

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Monday 22 Sep 2008

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
Southern and eastern areas of England and Wales will be rather cloudy again with a few showery outbreaks of rain now and again with a cool breeze. Northern and western areas particularly the westcountry, western Wales, Northern Ireland and Scotland will be drier and brighter with some spells of sunshine at times, and lighter breezes.

Outlook for Wednesday and Thursday:
The cloud and showers will become increasingly confined to the far southeast of England on Wednesday and Thursday with the brighter and drier conditions initially elsewhere gradually returning to most parts by the end of the week and the winds should ease too.
