

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Saturday 13 Sep 2008

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
In England and Wales patchy mist and fog will gradually disperse to leave a mainly dry day with sunny intervals. Central and eastern Scotland will also be dry and bright but outbreaks of rain will move eastwards across western Scotland and Northern Ireland. Western parts of Northern Ireland will have a wet afternoon and evening.

Outlook for Monday and Tuesday:

On Monday and Tuesday there will be rain at times across Scotland and Northern Ireland. England and Wales will be mainly dry, although that said the odd isolated shower cannot be ruled out altogether. Patchy mist and fog will disperse to allow some sunshine through.
