Daily Weather Summaries for November 2020

If you have any questions or feedback about this product or wish to obtain further data please contact the Met Office.

This document contains daily weather summaries for each day of November 2020. The Met Office National Meteorological Library and Archive holds a continuous record of daily weather summaries or daily weather reports from 1860, and these daily weather summaries form a continuation of that series.

The purpose of each summary is to provide an overview of the weather conditions across the UK on that day, with the historical emphasis mainly based on observations from surface network of weather stations, although the format has varied over the decades. While the emphasis remains on observations from the surface network, the current daily weather summaries supplement these by including satellite and rain-radar imagery to provide a more complete overview. The current format of the daily weather summaries is as follows:

1. Text summary of the main characteristics of the weather during the day, written by an operational meteorologist in the Met Office operations centre.
2. Table of daily extremes for the UK for key climate variables including temperature, rainfall, sunshine and gust speeds.
3. Overview of the synoptic situation at 00 and 12 UTC comprising: analysis charts showing the surface pressure pattern and associated weather fronts; North Atlantic and European infra-red satellite images showing cloud-cover; combined infra-red and rain-radar images of the UK; maps of wind speed and direction at 00 and 12 UTC; observations of pressure, wind speed and direction, cloud cover, air and dewpoint temperature at selected UK and European stations in data tables.
4. UK maps of key climate variables from observing stations including maximum, minimum and grass minimum temperature, rainfall, sunshine, gust speed and snow.
5. Further guidance notes

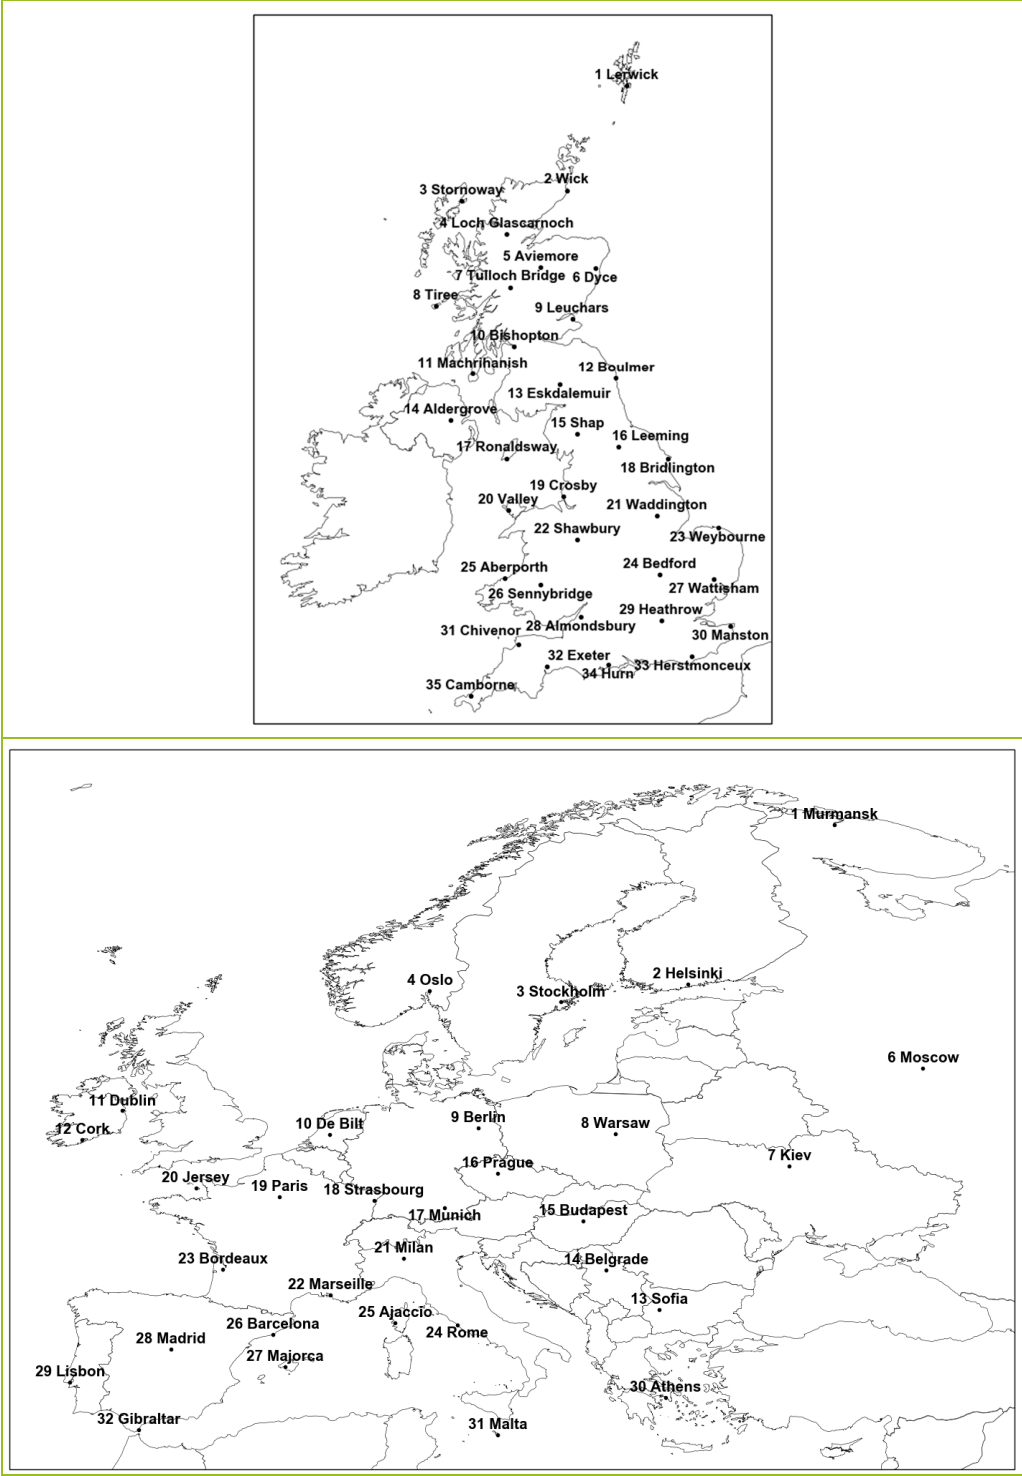

If you spot any data errors or omissions in this product please contact the Met Office.

This issue of the daily weather summary provides data for the following UK and European locations (Reykjavic (5) also included):

Daily Weather Summary for Sunday 01 November 2020

This day's summary created 10/11/2020 09:54

Summary of the UK Weather for Sunday 01 November 2020

It was a generally dry start to the night across the country but a band of rain covered Northern Ireland and most of Scotland. This moved eastwards across the UK through the night. It was windy in many areas, particularly near the coast. Later in the morning, heavy rain fell over Wales and the Northwest, and showers formed across the Southwest as a band of rain crossed the UK. By the afternoon rain covered much of the UK, with a few isolated dry spells, primarily over the South. It remained especially wet over the Northwest and Wales. Later it became largely dry and mostly cloudy over East Anglia, the Southeast, and the Southwest. It was generally a very windy day with widespread gusts and gales, most notably for exposed and coastal areas in the west. The unsettled conditions continued into the night, as most of England, Wales, and southern Scotland experienced further rainfall - particularly heavy over the Northwest.

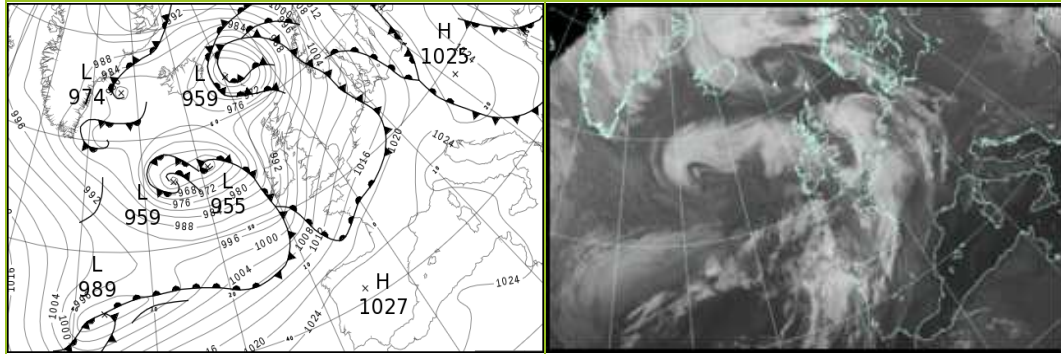

Daily Extremes

<i>Highest Maximum</i>	18.4°C Hawarden Airport (Clwyd, 11mAMSL)
<i>Lowest Maximum</i>	7.7°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Highest Minimum</i>	12.1°C Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Lowest Minimum</i>	3.1°C Orkney: Loch Of Hundland (Orkney, 28mAMSL)
<i>Lowest Grass Minimum</i>	0.6°C Kinbrace, Hatchery (Sutherland, 103mAMSL)
<i>Most Rainfall</i>	96.2mm Beckermonds (North Yorkshire, 315mAMSL)
<i>Most Sunshine</i>	4.3hr Whitby (North Yorkshire, 41mAMSL)
<i>Highest Gust</i>	71Kt 82mph Aultbea No 2 (Ross & Cromarty, 11mAMSL)
<i>Highest Gust (mountain)</i>	86Kt 99mph Bealach Na Ba No 2 (Ross & Cromarty, 773mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

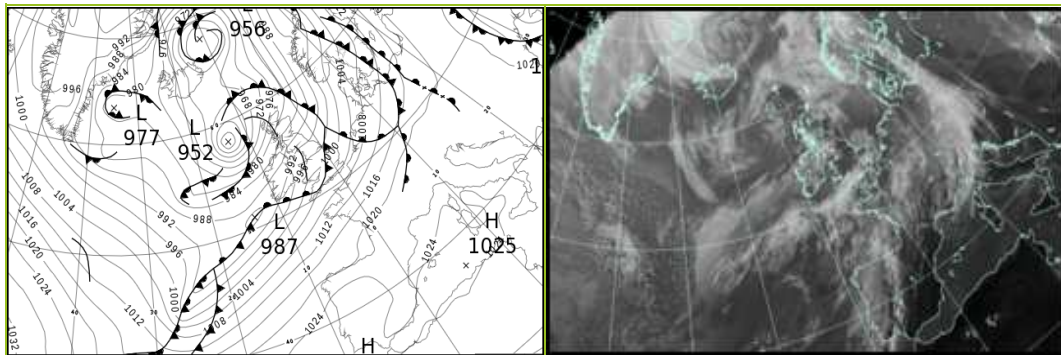

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 01 November 2020

North Atlantic and Europe analysis charts and satellite images at 0000 UTC

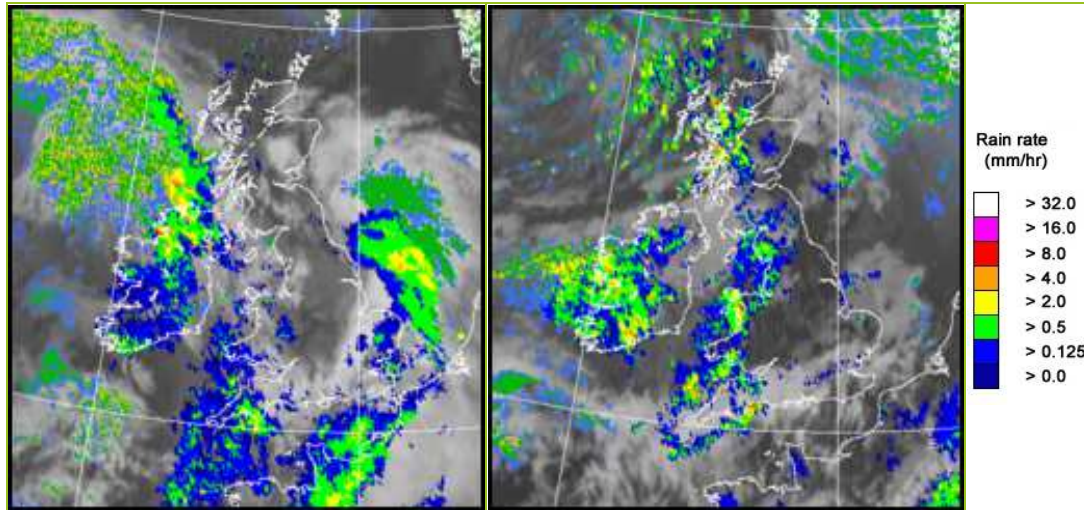

North Atlantic and Europe analysis charts and satellite images at 1200 UTC

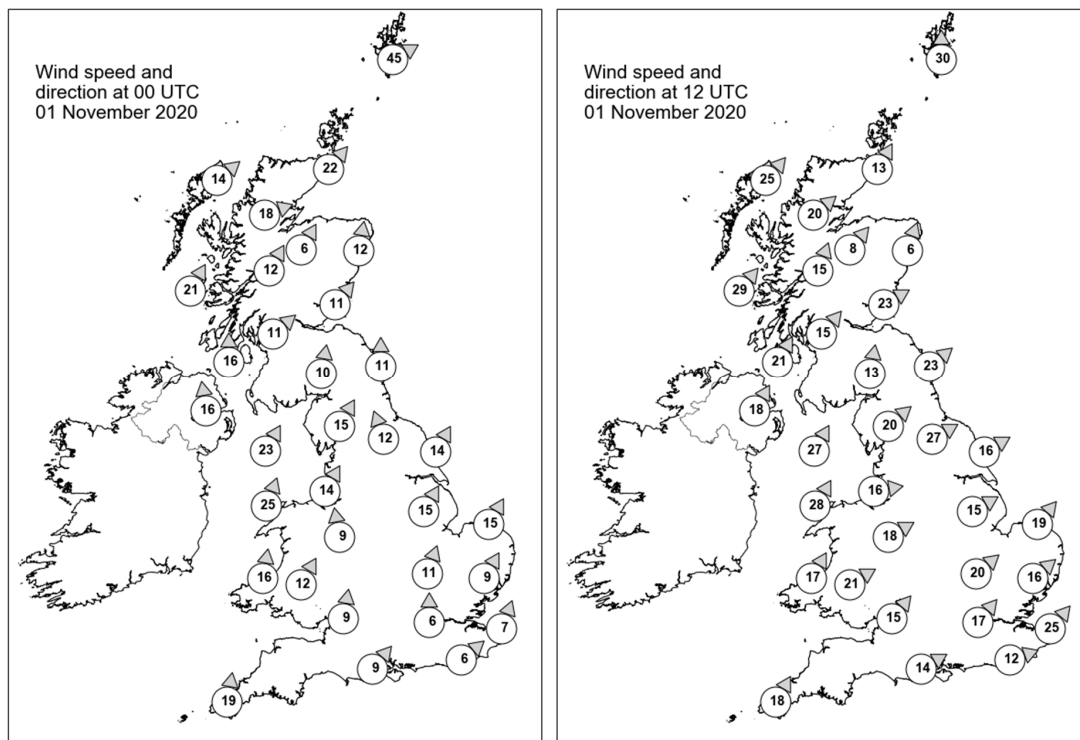

All satellite imagery copyright Met Office and EUMETSAT (European Organisation for the Exploitation of Meteorological Satellites). These show infra-red images from the geostationary MSG satellite. The rainfall rates are derived from both rain-radar and satellite data.

Daily Weather Summary for Sunday 01 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 02 November 2020

This day's summary created 10/11/2020 09:54

Summary of the UK Weather for Monday 02 November 2020

It was a rather unsettled start to the night throughout the country, with a band of rain covering Northern Ireland, Wales, and the north of England. South East England, the Midlands, and the northeast of Scotland remained dry with clear spells for the most part during the night. The south of Scotland, and most of England excluding East Anglia also saw blustery showers scattered through the early hours. It was windy in many areas, especially along western coasts and parts of Scotland. The band of rain and cloud travelled southeast across the country, clearing Kent by midday. Following the band of rain, blustery showers continued through the day spreading eastwards across the UK, with the heaviest located across western Wales and northern England. Eastern parts remained largely dry, seeing the longest spells of clear dry weather. A second band of more persistent rain and showers moved into Northern Ireland during the mid afternoon, reaching northern parts of England by the evening. It remained windy throughout, with the south coast and western areas seeing the strongest winds and gusts.

