METEOROLOGICAL OFFICE

CLIMATOLOGICAL SERVICES (Met O 3)

Climatological Memorandum No. 46(B)

Scottish Meteorological Records/Documents stored in Met O Edinburgh Archives

Part B of Clim. Memo. No. 46 lists the Daily Registers of Observations stored in the Meteorological Office Edinburgh (Archives). The method of listing, and the reasons for adopting this format, are as set out in the preamble to Part A.

While every care has been taken to identify sites it has not been possible to note minor changes. For the sake of simplicity, and to avoid a mass of detail, only the overall elements observed have been noted. No attempt has been made to show times of observations or periods within which various elements were or were not observed, except in a few clear ~~clear~~ cut cases (mainly those of commencement and/or final termination).

Abbreviations used to identify elements observed are shown below. It is presumed that where instrumental observations were made they include eye observations. Other abbreviations as Clim. Memo. 46A.

B	=	pressure readings
D	=	dry bulb (or air temp.) temperature
W	=	Wet bulb temperature
Mx	=	maximum temperature
Mn	=	minimum temperature
Gm	=	grass minimum temperature
Bx	=	black bulb maximum temperature
Bn	=	black bulb minimum temperature
R	=	rain
Wf	=	wind speed or force and direction
Wd	=	wind direction
O	=	ozone
E	=	earth temperature (depth shown)
S	=	sun
Eye	=	eye observations of cloud, visibility etc.

No set demarcation date has been used to determine the "Historical Records" section, the type of record (e.g. manuscript, privately printed form etc.) and general layout of the record also being taken into consideration.
