

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Monday 03 Aug 2009

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
It will be mostly cloudy and mild with outbreaks of rain at first, although the rain in eastern areas tending to become light and patchy with time. There may be a few bright or sunny intervals, northeast Scotland and other areas to the lee of high ground best favoured.

Outlook for Wednesday and Thursday:

On Wednesday and Thursday some rain persisting through central and eastern parts of England, locally heavy. Brighter and drier in the west and northwest, but some scattered showers at times in northwest Britain, locally heavy. Much warmer than of late in southeast England and East Anglia.