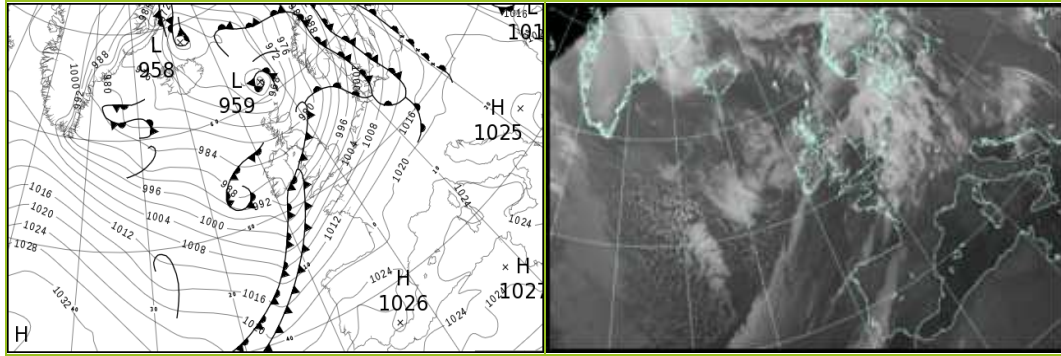

Daily Extremes

<i>Highest Maximum</i>	18.2°C Lingwood, Strumpshaw Hill (Norfolk, 33mAMSL)
<i>Lowest Maximum</i>	7.2°C Spadeadam No 2 (Cumbria, 285mAMSL)
<i>Highest Minimum</i>	15.3°C Chertsey, Abbey Mead P Sta (Surrey, 12mAMSL)
<i>Lowest Minimum</i>	4.1°C Drumnadrochit (Inverness-shire, 53mAMSL)
<i>Lowest Grass Minimum</i>	0.9°C Craibstone (Aberdeenshire, 102mAMSL)
<i>Most Rainfall</i>	45.8mm Seathwaite (Cumbria, 129mAMSL)
<i>Most Sunshine</i>	7.5hr Preston, Cove House (Dorset, 44mAMSL)
<i>Highest Gust</i>	70Kt 81mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	72Kt 83mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

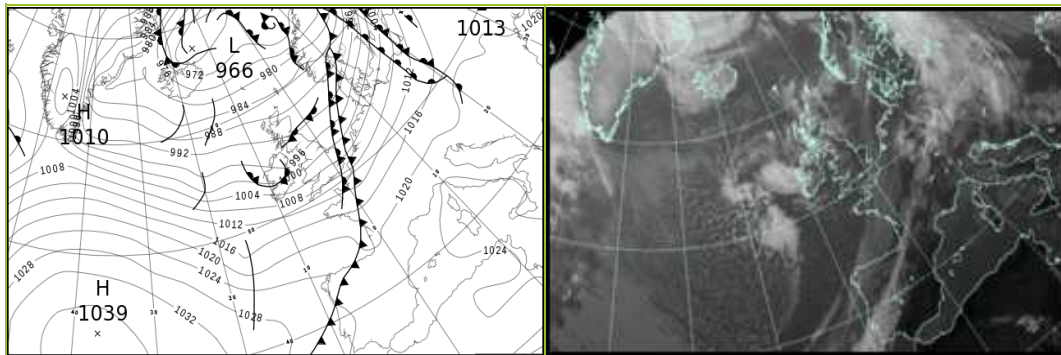

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 02 November 2020

Daily Weather Summary for Monday 02 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 03 November 2020

This day's summary created 10/11/2020 02:00

Summary of the UK Weather for Tuesday 03 November 2020

A band of persistent heavy rain moved northeastwards over Scotland throughout the early hours. Heavy rain moved in from the southwest and tracked northeastwards overnight, affecting Cornwall, Devon and South Wales at first. This brought locally heavy downpours, strong gusts and isolated thunder. Scattered showers in the northwest and Northern Ireland, elsewhere it was a largely dry clear night before cloud thickened becoming more widespread across England later on. Heavy rain affected much of Scotland by dawn, whilst the heavy rain in the south tracked its way over central England and central Wales. The northwest remained largely dry. By dawn scattered showers became a feature in the southwest and south Wales. A windy night, along western and southern coasts and Scotland. Heavy rain over Scotland and central England migrated eastwards and cleared offshore by midday leaving behind showers that mostly affected the western areas. These showers were more organised, particularly over northwest England. Thicker cloud cover moved southeastwards over Scotland through the day. However, eastern England drier day with some intermittent sunshine.

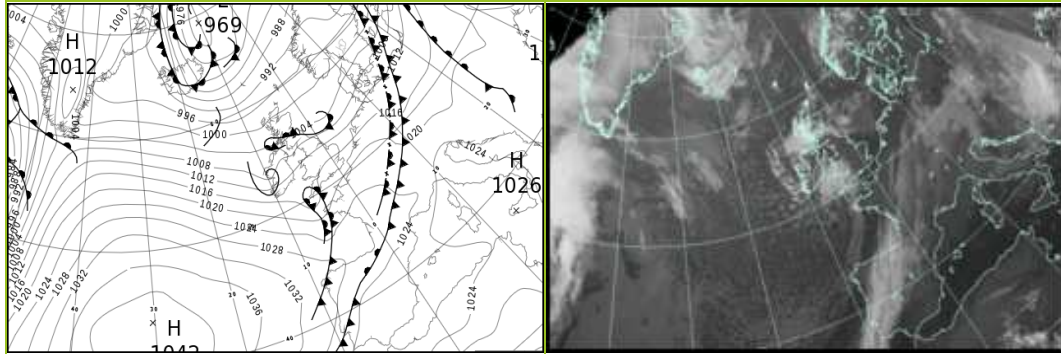

Daily Extremes

<i>Highest Maximum</i>	12.3°C Hastings (East Sussex, 45mAMSL) also Trevince (Cornwall, 69mAMSL)
<i>Lowest Maximum</i>	5.4°C Spadeadam No 2 (Cumbria, 285mAMSL)
<i>Highest Minimum</i>	8.2°C South Uist Range (Western Isles, 4mAMSL)
<i>Lowest Minimum</i>	-1.4°C Aboyne No 2 (Aberdeenshire, 140mAMSL)
<i>Lowest Grass Minimum</i>	-3.2°C Fettercairn, Glensaugh No 2 (Kincardineshire, 171mAMSL)
<i>Most Rainfall</i>	17.5mm Cornwood (Devon, 95mAMSL)
<i>Most Sunshine</i>	5.9hr Lyneham (Wiltshire, 145mAMSL)
<i>Highest Gust</i>	56Kt 64mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	61Kt 70mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

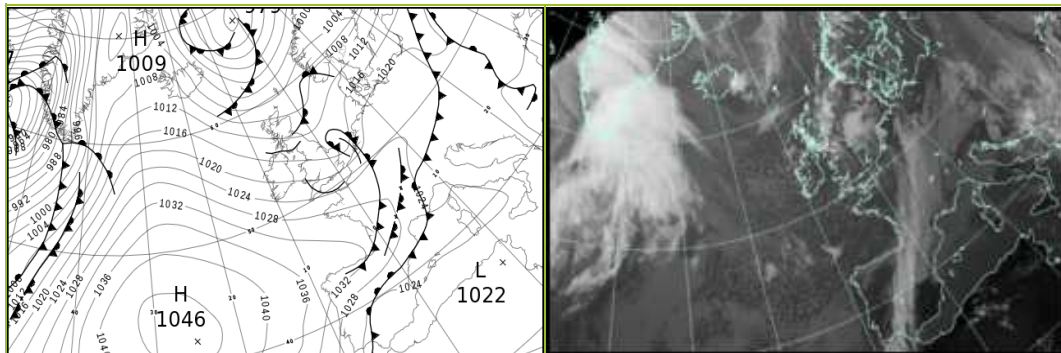

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 03 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 04 November 2020

This day's summary created 11/11/2020 02:00

Summary of the UK Weather for Wednesday 04 November 2020

For much of England and Wales it was a clear, dry and cold night. Air frosts were observed at many observation sites across central and southern England and central Wales. There were showers, some heavy, moving eastwards across Scotland through the night. A line of showers linking the west coast of Wales and southwest of England persisted for much of the night and became less frequent by dawn. Fog patches developed in some areas in southern England just before dawn. The minimum temperature was -3.6 Celsius at Benson, Oxfordshire. High pressure out in the Atlantic slowly reached over the British Isles, providing settled and sunny autumnal weather for most throughout the day. Scotland, on the outskirts with an occlusion passing over around lunchtime, saw more cloud cover, with some showers and light rain. Occasional showers elsewhere were mostly found inshore from north west coastlines, such as north Scotland, Northern Ireland, north Wales and northwest England, but otherwise a sunny and calm day for most, with some mild winds in North Scotland in the evening. The maximum temperature was 13.4 Celsius at Scolton Country Park, Dyfed. Through the evening the rain continued moving south eastward across Scotland, with showers elsewhere ceasing by late afternoon. Low cloud moved southward into Northern regions of England, but remained clear and dry elsewhere.

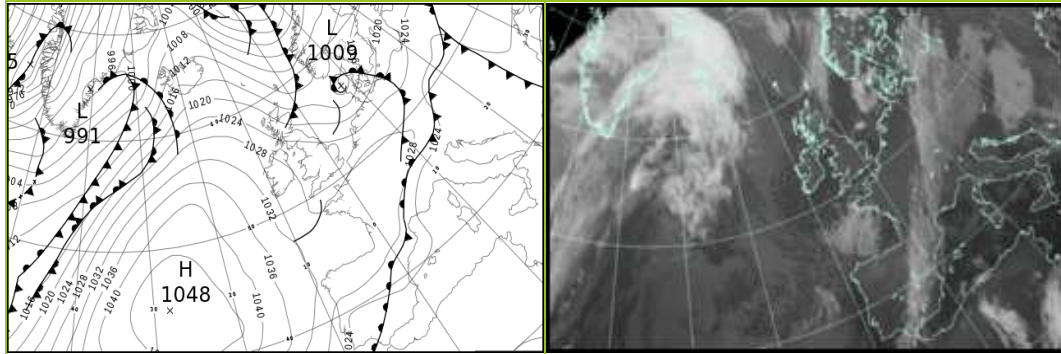

Daily Extremes

<i>Highest Maximum</i>	14.0°C Altnaharra No 2 (Sutherland, 81mAMSL) also Kinlochewe (Ross & Cromarty, 25mAMSL)
<i>Lowest Maximum</i>	7.5°C Buxton (Derbyshire, 307mAMSL)
<i>Highest Minimum</i>	8.3°C Port Henderson (Ross & Cromarty, 18mAMSL)
<i>Lowest Minimum</i>	-3.9°C St Harmon No 2 (Powys, 291mAMSL)
<i>Lowest Grass Minimum</i>	-7.9°C Reading University, Whiteknights (Berkshire, 66mAMSL)
<i>Most Rainfall</i>	14.9mm Wight: Carisbrooke W Wks (Isle Of Wight, 17mAMSL)
<i>Most Sunshine</i>	8.6hr Shoeburyness, Landwick (Essex, 2mAMSL) also Almondsbury (Avon, 75mAMSL) also Exeter Airport No 2 (Devon, 27mAMSL)
<i>Highest Gust</i>	51Kt 59mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	63Kt 72mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

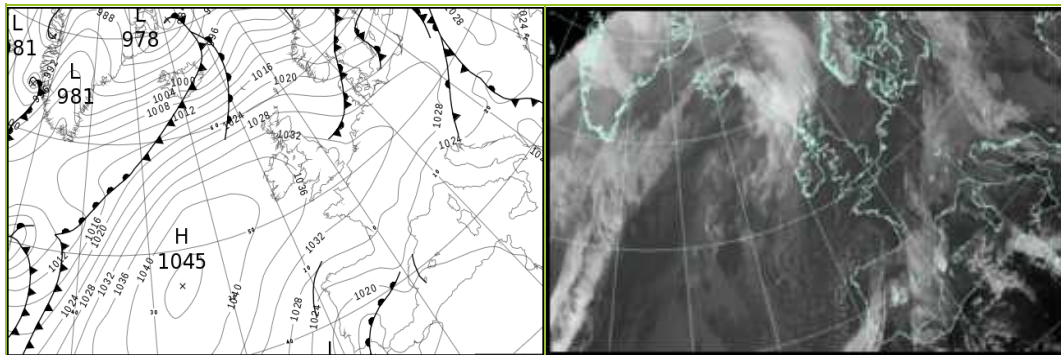

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 05 November 2020

This day's summary created 12/11/2020 02:00

Summary of the UK Weather for Thursday 05 November 2020

Through the night, low cloud persisted in the northern half of the UK, moving slowly south eastwards, covering most of northern England and Scotland by morning. Low cloud brought scattered light rain at times, but this faded through the early hours, becoming dry by morning. Fog was also seen in many places, particularly central and south eastern England. Elsewhere remained dry with clear skies, and calm winds, making it feel cold. Most areas saw dry conditions throughout the day, though northern and eastern parts of England experienced scattered showers through the morning. The fog present through the early hours lifted through the morning, with the exception of some south-eastern areas of England, where fog didn't clear until the early afternoon. This led to a slightly cooler morning in affected areas. Intermittent sunny spells followed across the country, with settled conditions for the rest of the day. However, northern and north-western parts of the country were cloudier, and north-western Scotland experienced some light rain. Temperatures were around average for the country; however, north-eastern parts were mild due to the sunshine.

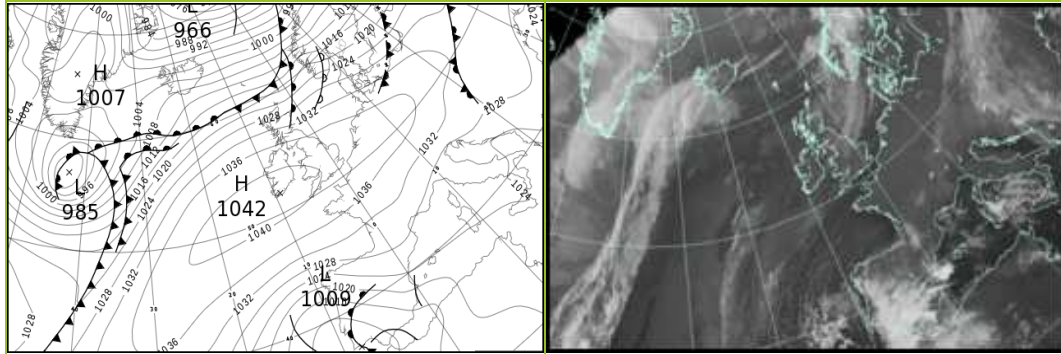

Daily Extremes

<i>Highest Maximum</i>	16.6°C Dyce (Aberdeenshire, 65mAMSL)
<i>Lowest Maximum</i>	6.8°C Wiggonholt (West Sussex, 28mAMSL)
<i>Highest Minimum</i>	9.3°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-2.7°C Exeter Airport No 2 (Devon, 27mAMSL)
<i>Lowest Grass Minimum</i>	-6.4°C Reading University, Whiteknights (Berkshire, 66mAMSL)
<i>Most Rainfall</i>	1.4mm Stormont Castle (Down, 56mAMSL)
<i>Most Sunshine</i>	8.2hr Bude (Cornwall, 15mAMSL)
<i>Highest Gust</i>	47Kt 54mph Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Gust (mountain)</i>	70Kt 81mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

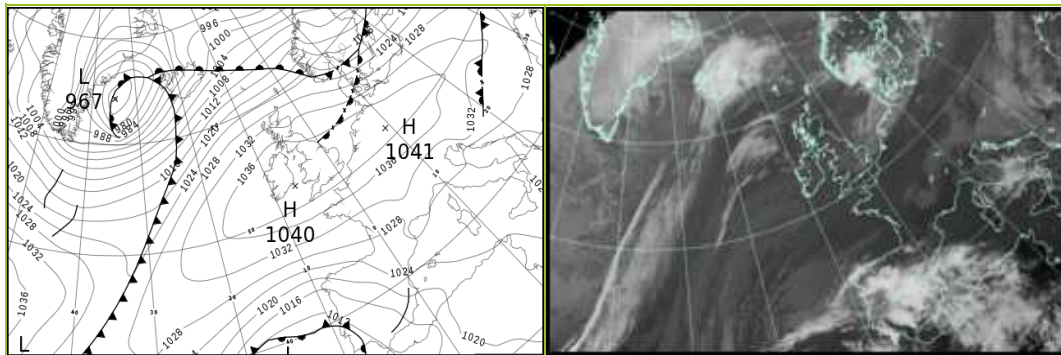

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 06 November 2020

This day's summary created 13/11/2020 03:00

Summary of the UK Weather for Friday 06 November 2020

A dry and clear night for most, though northern Scotland saw plenty of cloud which headed north as the night progressed. There was fog, sometimes freezing fog, throughout the country and low temperatures meant that many areas saw frost. Wind speeds were mostly low, though some areas on the south coast were a bit breezier. High pressure continued to dominate today. Fog, mist, and low cloud formed in certain places across the UK, most notably over Dartmoor, Wales, eastern parts, the southeast, and especially over the Vale of York. This cleared to leave a fine dry day for the whole of the UK with plenty of sunshine. Windy in the far southwest, but largely benign elsewhere.

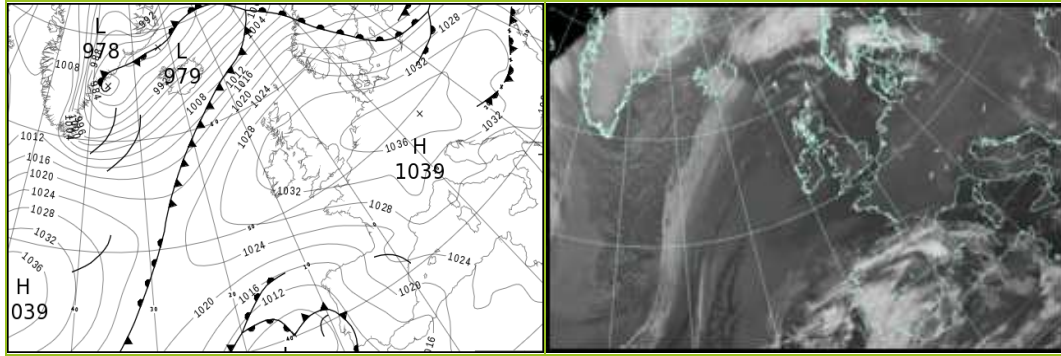

Daily Extremes

<i>Highest Maximum</i>	15.3°C Altnaharra No 2 (Sutherland, 81mAMS�)
<i>Lowest Maximum</i>	6.7°C Bramham (West Yorkshire, 54mAMS�)
<i>Highest Minimum</i>	10.3°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMS�)
<i>Lowest Minimum</i>	-3.7°C Benson (Oxfordshire, 57mAMS�)
<i>Lowest Grass Minimum</i>	-7.4°C Whitechurch (Dyfed, 129mAMS�)
<i>Most Rainfall</i>	4.8mm Harris: Quidnish (Western Isles, 13mAMS�)
<i>Most Sunshine</i>	8.6hr Aberdaron (Gwynedd, 86mAMS�)
<i>Highest Gust</i>	46Kt 53mph Lerwick (Shetland, 82mAMS�)
<i>Highest Gust (mountain)</i>	35Kt 40mph Cairngorm Summit (Inverness-shire, 1237mAMS�)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

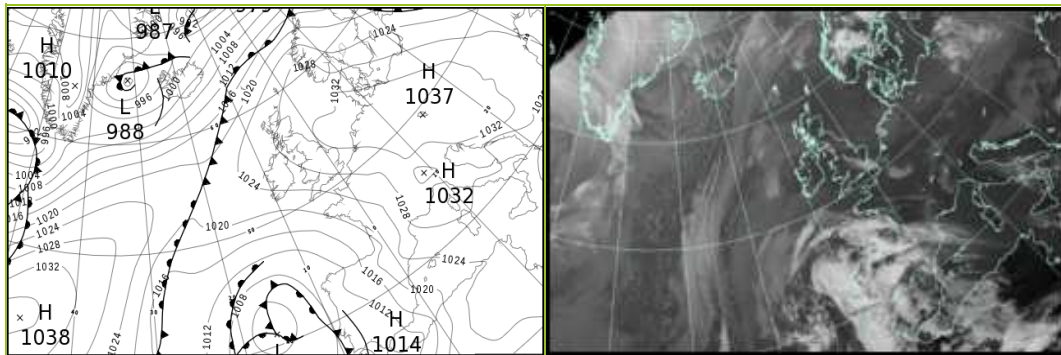

mAMS� refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 07 November 2020

This day's summary created 17/11/2020 09:18

Summary of the UK Weather for Saturday 07 November 2020

Conditions remained dry overnight except for remnants of showers in Norfolk. Fog, sometimes patchy, developed over the Pennines, northern Wales, southern Wales, the Midlands, and the South West. Winds generally remained light, though the south-western coasts saw some more blustery conditions. A chilly night overall for the country. A cloudy day, with fog for many prone locations. Some of this fog, particularly in the South, lingered through the morning. The Southwest, Northeast, and central Scotland had a large covering of low cloud persisting until the evening. It was a largely dry day, with some showers along the south coast of Wales. There were sunny spells at times, especially for more eastern parts. Winds were light for most of the UK, except for some strong gusts along south-western coasts. In the evening, a band of rain moved north over the Southwest. It was an exceptionally mild day for most, especially in the west, with Wales and the Southwest seeing unseasonably high temperatures.

