Daily Weather Summaries for July 2022

If you have any questions or feedback about this product or wish to obtain further data please contact the Met Office.

This document contains daily weather summaries for each day of July 2022. The Met Office National Meteorological Library and Archive holds a continuous record of daily weather summaries or daily weather reports from 1860, and these daily weather summaries form a continuation of that series.

The purpose of each summary is to provide an overview of the weather conditions across the UK on that day, with the historical emphasis mainly based on observations from surface network of weather stations, although the format has varied over the decades. While the emphasis remains on observations from the surface network, the current daily weather summaries supplement these by including satellite and rain-radar imagery to provide a more complete overview. The current format of the daily weather summaries is as follows:

1. Text summary of the main characteristics of the weather during the day, written by an operational meteorologist in the Met Office operations centre.
2. Table of daily extremes for the UK for key climate variables including temperature, rainfall, sunshine and gust speeds.
3. Overview of the synoptic situation at 00 and 12 UTC comprising: analysis charts showing the surface pressure pattern and associated weather fronts; North Atlantic and European infra-red satellite images showing cloud-cover; combined infra-red and rain-radar images of the UK; maps of wind speed and direction at 00 and 12 UTC; observations of pressure, wind speed and direction, cloud cover, air and dewpoint temperature at selected UK and European stations in data tables.
4. UK maps of key climate variables from observing stations including maximum, minimum and grass minimum temperature, rainfall, sunshine, gust speed and snow.
5. Further guidance notes

If you spot any data errors or omissions in this product please contact the Met Office.

This issue of the daily weather summary provides data for the following UK and European locations (Reykjavic (5) also included):

Daily Weather Summary for Friday 01 July 2022

This day's summary created 08/07/2022 03:04

Summary of the UK Weather for Friday 01 July 2022

Parts of central and northwest England saw locally heavy showers in the early hours, while a band of frontal rain approached the Orkney Islands, where early fog was also reported. Elsewhere, it was a mostly dry start with cloudy skies and only an odd shower seen in parts of Wales, Northern Ireland, southwest England, and western Scotland. Winds were mostly light westerlies to northwesterlies. The band of frontal rain travelled northwards and brought showers across western Scotland through the morning. Meanwhile, the north of England saw locally heavy rain, particularly in Northumberland. Into the afternoon, the frontal rain dispersed temporarily, leaving widespread scattered showers across most of the UK. Western regions saw just the occasional shower, but northern and eastern areas experienced some locally heavy rain. During the late afternoon, the showers returned to organised, frontal bands, travelling northeastwards. The southwest remained mostly dry, while Northern Ireland, the northeast, and Scotland saw persistent showers. Into the evening, the heaviest showers were seen across Wales, Northern Ireland, and northeast Scotland.

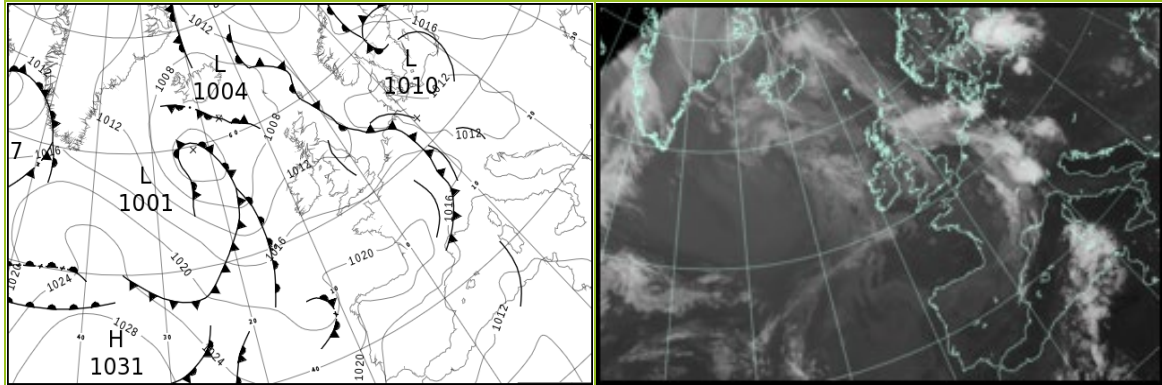

Daily Extremes

<i>Highest Maximum</i>	22.8°C Wisley (Surrey, 38mAMSL)
<i>Lowest Maximum</i>	11.9°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	14.1°C Crosby (Merseyside, 9mAMSL)
<i>Lowest Minimum</i>	3.9°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Lowest Grass Minimum</i>	-0.6°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Most Rainfall</i>	49.8mm Honister Pass (Cumbria, 358mAMSL)
<i>Most Sunshine</i>	10.8hr Charlwood (Surrey, 67mAMSL) also East Malling (Kent, 33mAMSL)
<i>Highest Gust</i>	45Kt 52mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	45Kt 52mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

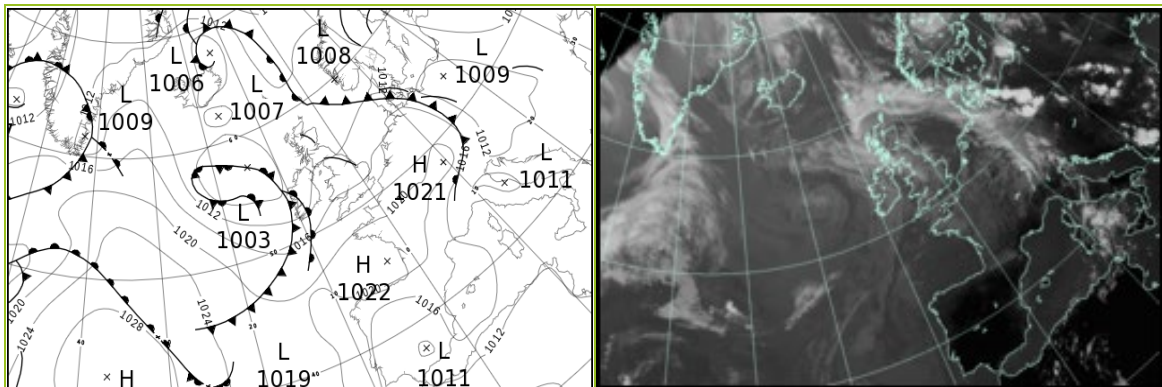

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 01 July 2022

North Atlantic and Europe analysis charts and satellite images at 0000 UTC

North Atlantic and Europe analysis charts and satellite images at 1200 UTC

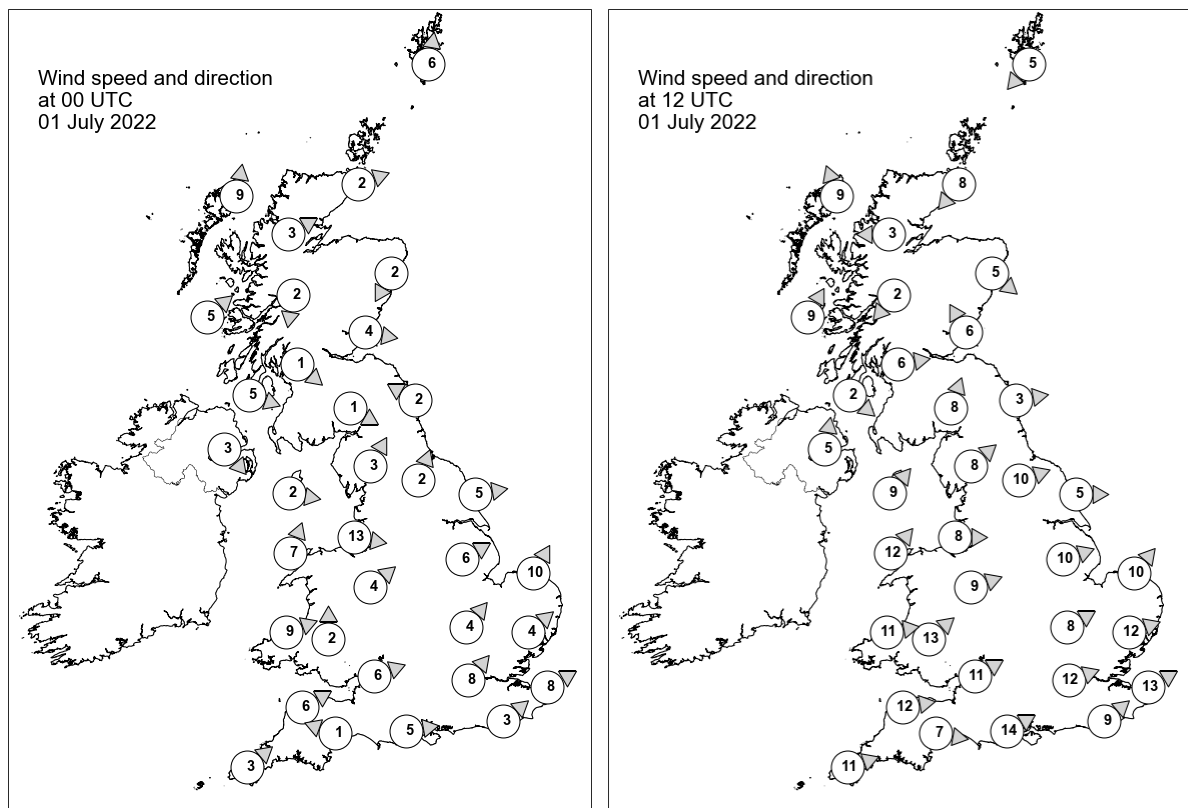

All satellite imagery copyright Met Office and EUMETSAT (European Organisation for the Exploitation of Meteorological Satellites). These show infra-red images from the geostationary MSG satellite. The rainfall rates are derived from both rain-radar and satellite data.

Daily Weather Summary for Friday 01 July 2022

Daily Weather Summary for Friday 01 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 02 July 2022

This day's summary created 09/07/2022 03:03

Summary of the UK Weather for Saturday 02 July 2022

A frontal system moved in from the west in the early hours, bringing rain to most western areas for much of the morning. The heaviest rain was seen across southern Scotland, while central and southeast England remained largely clear and dry. By dawn, the frontal rain had reached northeast England and stretched across the country down to Cornwall, where mist and haze were reported. Throughout the morning, the frontal system continued travelling eastwards, reaching Birmingham and parts of Oxfordshire by midday. While Northern Ireland, parts of the southwest, and the north of England saw scattered showers into the afternoon. Heavier rain persisted over northeast Scotland. Into the early evening, central and northern England remained largely dry as the frontal system approached eastern areas, bringing rain across Lincolnshire and Cambridgeshire. The rain continued travelling eastwards into the evening, and the showers became more dispersed.

