

FPUK86 EGRR 041745
Forecast for the UK.
Issued by the Met Office
at 1945 on Sunday 4 June 2006

** Valid for Broadcast at 2159 **

Here is the forecast for the United Kingdom for daytime tomorrow :
Generally dry with variable amounts of cloud and spells of sunshine.
Western Scotland and parts of Northern Ireland starting cloudy, but
steadily brighten up during the day. Just the chance of an isolated
light shower developing, central parts of England and Scotland most
prone. Warm or very warm but cooler along coasts.

Outlook for Tuesday and Wednesday:

Most places dry with some good spells of sunshine. Cloudier across
the far northwest, with some light rain or drizzle. Misty at times
around coasts. Generally warm or very warm, locally hot across inland
southern parts. Cooler on coasts. Winds light with afternoon sea
breezes.