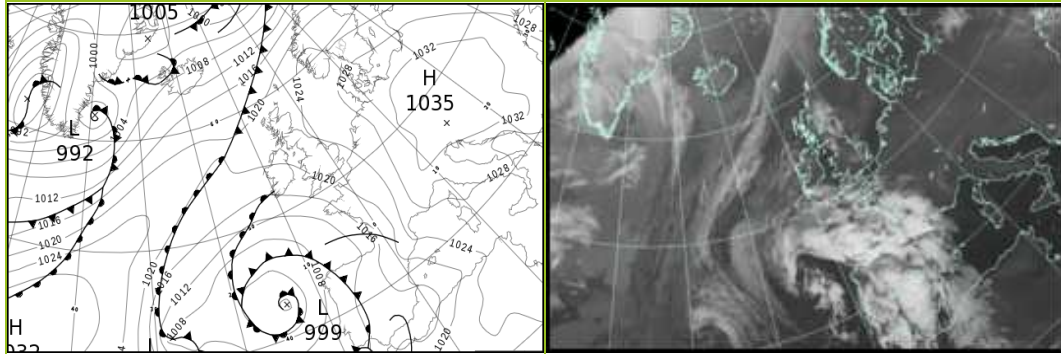

Daily Extremes

<i>Highest Maximum</i>	17.8°C Virginstow, Beaworthy (Devon, 147mAMSL)
<i>Lowest Maximum</i>	5.9°C Salsburgh (Lanarkshire, 277mAMSL) also Strathallan Airfield (Perthshire (in Tayside Region), 35mAMSL)
<i>Highest Minimum</i>	11.8°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-3.3°C Tulloch Bridge (Inverness-shire, 249mAMSL)
<i>Lowest Grass Minimum</i>	-7.0°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Most Rainfall</i>	16.8mm Derrylin, Cornahoule (Fermanagh, 68mAMSL)
<i>Most Sunshine</i>	7.4hr Weybourne (Norfolk, 21mAMSL)
<i>Highest Gust</i>	32Kt 37mph Camborne (Cornwall, 87mAMSL)
<i>Highest Gust (mountain)</i>	24Kt 28mph Great Dun Fell No 2 (Cumbria, 847mAMSL) also Cairnwell (Aberdeenshire, 928mAMSL) also Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

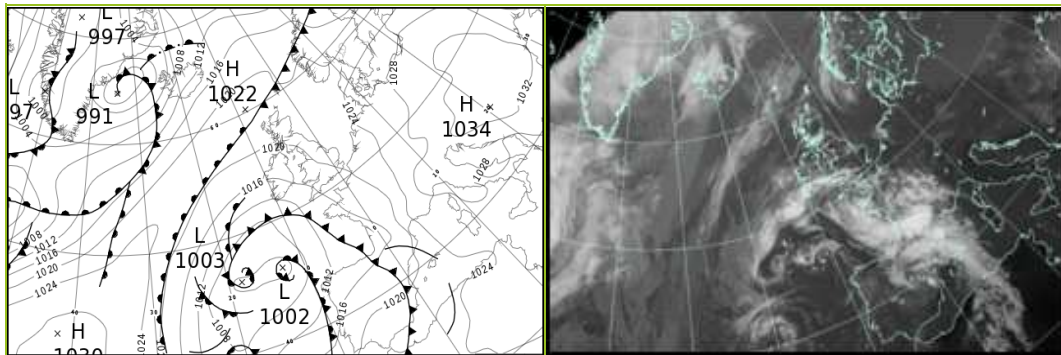

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 08 November 2020

This day's summary created 17/11/2020 09:18

Summary of the UK Weather for Sunday 08 November 2020

A largely dry night, with patchy cloud across the U.K. A band of rain, heavy at times continued to move across the Southwest and tracked Northeastwards affecting south Wales and Northern Ireland overnight and into the early hours. Rain, heavy at times also affecting northwest Scotland. There were some scattered showers in the Southeast that moved northwards. Winds remained light and a mild night for most, exceptionally mild across the south. Into the day the band of rain migrated north, only pushing slightly east, passing over Northern Ireland and covering most of the west coast of England and most parts of Scotland and Wales. Areas of rainfall saw thick cloud cover, but elsewhere saw only saw patchy cover with some brighter spells - particularly in the south east. Fog caused decrease visibility for most places throughout the day in central and eastern England. This continued into the evening, with widespread low cloud and fog, especially in central areas. The evening saw some locally heavy, showery rain moving into the Southwest. Generally quite mild, remaining so into the evening.

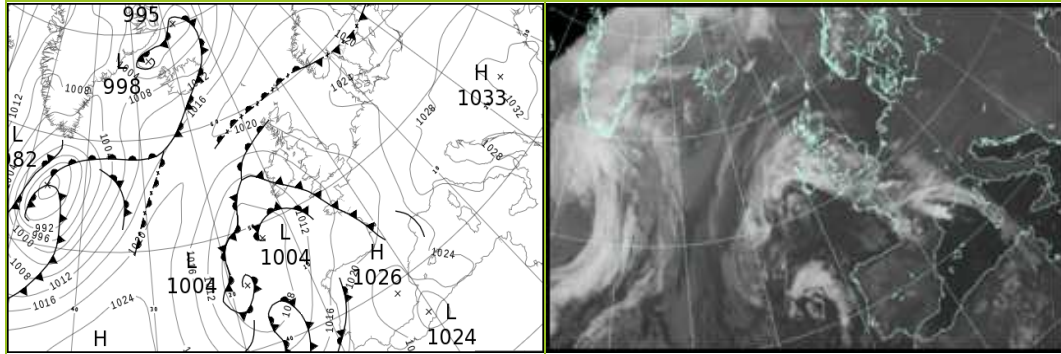

Daily Extremes

<i>Highest Maximum</i>	17.1°C Trawsgoed (Dyfed, 63mAMSL)
<i>Lowest Maximum</i>	6.8°C Urquhart, Northwood (Ross & Cromarty, 17mAMSL)
<i>Highest Minimum</i>	12.5°C Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Lowest Minimum</i>	-2.9°C Aviemore (Inverness-shire, 228mAMSL)
<i>Lowest Grass Minimum</i>	-5.0°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL) also Kinloss (Moray (in Grampian Region), 5mAMSL)
<i>Most Rainfall</i>	15.9mm Auchtermuchty, Rossie (Fife, 75mAMSL)
<i>Most Sunshine</i>	5.5hr Manston (Kent, 49mAMSL) also Tibenham Airfield (Norfolk, 52mAMSL)
<i>Highest Gust</i>	31Kt 36mph Ballypatrick Forest (Antrim, 156mAMSL)
<i>Highest Gust (mountain)</i>	59Kt 68mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

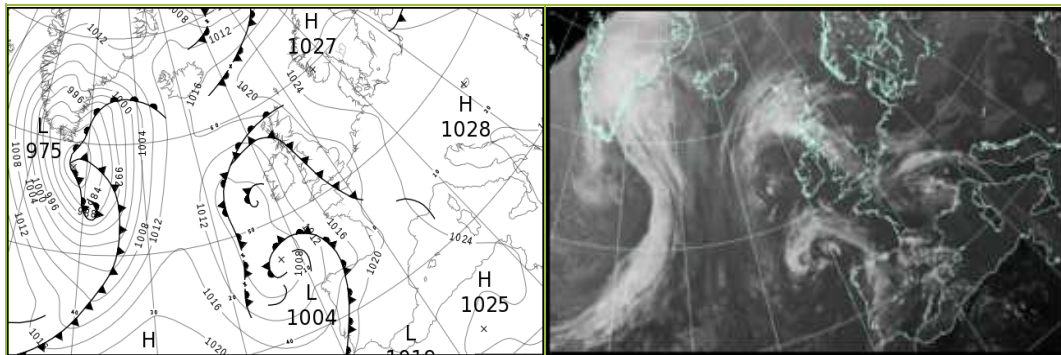

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 08 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 09 November 2020

This day's summary created 16/11/2020 03:00

Summary of the UK Weather for Monday 09 November 2020

Areas of low cloud covered much of the UK through the night, accompanied by some higher level cloud through most central and southwestern parts. Widespread fog was also present through many central parts, and hilly locations. There were two bands of rain moving northeastwards over the country, one over eastern parts, and one over southwestern. It was another mild night with calm winds, slightly stronger along southwestern coasts. Going into the morning, the eastern band of rain began to clear, and a new band started moving in over Cornwall. The day itself continued with plenty of cloud cover, though there were a few bright spells. Rain was seen across the country, but particularly focused in the south and Wales, with large rainstorms, often heavy, headed gradually north and eastwards through the day. Winds remained mostly light, with the south and west coasts seeing the strongest winds. Temperatures were generally above-average for this time of year, with the south spending most of the day in the low to mid teens, and even the north seeing plenty of double-digit values.

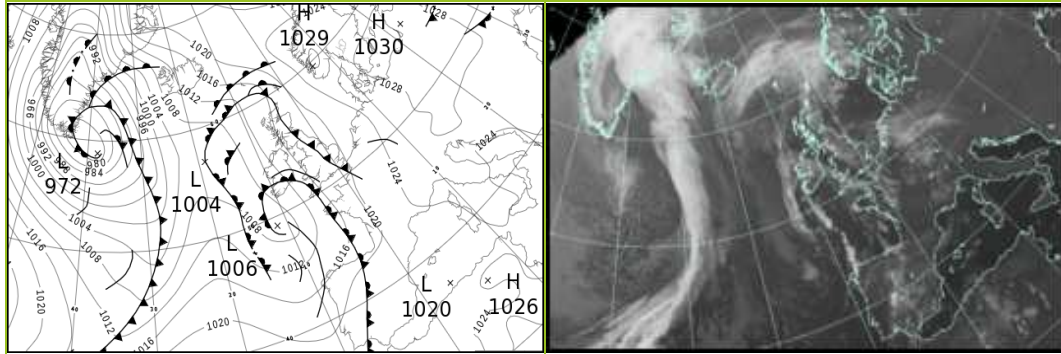

Daily Extremes

<i>Highest Maximum</i>	18.0°C Gogerddan (Dyfed, 31mAMSL)
<i>Lowest Maximum</i>	7.9°C Cassley (Sutherland, 99mAMSL)
<i>Highest Minimum</i>	13.2°C Hastings (East Sussex, 45mAMSL)
<i>Lowest Minimum</i>	0.1°C Braemar No 2 (Aberdeenshire, 327mAMSL)
<i>Lowest Grass Minimum</i>	-0.9°C Loch Glascarnoch (Ross & Cromarty, 269mAMSL)
<i>Most Rainfall</i>	33.0mm Gorslas Resr No2 (Carmarthenshire, 232mAMSL)
<i>Most Sunshine</i>	4.7hr Strathy East (Sutherland, 68mAMSL)
<i>Highest Gust</i>	33Kt 38mph Berry Head (Devon, 58mAMSL)
<i>Highest Gust (mountain)</i>	34Kt 39mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

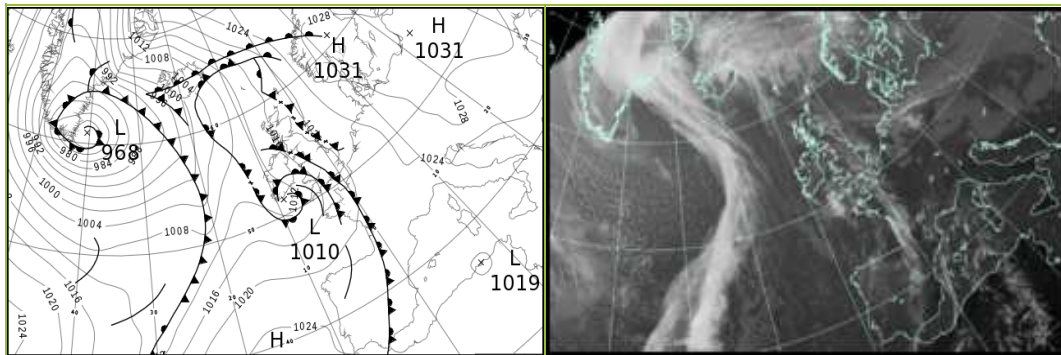

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 09 November 2020

Daily Weather Summary for Monday 09 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 10 November 2020

This day's summary created 17/11/2020 03:00

Summary of the UK Weather for Tuesday 10 November 2020

Overnight cloud covered most of the UK, with low cloud being most prevalent. Although some high cloud and convective clouds were also seen, these generated some stronger showers along the eastern and southern coasts and strikes of lightning were even seen in the north east around midnight. These soon lost energy as they migrated eastwards, however, with most of the UK becoming mostly dry by morning. A lot of areas saw fog after these showers passed, particularly along the east coast of England and Scotland. Another mild night. The day was dry with bright spells across the UK, despite intermittent patchy cloud cover. There were some scattered showers present over Scotland and southern parts of England. Winds remained slightly breezy throughout. Temperatures were unseasonably mild across the country. Into the night, cloud thickened, and a band of rain moved in from the west, bringing widespread rain to Northern Ireland and the westernmost parts of Scotland.

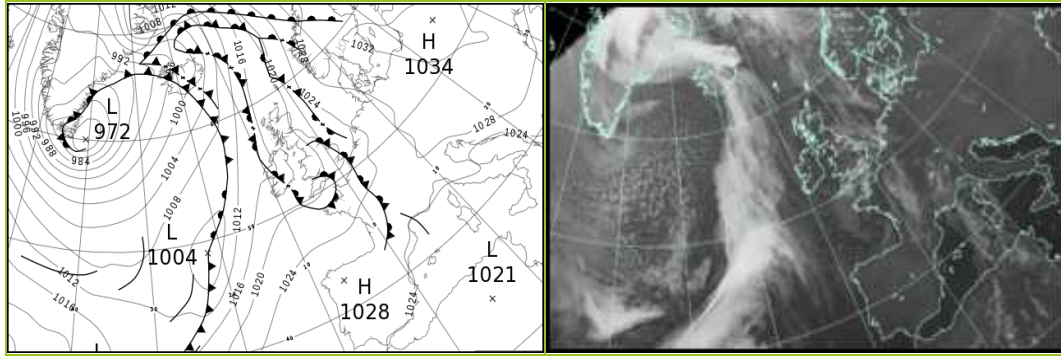

Daily Extremes

<i>Highest Maximum</i>	16.8°C Wisley (Surrey, 38mAMSL)
<i>Lowest Maximum</i>	9.8°C Cassley (Sutherland, 99mAMSL)
<i>Highest Minimum</i>	12.5°C Hastings (East Sussex, 45mAMSL)
<i>Lowest Minimum</i>	-0.3°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Lowest Grass Minimum</i>	-1.3°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Most Rainfall</i>	72.0mm Skye: Alltdearg House (Inverness-shire, 55mAMSL)
<i>Most Sunshine</i>	6.5hr Strathy East (Sutherland, 68mAMSL)
<i>Highest Gust</i>	38Kt 44mph South Uist Range (Western Isles, 4mAMSL)
<i>Highest Gust (mountain)</i>	64Kt 74mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

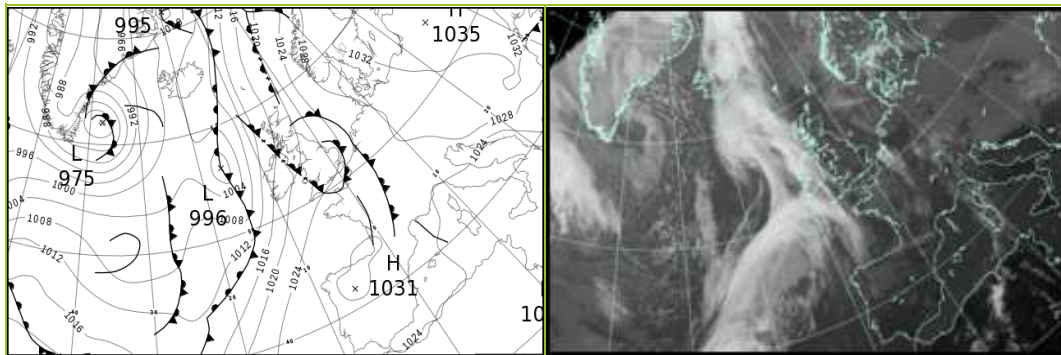

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 11 November 2020

This day's summary created 18/11/2020 03:00

Summary of the UK Weather for Wednesday 11 November 2020

At midnight, low cloud lay over the western half of the UK, and further west again was heavy rain, which inched eastwards falling upon; Northern Ireland, western parts of Scotland, the central belt of Scotland, and Anglesey and later the west coast of Wales. Low cloud progressed further inland, over much of the country, and fog was seen in the southeast. Calm winds for most but strong gales in the west, particularly along coastlines and the Irish Sea. Rain persisted in these areas for the rest of the day, with plenty of cloud cover across the UK. The morning remained dry for the majority of England, except for occasional showers over Wales, the south, and the southwest. A band of rain, heavy at times, then moved across Wales and the southwest through the afternoon. Isolated showers were seen across England in the afternoon, with a few sunny spells predominately concentrated around the southeast.

