DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Thursday, 01 April 2021 at 04:12 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Areas of Moderate air pollution will occur at first across parts of southern England and also south Wales, perhaps locally High levels at first, but through today air pollution levels in these locations will gradually improve as colder, fresher air and strengthening winds spread south. Elsewhere across the UK mostly Low levels of air pollution will prevail, but with perhaps isolated pockets of Moderate air pollution.

Tomorrow: Generally Low levels of air pollution are expected across the UK for Friday, although isolated pockets of Moderate air pollution will prevail, especially for eastern England.

Outlook: As much colder air arrives from the north so air pollution levels will remain predominantly at Low levels.
