

FPUK86 EGRR 071745  
Forecast for the UK.  
Issued by the Met Office  
at 1945 on Wednesday 7 January 2004

\*\* Valid for Broadcast at 2159 \*\*

Here is the forecast for the United Kingdom for daytime tomorrow :  
A wet and often windy day is expected with rain spreading northeast across many areas in the morning, some very heavy rain likely in parts of the south and west with thunder. Brighter weather with sunny spells and scattered heavy showers will spread to western areas in the morning and central areas in the afternoon, the cloud and rain becoming confined to northeast Scotland by evening. Temperatures generally above normal but feeling colder in wind and rain.

Outlook for Friday and Saturday:  
Sunny spells and scattered showers Friday. Rain and gales spreading from the west on Saturday. Temperatures near or a little above normal.
