

FPUK86 EGRR 011745
Forecast for the UK.
Issued by the Met Office
at 1945 on Thursday 1 December 2005

** Valid for Broadcast at 2159 **

Here is the forecast for the United Kingdom for daytime tomorrow :
Overnight rain will clear from England and Wales, but showers following, becoming heavy and prolonged in the southwest. Scotland and Northern Ireland, cloudy with rain at times, locally heavy. It will be windy, with gales or severe gales along southern coasts. Temperatures will be near normal.

Outlook for Saturday and Sunday:

A generally cloudy day on Saturday, just a few bright or sunny intervals, and many areas seeing showers. These are likely to be heavy and squally at times, and remaining windy around coasts. Sunday is similar with further showers, perhaps a bit more sunshine for some. Temperatures will continue around average for early December.
