

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Monday 19 Mar 2012

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Central and western Scotland will have a cloudy day with outbreaks of rain, most persistent across the West Highlands during the morning. There will also be some rain in Northwest England at first. It will be dry elsewhere with cloud breaking to allow some warm, sunny periods, these most extensive east of high ground in central and northern areas.

Outlook for Wednesday and Thursday:  
Any light rain lingering across western Scotland on Wednesday will soon clear with most places having a dry day with some warm, sunny spells. Thursday will be similar, although eastern areas are expected to be cloudy, especially near North Sea coasts.