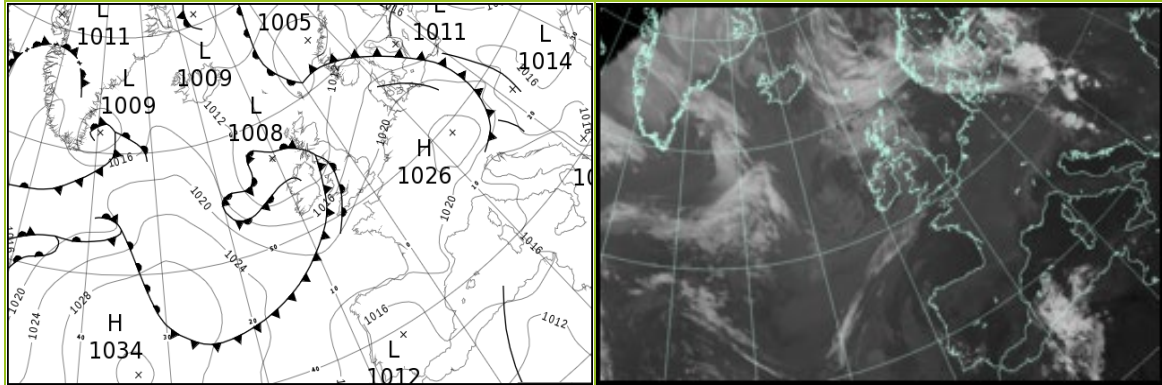

Daily Extremes

<i>Highest Maximum</i>	23.8°C Heathrow (Greater London, 25mAMSL) also Faversham (Kent, 46mAMSL)
<i>Lowest Maximum</i>	13.3°C Loch Glascarnoch (Ross & Cromarty, 269mAMSL)
<i>Highest Minimum</i>	14.4°C Swanage (Dorset, 10mAMSL)
<i>Lowest Minimum</i>	7.0°C Urquhart, Northwood (Ross & Cromarty, 17mAMSL) also Cirencester (Gloucestershire, 133mAMSL)
<i>Lowest Grass Minimum</i>	2.0°C Pitsford (Northamptonshire, 114mAMSL)
<i>Most Rainfall</i>	18.0mm Drumnadrochit (Inverness-shire, 53mAMSL)
<i>Most Sunshine</i>	14.4hr Hastings (East Sussex, 45mAMSL)
<i>Highest Gust</i>	43Kt 49mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	49Kt 56mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

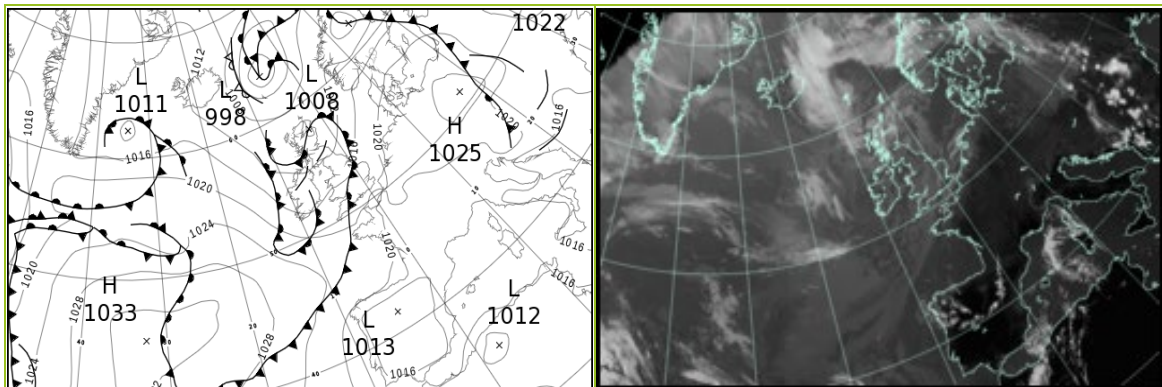

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 02 July 2022

Daily Weather Summary for Saturday 02 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 03 July 2022

This day's summary created 10/07/2022 03:03

Summary of the UK Weather for Sunday 03 July 2022

It was a dry start to the day for most, but parts of southwest and northwest England, north Wales, Northern Ireland, and Scotland saw scattered showers. By dawn, the showers had travelled eastwards, spreading across northern England, and into south Wales. There was patchy cloud for much of the rest of England where it remained dry. The low, patchy cloud lifted as the day warmed, bringing bright and sunny spells for much of the UK, interspersed with fair weather cumulus. However, fronts slowly pushing into the northwest brought duller conditions for Northern Ireland and the Hebrides by the late morning, triggering light rain and drizzle, mostly across the highlands. Showers further south broke out under day-time heating, organised mostly along an occluded front drifting east over England. By the evening, these showers became restricted to the most western areas while rain, stronger winds and cloudy conditions persisted overnight across northern and western Scotland. Further south, with calm and clear skies, mist patches developed.

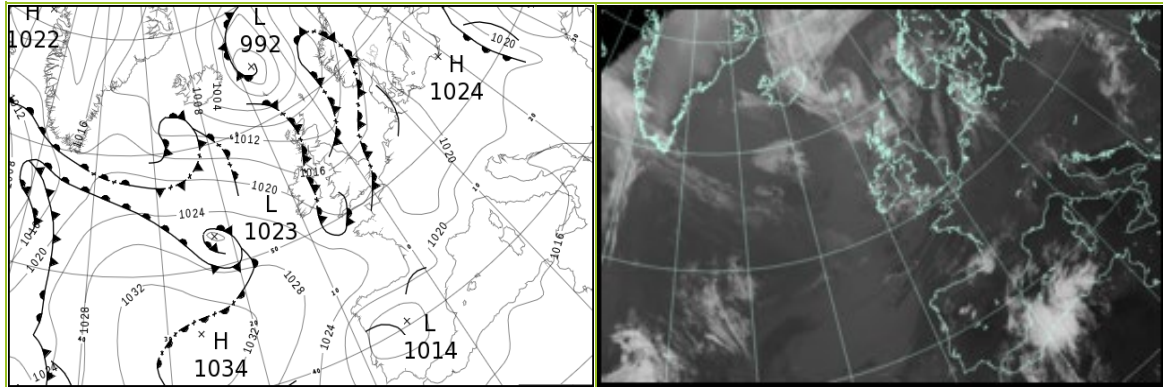

Daily Extremes

<i>Highest Maximum</i>	24.2°C Heathrow (Greater London, 25mAMSL)
<i>Lowest Maximum</i>	13.5°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	14.2°C Morecambe No 2 (Lancashire, 7mAMSL) also Crosby (Merseyside, 9mAMSL)
<i>Lowest Minimum</i>	4.5°C South Newington (Oxfordshire, 105mAMSL)
<i>Lowest Grass Minimum</i>	-0.6°C South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	23.4mm Achnagart (Ross & Cromarty, 15mAMSL)
<i>Most Sunshine</i>	10.4hr Hastings (East Sussex, 45mAMSL)
<i>Highest Gust</i>	34Kt 39mph South Uist Range (Western Isles, 4mAMSL)
<i>Highest Gust (mountain)</i>	49Kt 56mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

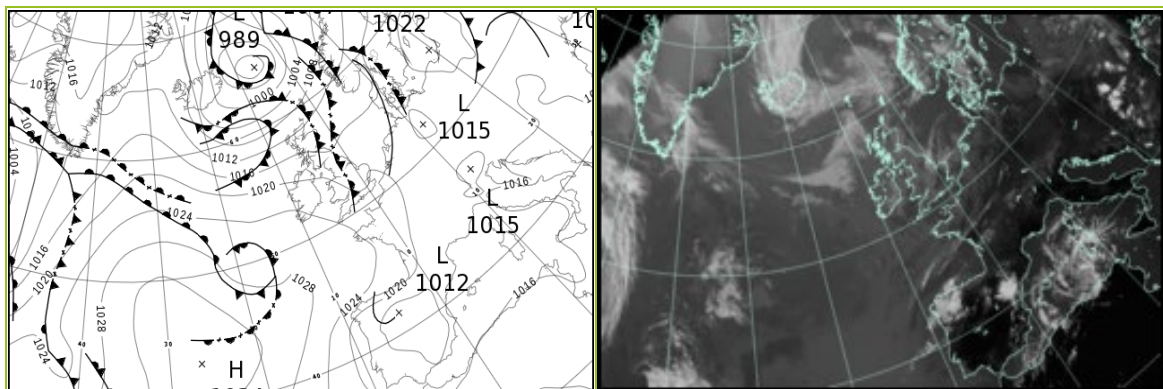

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 03 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 04 July 2022

This day's summary created 11/07/2022 03:03

Summary of the UK Weather for Monday 04 July 2022

A series of occlusions travelling northeastwards brought scattered showers across Northern Ireland, western Scotland, and parts of north England. It was dry and cloudy elsewhere, with early coastal fog in Southampton. The showers continued into the morning, becoming heavier across north Scotland by dawn. The occluded fronts continued to edge slowly eastwards throughout the day, bringing the showers and some fairly blustery winds across the north. Further south, the Azores high building across the UK exerted its influence in the form of fine and settled conditions. However, a zone of cloud sat across much of the country throughout the day and the odd shower was seen in western Wales, the west country and Anglia before noon. As the evening progressed, thicker cloud and heavier rain associated with a warm frontal wave began to approach Northern Ireland.

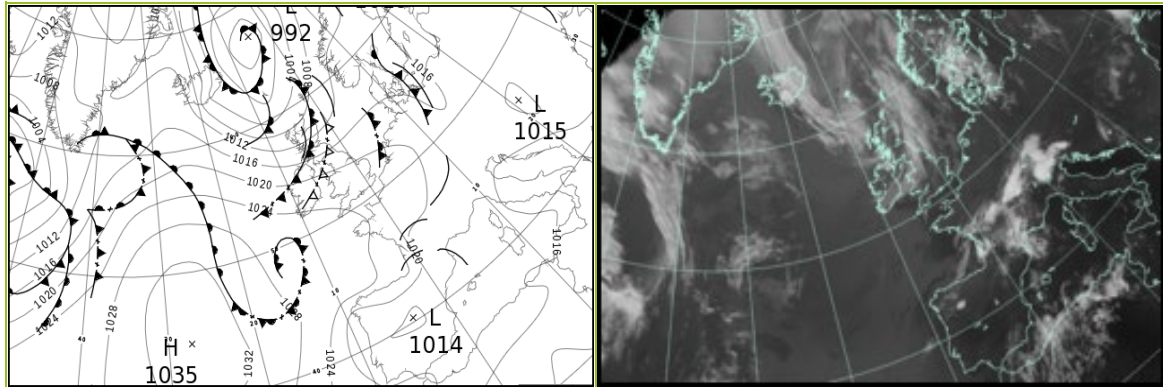

Daily Extremes

<i>Highest Maximum</i>	24.5°C Faversham (Kent, 46mAMSL)
<i>Lowest Maximum</i>	11.5°C Loch Glascarnoch (Ross & Cromarty, 269mAMSL)
<i>Highest Minimum</i>	14.5°C Bude (Cornwall, 15mAMSL)
<i>Lowest Minimum</i>	5.0°C Nettlecombe (Somerset, 96mAMSL)
<i>Lowest Grass Minimum</i>	0.3°C South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	12.0mm Cassley (Sutherland, 99mAMSL)
<i>Most Sunshine</i>	14.8hr Hastings (East Sussex, 45mAMSL)
<i>Highest Gust</i>	39Kt 45mph Emley Moor No 2 (West Yorkshire, 267mAMSL)
<i>Highest Gust (mountain)</i>	56Kt 64mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

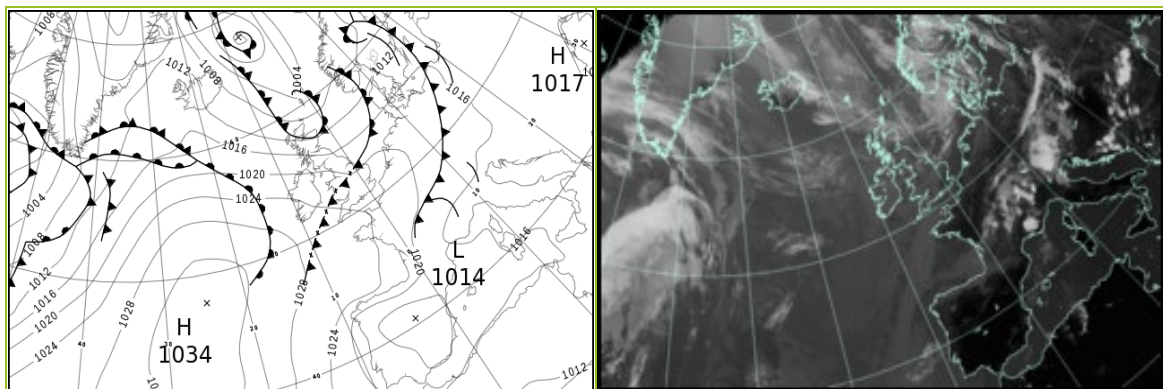

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 04 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 05 July 2022

This day's summary created 06/09/2022 15:09

Summary of the UK Weather for Tuesday 05 July 2022

Most of the UK saw a fine, dry start to the day under the influence of higher pressure, with early mist and fog reported in the southwest. Patchy light rain was observed in parts of north and west Scotland, Northern Ireland, Yorkshire, and the northwest. It was a fairly decent morning across much of the south and an improved morning for northeastern Scotland, with long sunny periods here. Elsewhere cloud prevailed, with rain affecting Northern Ireland, the Isle of the Man and northwestern Great Britain. A frontal wave slowly sank southwards over western UK into the afternoon, bringing more widespread cloudy conditions and further outbreaks of rain for the West Midlands, Wales and Northern Ireland. The cloud melted away into the night, leaving clear skies for many southern areas.

