DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Thursday, 05 November 2020 at 05:30 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are generally expected to be Low today, but patches of Moderate air pollution are possible near urban areas, as light winds develop across the bulk of the UK. Also, pollution levels in the vicinity of bonfire or firework celebrations are likely to be significantly higher than indicated on the forecast maps.

Tomorrow: Winds are expected to remain predominantly light on Friday with the potential for patches of Moderate air pollution near urban areas and from bonfire and firework related pollution. Otherwise, air pollution levels should be Low.

Outlook: Isolated areas of Moderate air pollution levels are possible through the outlook, especially in urban areas and near any bonfire and firework celebrations.