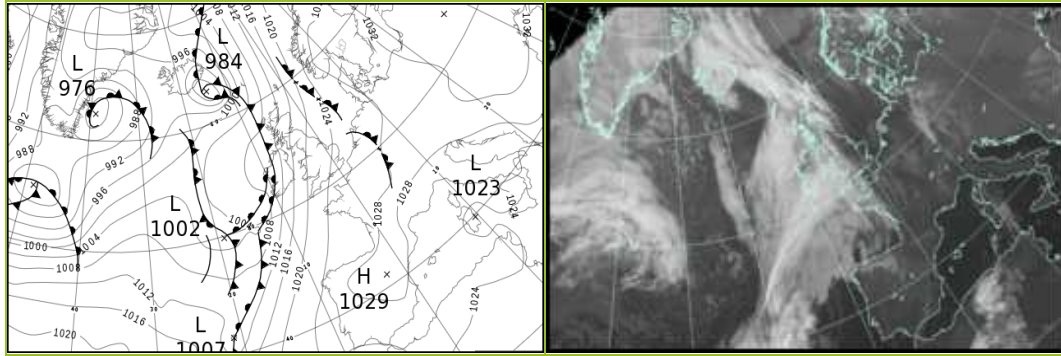

Daily Extremes

<i>Highest Maximum</i>	14.7°C Poolewe (Ross & Cromarty, 6mAMSL)
<i>Lowest Maximum</i>	9.3°C Copley (Durham, 253mAMSL)
<i>Highest Minimum</i>	12.3°C Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Lowest Minimum</i>	0.0°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Lowest Grass Minimum</i>	-0.7°C Thornes Park (West Yorkshire, 35mAMSL)
<i>Most Rainfall</i>	129.2mm Skye: Alltdearg House (Inverness-shire, 55mAMSL)
<i>Most Sunshine</i>	0.6hr North Wyke (Devon, 177mAMSL)
<i>Highest Gust</i>	58Kt 67mph Berry Head (Devon, 58mAMSL)
<i>Highest Gust (mountain)</i>	80Kt 92mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

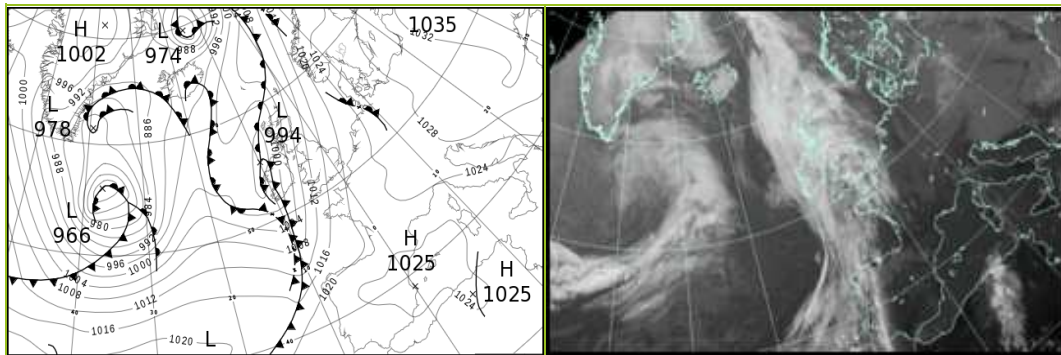

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 11 November 2020

Daily Weather Summary for Wednesday 11 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 12 November 2020

This day's summary created 19/11/2020 03:00

Summary of the UK Weather for Thursday 12 November 2020

A band of rain, heavy in some areas, moved across the east of the UK after midnight. However, there were still showery outbreaks, some which were locally heavy, across central and northern Scotland, north and southwest England, and Wales. The midlands, Northern Ireland and the south coast of England were largely dry through the night. During the latter part of the night, there were some lightning strikes near the south coast of England. Windy conditions persisted across the UK, and these were particularly strong along coastal areas, especially the western coasts of England and Wales. The morning began with low cloud across much of England, with higher cloud across Scotland and NI. These conditions persisted throughout the day, with a band of higher cloud moving over Central areas through midday. High winds also continued, mostly along Irish Sea coasts. Going into the evening, scattered showers began to move in over western coasts, before a band of rain, quite heavy in parts, started moving eastwards across the country from just before midnight. It was another quite mild day for most areas.

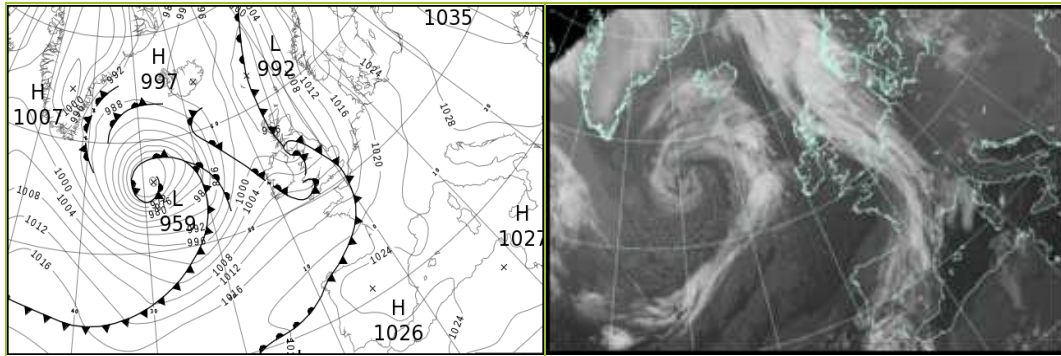

Daily Extremes

<i>Highest Maximum</i>	14.8°C Slapton (Devon, 32mAMSL)
<i>Lowest Maximum</i>	9.2°C Pennerley (Shropshire, 357mAMSL)
<i>Highest Minimum</i>	11.6°C Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Lowest Minimum</i>	3.5°C Lough Navar Forest (Fermanagh, 126mAMSL)
<i>Lowest Grass Minimum</i>	-1.3°C Huntsham (Devon, 237mAMSL)
<i>Most Rainfall</i>	60.6mm Skye: Alltdearg House (Inverness-shire, 55mAMSL)
<i>Most Sunshine</i>	7.7hr Manston (Kent, 49mAMSL) also Wattisham (Suffolk, 89mAMSL)
<i>Highest Gust</i>	54Kt 62mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	79Kt 91mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

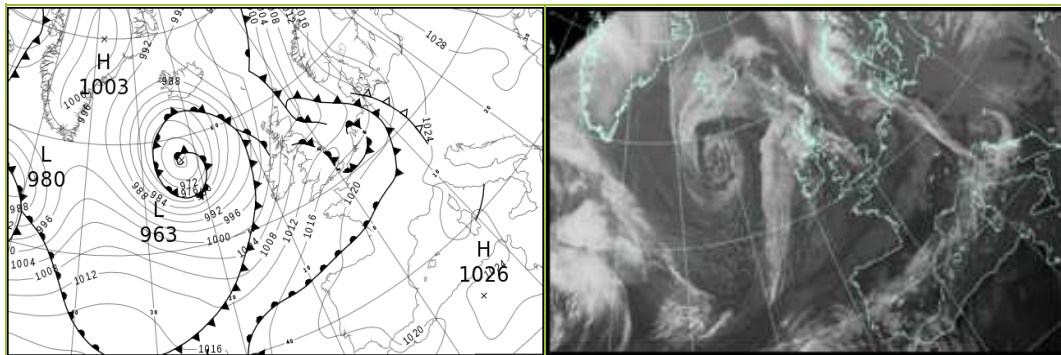

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 13 November 2020

This day's summary created 20/11/2020 03:00

Summary of the UK Weather for Friday 13 November 2020

A band of heavy rain continued to move eastwards throughout the night, impacting western areas and clearing Northern Ireland in the early hours with scattered showers following. Eastern areas remained largely dry but cloudy. There were strong winds along western coasts and across higher ground in Scotland and Wales. It was wet in the early hours of the morning for the eastern parts of the country. Wales and Scotland experienced downpours at times. These conditions persisted until the night, with showers in North Wales and outbreaks of rain across the west of the UK later on in the evening. The rest of the country remained dry with some bright spells for southeastern areas in the afternoon and increasing cloud cover into the evening; this covered much of the country by night. It was quite a windy day for most parts, predominantly along Irish Sea coasts, with the strongest winds across western and northern parts of the UK. There were also some coastal gales in parts. It was another quite mild day for many areas.

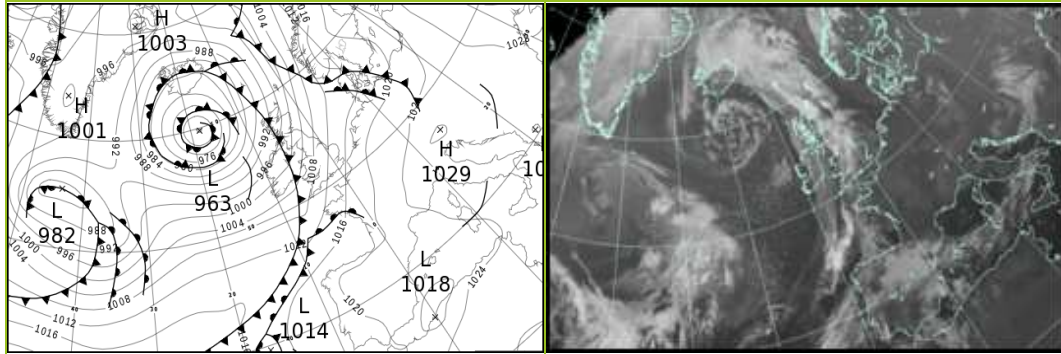

Daily Extremes

<i>Highest Maximum</i>	15.3°C Manston (Kent, 49mAMSL)
<i>Lowest Maximum</i>	6.8°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Highest Minimum</i>	11.8°C Hastings (East Sussex, 45mAMSL)
<i>Lowest Minimum</i>	3.6°C Libanus (Powys (south), 331mAMSL)
<i>Lowest Grass Minimum</i>	-0.1°C Whitechurch (Dyfed, 129mAMSL)
<i>Most Rainfall</i>	21.6mm Honister Pass (Cumbria, 358mAMSL)
<i>Most Sunshine</i>	6.4hr Preston, Cove House (Dorset, 44mAMSL)
<i>Highest Gust</i>	51Kt 59mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	72Kt 83mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

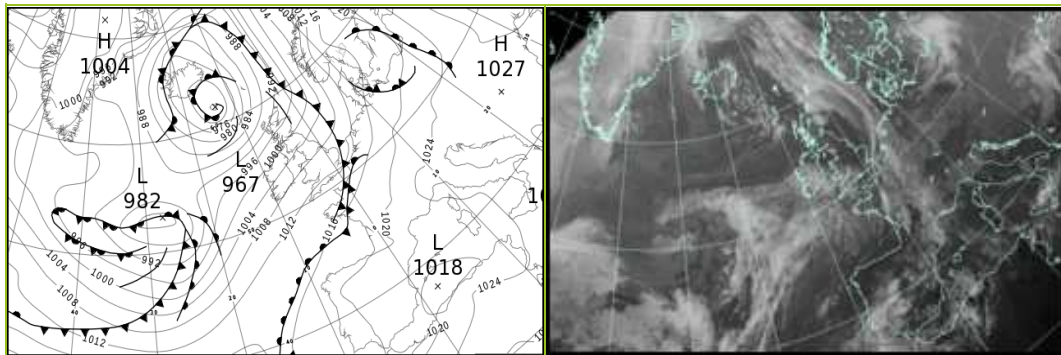

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 13 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 14 November 2020

This day's summary created 21/11/2020 03:00

Summary of the UK Weather for Saturday 14 November 2020

It was quite a cloudy start to the day, with low cloud across much of the South West and Scotland, and higher cloud across most of the country. There were coastal gales along Irish Sea and northern Scottish coasts. There was showery rain across much of western Scotland, the central belt of the UK and south coast of England. This rain moved northeast as the night progressed. As the morning progressed blustery rainfall covering the west coast of northern England and Scotland from overnight progressed north eastwards in the morning, losing energy and becoming more broken up and dispersed. At the same time down at the south coast of England, high cloud produced some heavy showers preceding a front as it advanced north eastwards. Into the afternoon a front brought in an organised band of heavy precipitation running the whole length of the UK - this moved linearly to the east coast, weakening as it did, and lingered over any high land in Scotland. With most of the UK being overcast and breezy from the start, winds only getting stronger and gales found along the western coast of England and Scotland during the afternoon. Another mild day for this time of year.

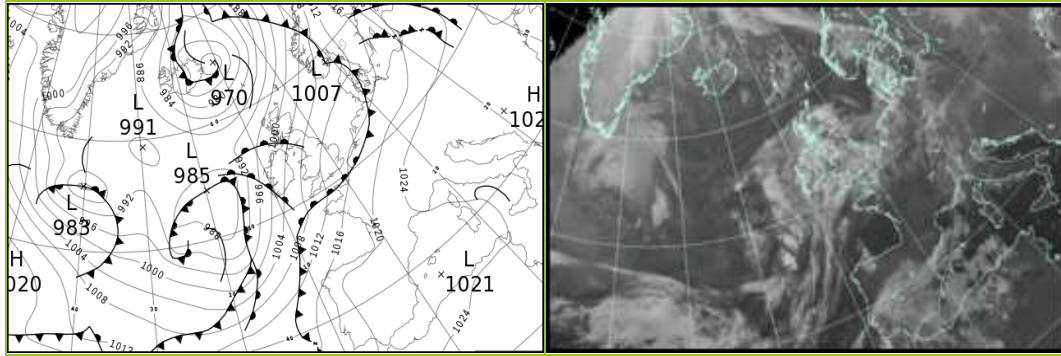

Daily Extremes

<i>Highest Maximum</i>	16.5°C Colwyn Bay (Clwyd, 36mAMSL)
<i>Lowest Maximum</i>	8.9°C Resallach (Sutherland, 133mAMSL)
<i>Highest Minimum</i>	10.7°C Isle Of Portland (Dorset, 52mAMSL)
<i>Lowest Minimum</i>	3.3°C Cromdale (Moray (in Highland Region), 193mAMSL)
<i>Lowest Grass Minimum</i>	-1.2°C Albemarle (Northumberland, 142mAMSL)
<i>Most Rainfall</i>	49.2mm Darwell Resr (East Sussex, 22mAMSL)
<i>Most Sunshine</i>	2.0hr Fair Isle (Shetland, 57mAMSL)
<i>Highest Gust</i>	58Kt 67mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	70Kt 81mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

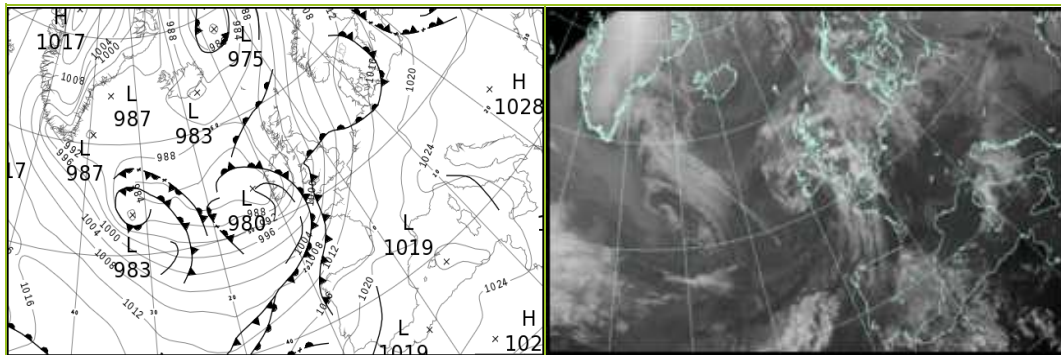

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 15 November 2020

This day's summary created 24/11/2020 16:06

Summary of the UK Weather for Sunday 15 November 2020

It remained largely cloudy across the UK during the early hours of Sunday. Frequent showers were observed across many western parts of the UK, some heavy with the odd rumble of thunder. A band of persistent and often heavy rain moved into southeast England from the near continent through the second half of the night. It was a windy night for all, with gales across some exposed western and southwestern coastlines. A cold front passed over the southeast, bringing heavy rain that spread out northward as it moved east. Another frontal band of rain ran through west Britain, splitting into two further bands subjecting Northern Ireland, north and central Wales, west and central Scotland with the heaviest of the downpours, while lingering here, it later passed through much of central UK, leaving behind clear skies and patchy showers. Lightning was recorded off the Cornish peninsular, the thunderstorm moved eastwards along the channel bringing gales to the south coast. Lightning was also recorded in north Wales. Strong winds were felt throughout.