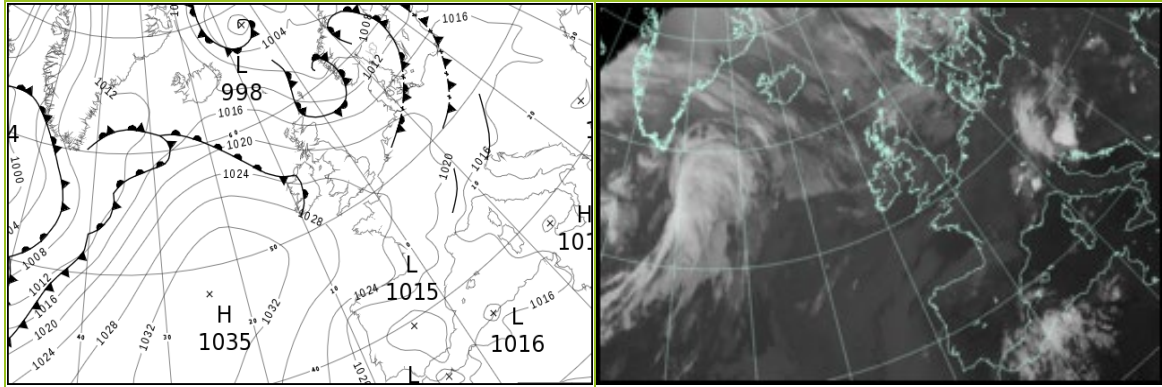

Daily Extremes

<i>Highest Maximum</i>	23.0°C East Malling (Kent, 33mAMSL) also Thorney Island (West Sussex, 4mAMSL)
<i>Lowest Maximum</i>	13.3°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	13.6°C Hastings (East Sussex, 45mAMSL)
<i>Lowest Minimum</i>	4.5°C Santon Downham (Suffolk, 6mAMSL)
<i>Lowest Grass Minimum</i>	-1.1°C South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	38.0mm Poolewe (Ross & Cromarty, 6mAMSL)
<i>Most Sunshine</i>	9.6hr Lyth No 2 (Caithness, 24mAMSL)
<i>Highest Gust</i>	33Kt 38mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	49Kt 56mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 06 July 2022

This day's summary created 13/07/2022 03:03

Summary of the UK Weather for Wednesday 06 July 2022

A low pressure system sat to the north of the UK overnight, bringing two bands of rain across Scotland and the north of England. The first band had passed over by dawn, leaving only a few scattered showers over the northeast and East Midlands, while the second heavier band persisted over the northwest of Scotland. Southern areas saw a dry night with clear spells. The second band of rain moved slowly eastwards through the morning, clearing the UK by midday, whilst further rain associated with a series of weakening frontal systems brought reasonably heavy rain and brisk winds into northwest Scotland and Northern Ireland. The cloud and rain sank further southwards but became lighter later on, bringing patchy drizzle for northern England into the evening and the Midlands by midnight. Elsewhere it was dry but fairly cloudy throughout the period, with the best of the clear and sunny spells in the east and south.

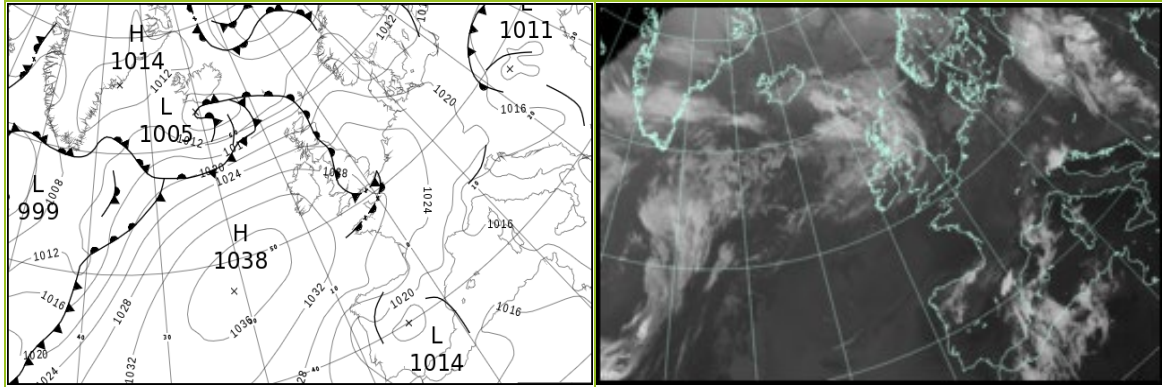

Daily Extremes

<i>Highest Maximum</i>	25.9°C Gosport, Fleetlands (Hampshire, 1mAMSL)
<i>Lowest Maximum</i>	12.3°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	15.7°C Mumbles Head (West Glamorgan, 44mAMSL)
<i>Lowest Minimum</i>	5.9°C Santon Downham (Suffolk, 6mAMSL)
<i>Lowest Grass Minimum</i>	2.0°C Santon Downham (Suffolk, 6mAMSL)
<i>Most Rainfall</i>	10.4mm Marske S Wks (Cleveland, 16mAMSL)
<i>Most Sunshine</i>	11.6hr Preston, Cove House (Dorset, 44mAMSL)
<i>Highest Gust</i>	50Kt 58mph Brizlee Wood (Northumberland, 250mAMSL)
<i>Highest Gust (mountain)</i>	68Kt 78mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

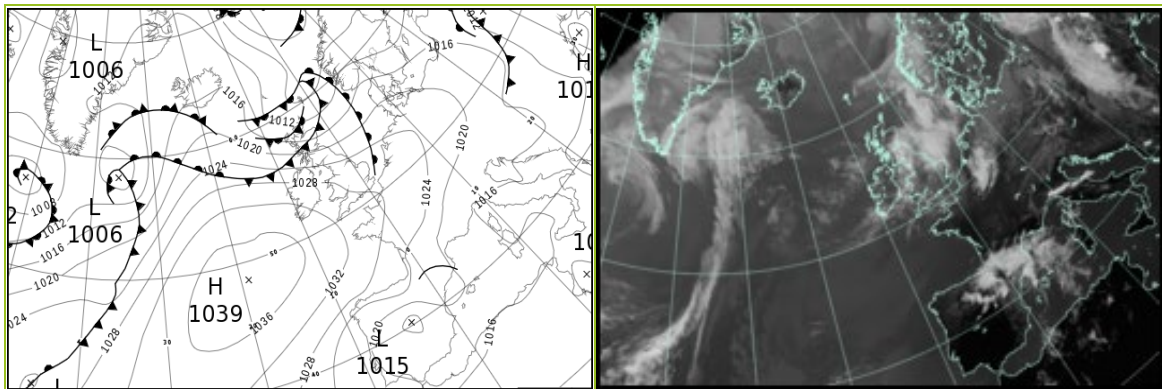

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 06 July 2022

Daily Weather Summary for Wednesday 06 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 07 July 2022

This day's summary created 14/07/2022 03:03

Summary of the UK Weather for Thursday 07 July 2022

It was a very benign night as a high pressure system over the Atlantic brought very little impactful weather to the UK. There were a few weak frontal systems moving southwards in the early hours, but these brought only a scattering of showers to East Anglia and the southeast of England near to dawn. Everywhere else saw a dry night with clear spells. Fine and dry conditions continued to prevail across the country through the day, as the centre of the high pressure system was situated to the southwest of the UK. Wales and most of England saw some cloud in the morning which cleared after midday to leave blue skies and plenty of sunshine through the afternoon. Meanwhile, Scotland, Northern Ireland and parts of northern England saw thicker cloud cover in the afternoon. Some light rain arrived in northwest Scotland in the late afternoon and continued into the evening. While the far north and northwest remained cloudy, most areas saw dry conditions with long clear spells towards the end of the day.

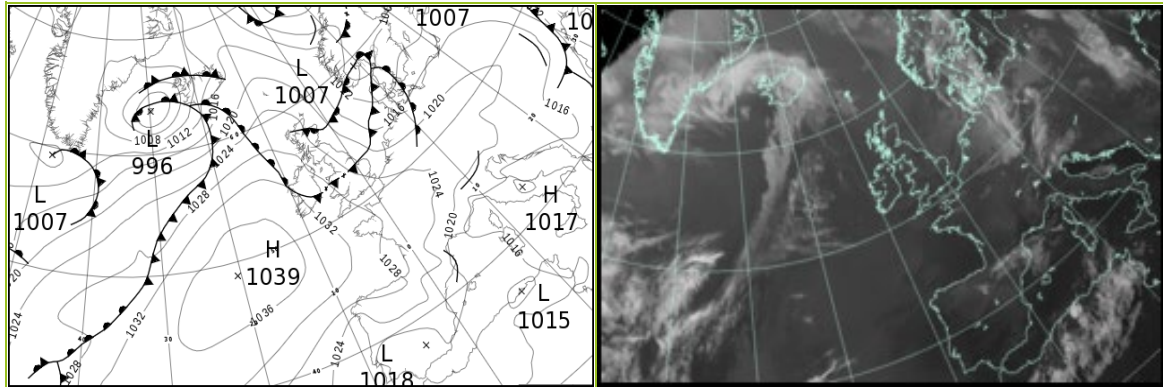

Daily Extremes

<i>Highest Maximum</i>	25.8°C Topcliffe (North Yorkshire, 25mAMSL)
<i>Lowest Maximum</i>	12.6°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	17.0°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Minimum</i>	7.9°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Lowest Grass Minimum</i>	5.1°C Baintown (Fife, 123mAMSL)
<i>Most Rainfall</i>	9.4mm Resallach (Sutherland, 133mAMSL)
<i>Most Sunshine</i>	14.0hr Edinburgh, Gogarbank (Midlothian (in Lothian Region), 57mAMSL)
<i>Highest Gust</i>	38Kt 44mph Berry Head (Devon, 58mAMSL) also Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	46Kt 53mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

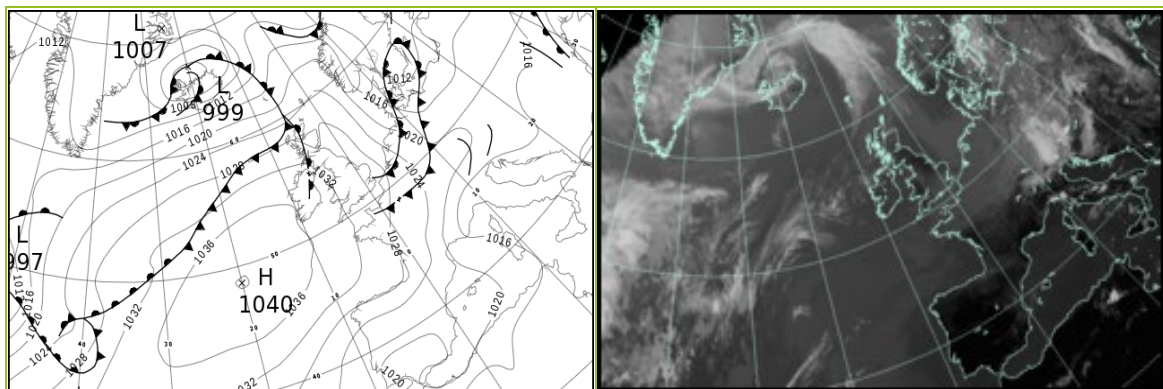

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 07 July 2022

Daily Weather Summary for Thursday 07 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 08 July 2022

This day's summary created 15/07/2022 03:03

Summary of the UK Weather for Friday 08 July 2022

It was another fine and dry start for much of the UK with high pressure building from the southwest. Under a weak frontal system, it was blustery at times across parts of Scotland with some rain towards the west. Low cloud here and over Northern Ireland moved southeastwards through the early morning. To the south and east of this cloud, conditions were mainly clear with light winds and some isolated fog patches forming towards dawn. Partially cloudy conditions continued through the morning for Scotland, Northern Ireland, northwest England and north Wales. Elsewhere, the skies remained mostly clear. Some very light showers were seen in northwest Scotland. More cloud arrived over central and southwest England in the late afternoon. Meanwhile, some light showers emerged over eastern parts of Northern Ireland. The evening was fine and dry for most of the UK, with light rain and drizzle reported in parts of Scotland and Northern Ireland.

