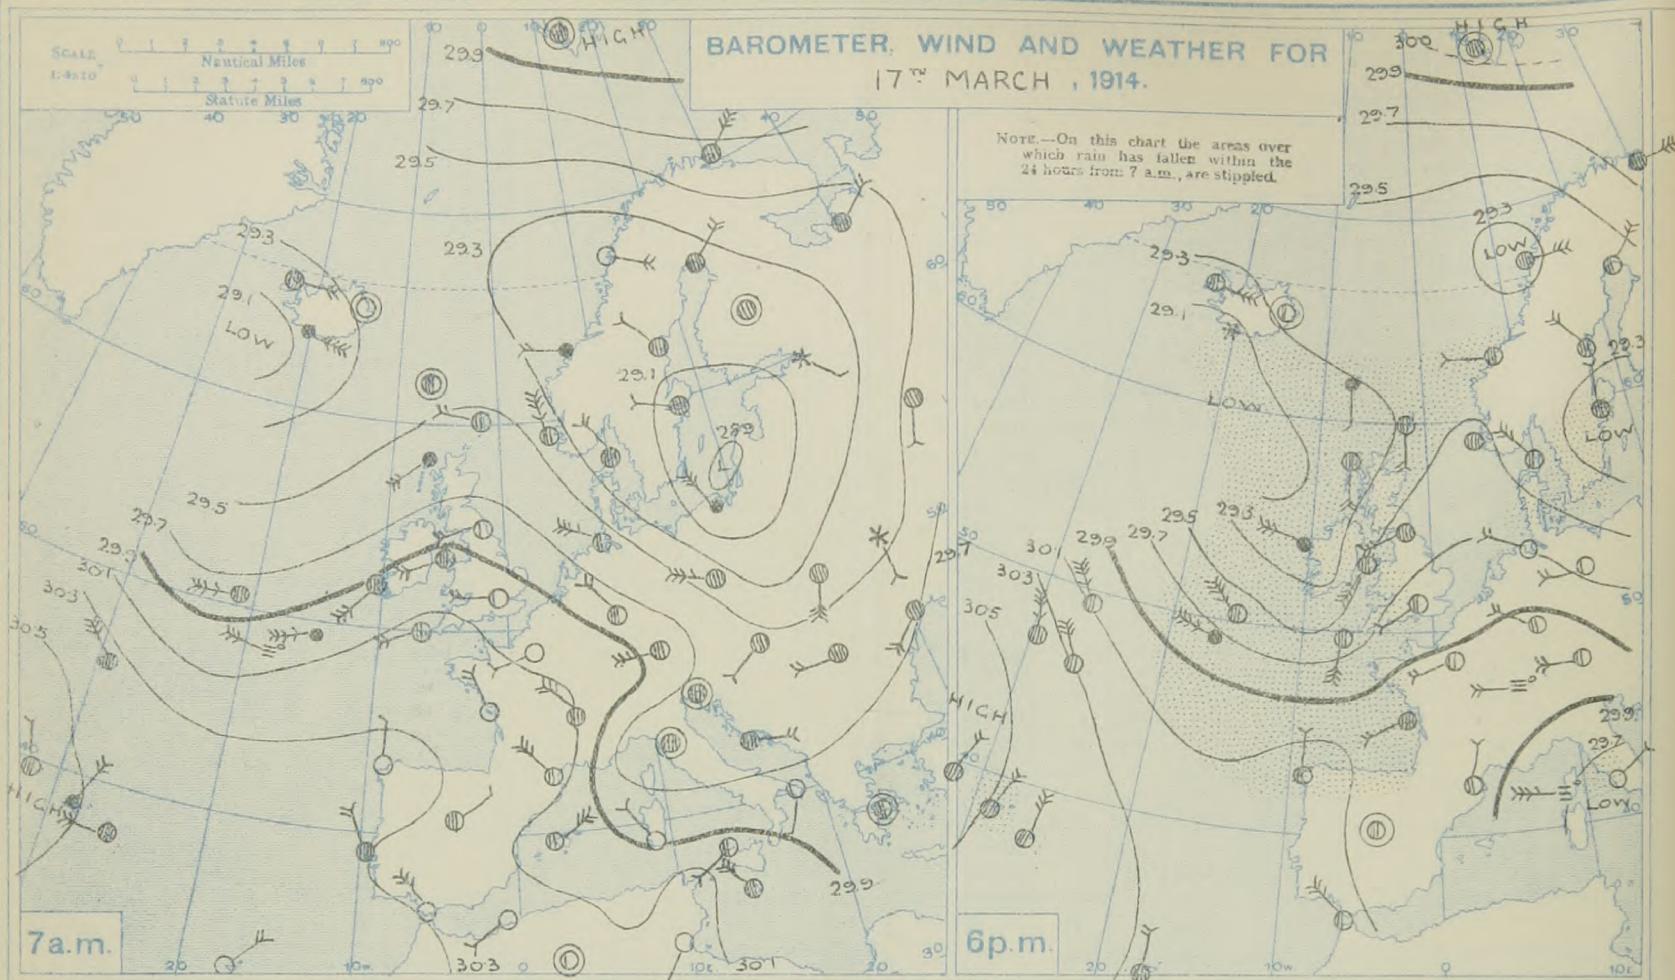

NOTE.—The information relating to weather is indicated by the following letters—b, blue sky; bc, sky half clouded; c, sky three parts clouded; d, drizzling rain; e, wet air, without rain falling; f, fog; g, gloom; h, hail; l, lightning; m, mist; o, overcast sky; p, passing showers; q, squalls; r, rain; s, snow; t, thunder; u, ugly, threatening sky; v, visibility, unusual transparency; w, dew; x, hoar frost; z, dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

FURTHER OUTLOOK.

# SYNOPTIC CHART FOR 7 a.m., Wednesday, 18<sup>TH</sup> MARCH, 1914.

## GENERAL INFERENCE.

The depression off the north and west of Scotland is likely to remain almost stationary. The conditions are favourable for the continued development of small, secondary disturbances over various parts of the United Kingdom, and cold, changeable weather is, therefore, likely to continue, with hail or sleet in places.

## NOTES ON YESTERDAY'S WEATHER.

The thermometer rose to between 45° and 50° over the United Kingdom generally, and to 51° at some of our south coast stations, where the amount of bright sunshine was large. Rain was again experienced in most districts, and a fresh gale from between South and West occurred on our south and southwest coasts. Wireless reports show that between the Irish coasts and the 20th meridian the wind was strong to a gale from the Westward, with changeable, showery weather; further to the westward the wind was North-Westerly and the weather fine.

