

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Wednesday 10 Jan 2007

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:

A very windy day across much of the UK with gusts of around 70mph in places, leading to some very poor travelling conditions. Southern parts will see the cloudiest conditions with some rain, this clearing to brighter skies during the afternoon. Central and northern areas will see bright spells and some very squally showers. Feeling chilly in the wind.

Outlook for Friday and Saturday:

A lot of cloud on Friday, the wettest conditions expected across northern England, Northern Ireland and Scotland with just a little drizzle elsewhere. Still windy, especially in the north and west. Rain will slip southeast across many places during Saturday.