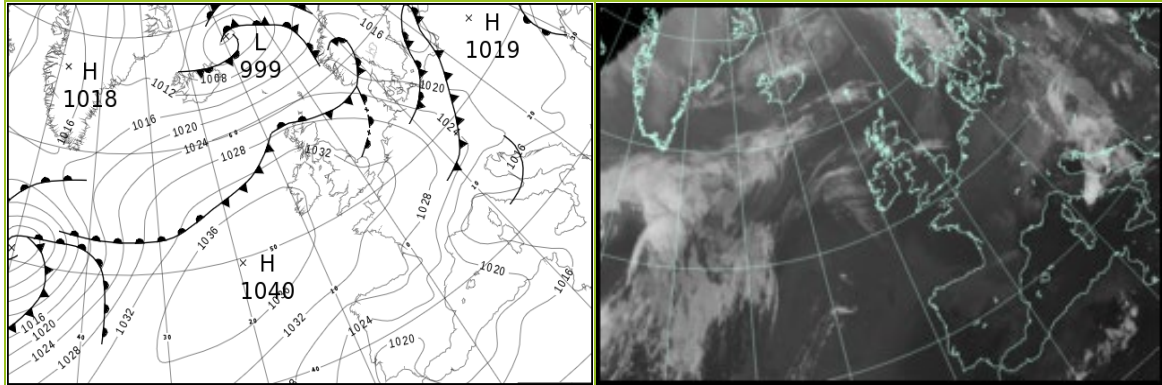

Daily Extremes

<i>Highest Maximum</i>	29.3°C Teddington, Bushy Park (Middlesex, 9mAMSL)
<i>Lowest Maximum</i>	12.5°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	15.8°C Mumbles Head (West Glamorgan, 44mAMSL)
<i>Lowest Minimum</i>	7.8°C Pitsford (Northamptonshire, 114mAMSL)
<i>Lowest Grass Minimum</i>	3.2°C Whitechurch (Dyfed, 129mAMSL)
<i>Most Rainfall</i>	2.8mm Honister Pass (Cumbria, 358mAMSL) also Wet Sledale Resr (Cumbria, 270mAMSL)
<i>Most Sunshine</i>	14.5hr Leconfield (Humberside, 7mAMSL)
<i>Highest Gust</i>	38Kt 44mph Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Gust (mountain)</i>	53Kt 61mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

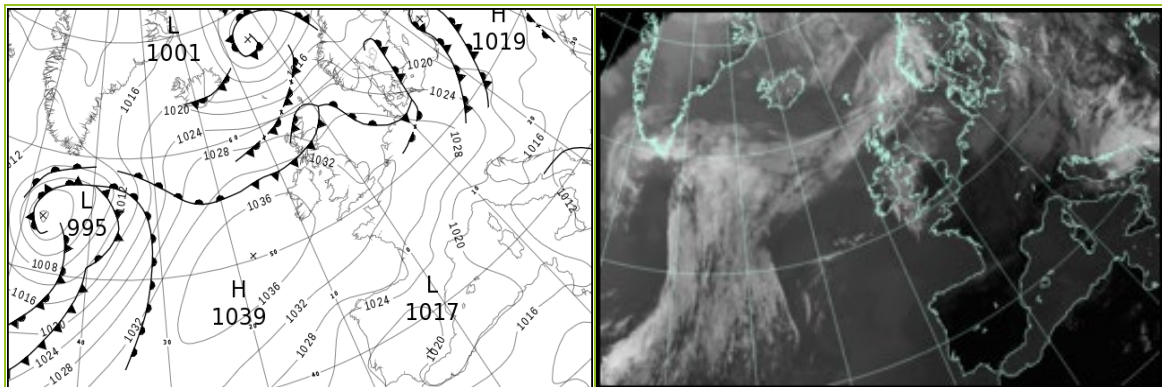

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 09 July 2022

This day's summary created 16/07/2022 03:03

Summary of the UK Weather for Saturday 09 July 2022

The night's weather was dominated by high pressure in the southwest. A weakening frontal system slowly pushed southwards over Scotland and Northern Ireland in the early hours, bringing low cloud and some isolated patches of light rain and drizzle here, mainly over western hills. There was some low stratus to start in parts of central and southern England, but this dissolved quickly, leaving fine and dry conditions into the morning. Winds were light and westerly to northwesterly for most, but locally moderate around Irish Sea coasts and far eastern Scotland. It was a widely fine and dry morning across the UK, with patchy light rain across Northern Ireland. The weakening frontal system brought occasional light showers to the far north of Scotland, including Orkney and the Hebrides. The afternoon remained dry and bright, with reports of mist in western Scotland. However, patchy rain continued across Northern Ireland and north Scotland through the afternoon and into the evening. Dry conditions prevailed elsewhere throughout the evening, with some coastal fog and mist forming along the northwestern coast.

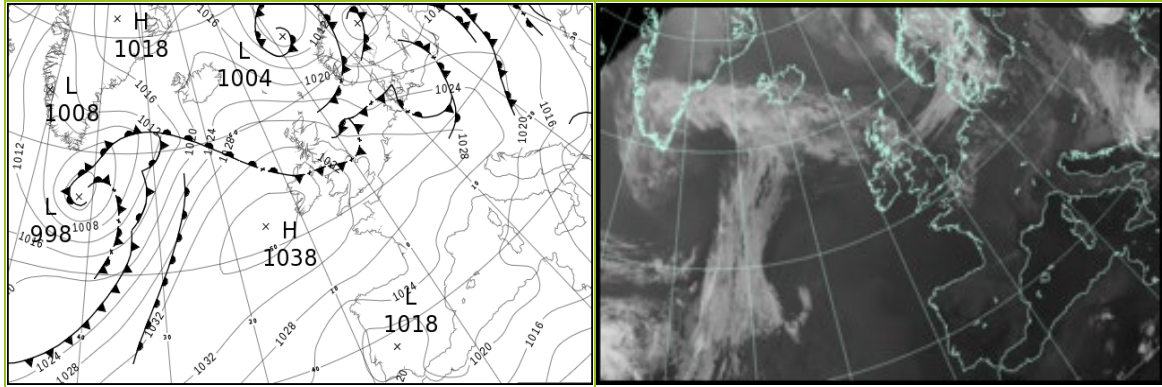

Daily Extremes

<i>Highest Maximum</i>	27.5°C Heathrow (Greater London, 25mAMSL) also Gosport, Fleetlands (Hampshire, 1mAMSL)
<i>Lowest Maximum</i>	12.9°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	16.9°C Isle Of Portland (Dorset, 52mAMSL)
<i>Lowest Minimum</i>	5.4°C Balmoral (Aberdeenshire, 283mAMSL)
<i>Lowest Grass Minimum</i>	1.3°C Balmoral (Aberdeenshire, 283mAMSL)
<i>Most Rainfall</i>	15.8mm Fair Isle (Shetland, 57mAMSL)
<i>Most Sunshine</i>	15.7hr Morecambe No 2 (Lancashire, 7mAMSL)
<i>Highest Gust</i>	32Kt 37mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	43Kt 49mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

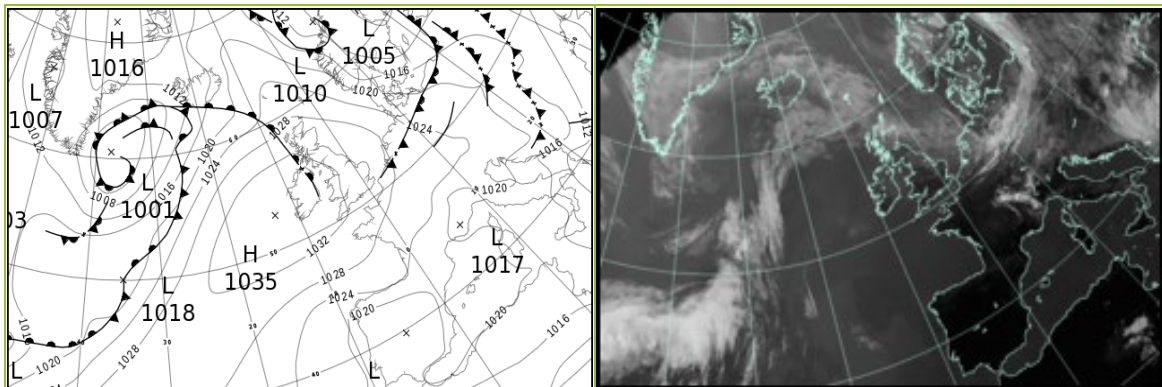

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 09 July 2022

Daily Weather Summary for Saturday 09 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 10 July 2022

This day's summary created 17/07/2022 03:03

Summary of the UK Weather for Sunday 10 July 2022

A band of showers moved southeastwards through the far northeast of Scotland and the Orkney Islands in the small hours. Elsewhere, it was a dry start to the day with clear skies for eastern and southern parts. Meanwhile, broken to overcast low cloud was seen over northwest England, northern Wales, western Scotland, and Northern Ireland. Local fog was reported in southwest Wales and on the west coast of Scotland. The showers cleared by dawn, leaving a dry morning across the UK. Clear skies continued for most throughout the day, with low stratus breaking up over the morning. The afternoon saw a frontal system travelling eastwards, approaching far northeast Scotland. This brought light drizzle across the Outer Hebrides for a time in the mid-afternoon, however, it cleared briskly. The sunshine became hazy into the afternoon at times for some western areas, but fine and dry conditions prevailed into the evening. Some coastal mist and fog formed into the late hours across western parts. It was a warm or hot day for many, with both Northern Ireland and Scotland recording the highest temperatures of the year so far.