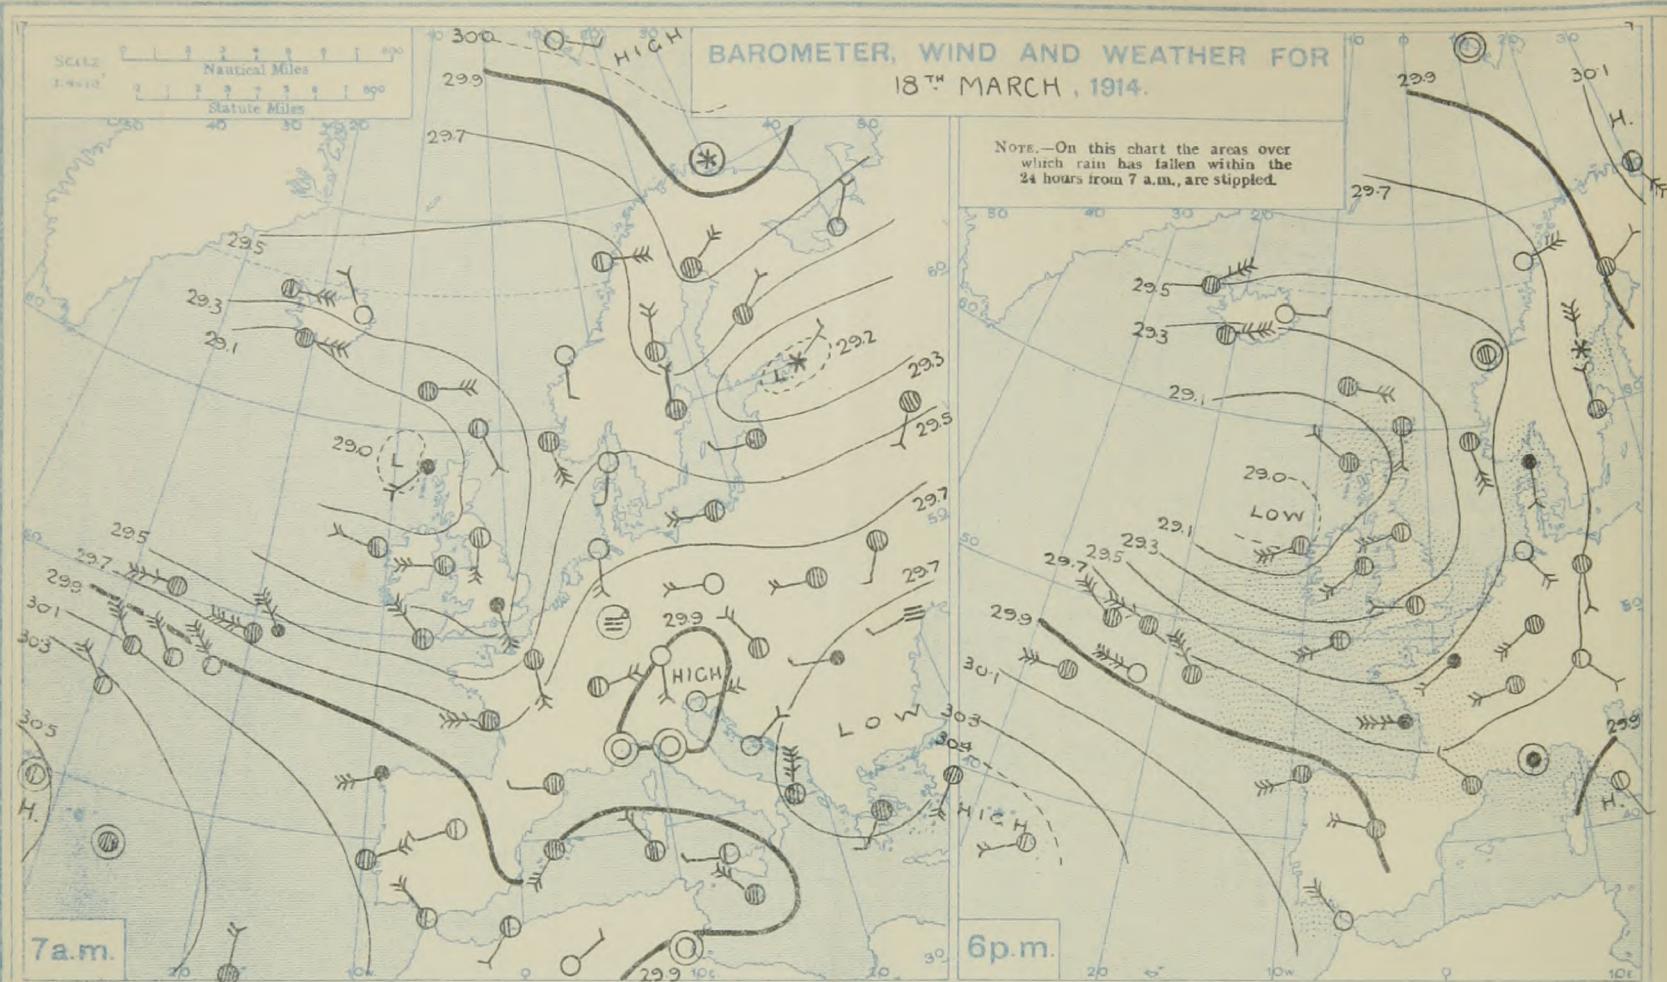

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky halfclouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hail; l. lightning; m. mist; o. overcast sky; p. passing showers; q. squalls; r. rain; s. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Terminus in London.

## GENERAL INFERENCE.

There are no indications of any material change in the weather. A tendency still exists for the development of small, shallow depressions over various parts of the United Kingdom, and showers of cold precipitation are, therefore, likely to occur in most districts, with, however, considerable intervals of fine, bright weather.

## EXPLANATION.

**BAROMETER.**—Isobars are drawn for each tenth of an inch.

**WIND.**—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

Calm

## NOTES ON YESTERDAY'S WEATHER.

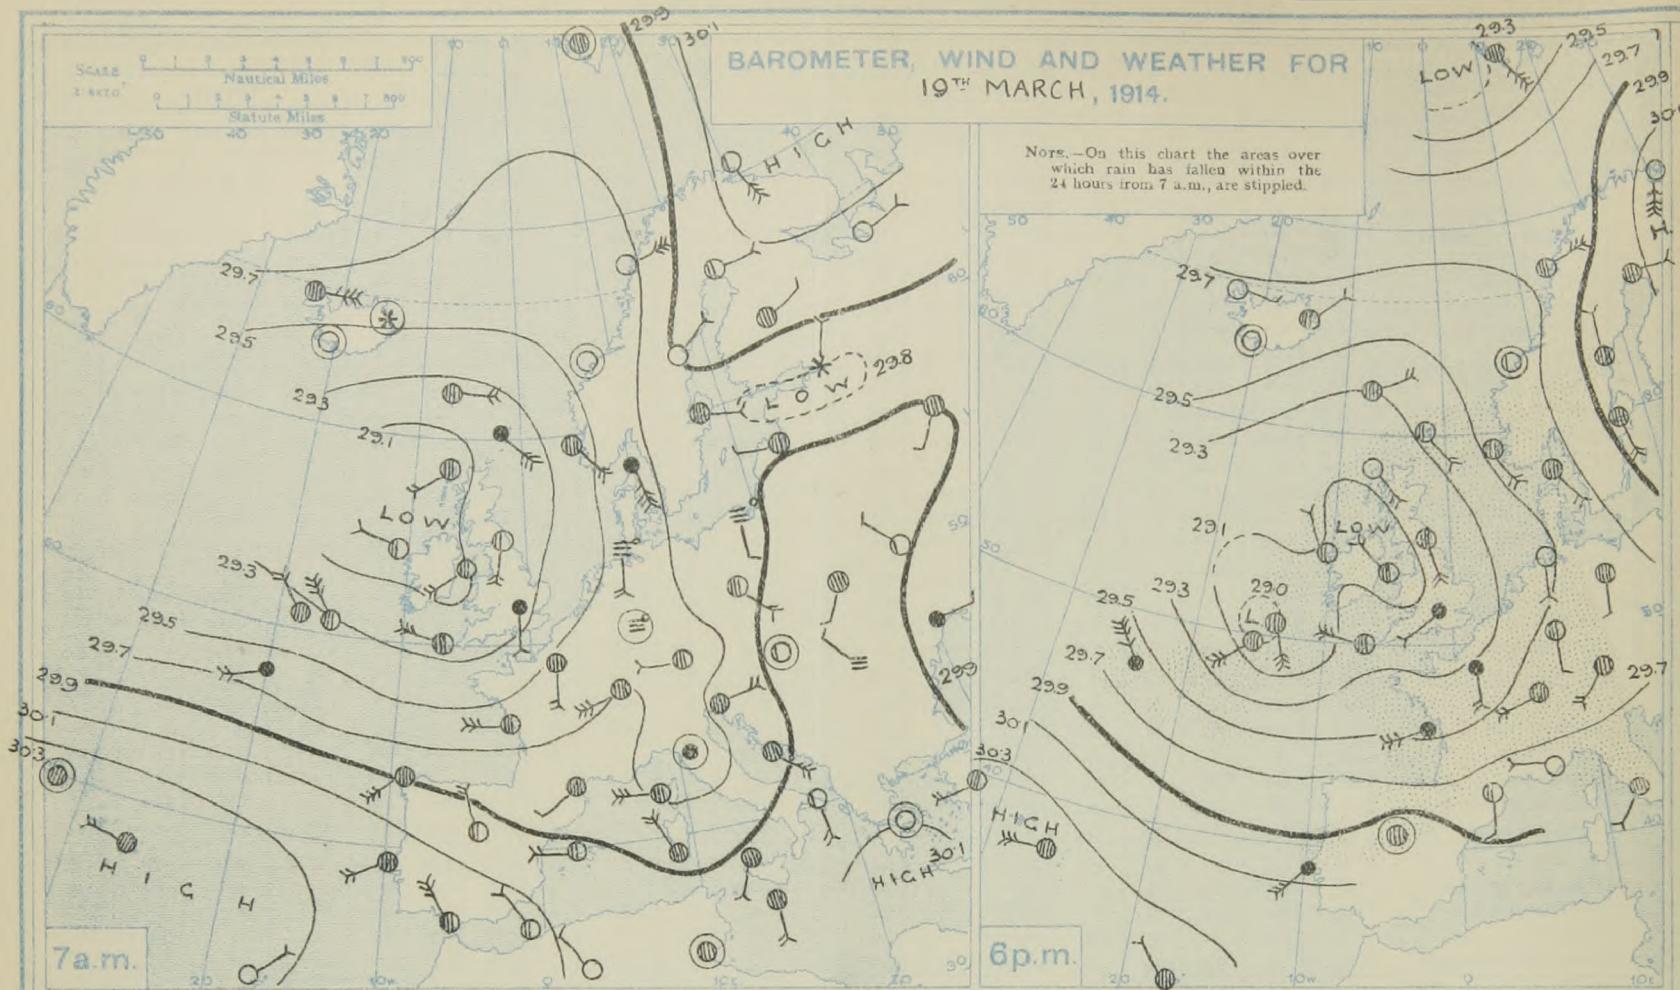

At many of our western and northern stations the thermometer failed to reach 45°. Considerable amounts of bright sunshine were recorded in the west and north of England. Showers of hail or sleet occurred in most districts, a thunder-storm occurred at Holyhead, and lightning was seen at several places in the west and north. Wireless reports show that as far west as the 30th meridian ships experienced gales and strong winds from the North-Westward, with changeable, showery weather.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of 1/- per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

## NOTES ON YESTERDAY'S WEATHER.

Over a large portion of the United Kingdom the thermometer failed to reach 45°. The amount of bright sunshine was generally small. Rain, hail or sleet again fell generally, heavily in the south-west of England, and thunderstorms occurred in a few isolated places. Wireless reports show that as far west as the 20th meridian ships experienced moderate to fresh winds from West or North-West, and cloudy, changeable weather.

