DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 10 January 2022 at 00:31 local time

#### Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are expected to remain generally Low across the UK, with dispersal of pollutants helped in northern areas by the breeze.

Tomorrow: Air pollution levels are expected to be Low for all parts of the UK.

Outlook: While much of the UK should retain Low air pollution levels, southern Britain may see areas of Moderate air pollution, as calm conditions fail to disperse locally-generated pollutants.
