

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Sunday 07 Jul 2013

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
A sunny and very warm or even hot day for many parts of the UK, these conditions spreading to Northern Ireland and inland eastern Scotland. It will be cooler near the English North Sea coasts with low cloud and coastal fog likely. Over northwest Scotland it will be rather cloudy with perhaps some light patchy rain or drizzle.

Outlook for Tuesday and Wednesday:

It should remain dry, fine and very warm in many areas on Tuesday, though still cloudier and cooler over parts of Scotland. On Wednesday the cloudier and slightly cooler conditions in the north and east may become more widespread in southeast Britain.