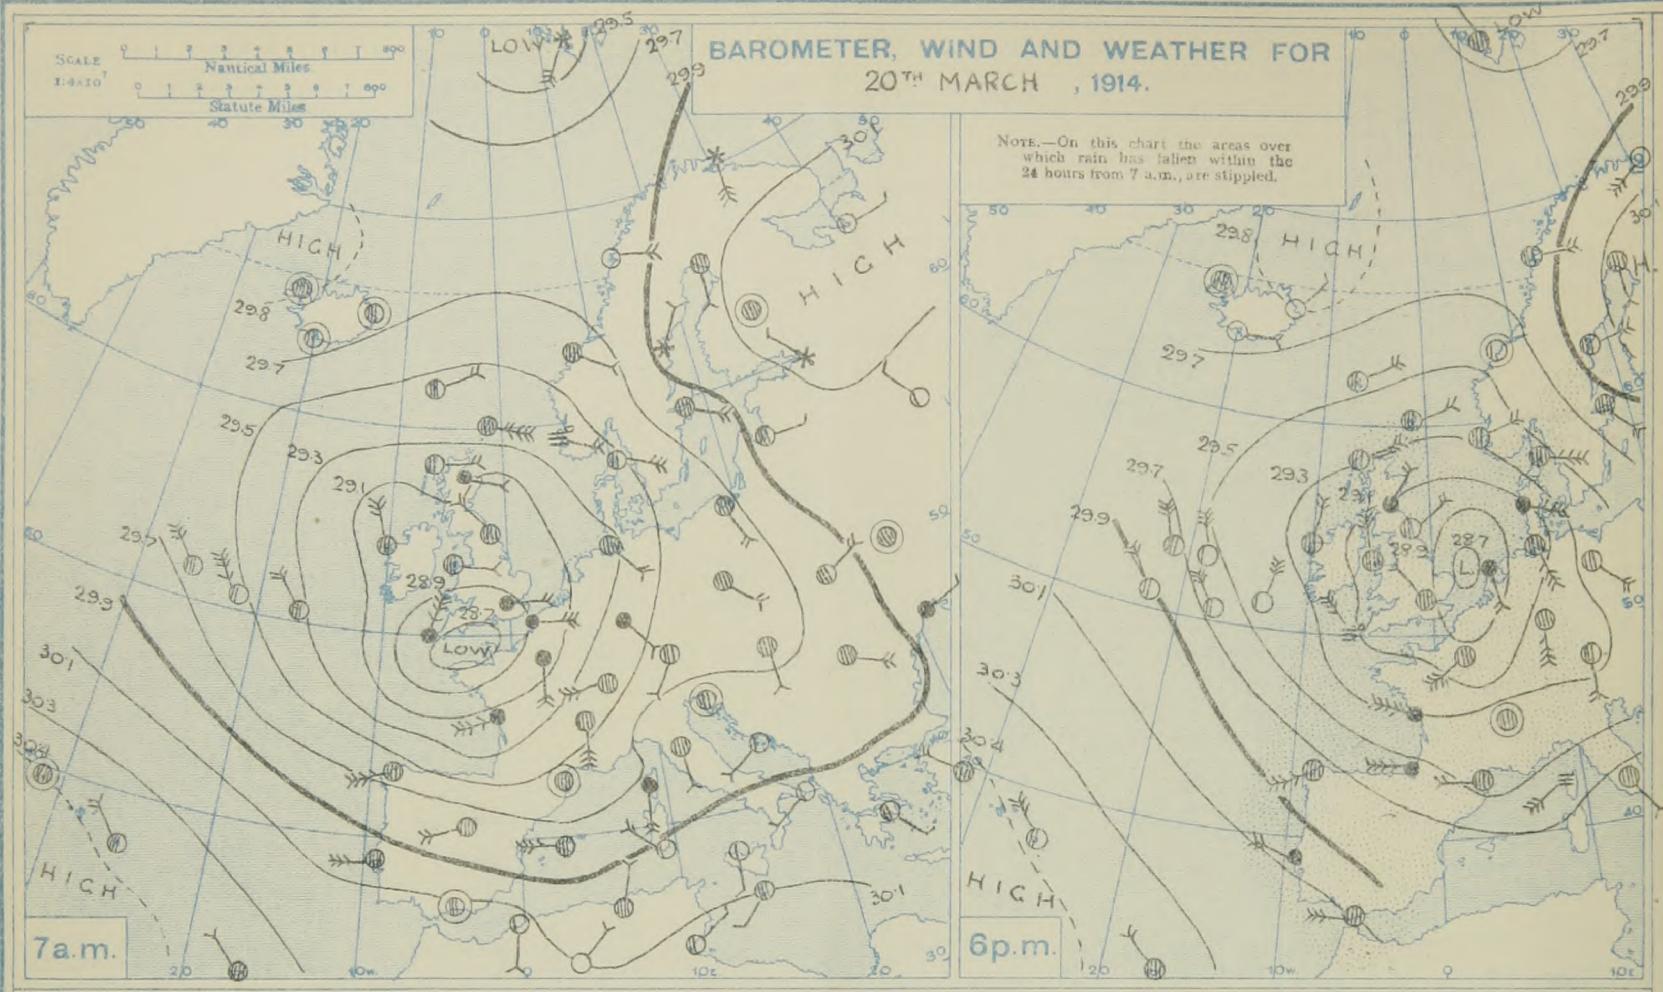

NOTE.—The information relating to weather is indicated by the following letters—b, blue sky; bc, sky half clouded; c, sky three parts clouded; d, drizzling rain; e, wet air, without rain falling; f, fog; g, gloom; h, hail; l, lightning; m, mist; o, overcast sky; p, passing showers; q, squalls; r, rain; s, snow; t, thunder; u, ugly, threatening sky; v, visibility, unusual transparency; w, dew; x, hoar frost; z, dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

FURTHER OUTLOOK.

**SYNOPTIC CHART FOR 7 a.m., Saturday, 21<sup>ST</sup> MARCH, 1914.**

## GENERAL INFERENCE.

The depression over the North Sea will move slowly north-eastward, and will gradually disperse. A temporary improvement in the weather is, therefore, probable. The new disturbance which is approaching Iceland will occasion a backing of the wind to West or South-West on our western and northern coasts.

## NOTES ON YESTERDAY'S WEATHER.

Over a large portion of the country the thermometer failed to reach 45 deg., and in London it remained below 40 deg. Considerable amounts of bright sunshine were recorded in the west and south-west of Great Britain, but elsewhere the duration was small. Rain, hail or snow fell generally, thunderstorms occurred at Valencia, and lightning was seen at Roche's Point and Scilly. A gale from between North and East was experienced on several parts of our south and east coasts.

