

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Wednesday 09 May 2007

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Outbreaks of rain across eastern Scotland will turn more showery, then most places will have a rather cool, windy day with sunshine and showers, some of these rather heavy in the northwest. Southern England and perhaps south Wales will be cloudier with more prolonged rain and some of this may become heavy near the south coast in the afternoon.

Outlook for Friday and Saturday:

It will remain unsettled with further rain or showers at times, and some of these are likely to be heavy. However, some sunshine is likely at time too. It will feel rather cool at times in brisk west or southwesterly winds.