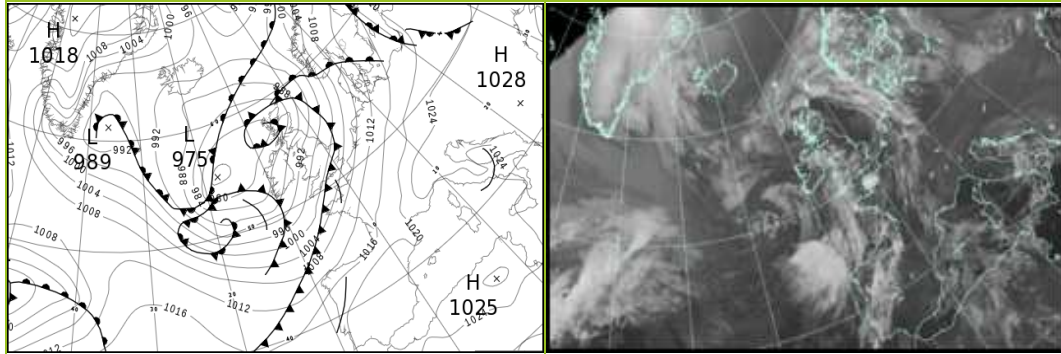

Daily Extremes

<i>Highest Maximum</i>	14.9°C Hastings (East Sussex, 45mAMSL)
<i>Lowest Maximum</i>	8.1°C Okehampton, East Okement Farm (Devon, 408mAMSL) also Tredegar, Bryn Bach Park No 2 (Gwent, 360mAMSL)
<i>Highest Minimum</i>	12.7°C Langdon Bay (Kent, 117mAMSL)
<i>Lowest Minimum</i>	3.3°C Drumnadrochit (Inverness-shire, 53mAMSL)
<i>Lowest Grass Minimum</i>	-0.2°C Cawdor Castle No 2 (Nairnshire, 60mAMSL)
<i>Most Rainfall</i>	64.8mm Mickleden, Middlefell Farm (Cumbria, 99mAMSL)
<i>Most Sunshine</i>	5.3hr Hawarden Airport (Clwyd, 11mAMSL)
<i>Highest Gust</i>	80Kt 92mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	65Kt 75mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

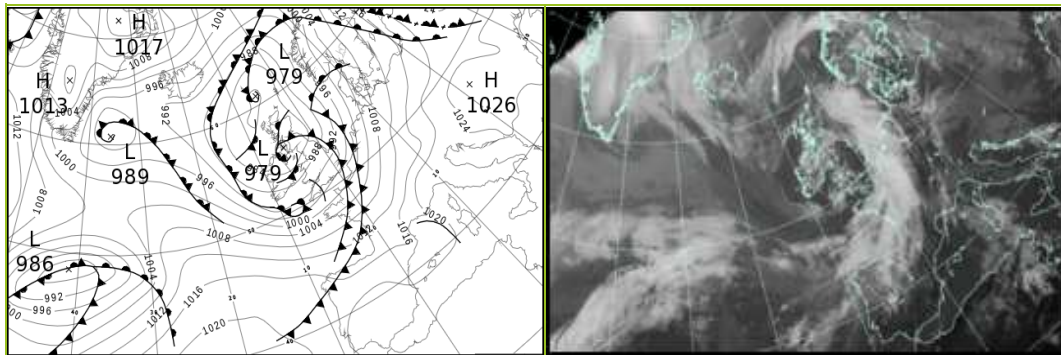

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 15 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 16 November 2020

This day's summary created 24/11/2020 16:06

Summary of the UK Weather for Monday 16 November 2020

The night started with rainfall being seen along the western coast of Wales, northern England and Scotland and in Northern Ireland. The progressed eastwards, losing energy and breaking up as it did - with Wales and Northern Ireland becoming dry into the morning and rainfall only persisting towards higher ground in northern England and Scotland. Patchy low cloud covered most of the UK. A breezy night, with some stronger gusts being seen along the western coasts. Another mild night. The day started dry for most, with some sunny spells in the east. However, there were several scattered showers, mostly in the north and west of the country. The showers dissipated but the clouds increased ahead of a rainstorm approaching from the west. Northern Ireland had the edge of the storm shortly before noon, with Wales and the west coast of northern England a few hours later. The rain moved east through the day and night, though it persisted in high ground from Wales northwards. Most of the UK saw at least some rain by the end of the night, with the southwest, northeast England and parts of eastern Scotland having the least rain.

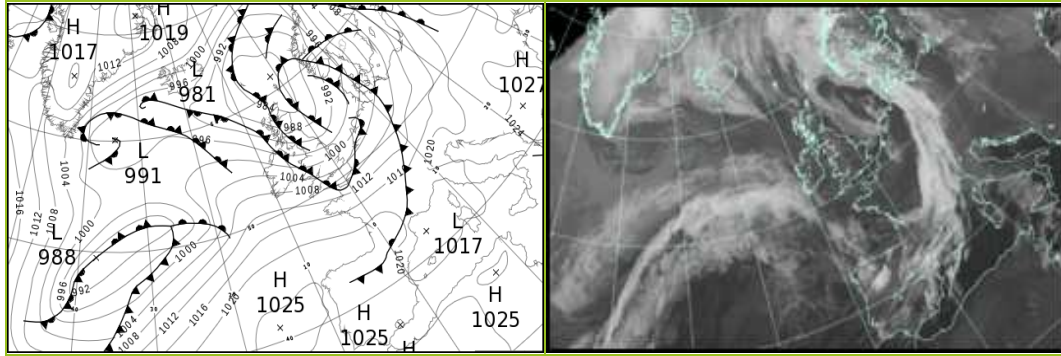

Daily Extremes

<i>Highest Maximum</i>	15.1°C Aboyne No 2 (Aberdeenshire, 140mAMSL)
<i>Lowest Maximum</i>	9.4°C Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Minimum</i>	9.0°C Bude (Cornwall, 15mAMSL)
<i>Lowest Minimum</i>	2.8°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Lowest Grass Minimum</i>	-1.0°C Fettercairn, Glensaugh No 2 (Kincardineshire, 171mAMSL)
<i>Most Rainfall</i>	54.6mm Achnagart (Ross & Cromarty, 15mAMSL)
<i>Most Sunshine</i>	4.0hr Mylnefield (Angus, 31mAMSL)
<i>Highest Gust</i>	49Kt 56mph Aberdaron (Gwynedd, 86mAMSL) also Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	68Kt 78mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

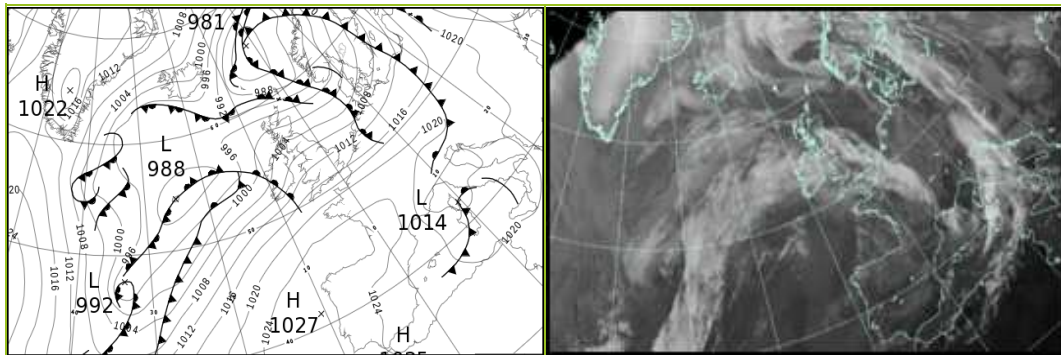

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 17 November 2020

This day's summary created 24/11/2020 03:00

Summary of the UK Weather for Tuesday 17 November 2020

Overall, a cloudy but mild night, as most of the UK sat snugly within the warm sector with southwesterly winds. Some strong winds were seen along the coastline, particularly the west, while inland the air was calmer. At midnight, there was plenty of heavy rain over Scotland, which persisted through the day, as well as some scattered shower in south Wales, northern England, and Northern Ireland. Around 0545 there were lightning strikes in the Celtic sea. Through the morning, rain was slow to clear across southern Scotland and Northern Ireland. The rain over central and eastern Scotland was more persistent, however. Southern and western parts of Wales saw scattered showers linger, only clearing by the late afternoon. However, in Scotland, the rain became more widespread, affecting much of northern Scotland, and was particularly heavy in coastal areas. Across the rest of the UK it remained largely dry. The south of Wales also saw brief thunderstorms form towards the evening. Through the evening, winds strengthened across the country. Into the night, further heavy rainfall moved in towards northern Scotland.

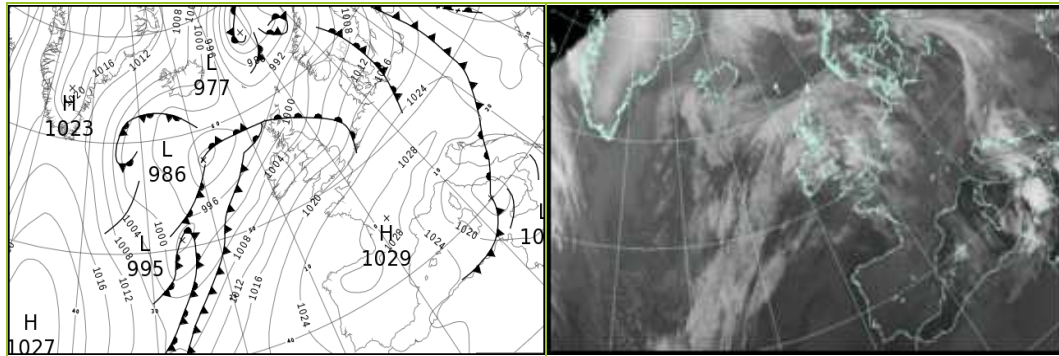

Daily Extremes

<i>Highest Maximum</i>	17.8°C Colwyn Bay (Clwyd, 36mAMSL)
<i>Lowest Maximum</i>	9.0°C Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Minimum</i>	11.8°C Bude (Cornwall, 15mAMSL)
<i>Lowest Minimum</i>	4.6°C Fyvie Castle (Aberdeenshire, 55mAMSL)
<i>Lowest Grass Minimum</i>	2.0°C Oyne No 2 (Aberdeenshire, 116mAMSL) also Cawdor Castle No 2 (Nairnshire, 60mAMSL)
<i>Most Rainfall</i>	61.8mm Achnagart (Ross & Cromarty, 15mAMSL)
<i>Most Sunshine</i>	3.7hr Colwyn Bay (Clwyd, 36mAMSL)
<i>Highest Gust</i>	50Kt 58mph Aberdaron (Gwynedd, 86mAMSL) also Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	90Kt 104mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

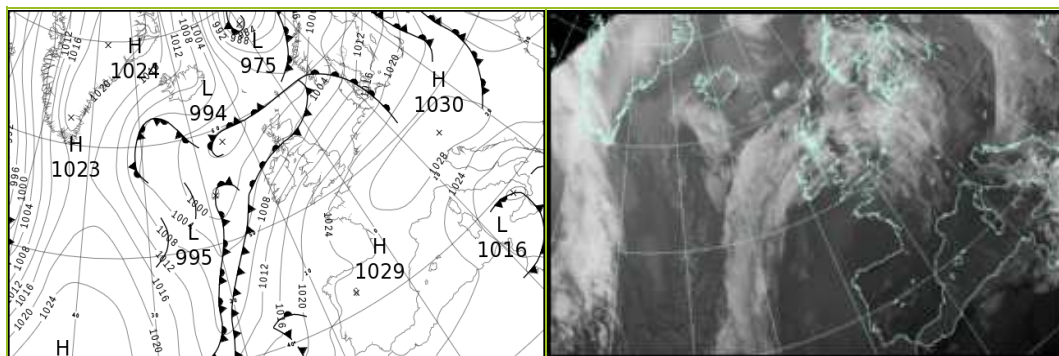

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 17 November 2020

Daily Weather Summary for Tuesday 17 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 18 November 2020

This day's summary created 25/11/2020 03:00

Summary of the UK Weather for Wednesday 18 November 2020

Today started with heavy rain over northwest Scotland, with a little rain scattered across the rest of Scotland. Wind speeds were high across the UK, especially along the western coast. The rain continued spreading as the night went on, covering most of western and central Scotland, and parts of northwest England. Near sunrise, a new band of rain from the southwest arrived in Northern Ireland, and another in Wales. Temperatures remained mild for this time of year. The heavy outbreaks of rain across the northern and western parts of Scotland gradually turned more widespread, and made their way across England and Wales, lasting until the afternoon. The South West also experienced rain during the morning, but this quickly cleared. Colder and brighter conditions followed across the UK. Rain also persisted throughout the afternoon in northern and western parts of Scotland. In the evening this moved southwards and fell as snow over the Scottish mountains, and reached parts of northern England and northern Wales by midnight. Conditions throughout the day were windy with some areas experiencing coastal gales.

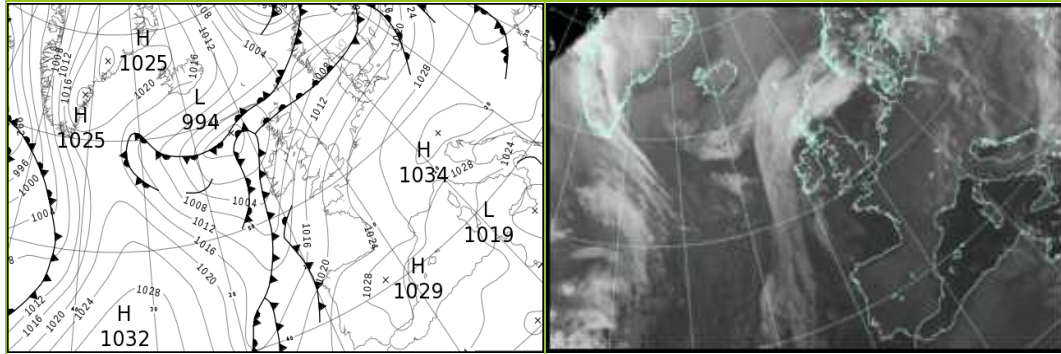

Daily Extremes

<i>Highest Maximum</i>	16.6°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Maximum</i>	7.3°C Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Minimum</i>	13.3°C Edinburgh, Royal Botanic Garden No 2 (Midlothian (in Lothian Region), 28mAMSL)
<i>Lowest Minimum</i>	6.3°C Baltasound No 2 (Shetland, 15mAMSL)
<i>Lowest Grass Minimum</i>	5.6°C Hereford, Credenhill (Hereford & Worcester, 76mAMSL)
<i>Most Rainfall</i>	48.4mm Honister Pass (Cumbria, 358mAMSL)
<i>Most Sunshine</i>	5.8hr Manston (Kent, 49mAMSL)
<i>Highest Gust</i>	57Kt 66mph Lerwick (Shetland, 82mAMSL) also Kirkwall (Orkney, 26mAMSL)
<i>Highest Gust (mountain)</i>	79Kt 91mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

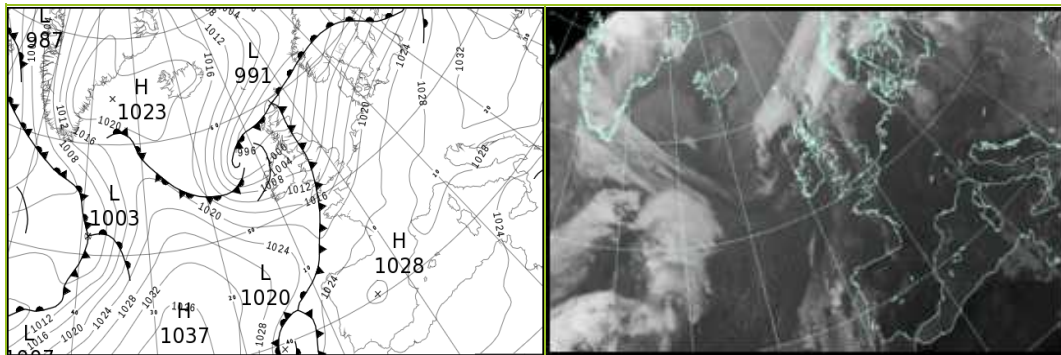

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 18 November 2020

Daily Weather Summary for Wednesday 18 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 19 November 2020

This day's summary created 26/11/2020 03:00

Summary of the UK Weather for Thursday 19 November 2020

Showers lingered through the night over western parts of Wales, Northern Ireland, northwest England, and Scotland - except southern Scotland. These showers were particularly heavy over elevated areas in northwest England. Through the early hours, the showers over Scotland largely cleared, but further showers developed in southern Scotland and southwest England. There were several lightning strikes recorded along the southwest coast of England. Strong winds were present throughout, with gales along western coasts.

Temperatures were close to average, but it was colder than recently throughout the UK. At daybreak there were showers, heavy in some areas, over much of the UK. Elsewhere the showers had cleared with some sunny intervals too. By midday most of these showers had passed with scattered showers still over Wales, locally in the Southwest, and some heavier showers developing over the Southeast. A band of cloud moved across Northern Ireland and the Hebrides with plenty of sunshine elsewhere. Cloud became more widespread through the afternoon into the evening with skies remaining clear over East Anglia.

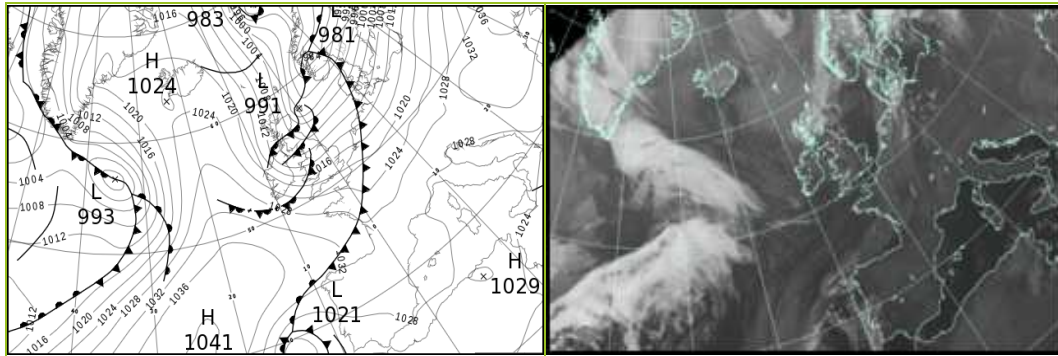

Daily Extremes

<i>Highest Maximum</i>	12.1°C Gosport, Fleetlands (Hampshire, 1mAMSL) also Swanage (Dorset, 10mAMSL)
<i>Lowest Maximum</i>	2.5°C Balmoral (Aberdeenshire, 283mAMSL)
<i>Highest Minimum</i>	10.0°C Isle Of Portland (Dorset, 52mAMSL) also Bude (Cornwall, 15mAMSL) also Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Lowest Minimum</i>	-0.7°C Baltasound No 2 (Shetland, 15mAMSL)
<i>Lowest Grass Minimum</i>	-3.1°C Mylnefield (Angus, 31mAMSL)
<i>Most Rainfall</i>	12.0mm Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Most Sunshine</i>	6.5hr Slapton (Devon, 32mAMSL)
<i>Highest Gust</i>	53Kt 61mph Aberdaron (Gwynedd, 86mAMSL)
<i>Highest Gust (mountain)</i>	93Kt 107mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	3cm Lerwick (Shetland, 82mAMSL)

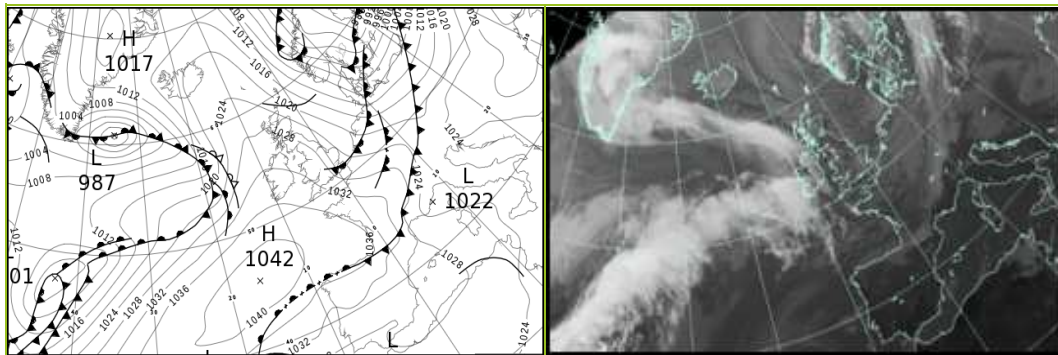

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 19 November 2020

Daily Weather Summary for Thursday 19 November 2020

Daily Weather Summary for Friday 20 November 2020

This day's summary created 27/11/2020 03:00

Summary of the UK Weather for Friday 20 November 2020

It was a clear start to Friday for many. Areas in Northern Ireland, far western Scotland, Wales, and the South West experienced showery spells at times. A large band of rain arrived from the west in the early hours, affecting Northern Ireland and western coasts of mainland UK. Some lightning struck off the south coast of England during the night. It was a largely dry, cold start to the day for the UK mainland, with air frosts in many locations in the east. The large band of rain and cloud continued eastwards throughout the day. During the afternoon the rain began to break up leaving most areas in the west dry but cloudy. By the evening most of the rain had moved over the North Sea, with any lingering outbreaks of rain over the east coast of England. Showers persisted over the Scottish Highlands all day and continued into the evening. It was a blustery day for many coastal areas, with coastal gales in the northwest of Scotland.