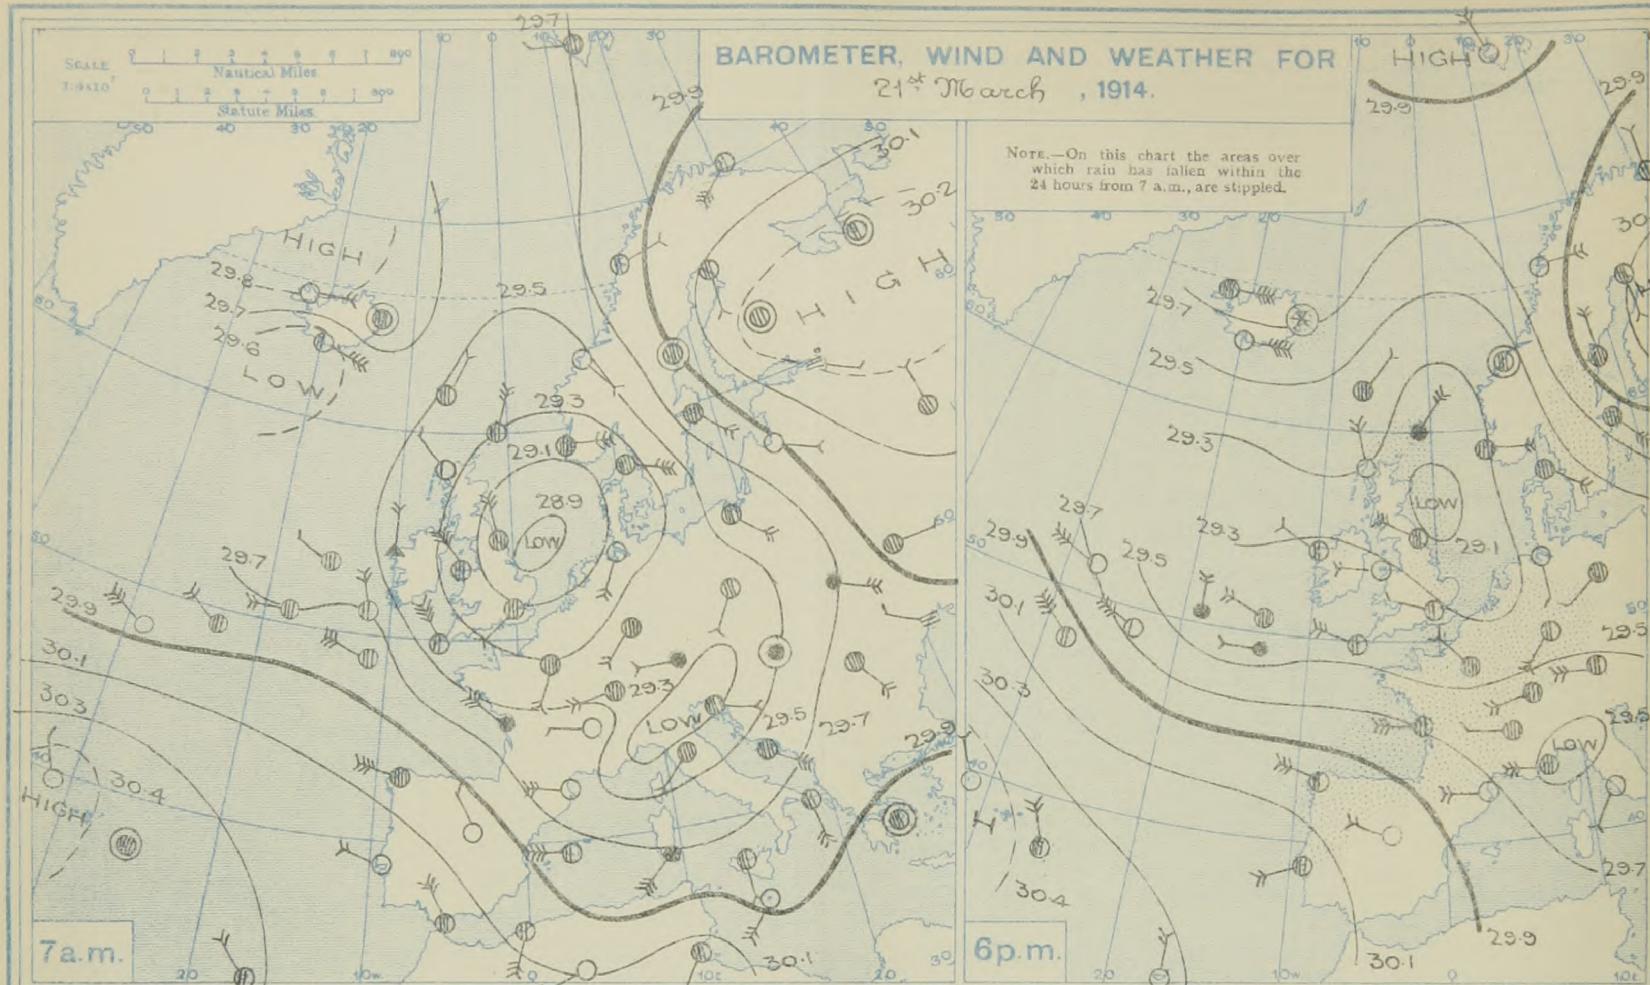

NOTE.—The information relating to weather is indicated by the following letters—b, blue sky; bc, sky half clouded; c, sky three parts clouded; d, drizzling rain; e, wet air, without rain falling; f, fog; g, gloom; h, hail; l, lightning; m, mist; o, overcast sky; p, passing showers; q, squalls; r, rain; s, snow; t, thunder; u, ugly, threatening sky; v, visibility, unusual transparency; w, dew; x, hoar frost; z, dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

NOTES ON YESTERDAY'S WEATHER.

Temperature remained below 50 deg. at all except the most south-western and southern stations, only rising to 40 deg. at Aberdeen. Frost occurred at night in many parts of England and Ireland. Rain fell over the greater portion of the Kingdom, but the west and south-west of England, Wales and Ireland recorded much bright sunshine and in most other districts there was a moderate amount. According to wireless reports a Westerly to North-Westerly wind, moderate to a gale in force, prevailed between the Irish coast and the 28th meridian.

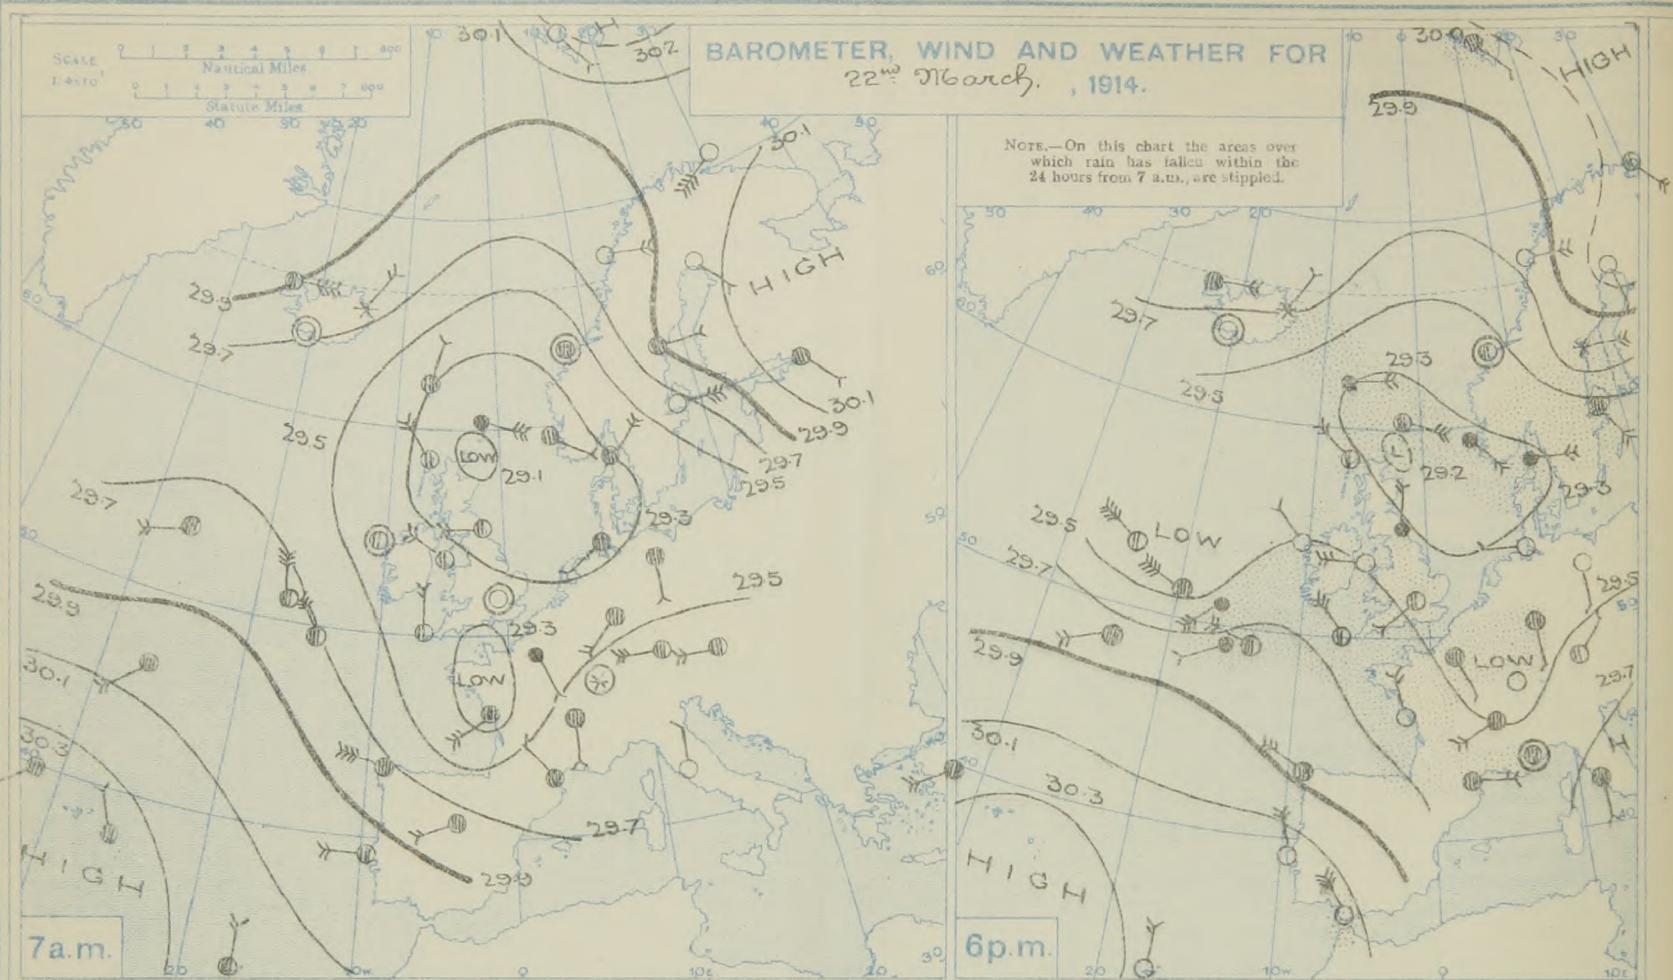

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky halfclouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hail; i. lightning; m. mist; o. overcast sky; p. passing showers; q. squalls; r. rain; s. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of 6/- per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

## NOTES ON YESTERDAY'S WEATHER.

The thermometer rose to between 45 deg. and 50 deg over the United Kingdom generally, and to a trifle above 50 deg. at some of our south coast stations. Ground frost was again experienced at night in most places. The amount of bright sunshine was small, rain was again experienced generally, and thunder was heard at Weymouth. Wireless reports show that as far west as the 21st meridian ships experienced strong to high winds from the Westward, with cloudy changeable weather.

