DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 14 June 2022 at 05:43 Local time

#### Air Quality Forecast for the UK

Issued by the Met Office

**Today:** Areas of Moderate air pollution may develop across central and southern parts of England on Tuesday, due to light winds allowing the accumulation of locally emitted pollutants. Elsewhere in the UK air pollution levels are expected to remain Low.

**Tomorrow:** On Wednesday fairly widespread Moderate levels of air pollution are likely across central and southern England, as well as parts of northeast England and southeast Wales. Low levels of air pollution expected elsewhere.

**Outlook:** Air pollution levels may become widely Moderate in central and southern Britain, especially on Friday in the hot conditions. Air pollution levels remaining generally Low elsewhere. Cloudier and fresher conditions spreading southeast on Saturday, with widespread Low levels of air pollution, though there is low confidence for this.