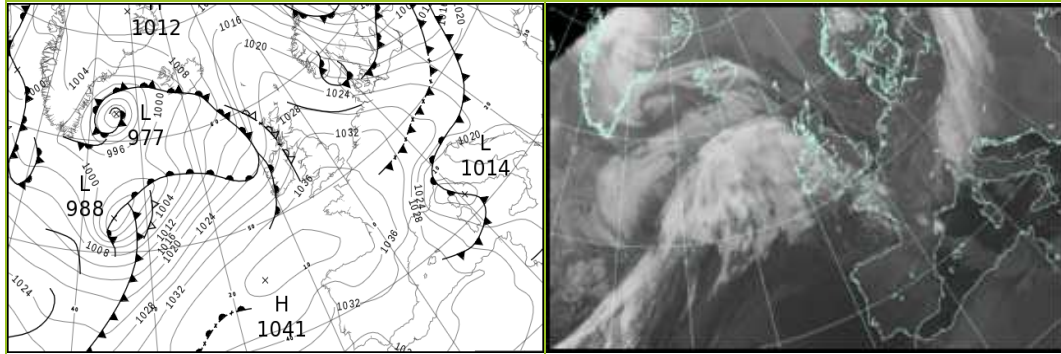

Daily Extremes

<i>Highest Maximum</i>	14.1°C Colwyn Bay (Clwyd, 36mAMSL)
<i>Lowest Maximum</i>	8.3°C Okehampton, East Okement Farm (Devon, 408mAMSL)
<i>Highest Minimum</i>	9.5°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-5.3°C Aboyne No 2 (Aberdeenshire, 140mAMSL)
<i>Lowest Grass Minimum</i>	-8.2°C Copley (Durham, 253mAMSL)
<i>Most Rainfall</i>	92.8mm Honister Pass (Cumbria, 358mAMSL)
<i>Most Sunshine</i>	4.1hr Manston (Kent, 49mAMSL)
<i>Highest Gust</i>	61Kt 70mph Loch Glascarnoch (Ross & Cromarty, 269mAMSL)
<i>Highest Gust (mountain)</i>	96Kt 110mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

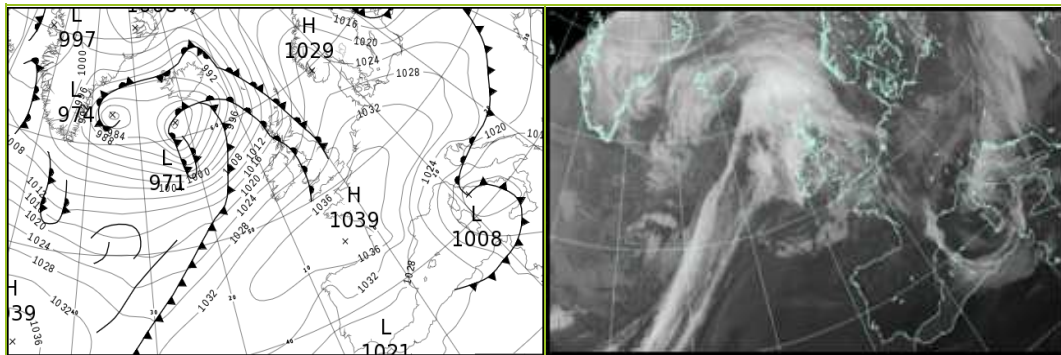

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 20 November 2020

Daily Weather Summary for Friday 20 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 21 November 2020

This day's summary created 28/11/2020 03:00

Summary of the UK Weather for Saturday 21 November 2020

In the early hours of Saturday there was a cold front producing heavy rain over western Scotland and approaching Northern Ireland. Outbreaks of light rain occurred over Northern Ireland, Wales, and the north of England. Elsewhere it was largely dry but cloudy. Winds were especially strong along the northern coast of Scotland with severe gales. Through the early hours the rain intensified over Northern Ireland, and a few clear spells developed over Wales, northern England, the Midlands, and the southwest of England. Cloud remained over the southeast with a few isolated showers. Throughout the day the band of rain slowly moved southeast over England and was just north of the midlands by mid-afternoon. Behind the band of rain, heavy blustery showers occurred over northwest Scotland and later into eastern Scotland and northwest England, turning wintry over the highest Scottish mountains. Ahead of the front it remained largely cloudy and mild. Into the evening and the early night the rain band slowly moved southwards over the south of England, with showers continuing in the northwest. Elsewhere clearer spells developed.

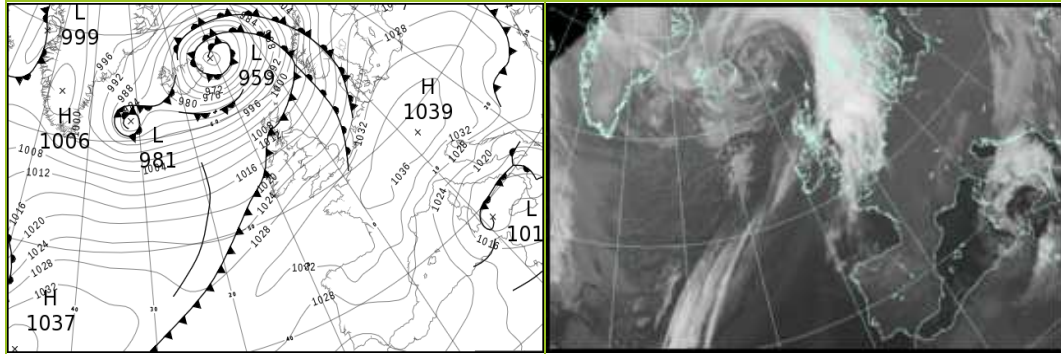

Daily Extremes

<i>Highest Maximum</i>	15.3°C Prestatyn (Clwyd, 4mAMSL)
<i>Lowest Maximum</i>	6.4°C Loch Glascarnoch (Ross & Cromarty, 269mAMSL)
<i>Highest Minimum</i>	11.2°C Valley (Gwynedd, 10mAMSL)
<i>Lowest Minimum</i>	-1.0°C Cromdale (Moray (in Highland Region), 193mAMSL)
<i>Lowest Grass Minimum</i>	-1.1°C Durris (Kincardineshire, 107mAMSL)
<i>Most Rainfall</i>	24.0mm Croeserw (West Glamorgan, 299mAMSL)
<i>Most Sunshine</i>	6.5hr Durris (Kincardineshire, 107mAMSL)
<i>Highest Gust</i>	70Kt 81mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	85Kt 98mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

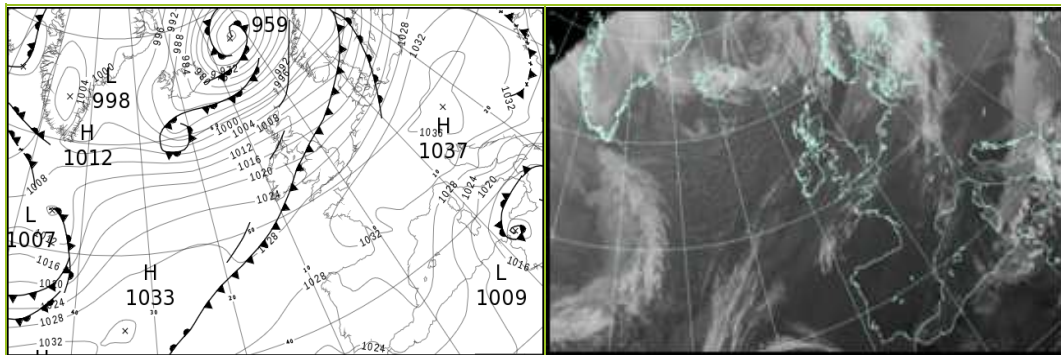

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 22 November 2020

This day's summary created 29/11/2020 03:00

Summary of the UK Weather for Sunday 22 November 2020

Western and central Scotland and Northern Ireland experienced showers throughout the night, falling as snow over the highest mountain tops. There were also a few showers over northern England, but they eased soon after midnight. A band of patchy rain slowly pushed southwards over southern England, just about clearing land by dawn. Most areas of the UK experienced clear skies at times, with only southern England staying continuously cloudy, in conjunction with the band of rain. Orkney and Shetland were affected by gales overnight, but winds weakened by dawn. The rest of the UK received lighter winds. Temperatures were average for most of the UK, and mild in the south. The same was true for the daytime temperatures. Strong winds and gusts persisted in Scotland for the rest of the day. High cloud moved east over the UK throughout, accompanied by showers in western Scotland, northwest England, and Northern Ireland. Low cloud persisted in southwest and northern England all day. Going into the evening, most showers began to ease off.

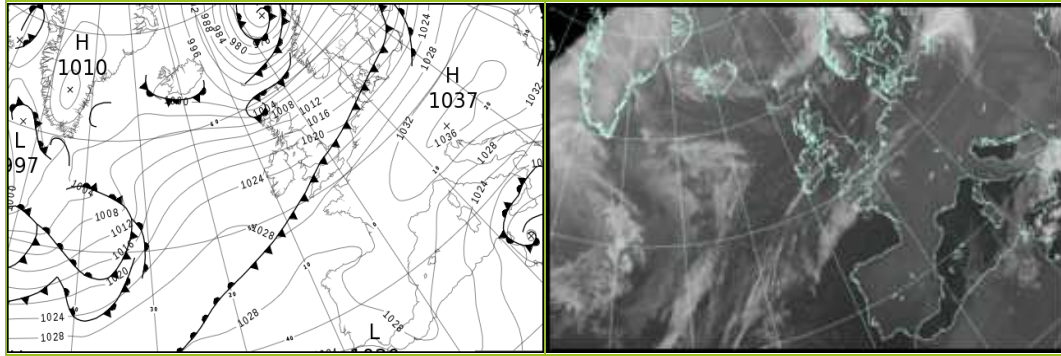

Daily Extremes

<i>Highest Maximum</i>	12.5°C Gosport, Fleetlands (Hampshire, 1mAMSL) also Ringmer, Bishops Lane (East Sussex, 23mAMSL)
<i>Lowest Maximum</i>	5.4°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL) also Killylane (Antrim, 250mAMSL)
<i>Highest Minimum</i>	11.0°C Hastings (East Sussex, 45mAMSL) also Ringmer, Bishops Lane (East Sussex, 23mAMSL)
<i>Lowest Minimum</i>	0.1°C Katesbridge (Down, 91mAMSL)
<i>Lowest Grass Minimum</i>	-4.1°C Whitechurch (Dyfed, 129mAMSL)
<i>Most Rainfall</i>	14.4mm Achnagart (Ross & Cromarty, 15mAMSL)
<i>Most Sunshine</i>	6.0hr Boulmer (Northumberland, 23mAMSL)
<i>Highest Gust</i>	58Kt 67mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	74Kt 85mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

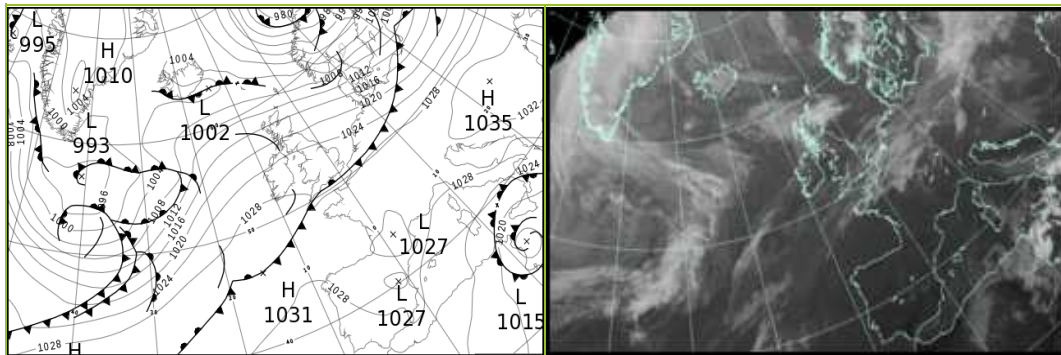

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 22 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 23 November 2020

This day's summary created 30/11/2020 03:00

Summary of the UK Weather for Monday 23 November 2020

During the early hours it was largely dry across England, Wales and Northern Ireland, with a few isolated showers in the west. Clearer spells occurred over the bulk of the UK, with an area of cloud pushing eastwards through Wales, the Midlands and into the southeast. Scattered showers, at times heavy, continued in the northwest of Scotland, with more extensive cloud building eastwards over Northern Ireland and Scotland. During the early morning, fog patches developed in the south, with chilly overnight temperatures producing localised frosts. During the afternoon, it remained largely dry and cloudy across the southern parts of the UK. Outbreaks of rain moving eastwards were observed across many northern parts of the UK with some heavy, for the western parts of Scotland. Elsewhere, some areas in Wales saw showers lasting into the afternoon, with the southeastern parts of the country generally seeing the clearest and driest spells. It was mostly windy in the north and northwest of the UK, with gales across some exposed western and northwestern coastlines. Temperatures were mild and slightly higher than recently for many.

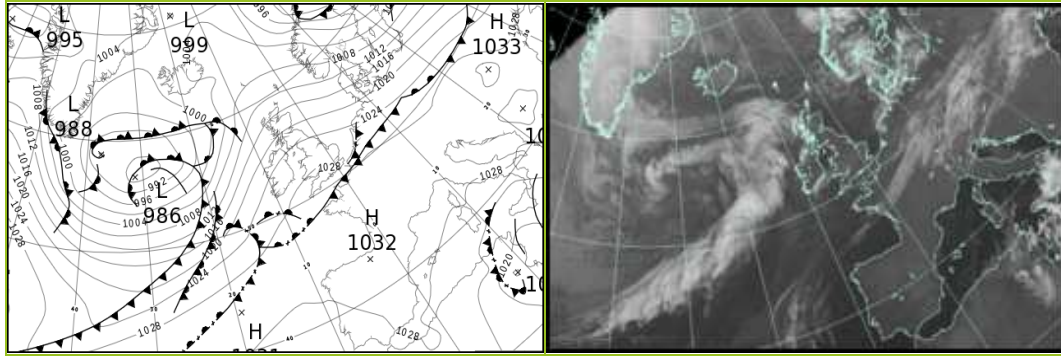

Daily Extremes

<i>Highest Maximum</i>	13.9°C Slapton (Devon, 32mAMSL)
<i>Lowest Maximum</i>	8.1°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Highest Minimum</i>	8.2°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-3.4°C Santon Downham (Suffolk, 6mAMSL) also Shobdon Airfield (Hereford & Worcester, 99mAMSL)
<i>Lowest Grass Minimum</i>	-7.7°C Santon Downham (Suffolk, 6mAMSL) also South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	87.6mm Honister Pass (Cumbria, 358mAMSL)
<i>Most Sunshine</i>	6.2hr Weybourne (Norfolk, 21mAMSL)
<i>Highest Gust</i>	49Kt 56mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	83Kt 96mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

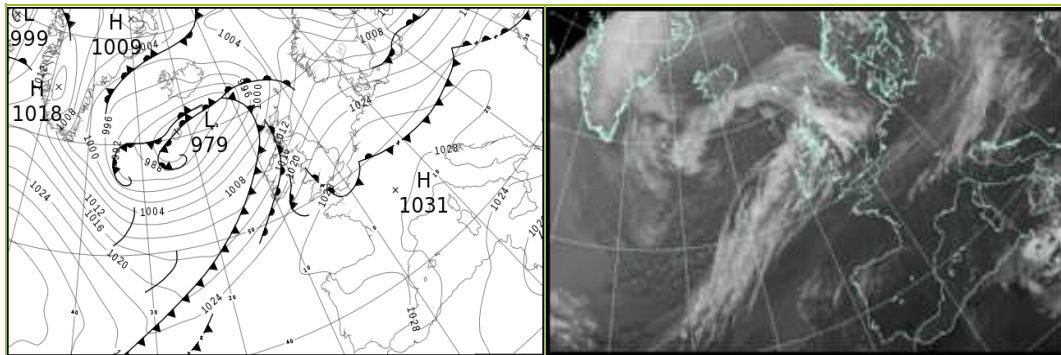

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 24 November 2020

This day's summary created 01/12/2020 03:00

Summary of the UK Weather for Tuesday 24 November 2020

It was a windy night for much of the UK, notably the west coast. Northern Wales and Scotland got particularly strong winds and gusts. There was rain, heavy and persistent at times, across northwestern England, Western Scotland and Northern Ireland through the early hours, and low cloud covered much of the UK. It was a mild night for most. Overnight rain from over western Scotland and Northern Ireland slowly spread eastwards, beginning to cover northern England for a time during the morning, but mostly staying in place giving persistent rainfall for the majority of the day. The odd isolated shower was also seen towards south Wales and South East England during the morning. Into the night the rainfall continued eastwards, moving towards the western coast of England and Wales and away from Northern Ireland and Scotland but leaving scattered showers in its place. Cloud cover was quite extensive but some areas saw some sunny intervals, such as eastern England in the morning and Wales and southeast England during the afternoon. The strongest of the winds were seen to the west coast of Scotland. Temperatures were usual for this time of year, but turned chilly into the night.

