DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 15 August 2022 at 05:33 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Light winds and ongoing very warm or hot weather will continue to give a chance of localised High levels of air pollution across England and Wales, mainly near urban sources. Otherwise widespread Moderate levels are expected. For Scotland and Northern Ireland there will be the chance of localised Moderate levels, however air pollution levels should remain Low for most.

Tomorrow: Areas of widespread Moderate levels remain possible across England and Wales Tuesday, although levels will decrease to Low for some. Low levels also expected across Scotland and Northern Ireland.

Outlook: Mostly Low levels expected across the UK, with areas of Moderate possible across southern and eastern England. There is the low chance of locally High to Very High levels moving into the far southeast Wednesday and Thursday.
