Here is the forecast for the United Kingdom for daytime tomorrow:
Another day with a mixture of sunshine and scattered showers, with the focus of showers moving to eastern areas through the day. The showers will be heavy at times, and often slow moving. Showers will gradually ease from the west later in the day.

Outlook for Wednesday and Thursday:
Wednesday will be a dry day for many, with just the odd shower, but more persistent rain will spread across eastern-most counties. On Thursday, the rain in the east is likely to edge gradually westwards. The best of the drier and brighter weather will be in the west.