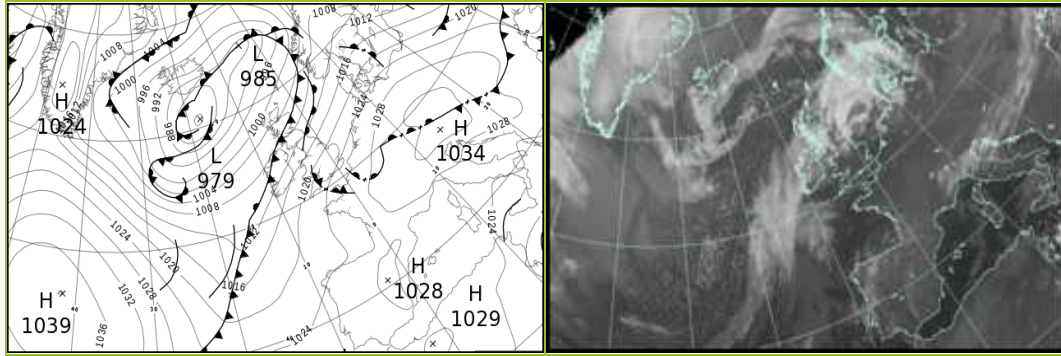

Daily Extremes

<i>Highest Maximum</i>	15.5°C Colwyn Bay (Clwyd, 36mAMSL)
<i>Lowest Maximum</i>	7.0°C Tulloch Bridge (Inverness-shire, 249mAMSL)
<i>Highest Minimum</i>	10.8°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-1.9°C Shobdon Airfield (Hereford & Worcester, 99mAMSL)
<i>Lowest Grass Minimum</i>	-0.7°C Fyvie Castle (Aberdeenshire, 55mAMSL)
<i>Most Rainfall</i>	34.4mm Penridge (Somerset, 214mAMSL)
<i>Most Sunshine</i>	5.9hr Preston, Cove House (Dorset, 44mAMSL)
<i>Highest Gust</i>	51Kt 59mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	75Kt 86mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

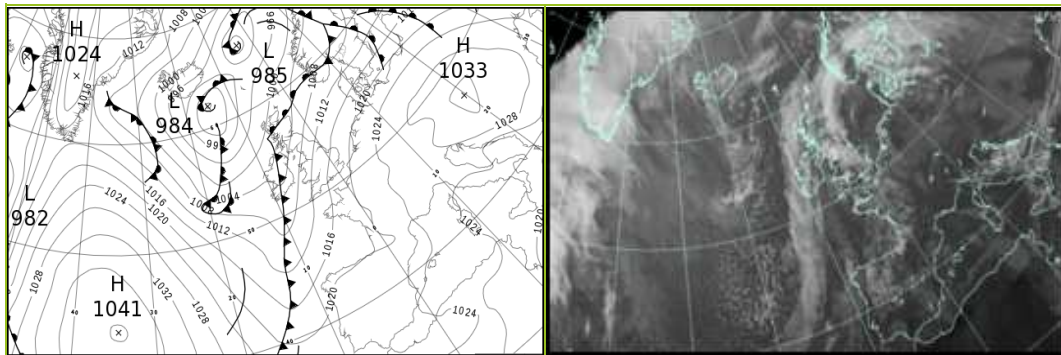

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 24 November 2020

Daily Weather Summary for Tuesday 24 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 25 November 2020

This day's summary created 02/12/2020 08:15

Summary of the UK Weather for Wednesday 25 November 2020

During the early hours frequent rain was observed across many western parts of the UK and was often heavy and persistent. Rain moving eastwards affected Wales, southwestern England, West Midlands, northern England and parts of Scotland through the second half of the night. It remained largely cloudy across the rest of the UK with some clear spells occurring over eastern parts of the country through the early morning. It was a mild night for most, with northern UK feeling chilly. Widespread rain across Wales and the far southwest by dawn. This band of rain moved eastwards into the English Channel and midlands respectively, by midday, some rain lingered over London, but most had eased. West Scotland and Northern Ireland saw showers throughout. A marked parity within England and Wales: a divide, running from southwest to northeast, to the north was bright skies, and to the south, low cloud. By the evening this cloud and patchy rain became confined to the far southeast of England. For most, it was a cold evening and night, with frost, fog, and freezing fog patches.

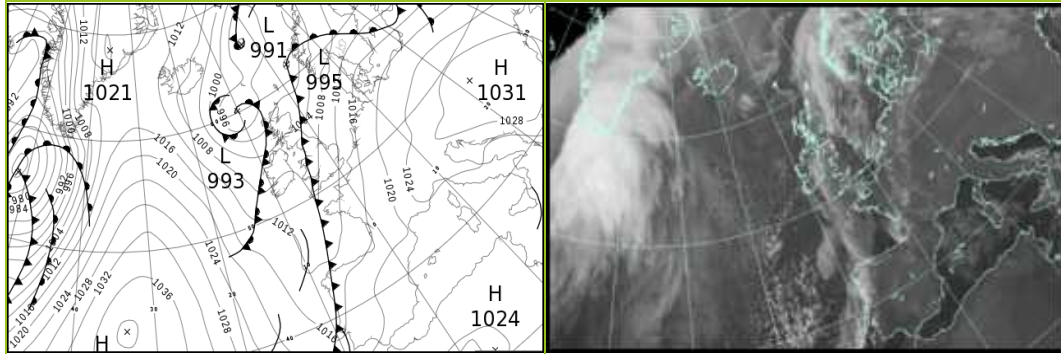

Daily Extremes

<i>Highest Maximum</i>	14.9°C Wisley (Surrey, 38mAMSL)
<i>Lowest Maximum</i>	5.9°C Cromdale (Moray (in Highland Region), 193mAMSL)
<i>Highest Minimum</i>	11.3°C Swanage (Dorset, 10mAMSL)
<i>Lowest Minimum</i>	-1.3°C Cromdale (Moray (in Highland Region), 193mAMSL)
<i>Lowest Grass Minimum</i>	-4.5°C Durris (Kincardineshire, 107mAMSL)
<i>Most Rainfall</i>	9.2mm Aultbea No 2 (Ross & Cromarty, 11mAMSL)
<i>Most Sunshine</i>	6.0hr Colwyn Bay (Clwyd, 36mAMSL)
<i>Highest Gust</i>	37Kt 43mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	48Kt 55mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

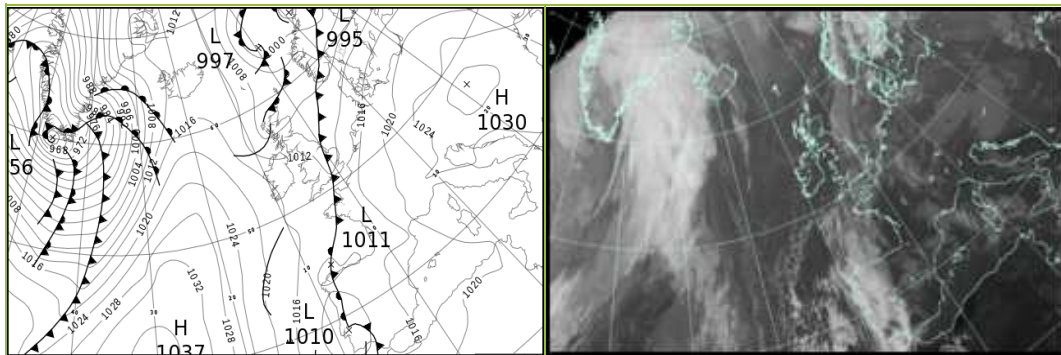

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 25 November 2020

Daily Weather Summary for Wednesday 25 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 26 November 2020

This day's summary created 03/12/2020 03:00

Summary of the UK Weather for Thursday 26 November 2020

The night started off mostly dry, seeing only small showers to the south east and even lighter scattered showers to the north west and England and the northern coast of Scotland. Low cloud covered most regions, with Scotland, Wales and Central England seeing the most of any clearer spells. Fog was reported in some places to the south of England. Winds were light throughout. It was a cold night. High pressure dominated much of the UK, leaving most areas dry with plenty of sunny spells and light winds. Southeastern England was largely cloudy throughout the day with some light patchy rain across south London and Kent. Cloud thickened across the south coast in the afternoon but remained dry. There were some outbreaks of rain across Wales and western Scotland, these continued throughout the night in Scotland with increasing cloud cover. Elsewhere, it was a clear evening and night with frost and fog forming.

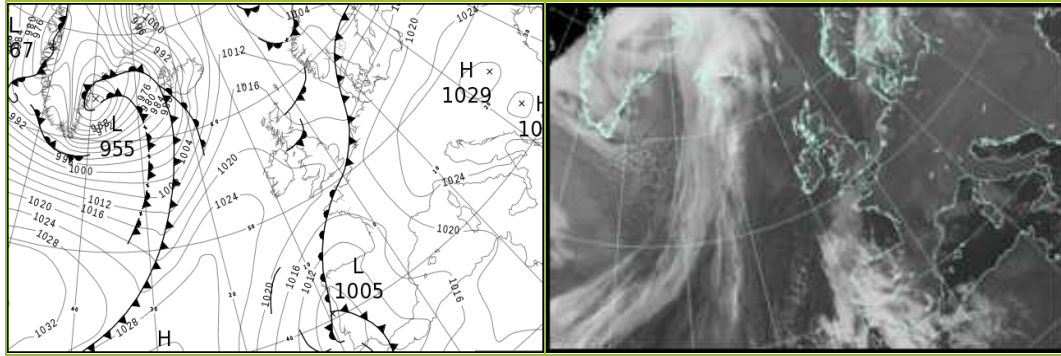

Daily Extremes

<i>Highest Maximum</i>	11.8°C Chivenor (Devon, 6mAMSL)
<i>Lowest Maximum</i>	1.4°C Llysdimam (Powys (south), 196mAMSL)
<i>Highest Minimum</i>	8.8°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-3.1°C South Newington (Oxfordshire, 105mAMSL) also Sennybridge No 2 (Powys (south), 307mAMSL)
<i>Lowest Grass Minimum</i>	-8.4°C South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	14.6mm Skye: Alltdearg House (Inverness-shire, 55mAMSL)
<i>Most Sunshine</i>	7.3hr Bude (Cornwall, 15mAMSL)
<i>Highest Gust</i>	30Kt 35mph South Uist Range (Western Isles, 4mAMSL)
<i>Highest Gust (mountain)</i>	46Kt 53mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

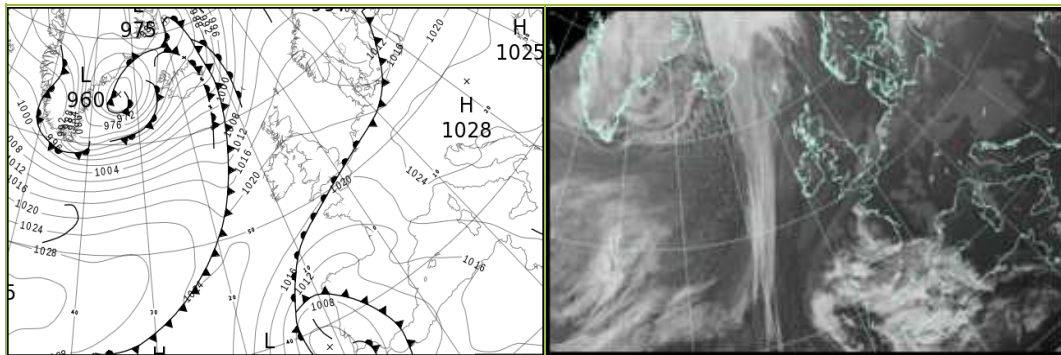

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 27 November 2020

This day's summary created 04/12/2020 03:00

Summary of the UK Weather for Friday 27 November 2020

A calm night for most, with light winds across the UK allowing thick and persistent fog to develop over central, eastern and southern parts, most prominently affecting the Midlands. Clear skies in the south, eastern Midlands, eastern Scotland, and sporadic parts of Northern Ireland. Some intermittent showers lingered where cloud was thick; western Northern Ireland and western Highlands, over Hadrian's Wall, the Irish Sea, and the southeast English coast during the early hours. With little cloud cover and still air, it was a chilly night. The showers present continued until noon and it remained cloudy for most through the day. There were some sunny spells in southwest England and Wales, as well as parts of the Midlands and East Anglia. Some showers formed over Northern Ireland and southern Scotland in the afternoon, which lingered until night. Late in the evening, further blustery showers moved across the south of England, locally heavy in southwest England. As the band of rain continued further north, southern Wales and the Midlands saw light rain and drizzle. Along western coasts, winds strengthened into the night.

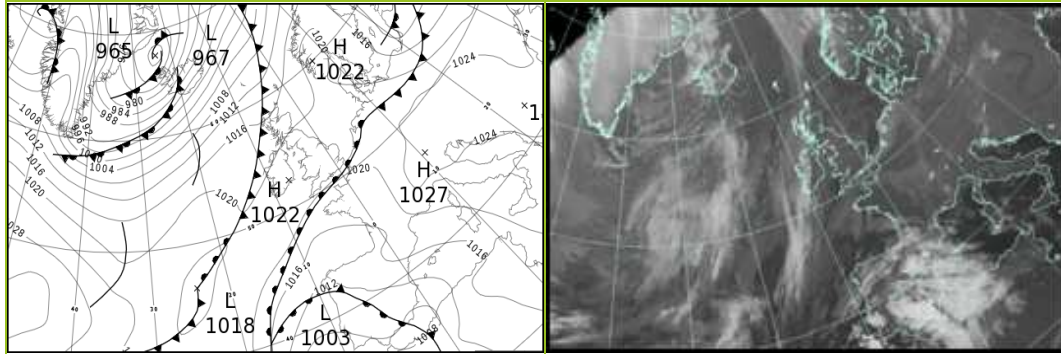

Daily Extremes

<i>Highest Maximum</i>	12.4°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Maximum</i>	4.3°C Lake Vyrnwy No 2 (Powys (north), 360mAMSL)
<i>Highest Minimum</i>	8.3°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-4.6°C Aboyne No 2 (Aberdeenshire, 140mAMSL)
<i>Lowest Grass Minimum</i>	-9.4°C South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	13.8mm St Athan (South Glamorgan, 49mAMSL)
<i>Most Sunshine</i>	6.6hr Leconfield (Humberside, 7mAMSL)
<i>Highest Gust</i>	28Kt 32mph Fair Isle (Shetland, 57mAMSL)
<i>Highest Gust (mountain)</i>	37Kt 43mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

Daily Weather Summary for Friday 27 November 2020

Daily Weather Summary for Friday 27 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 28 November 2020

This day's summary created 05/12/2020 03:00

Summary of the UK Weather for Saturday 28 November 2020

It was a largely cloudy night for much of the UK with cloud thickening in southwest England and Scotland throughout the night. This cloud brought rain to the southwest and moved northeastwards into southern and central Wales and the West Midlands in the early hours, heavy at times. Further rain affected Scotland overnight, more persistent in the north, fading slightly by dawn. Elsewhere, it was largely dry with some drizzle and fog patches formed under any clear skies. A wet start across Wales and the West Midlands as outbreaks of rain pushed into northern England through the morning. Largely dry elsewhere with fog, which cleared by noon. It was a dry afternoon for many, with bright skies over north and central Scotland. There was also the odd rumble of thunder in the West Midlands during the late afternoon. Some light rain affected northern England during the evening and night, and there was hill fog in central and southern parts of the UK. Patches of freezing fog affected parts of northern, eastern, and central Scotland due to breaks in cloud.