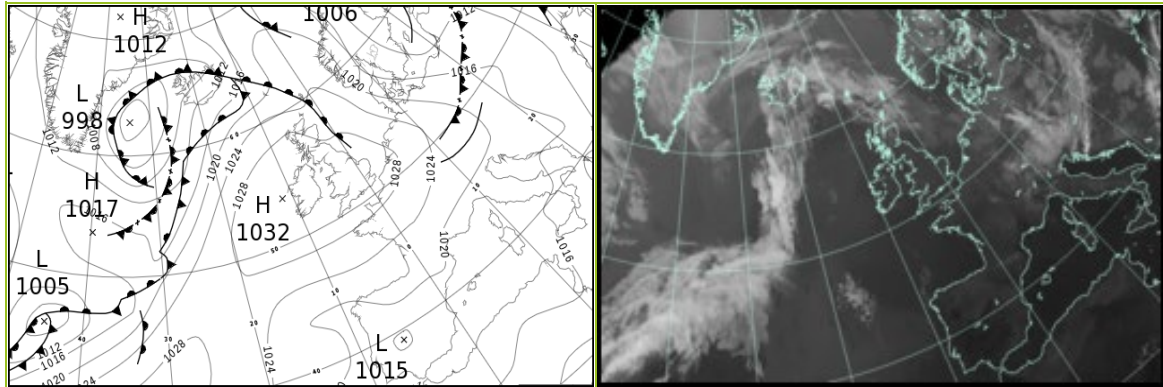

Daily Extremes

<i>Highest Maximum</i>	30.1°C London, St James's Park (Greater London, 5mAMSL) also Cirencester (Gloucestershire, 133mAMSL)
<i>Lowest Maximum</i>	12.3°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	16.7°C Slapton (Devon, 32mAMSL)
<i>Lowest Minimum</i>	4.7°C Shap (Cumbria, 263mAMSL)
<i>Lowest Grass Minimum</i>	0.7°C Llangunllo, Cefnysur (Powys (south), 310mAMSL)
<i>Most Rainfall</i>	0.4mm Lerwick (Shetland, 82mAMSL)
<i>Most Sunshine</i>	16.1hr Boulmer (Northumberland, 23mAMSL)
<i>Highest Gust</i>	35Kt 40mph Kirkwall (Orkney, 26mAMSL)
<i>Highest Gust (mountain)</i>	40Kt 46mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

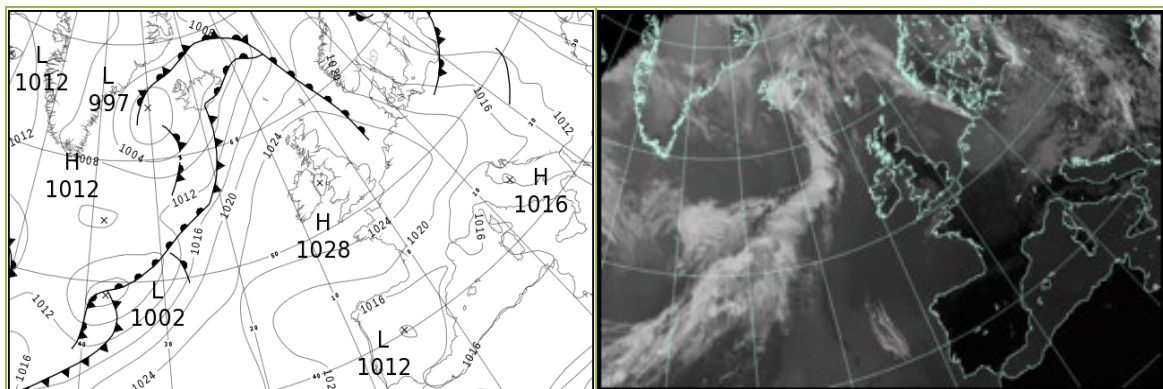

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 10 July 2022

Daily Weather Summary for Sunday 10 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 11 July 2022

This day's summary created 18/07/2022 03:03

Summary of the UK Weather for Monday 11 July 2022

Settled and dry conditions prevailed through the early hours under the influence of high pressure. Some light showers arrived over the far north of Scotland shortly after dawn. Most regions saw plenty of bright spells through the early morning, although low cloud overcast parts of northwest England and Northern Ireland. Fog and mist were observed across many coastal regions, including Merseyside, Norfolk, and Aberdeenshire. Fine weather continued through the morning and early afternoon in the south and east, bringing strong sunshine and very warm or locally hot temperatures with it. Meanwhile the north and west experienced more hazy conditions, and closer to normal temperatures, as a southwards moving low pressure system brought in cloud over the west. While this cloud affected most of the country by the late afternoon, it remained patchy in the south, resulting in sunny spells. In the evening, a set of fronts associated with the low pressure system continued to edge over western Scotland and Northern Ireland, bringing scattered showers to these areas, and causing winds to pick up, becoming gales later in the night.

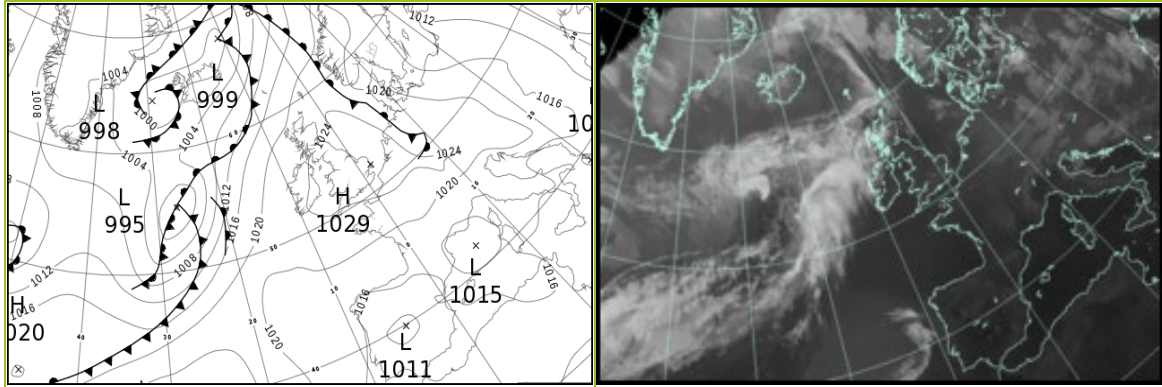

Daily Extremes

<i>Highest Maximum</i>	32.0°C Northolt (Greater London, 33mAMSL)
<i>Lowest Maximum</i>	15.2°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	16.5°C Heathrow (Greater London, 25mAMSL)
<i>Lowest Minimum</i>	6.4°C Kinbrace, Hatchery (Sutherland, 103mAMSL)
<i>Lowest Grass Minimum</i>	2.2°C Llangunllo, Cefnysur (Powys (south), 310mAMSL)
<i>Most Rainfall</i>	12.8mm Achnagart (Ross & Cromarty, 15mAMSL)
<i>Most Sunshine</i>	14.0hr Preston, Cove House (Dorset, 44mAMSL)
<i>Highest Gust</i>	51Kt 59mph Loch Glascarnoch (Ross & Cromarty, 269mAMSL)
<i>Highest Gust (mountain)</i>	76Kt 87mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

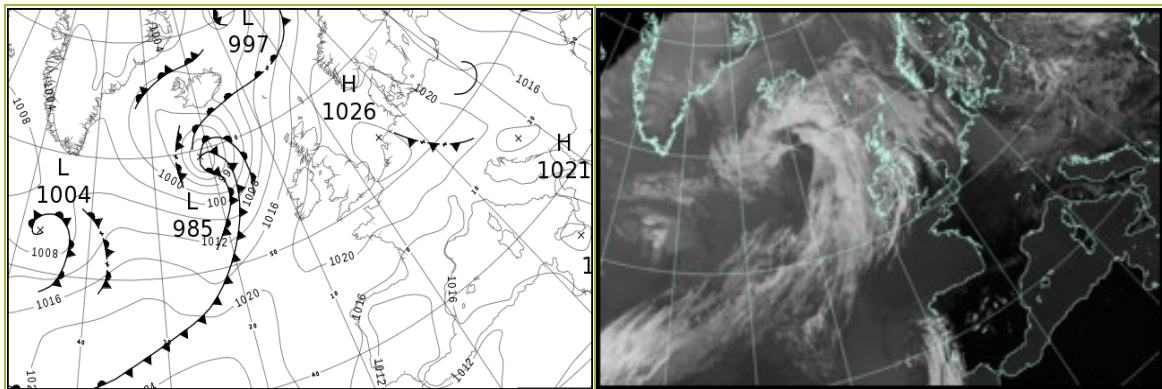

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 11 July 2022

Daily Weather Summary for Monday 11 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 12 July 2022

This day's summary created 19/07/2022 03:03

Summary of the UK Weather for Tuesday 12 July 2022

It was a mild night for many, with the continued influence of higher pressure bringing warm and dry weather for much of England and Wales. A frontal system associated with lower pressure to the northwest brought a band of rain across northern and western parts of Scotland, Northern Ireland, and north Wales. Travelling southeastwards and stretching widely across the UK, it brought light showers across Aberdeen, Northumberland, and Birmingham. The cold front continued edging southeastwards throughout the day. Much of the precipitation in the morning was virga, but by midday, the intensity increased and many areas in southern and central England reported precipitation reaching the ground. Cloud gave way in the afternoon, bringing a bright and sunny afternoon in Scotland, also thinning in the south to give sunny spells. In sunshine, it was another very warm day, but cooler than previous days. In the evening the rain weakened, leaving a thin band stretching from southern Wales to East Anglia, and another band of cloud associated with the lower pressure to the north began edging over northwestern Scotland.

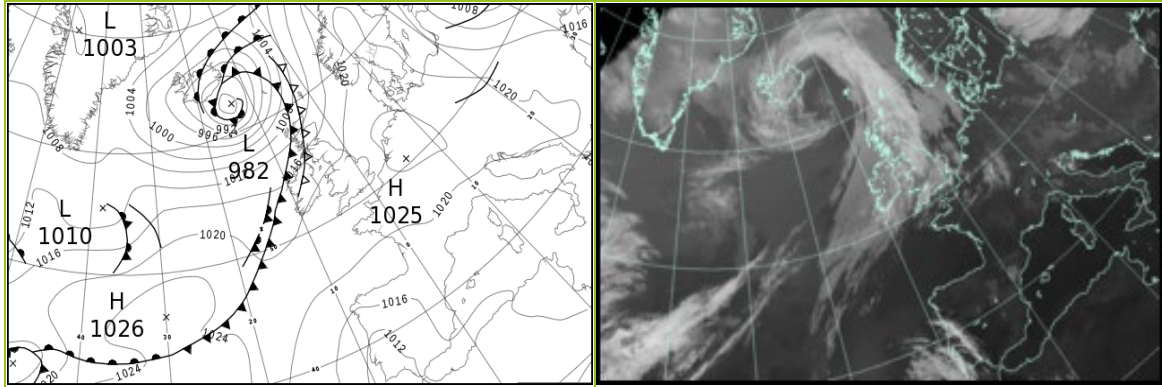

Daily Extremes

<i>Highest Maximum</i>	32.0°C Kew Gardens (Greater London, 6mAMSL)
<i>Lowest Maximum</i>	14.7°C Fair Isle (Shetland, 57mAMSL) also Stornoway Airport (Western Isles, 15mAMSL)
<i>Highest Minimum</i>	20.5°C Sheffield (South Yorkshire, 131mAMSL)
<i>Lowest Minimum</i>	11.4°C Lerwick (Shetland, 82mAMSL)
<i>Lowest Grass Minimum</i>	8.2°C Goudhurst (Kent, 85mAMSL)
<i>Most Rainfall</i>	8.0mm South Uist Range (Western Isles, 4mAMSL)
<i>Most Sunshine</i>	12.7hr Kirkwall (Orkney, 26mAMSL)
<i>Highest Gust</i>	42Kt 48mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	62Kt 71mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

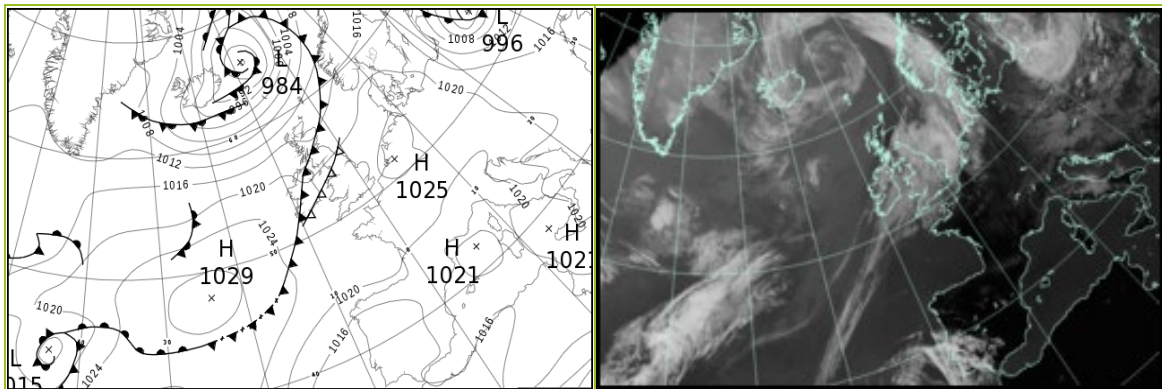

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 12 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 13 July 2022

This day's summary created 20/07/2022 03:03

Summary of the UK Weather for Wednesday 13 July 2022

It was a mild night for most and the morning saw a series of fronts travelling southeastwards across the UK. This brought bands of light rain and cloud across the north and the far south of England, and northern and western Scotland. Early mist and haze were reported across southwestern and eastern coastal regions. The fronts continued to move southwards through the morning, with the forwardmost front clearing the UK by midday. Away from these, conditions were largely clear with lengthy sunny periods for many, except in northern and eastern Scotland where there was increased cloud cover and light showery rain. An occluded front entered the north of Scotland in the early afternoon and a trough moved in slowly over Northern Ireland. Here, light rain and drizzle were reported. The light rain continued into the evening, spreading into northwestern England, whilst further south it was drier and clearer under the influence of high pressure.

