

FPUK86 EGRR 011745  
Forecast for the UK.  
Issued by the Met Office  
at 1945 on Wednesday 1 September 2004

\*\* Valid for Broadcast at 2159 \*\*

Here is the forecast for the United Kingdom for daytime tomorrow :  
Much of Scotland will start cloudy and wet, improving to sunny spells and occasional showers through the morning. N.Ireland will see sunny spells and isolated, light showers. Dry with sunny spells once early mist clears in central and eastern England. Otherwise rather cloudy with patchy, light rain, mainly over northwest England, southern Scotland and West Wales. Temperatures widely around normal, rather warm in the south.

Outlook for Friday and Saturday:

Cloudy with rain in the north and far west on Friday. Rain will also affect northern Scotland on Saturday. Otherwise it will be rather cloudy, but mainly dry. Generally warm, very warm in the southeast.
