

FPUK86 EGRR 031745
Forecast for the UK.
Issued by the Met Office
at 1945 on Wednesday 3 November 2004

** Valid for Broadcast at 2159 **

Here is the forecast for the United Kingdom for daytime tomorrow :
Cloud and outbreaks of rain clearing from southeast England by lunchtime. Heavy showers over northern and western Scotland, isolated showers over north coast of Northern Ireland and northwest England. Elsewhere dry with long sunny periods. Windy in the north, risk of gales in northern Scotland. Temperatures near average, feeling colder in wind.

Outlook for Friday and Saturday:

Strong winds and scattered showers over northern Scotland at first on Friday then most parts dry with good sunny periods. Cloud and rain spreading to northern Scotland late on Friday, spreading southeast across eastern England during Saturday, otherwise dry with sunny periods. Temperatures near average to rather warm.