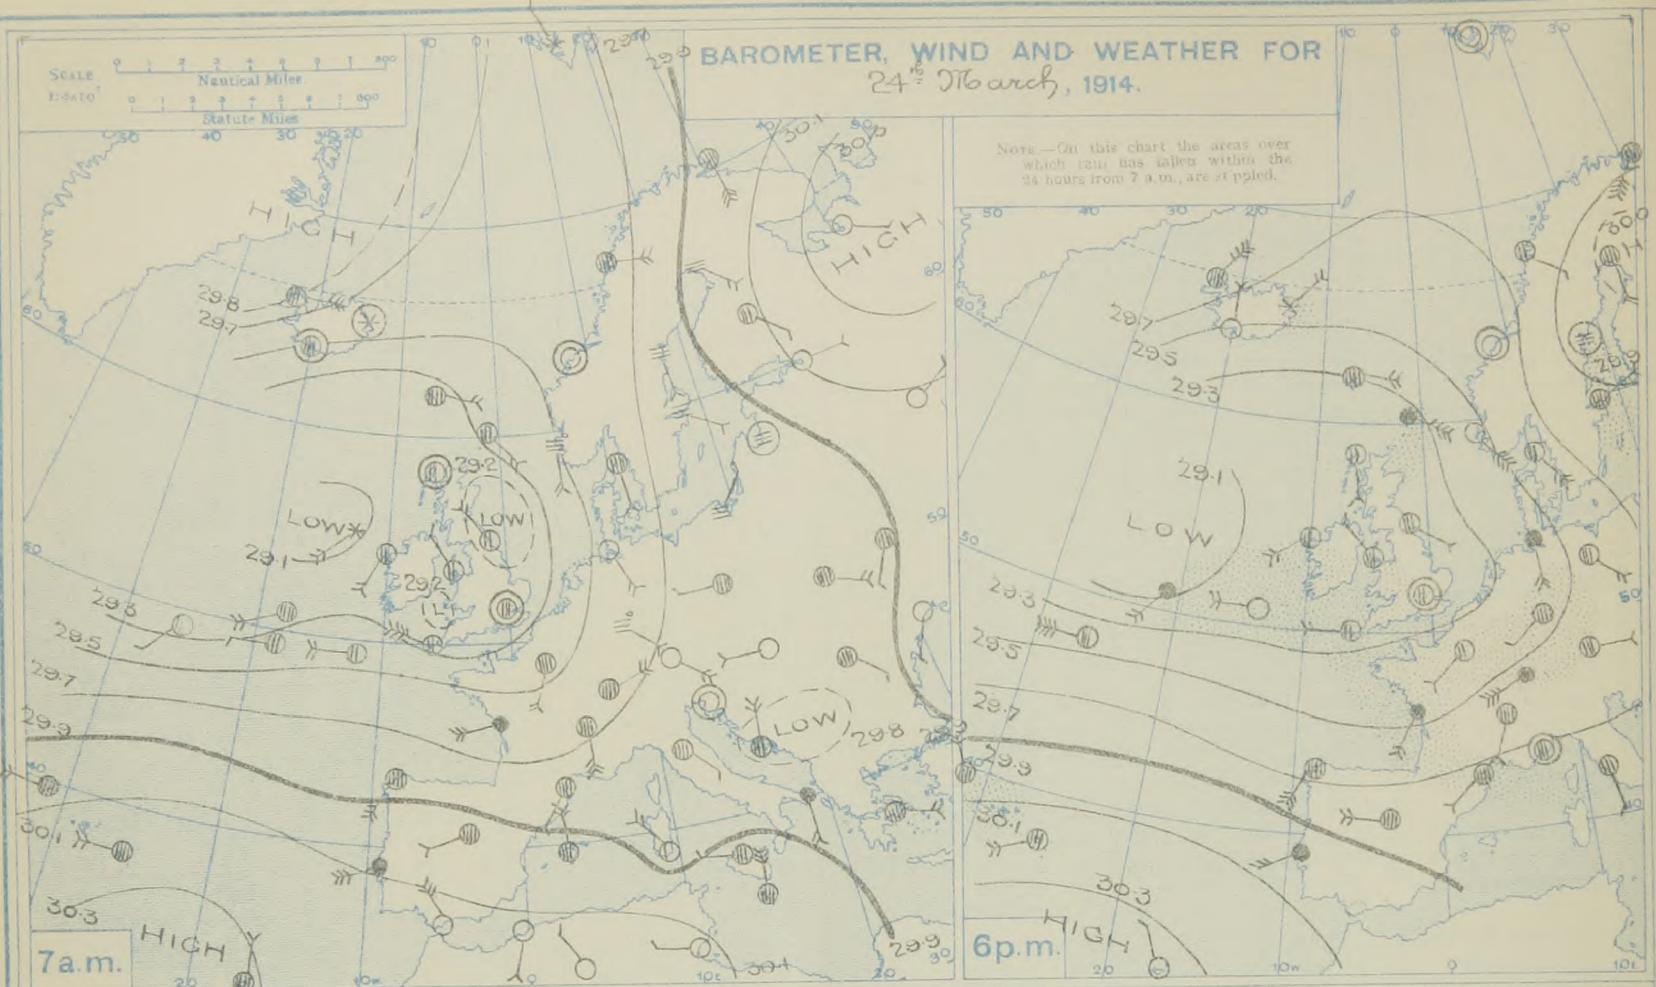

NOTE.—The information relating to weather is indicated by the following letters—b, blue sky; bc, sky half clouded; c, sky three parts clouded; d, drizzling rain; e, wet air, without rain falling; f, fog; g, gloom; h, hail; l, lightning; m, mist; o, overcast sky; p, passing showers; q, squalls; r, rain; s, snow; t, thunder; u, ugly, threatening sky; v, visibility, unusual transparency; w, dew; x, hoar frost; z, dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

## NOTES ON YESTERDAY'S WEATHER.

The thermometer rose to 50 deg. or a trifle above it at several of the English and Irish stations, and reached 55 deg. at Hythe. The amount of bright sunshine varied considerably in different localities. Showers were again experienced in most districts, and lightning occurred at Nottingham at night. Wireless reports show that as far west as the 25th meridian ships experienced moderate to strong winds from West or South-West, with changeable weather, rain in places.