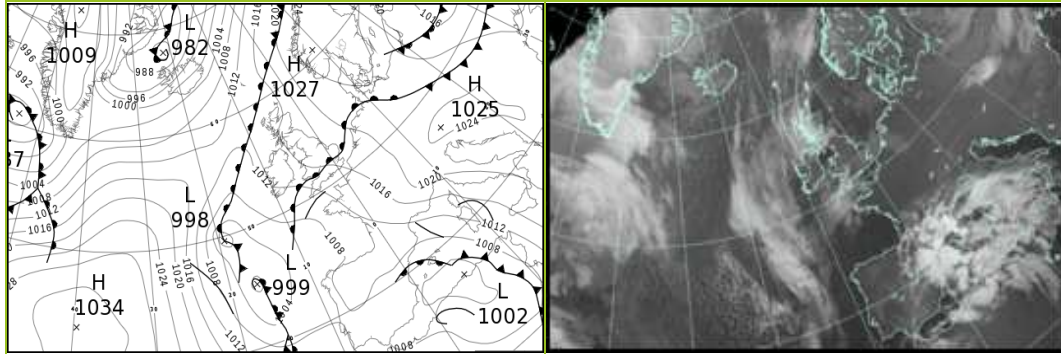

Daily Extremes

<i>Highest Maximum</i>	14.4°C Herstmonceux, West End (East Sussex, 52mAMSL)
<i>Lowest Maximum</i>	3.0°C Strathallan Airfield (Perthshire (in Tayside Region), 35mAMSL)
<i>Highest Minimum</i>	9.0°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-5.0°C Ravensworth (North Yorkshire, 120mAMSL)
<i>Lowest Grass Minimum</i>	-10.0°C Copley (Durham, 253mAMSL)
<i>Most Rainfall</i>	6.6mm Wingerworth No 2 (Derbyshire, 115mAMSL) also Mearley Hall (Lancashire, 200mAMSL)
<i>Most Sunshine</i>	6.4hr Baintown (Fife, 123mAMSL) also Dunbar (East Lothian, 23mAMSL)
<i>Highest Gust</i>	31Kt 36mph Mumbles Head (West Glamorgan, 43mAMSL)
<i>Highest Gust (mountain)</i>	28Kt 32mph Bealach Na Ba No 2 (Ross & Cromarty, 773mAMSL) also Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

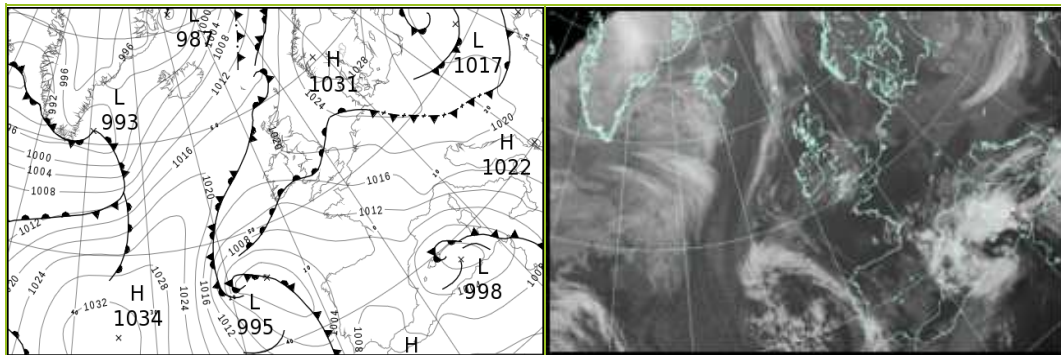

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 29 November 2020

This day's summary created 08/12/2020 16:29

Summary of the UK Weather for Sunday 29 November 2020

Excluding a few showers in Yorkshire and the northeast of England, and drizzle over the Pennines, it remained dry through the night across the UK. Cloud was widespread, with only a few pockets of clear sky appearing over the southeast and southwest of England, western Wales, and northern and central Scotland. Fog also developed, primarily across the Midlands and northern England, in addition to the hills in Wales and the south of England. Winds remained light throughout the day, with the exception of a few gustier winds along the north coast of Scotland. Low cloud also lingered throughout, with very few breaks anywhere in the country. This cloud was accompanied by some sporadic patches of rain, moving southeast from northern England through to East Anglia. Going into the evening and night, some fog patches formed. These were particularly dense in the southwest of England. Temperatures were average for the time of year, with a few above average temperatures being reported in the southwest of the UK.

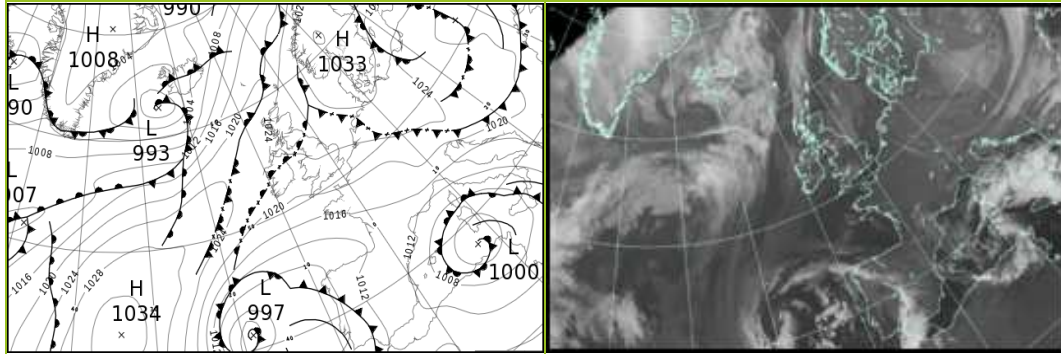

Daily Extremes

<i>Highest Maximum</i>	14.6°C Tredegar, Bryn Bach Park No 2 (Gwent, 360mAMSL)
<i>Lowest Maximum</i>	6.0°C Lyneham (Wiltshire, 145mAMSL)
<i>Highest Minimum</i>	10.9°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-6.1°C Aboyne No 2 (Aberdeenshire, 140mAMSL) also Cromdale (Moray (in Highland Region), 193mAMSL)
<i>Lowest Grass Minimum</i>	-9.5°C Balmoral (Aberdeenshire, 283mAMSL)
<i>Most Rainfall</i>	42.2mm Skye: Alltdearg House (Inverness-shire, 55mAMSL)
<i>Most Sunshine</i>	6.3hr Aberporth (Dyfed, 133mAMSL)
<i>Highest Gust</i>	35Kt 40mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	59Kt 68mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

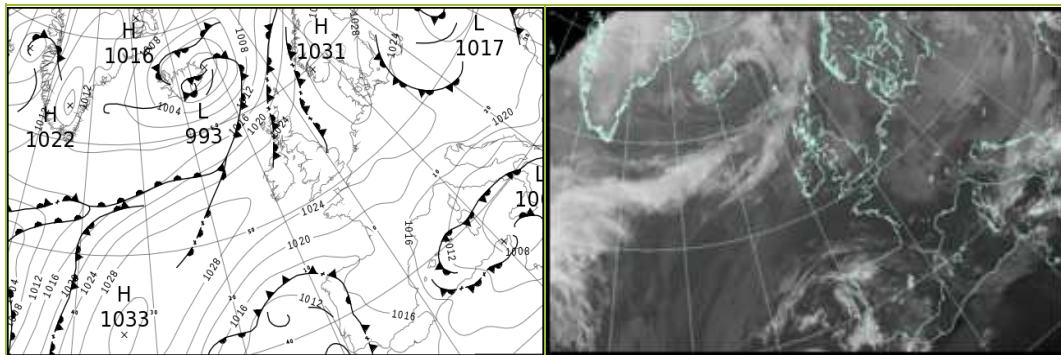

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 29 November 2020

Daily Weather Summary for Sunday 29 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 30 November 2020

This day's summary created 08/12/2020 16:29

Summary of the UK Weather for Monday 30 November 2020

Low cloud, mist and hill fog was present in much of the country, with southern Wales and southwestern parts of England experiencing the densest patches. Conditions were breezy further north, particularly in northwestern Scotland. There were outbreaks of rain moving south across Scotland, spreading into northern England and Northern Ireland. Wales, the Midlands and southern parts of England were dry throughout. Grass frost formed in southwest and northeast England, and also in parts of eastern and southern Scotland. A sunny start along the south coast, with the rain band covering northwest England, north Wales, the Midlands, and edging its way into East Anglia, leaving extensive showers behind. By late morning much of England was covered by cloud with patchy rain across all regions except the far south. Drier conditions developed for Scotland away from high ground. Through the afternoon this rain band continued southwards, bringing patchy rain across England and Wales, however with some clearer spells for northwestern England. Scattered showers over Northern Ireland began to clear by late afternoon. The evening was clearer and drier, with lingering coastal showers.

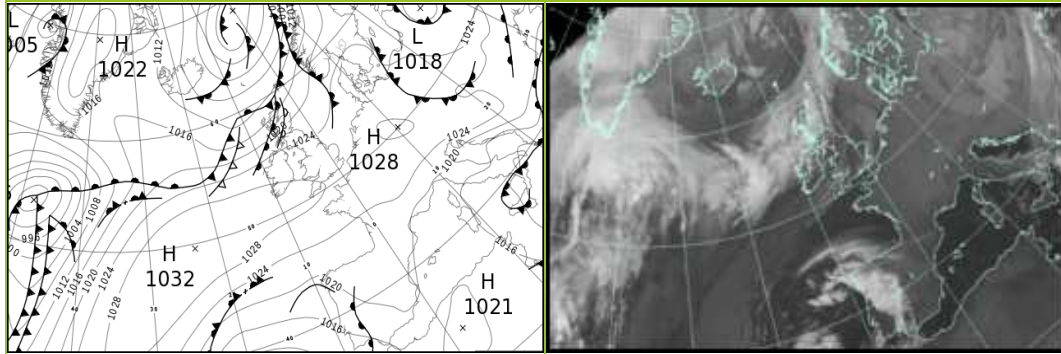

Daily Extremes

<i>Highest Maximum</i>	12.1°C Leeming (North Yorkshire, 33mAMSL) also Topcliffe (North Yorkshire, 25mAMSL)
<i>Lowest Maximum</i>	6.3°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	8.8°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	-5.7°C Cromdale (Moray (in Highland Region), 193mAMSL)
<i>Lowest Grass Minimum</i>	-5.8°C Cromdale (Moray (in Highland Region), 193mAMSL)
<i>Most Rainfall</i>	10.6mm Loch Droma No 4 (Ross & Cromarty, 267mAMSL)
<i>Most Sunshine</i>	3.5hr Drummond Castle (Perthshire (in Tayside Region), 113mAMSL)
<i>Highest Gust</i>	51Kt 59mph Weybourne (Norfolk, 21mAMSL)
<i>Highest Gust (mountain)</i>	73Kt 84mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values

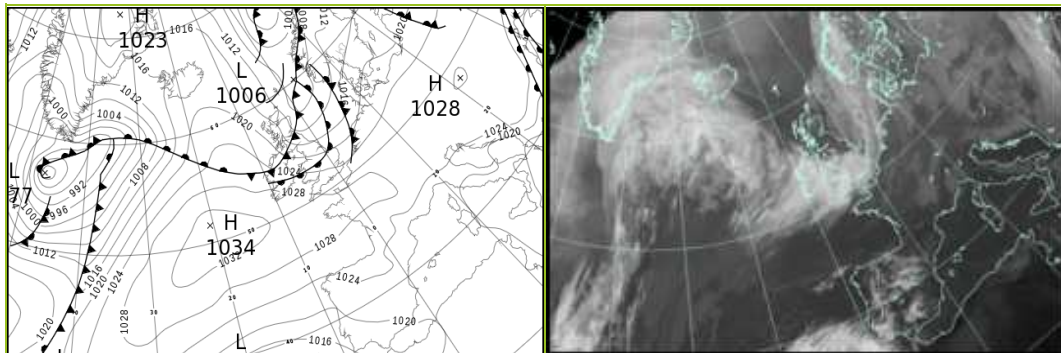

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 30 November 2020

North Atlantic and Europe analysis charts and satellite images at 0000 UTC

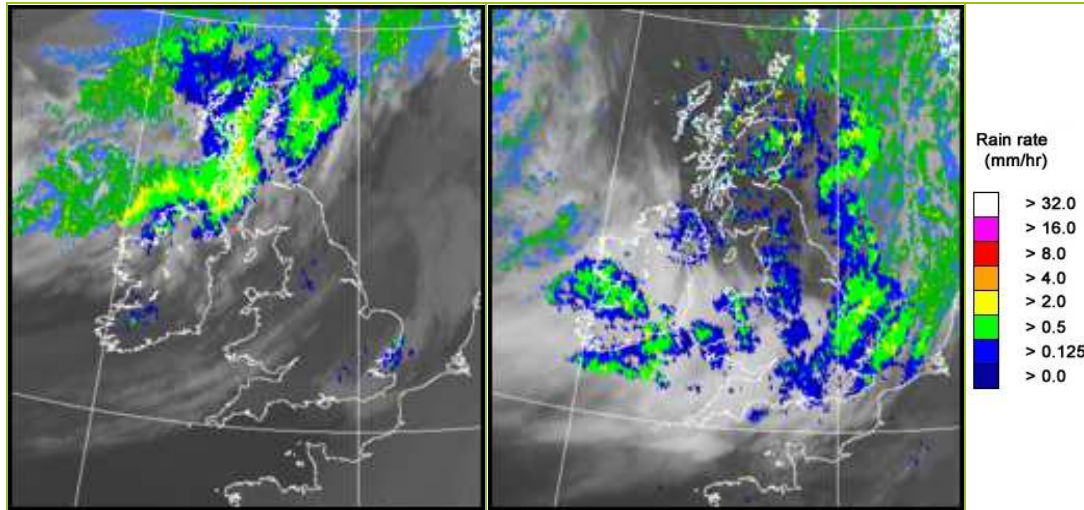

North Atlantic and Europe analysis charts and satellite images at 1200 UTC

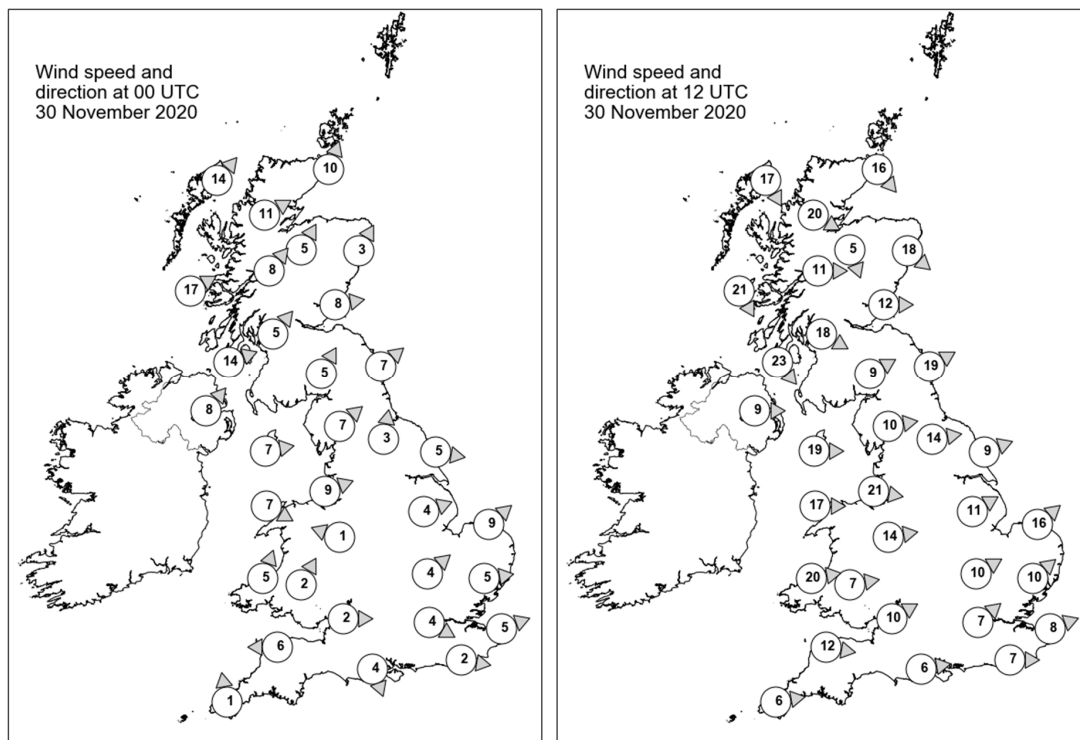

All satellite imagery copyright Met Office and EUMETSAT (European Organisation for the Exploitation of Meteorological Satellites). These show infra-red images from the geostationary MSG satellite. The rainfall rates are derived from both rain-radar and satellite data.

Daily Weather Summary for Monday 30 November 2020

Daily Weather Summary for Monday 30 November 2020

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Guidance Notes

UTC = Universal Coordinated Time. For the UK UTC is the same as GMT (Greenwich Mean Time).

National boundaries shown on the European station map are for illustrative purposes only.

Daily extremes

- Daily extremes have been manually confirmed by Met Office Observations Quality Management as valid observations from the live database at the time of checking. However, more extreme values may still be possible if they occur after the time of production.
- Mountain stations above 500 masl are excluded from lowest temperatures, highest gust speeds and greatest snow depths at 0900 UTC. This is because they are not considered representative of low level areas.
- Counties quoted against each station are based on historical county boundaries pre-1974 and may not reflect current administrative boundaries.

Analysis charts and satellite imagery

- The satellite imagery is infra-red imagery from the geostationary MSG satellite.
- The rainfall image is derived from satellite data from MSG and rain-radar data. This represents a snapshot of instantaneous rain-rates at 0000 UTC and 1200 UTC and so does not necessarily reflect daily accumulations in the rainfall station map.
- Any analysis charts or satellite images which are unavailable will be displayed as white space.

Station maps

- The UK maps show station data for the same set of stations presented UK data table. These stations are selected to provide good spatial coverage across the UK; they represent only a fraction of the overall UK observing network.
- Wind speed maps show wind speed in Kt and direction both averaged over the hour up to the time of observation. 1 Kt = 1.151 mph.

Hourly station data

- The data tables provide spot hourly observations from synoptic messages at 0000 and 1200 UTC. Missing data are denoted by '-'.

- Pressures are mean sea level pressure in hPa.
- For UK stations, Gibraltar and Jersey, the wind speeds and directions are both averaged over the hour up to the time of observation. However, for European stations wind speeds and directions are both averaged over a 10-minute period up to the time of observation.
- Wind speeds are in Kt. Wind directions are stored in the database every 10 degrees and have been converted to the nearest point of the compass. These give the direction the wind is blowing from, not to.
- Cloud amounts are in Oktas from 0 (clear) to 8 (overcast). 9 indicates sky obscured (eg by fog).
- Air temperature and dew point temperature are in Celsius.

Temperature maps

- Daily maximum, minimum and grass minimum temperatures are in Celsius.
- The period for the daily maximum temperature on day D is defined from 0900 UTC day D to 0900 UTC day D+1.
- The period for the daily minimum and grass minimum temperatures on day D is defined as 0900 UTC day D-1 to 0900 UTC day D.
- On any given day D the minimum will typically occur in the early hours of the morning and the maximum in early afternoon.

Rainfall, sunshine and max gust speed maps

- Daily rainfall is in mm from 0900 UTC day D to 0900 UTC day D+1.
- Daily sunshine is in hours from Kipp and Zonen CSD1 automatic sunshine records. Bright sunshine is defined as exceeding 120 W/m².
- Max gust speeds are the daily max gust in Kt from 0000-0000 UTC

Snow maps

- The day of snow falling map displays data from present weather sensors, showing stations which have recorded sleet or snow falling at any point in the day (0000-0000 UTC).
- The snow lying map shows level snow depth as recorded by the automatic snow depth sensors at 0900 UTC. These snow depth sensors do not record snow depth if this is less than 1cm.
- Snow depth sensors are normally operational from October to April, in the event of snow falling outside this period data availability may be limited.
- Snow maps will only be displayed if one or more of the selected stations on that date have recorded either snow falling or non-zero snow depths. If snow maps are not

displayed it is still possible that other stations in the network have recorded a day of sleet or snow falling or non-zero snow depth.
