

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Tuesday 30 Oct 2007

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Cloudy and windy with rain at times across northern areas. Mainly dry elsewhere, but with plenty of cloud, especially in the west. Temperatures will generally be above normal, with the best of any sunshine and warm conditions across central and eastern parts.

Outlook for Thursday and Friday:  
Cloudy and windy with rain at times across northern areas, perhaps as far south as northern England and Wales at times. Mainly dry elsewhere, but with plenty of cloud, especially in the west. Temperatures will generally be above normal, with the best of any sunshine and warm conditions across central and eastern parts.