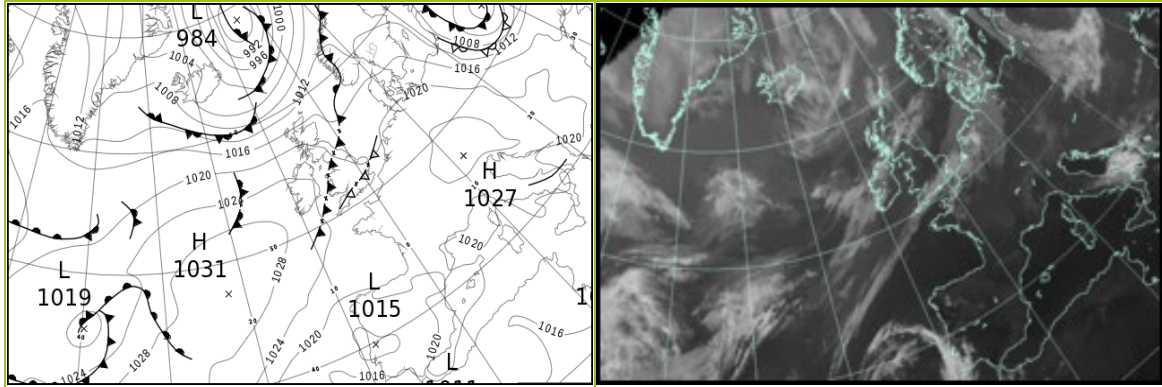

Daily Extremes

<i>Highest Maximum</i>	30.1°C Gosport, Fleetlands (Hampshire, 1mAMSL)
<i>Lowest Maximum</i>	12.7°C Fair Isle (Shetland, 57mAMSL) also Resallach (Sutherland, 133mAMSL) also Achfary (Sutherland, 46mAMSL)
<i>Highest Minimum</i>	21.5°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Minimum</i>	5.4°C Katesbridge (Down, 91mAMSL)
<i>Lowest Grass Minimum</i>	2.6°C Katesbridge (Down, 91mAMSL)
<i>Most Rainfall</i>	6.6mm Achfary (Sutherland, 46mAMSL)
<i>Most Sunshine</i>	13.6hr Aberdaron (Gwynedd, 86mAMSL)
<i>Highest Gust</i>	40Kt 46mph Kirkwall (Orkney, 26mAMSL)
<i>Highest Gust (mountain)</i>	63Kt 72mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

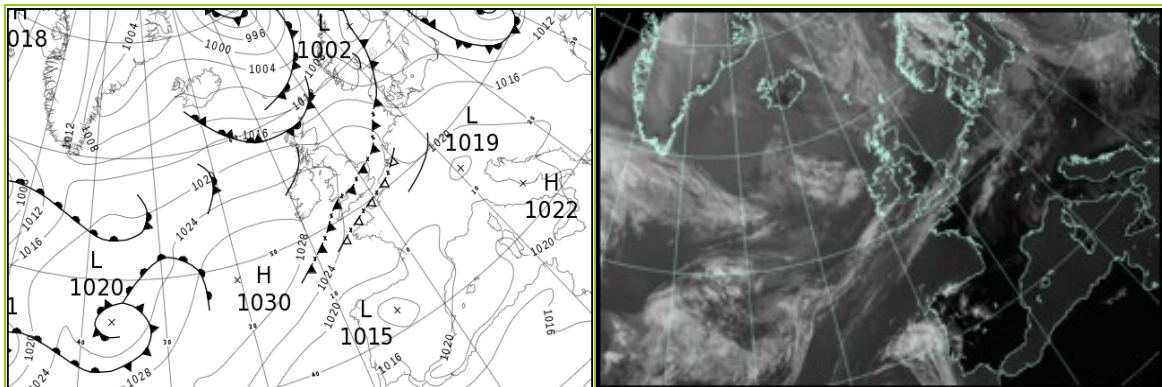

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 13 July 2022

Daily Weather Summary for Wednesday 13 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 14 July 2022

This day's summary created 21/07/2022 03:03

Summary of the UK Weather for Thursday 14 July 2022

It was a benign night with much of the country experiencing long clear periods and dry weather. Any cloud in the early hours was high level, but lower cloud moved in from the northwest over the rest of the night. These brought few showers to high ground over Northern Ireland and the northwest of Scotland, which also experienced some patches of fog towards dawn. Occlusion fragments moving across the UK throughout the day brought stratus cloud and occasional showers for Northern Ireland, Scotland and parts of northern and eastern England. A few of these showers turned heavier in the afternoon to the north of the Pennines, becoming more concentrated towards the east of the country into the evening and then more isolated overnight. For the south and east of England it was a dry and fine day with plenty of sunny spells.

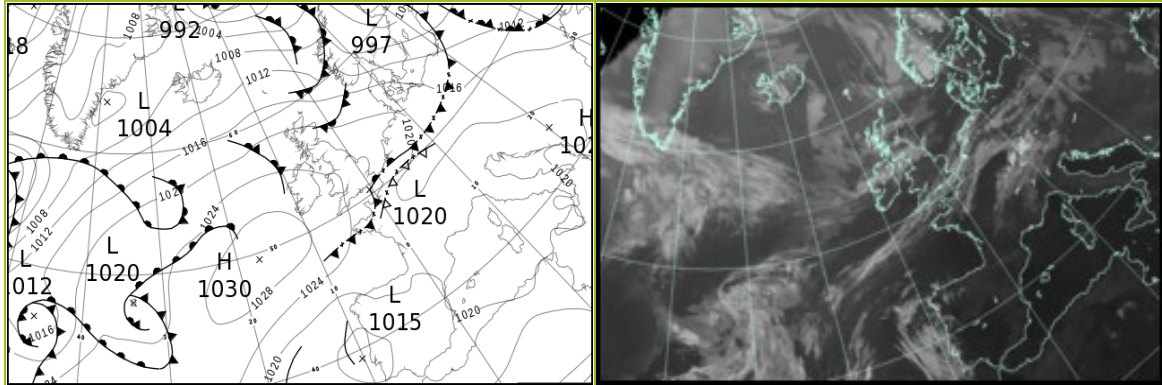

Daily Extremes

<i>Highest Maximum</i>	26.6°C Wiggonholt (West Sussex, 28mAMSL)
<i>Lowest Maximum</i>	13.3°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	16.1°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Minimum</i>	4.2°C Aboyne No 2 (Aberdeenshire, 140mAMSL)
<i>Lowest Grass Minimum</i>	0.0°C Durris (Kincardineshire, 107mAMSL)
<i>Most Rainfall</i>	17.6mm Calder Hall (Cumbria, 28mAMSL)
<i>Most Sunshine</i>	15.2hr Oxford (Oxfordshire, 63mAMSL)
<i>Highest Gust</i>	32Kt 37mph Thorney Island (West Sussex, 4mAMSL)
<i>Highest Gust (mountain)</i>	38Kt 44mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

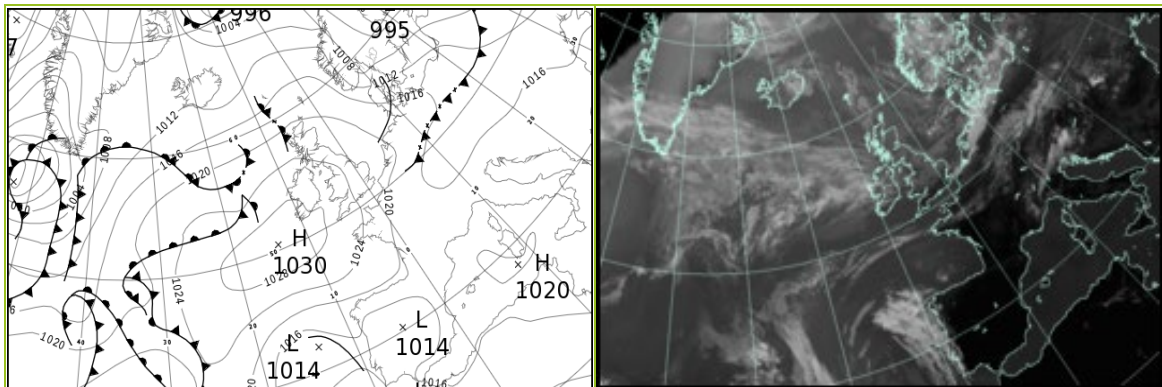

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 14 July 2022

Daily Weather Summary for Thursday 14 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 15 July 2022

This day's summary created 22/07/2022 03:03

Summary of the UK Weather for Friday 15 July 2022

A high pressure system sat over the southwest of the UK overnight. A large area of cloud and rain, brought in by an occluded front, moved across the majority of Scotland through the early hours, also bringing scattered showers to Northern Ireland and the north of England towards dawn. Further south it was a benign night with patchy cloud and clear spells. It was cooler than previous nights across the country. The band of cloud and rain continued to move eastwards over southern Scotland and parts of northern England through late morning. The rain significantly weakened by midday, to eventually completely clear Scotland in the early afternoon. Some showers continued in northeast England after midday. Elsewhere, it was a mostly dry afternoon with plenty of sunny spells, as cloud cover substantially reduced since the morning. Any remaining showers cleared northeast England in the early evening. Most parts stayed dry with clear periods towards the end of the day.

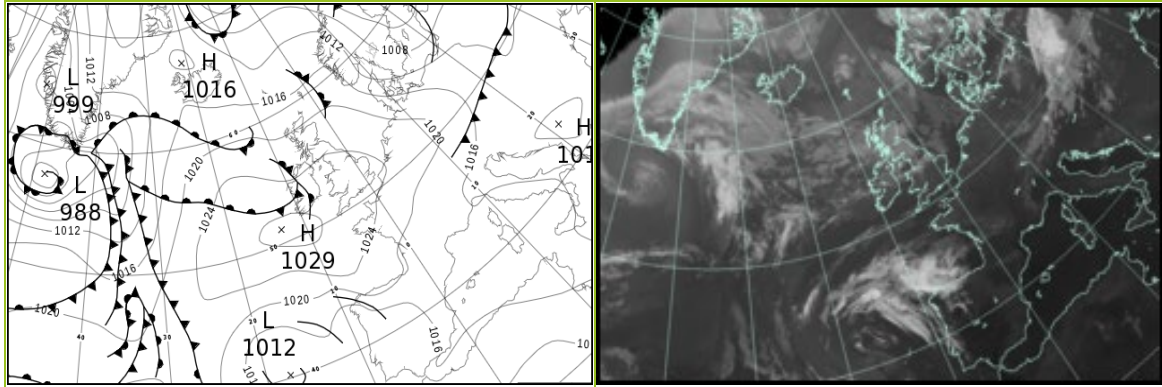

Daily Extremes

<i>Highest Maximum</i>	27.2°C Heathrow (Greater London, 25mAMSL)
<i>Lowest Maximum</i>	12.9°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	15.6°C Morecambe No 2 (Lancashire, 7mAMSL)
<i>Lowest Minimum</i>	5.0°C Llangunllo, Cefnysur (Powys (south), 310mAMSL)
<i>Lowest Grass Minimum</i>	1.3°C South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	6.2mm Blyth S Wks No 2 (Northumberland, 4mAMSL)
<i>Most Sunshine</i>	14.6hr Camborne (Cornwall, 87mAMSL)
<i>Highest Gust</i>	30Kt 35mph Leeming (North Yorkshire, 33mAMSL)
<i>Highest Gust (mountain)</i>	37Kt 43mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