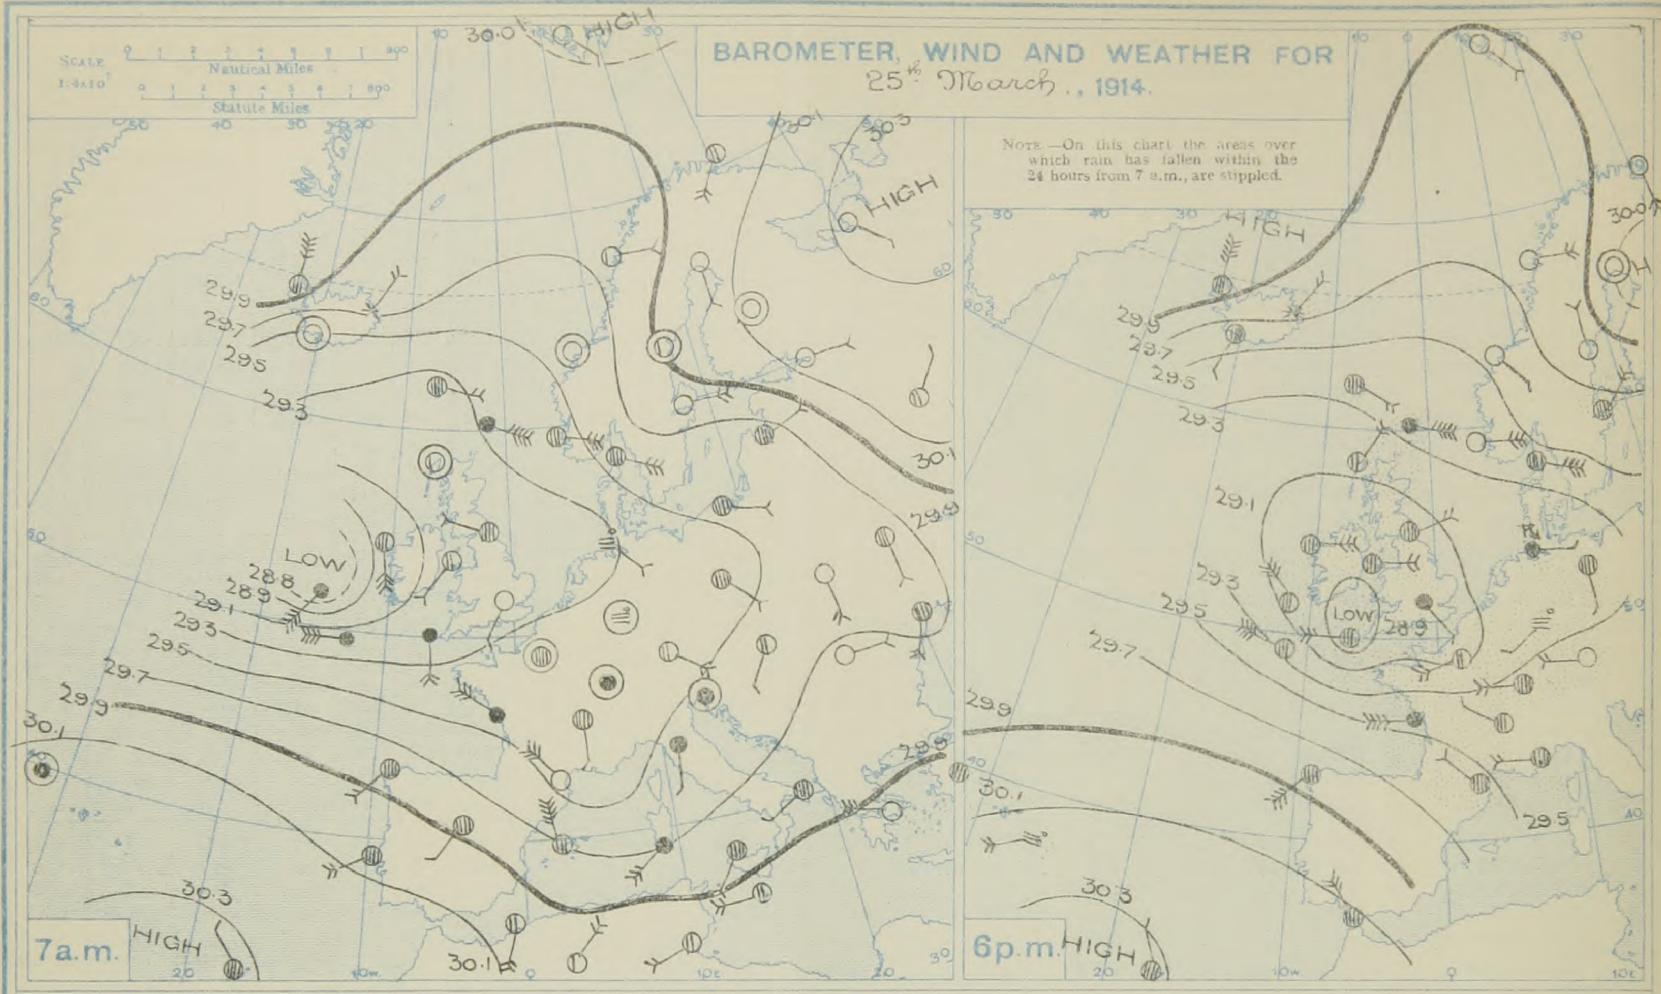

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky half-clouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hail; l. lightning; m. mist; o. overcast sky; p. passing showers; q. squalls; r. rain; s. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

## NOTES ON YESTERDAY'S WEATHER.

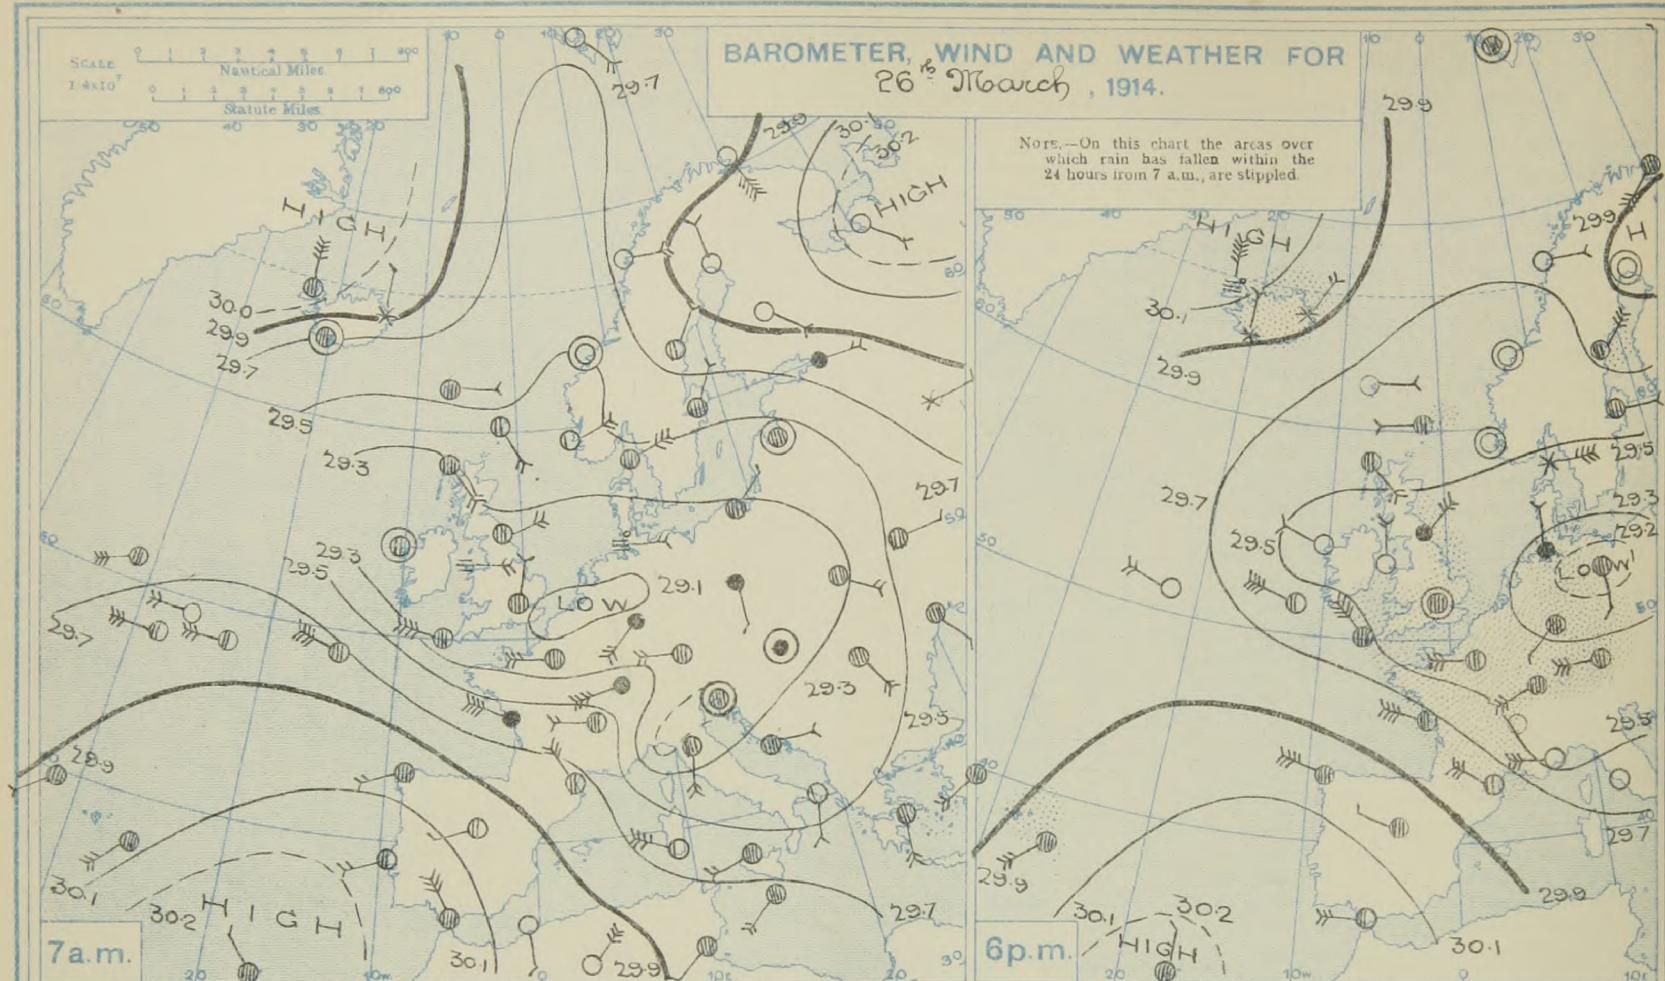

The thermometer rose to 50 deg. or a trifle above it at several of the English stations. The amount of bright sunshine varied considerably in different districts. Rain was again experienced in most districts, and a gale from the Westward occurred in the western part of the Channel. Wireless reports show that as far west as the 15th meridian ships experienced gales or strong winds from between South-West and North-West, and squally, changeable weather.

NOTE.—The information relating to weather is indicated by the following letters—b, blue sky; bc, sky half clouded; c, sky three parts clouded; d, drizzling rain; e, wet air, without rain falling; f, fog; g, gloom; h, hall; i, lightning; m, mist; o, overcast sky; p, passing showers; q, scud; r, rain; s, snow; t, thunder; u, ugly, threatening sky; v, visibility, unusual transparency; w, dew; x, hoar frost; z, dust-haze, or smoke.