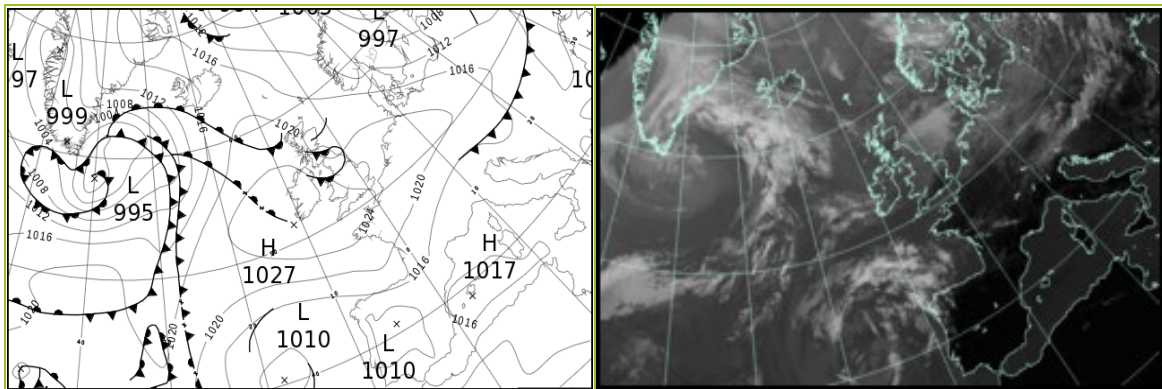

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 16 July 2022

This day's summary created 23/07/2022 03:03

Summary of the UK Weather for Saturday 16 July 2022

It was a fine and dry night for most, with high pressure building in response to an eastward moving ridge. Some light rain was reported in central Northern Ireland in the early hours, and a warm front to the northwest of the UK moving eastwards brought some low stratus and drizzle to the far north of Scotland shortly before dawn. Winds were light and variable in direction. Mist and shallow fog were reported in various parts of the country, including Northumberland, Glasgow and Aberporth. The morning was dry and bright for most as any remaining drizzle cleared the far northwest of Scotland by midday. Meanwhile, a band of rain arrived from the west over Northern Ireland and continued to advance inland through the afternoon, bringing heavy precipitation to most parts of this country. The band of rain continued to progress eastwards and eventually reached the southwest of Scotland in the early evening. Further north, some showers developed over northern Scotland in late afternoon and continued into the evening. Elsewhere, it was a fine and dry evening with clear periods.

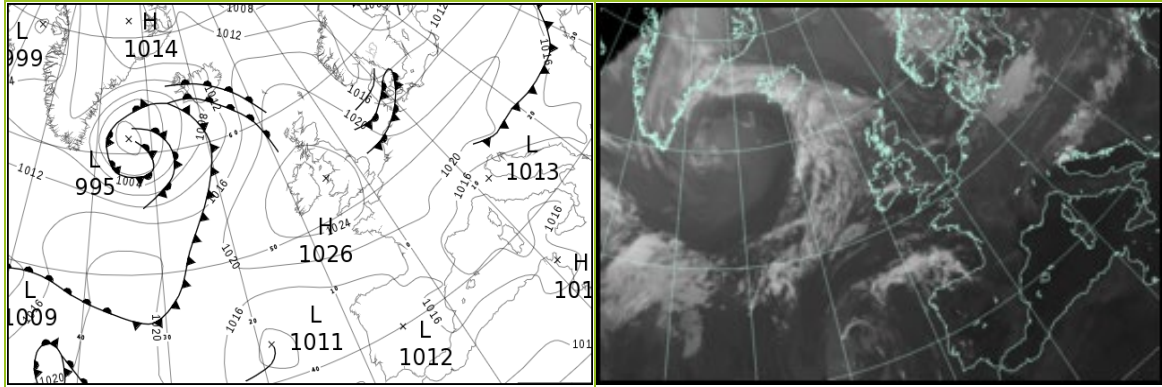

Daily Extremes

<i>Highest Maximum</i>	29.1°C Heathrow (Greater London, 25mAMSL) also Kew Gardens (Greater London, 6mAMSL)
<i>Lowest Maximum</i>	13.3°C Fair Isle (Shetland, 57mAMSL) also Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	15.5°C Isle Of Portland (Dorset, 52mAMSL)
<i>Lowest Minimum</i>	3.6°C Eskdalemuir (Dumfriesshire, 236mAMSL)
<i>Lowest Grass Minimum</i>	-0.3°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Most Rainfall</i>	9.6mm Calder Hall (Cumbria, 28mAMSL)
<i>Most Sunshine</i>	14.5hr Odiham (Hampshire, 118mAMSL)
<i>Highest Gust</i>	36Kt 41mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	39Kt 45mph Bealach Na Ba No 2 (Ross & Cromarty, 773mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

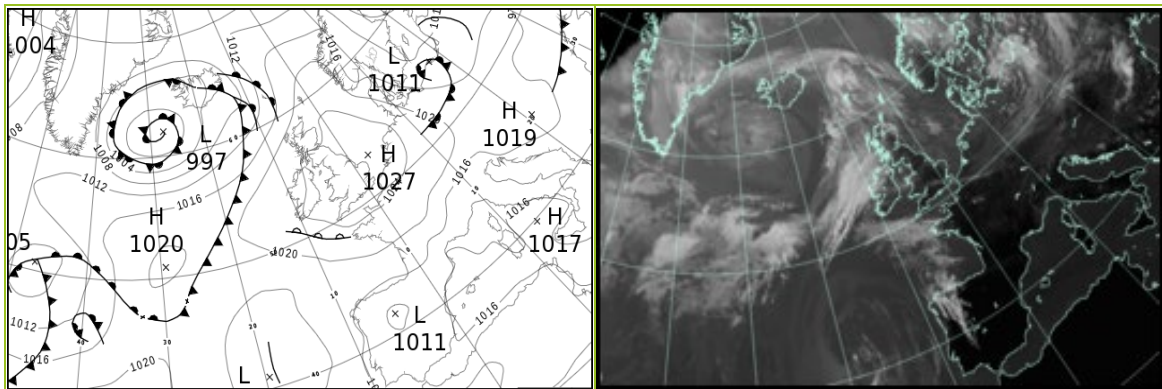

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 16 July 2022

Daily Weather Summary for Saturday 16 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 17 July 2022

This day's summary created 24/07/2022 03:04

Summary of the UK Weather for Sunday 17 July 2022

Low stratus and outbreaks of showery rain associated with a frontal wave moved across Scotland and northern England through the early hours. A trough edging northeastwards over Northern Ireland, Wales and northwestern Great Britain also brought some light rain to these areas. Elsewhere it was a dry and fairly benign start to the day, with the clearest spells in the south and east of the country. Winds were relatively light and southerly as high pressure became centred further east, but there was some lee gustiness through the night in the southwest. The trough continued to travel northeastwards over northern England and southern half of Scotland, reaching eastern coastline before midday. As a result, these areas remained cloudy and showery through the late morning. Further south, the conditions were fine and dry with a good deal of sunshine through the day. Any showers cleared almost completely after lunchtime, with some drizzle lingering to parts of eastern Scottish coast. A westward-moving band of rain approached the Western Isles of Scotland in the late afternoon, bringing light rain to parts of far north in the evening.

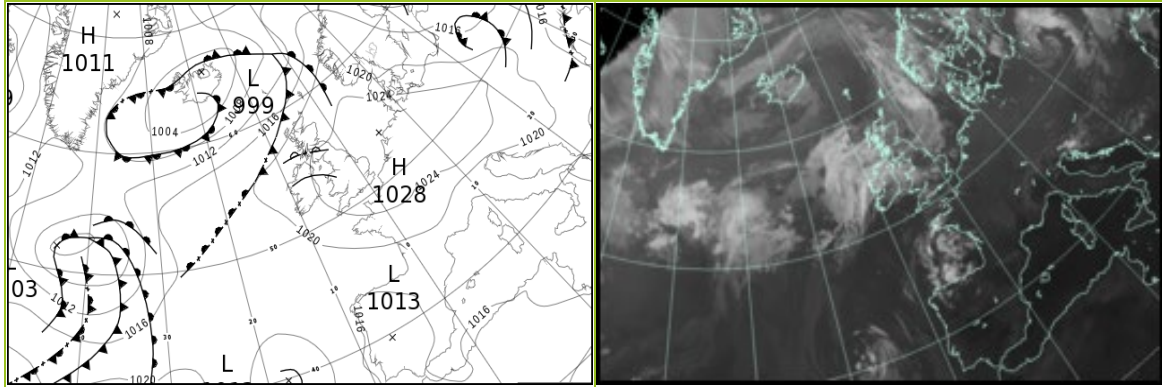

Daily Extremes

<i>Highest Maximum</i>	33.0°C Hawarden Airport (Clwyd, 11mAMSL)
<i>Lowest Maximum</i>	15.2°C Fair Isle (Shetland, 57mAMSL) also Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	17.8°C Milford Haven Conservancy Board (Dyfed, 44mAMSL)
<i>Lowest Minimum</i>	9.5°C Exeter Airport No 2 (Devon, 27mAMSL)
<i>Lowest Grass Minimum</i>	5.8°C Goudhurst (Kent, 85mAMSL)
<i>Most Rainfall</i>	0.6mm Herstmonceux, West End (East Sussex, 52mAMSL)
<i>Most Sunshine</i>	13.2hr Heathrow (Greater London, 25mAMSL)
<i>Highest Gust</i>	35Kt 40mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	41Kt 47mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

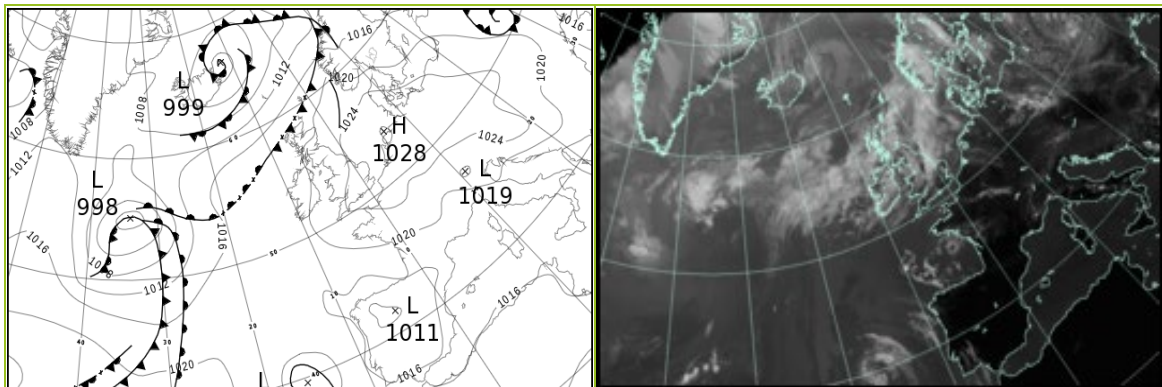

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 17 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 18 July 2022

This day's summary created 27/07/2022 13:46

Summary of the UK Weather for Monday 18 July 2022

Under the continued influence of higher pressure, it was a mild night for many. The early hours saw patchy rain across Scotland and northeast England associated with a frontal system. The southwest and far southeast also saw occasional patchy rain and overcast low cloud. Rain across the very far north and south of the country continued throughout the morning, whilst elsewhere continued to see cloudy and overcast conditions, with increasingly sunny spells throughout the morning. This cloud broke up throughout the day, making way for a brighter afternoon. Temperatures rose quickly through the morning, and some sparse showers broke out in northwest England around midday. It was an exceptionally warm day for most, with Wales having a new record high temperature of 37.1°C at Hawarden Airport, Flintshire, and 38.2°C at Pitsford, Northamptonshire. Into the evening it remained very mild, with just the occasional shower in some central and southern regions.