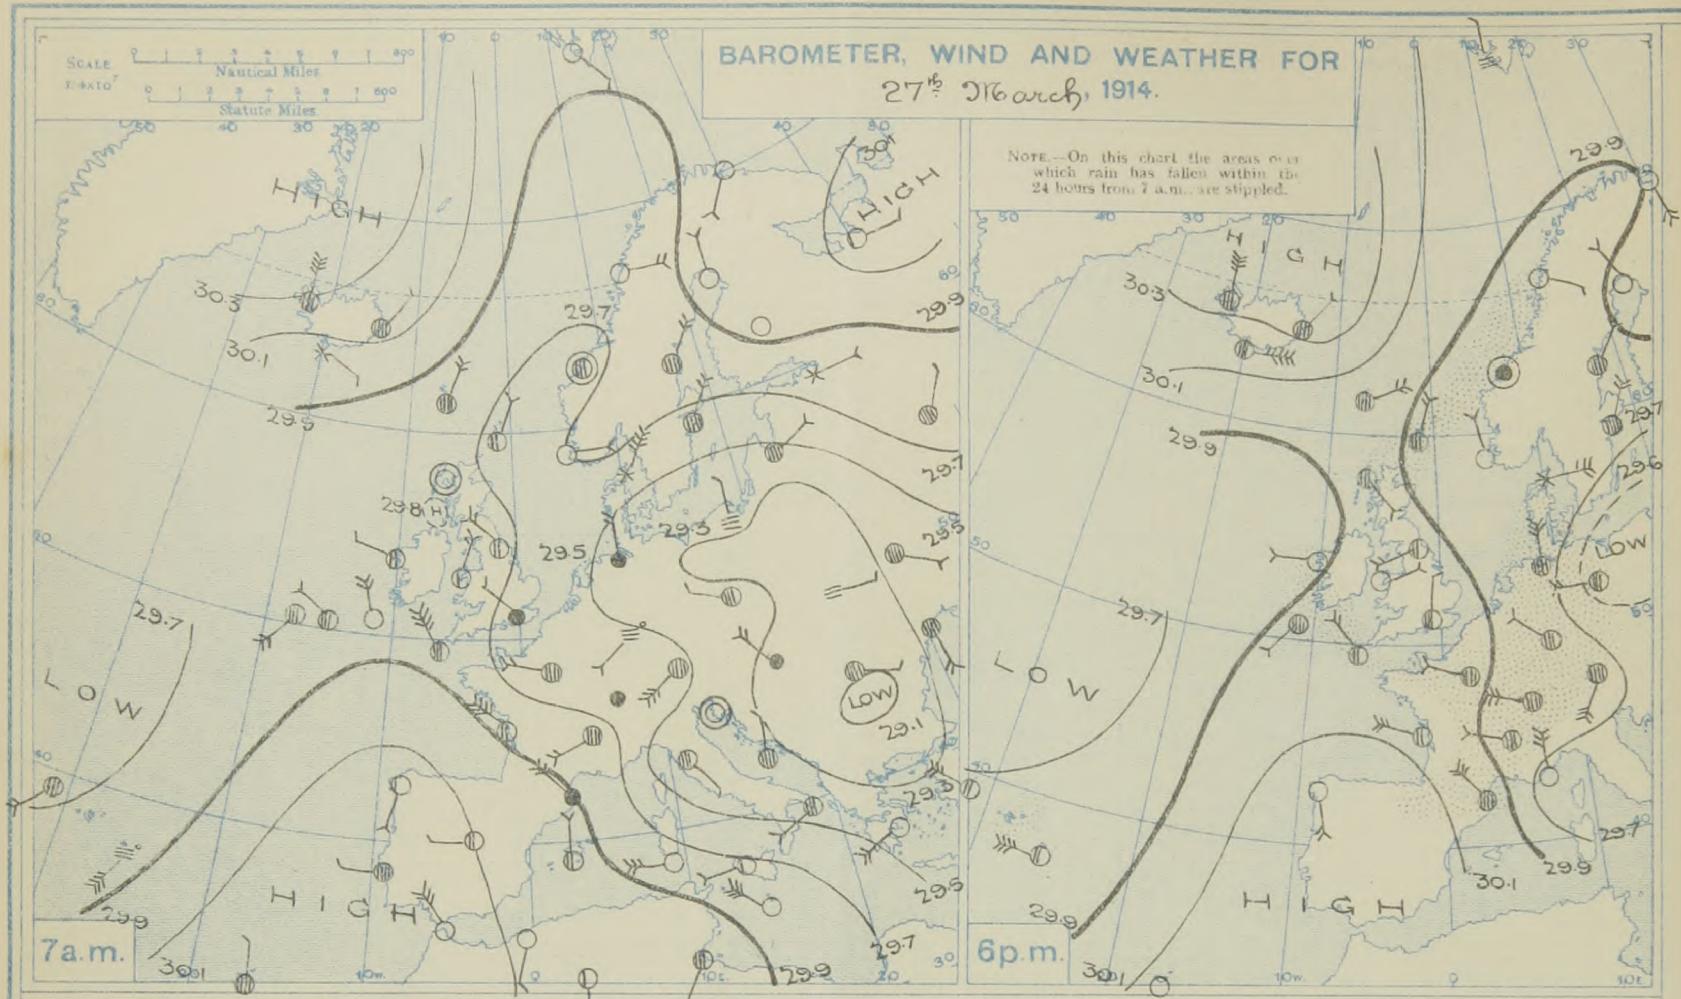

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.

The thermometer rose to 50 deg. or slightly above it in many parts of England and Ireland: in the north of Scotland it did not reach 45 deg. The amount of bright sunshine was as a rule somewhat small. Showers fell in most districts, and thunderstorms or thunder only occurred in several isolated localities. Wireless reports show that as far west as the 30th meridian ships experienced strong to high winds from the Westward, and fair weather.

## NOTES ON YESTERDAY'S WEATHER.

The thermometer rose to 50 deg. and upwards in many parts of the country, to 55 deg. at Weymouth, and to 56 deg. at Teignmouth. Very little bright sunshine was recorded over Central and South-Eastern England, but in most other districts the duration was large. Wireless reports show that as far west as the 17th meridian ships experienced moderate to fresh breezes from between South-West and North-West, and cloudy weather.

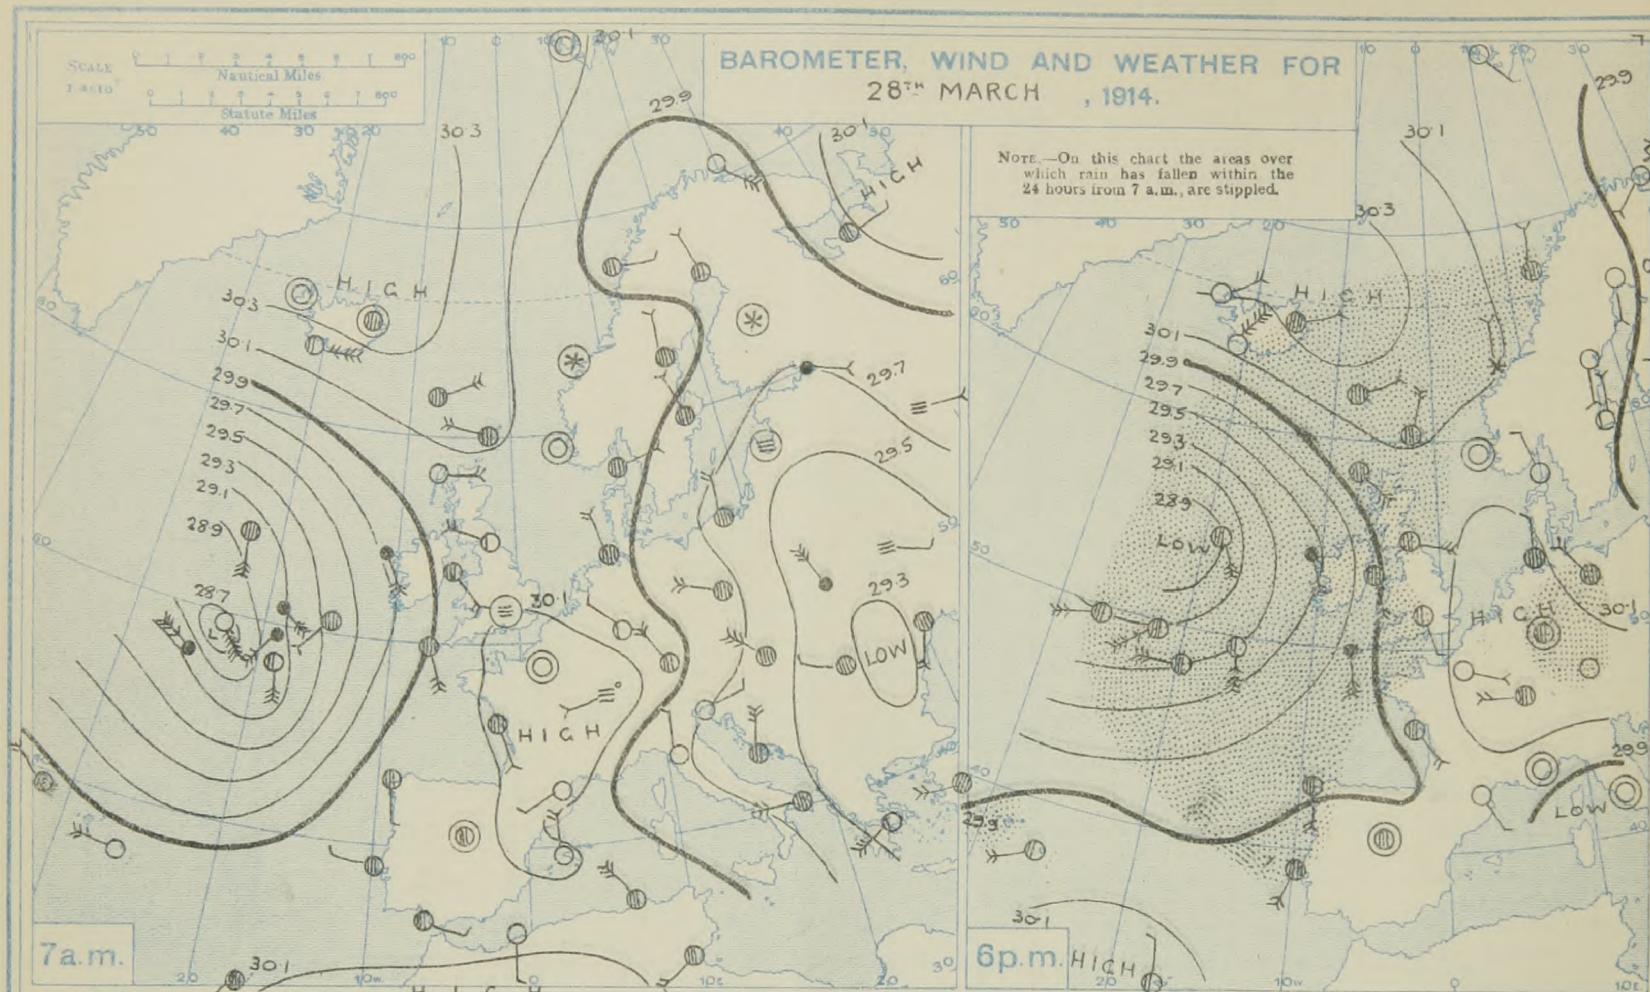

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky half clouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hall; l. lightning; m. mist; o. overcast sky; p. passing showers; q. squalls; r. rain; s. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Terminals in London.

TEMPERATURE, WEATHER AND SEA DISTURBANCE.

EXPLANATION.

**BAROMETER.**—Isobars are drawn for each tenth of an inch.

**WIND.**—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

Calm (circle).

**TEMPERATURE.**—Given in degrees Fahrenheit.

Isotherms shown by dotted lines.

**WEATHER.**—Shown by the following symbols:—

(circle) clear sky. (cross) sky + cloudy. (dot) sky + cloudy.

(cross with dot) sky + cloudy. (dot with dot) overcast sky. (circle with dot) rain falling.

\*snow. ▲ hail. △ fog. □ mist. T, thunder.

F, thunderstorm.

**SEA DISTURBANCE.**—Rough (wavy line). High (double wavy line).

## NOTES ON YESTERDAY'S WEATHER.

Temperature rose to 50° or a few degrees higher in several parts of the Kingdom. Rain was experienced in the west and south, and at some northern stations, about 1.0 in. in the south of Ireland. Bright sunshine was abundant in the east and south of England and also at Harrogate. According to wireless reports strong winds and gales from between South and West prevailed very generally on the Atlantic between the Irish coast and the 25th meridian.

**FURTHER OUTLOOK.**

SYNOPTIC CHART FOR 7 a.m., Monday, 30<sup>th</sup> MARCH, 1914.

GENERAL INFERENCE.

It is probable that our south-eastern districts will come under the influence of the Continental anticyclone to an increasing extent. Our western districts are likely to be affected by the depression which was causing a fall of the barometer at the Azores yesterday evening.

## NOTES ON YESTERDAY'S WEATHER.

Rain fell in most parts of the country. The amounts of bright sunshine were mostly small, but in the south-west and also in the south of Ireland the totals were considerable. Birr Castle reports 8.2 hours, Newquay 8.0 hours. Temperature rose to 57 deg. at these two stations, but over a large area the maximum thermometer did not register 50 deg.

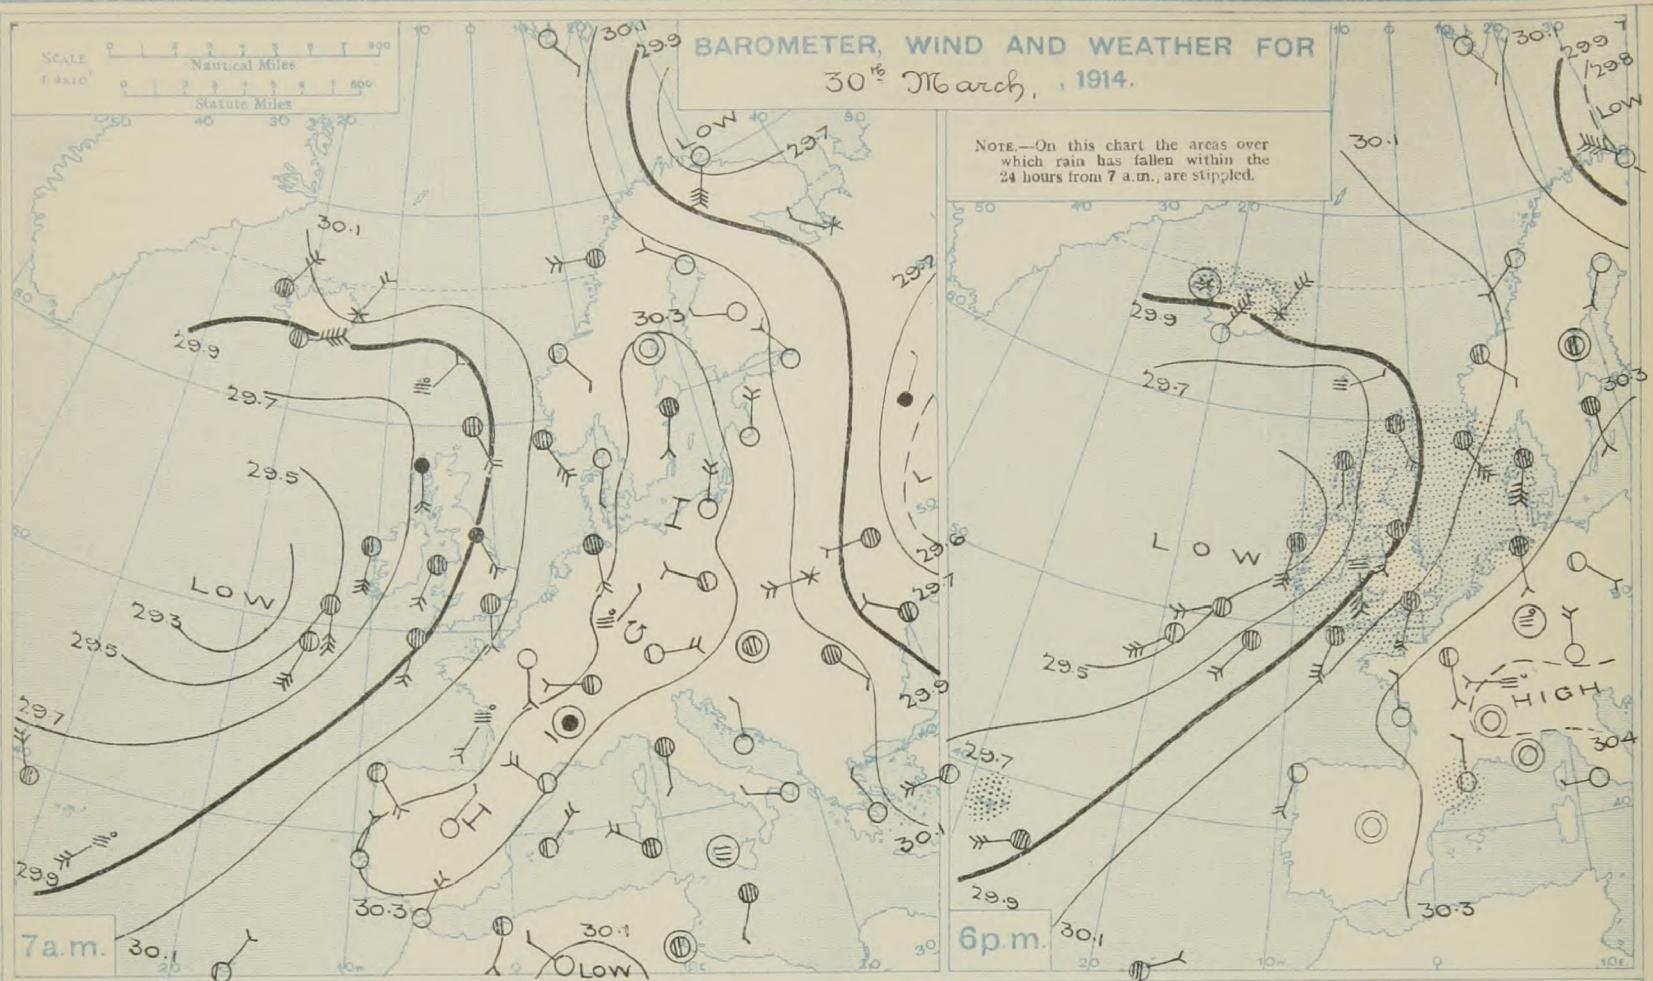

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky half clouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hail; l. lightning; m. mist; o. overcast sky; p. passing showers; q. squalls; r. rain; s. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O. and at the bookstalls at certain Railway Termini in London.