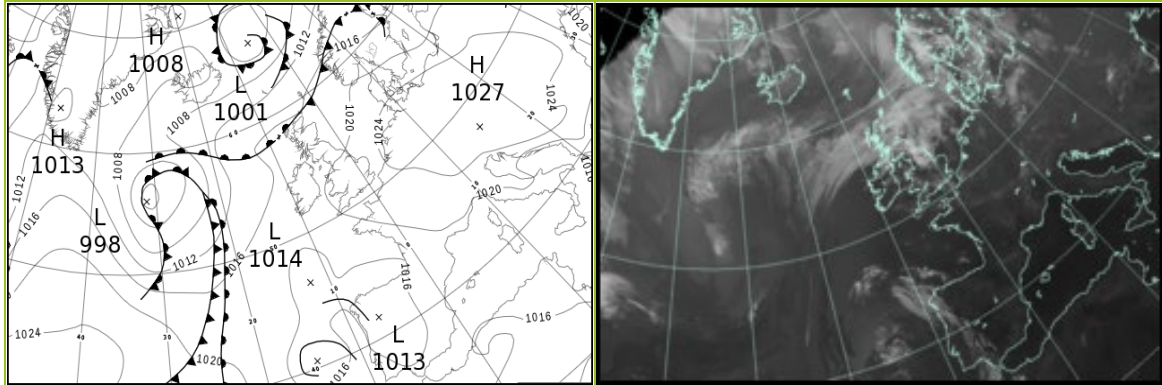

Daily Extremes

<i>Highest Maximum</i>	38.2°C Pitsford (Northamptonshire, 114mAMSL)
<i>Lowest Maximum</i>	15.4°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	20.4°C Emley Moor No 2 (West Yorkshire, 267mAMSL)
<i>Lowest Minimum</i>	8.6°C Lough Navar Forest (Fermanagh, 126mAMSL)
<i>Lowest Grass Minimum</i>	4.5°C Hartpury College (Gloucestershire, 41mAMSL)
<i>Most Rainfall</i>	7.4mm Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Most Sunshine</i>	13.6hr Shoeburyness, Landwick (Essex, 2mAMSL)
<i>Highest Gust</i>	29Kt 33mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	36Kt 41mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

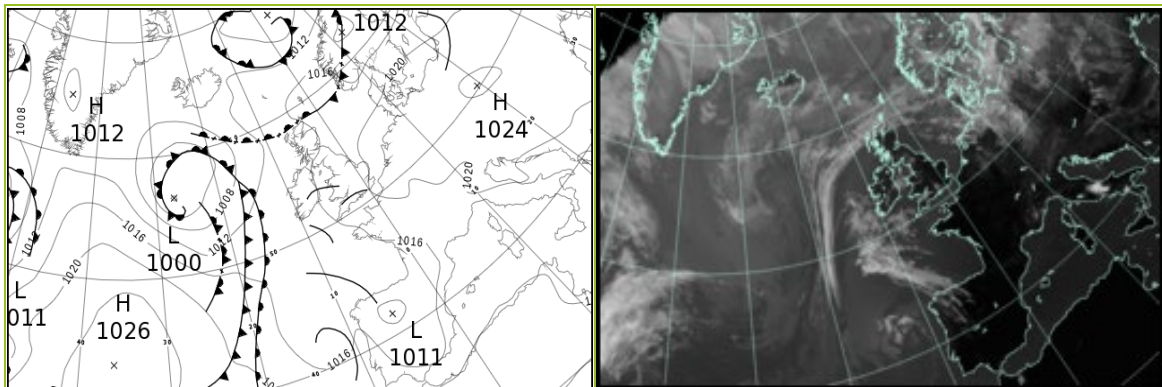

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 18 July 2022

Daily Weather Summary for Monday 18 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 19 July 2022

This day's summary created 24/08/2022 17:47

Summary of the UK Weather for Tuesday 19 July 2022

This was an unprecedented day making UK climate history with 40°C recorded in the UK for the first time as hot air associated with a heatwave across western Europe extended north to the UK. 40.3°C was recorded at Coningsby, Lincolnshire, setting a new record by a wide margin, while several other stations also exceeded 40°C. The previous UK record of 38.7°C was exceeded by stations across a wide area of England extending from Kent to North Yorkshire, Suffolk to the West Midlands. Several long-running stations with 100+ year records had their highest maximum temperature broken by margins of 3 to 4°C.

A series of fronts travelling eastwards across the UK brought scattered showers across parts of northern and western Scotland, north England, north Wales, and Northern Ireland in the early hours. Medium to high level cloud accompanied this across northern and western regions. The day started with a band of thundery rain approaching Cornwall from the southwest, which reached Devon by mid-morning before easing. It was a mostly dry morning elsewhere. By midday some thunderstorms had developed in Irish Sea and the far northeast of Scotland. A further band of frontal rain reached the northwest coast of Scotland in the afternoon. Most of the rain cleared by midnight leaving a fine and dry evening for many.

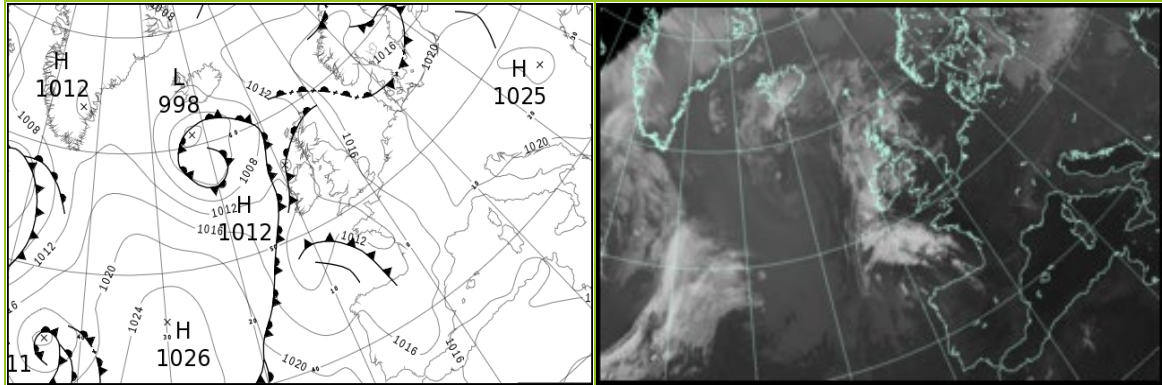

Daily Extremes

<i>Highest Maximum</i>	40.3°C Coningsby (Lincolnshire, 6mAMSL)
<i>Lowest Maximum</i>	15.9°C South Uist Range (Western Isles, 4mAMSL)
<i>Highest Minimum</i>	26.8°C Shirburn Model Farm (Oxfordshire, 108mAMSL)
<i>Lowest Minimum</i>	11.1°C Eskdalemuir (Dumfriesshire, 236mAMSL)
<i>Lowest Grass Minimum</i>	8.5°C Tyndrum No 3 (Perthshire (in Central Region), 168mAMSL)
<i>Most Rainfall</i>	10.0mm Lyth No 2 (Caithness, 24mAMSL)
<i>Most Sunshine</i>	13.8hr Weybourne (Norfolk, 21mAMSL) also Wattisham (Suffolk, 89mAMSL)
<i>Highest Gust</i>	40Kt 46mph Mumbles Head (West Glamorgan, 44mAMSL) also Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	37Kt 43mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

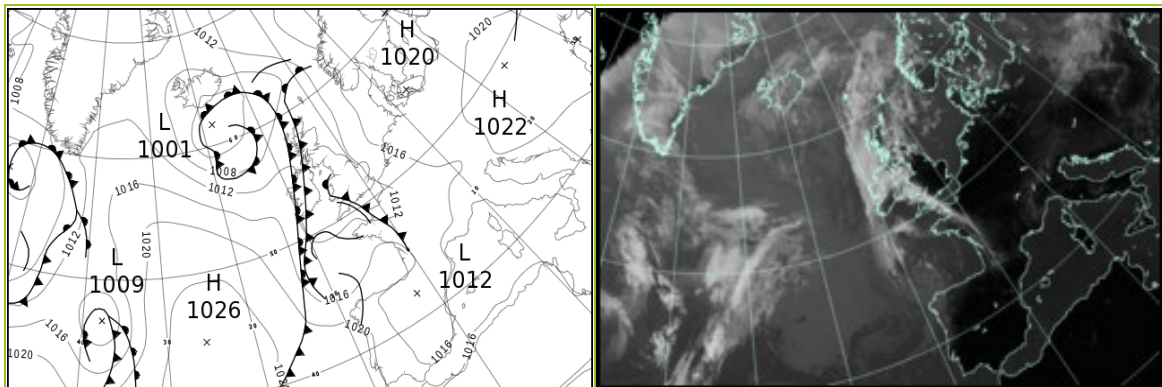

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 19 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 20 July 2022

This day's summary created 27/07/2022 03:03

Summary of the UK Weather for Wednesday 20 July 2022

A band of rain stretched along the east coast around midnight, but this dissipated within a few hours. Further heavy scattered showers spread along the England-Scotland border and northeastern parts of Scotland. A second band of rain spread over the southeast towards dawn. Most areas were overcast throughout the night, with patchy cloud across the West Midlands and Wales. Some areas saw patches of mist and fog towards dawn. A cold front pushed eastwards across Great Britain throughout the day, bringing cloud and showers to the west as it interacted with the daytime heat. Rain also lingered in the far southeast until the mid-morning. Elsewhere there was a good deal of dry weather with the north and east of the country seeing the best of the sunny spells. It was markedly cooler than Wednesday though still hot in many places. Showers continued through the evening but largely died out through the night, except for in the far east.

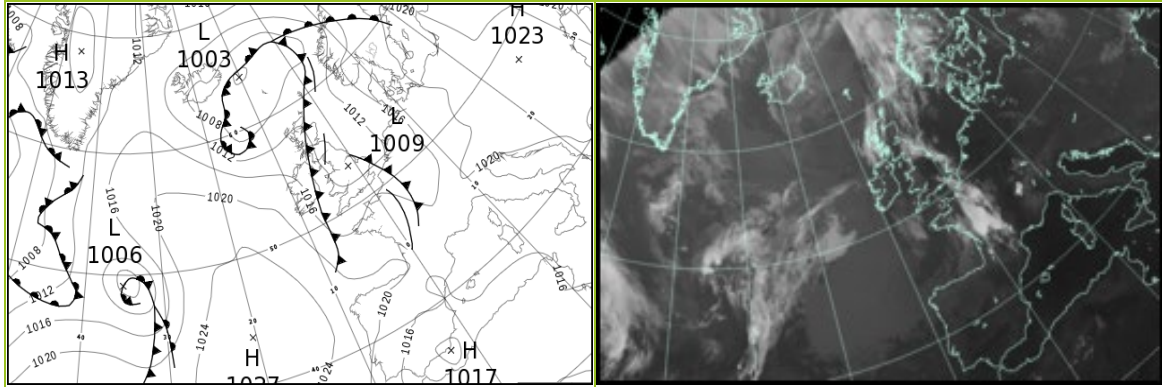

Daily Extremes

<i>Highest Maximum</i>	30.5°C Lingwood, Strumpshaw Hill (Norfolk, 33mAMSL)
<i>Lowest Maximum</i>	15.1°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	21.0°C Sheffield (South Yorkshire, 131mAMSL)
<i>Lowest Minimum</i>	9.8°C Islay: Port Ellen (Argyll (in Strathclyde Region), 17mAMSL)
<i>Lowest Grass Minimum</i>	7.2°C Dunrobin Castle Gardens (Sutherland, 6mAMSL)
<i>Most Rainfall</i>	16.0mm Cardington (Bedfordshire, 27mAMSL)
<i>Most Sunshine</i>	13.5hr Dundrennan (Kirkcudbrightshire, 113mAMSL)
<i>Highest Gust</i>	38Kt 44mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	24Kt 28mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

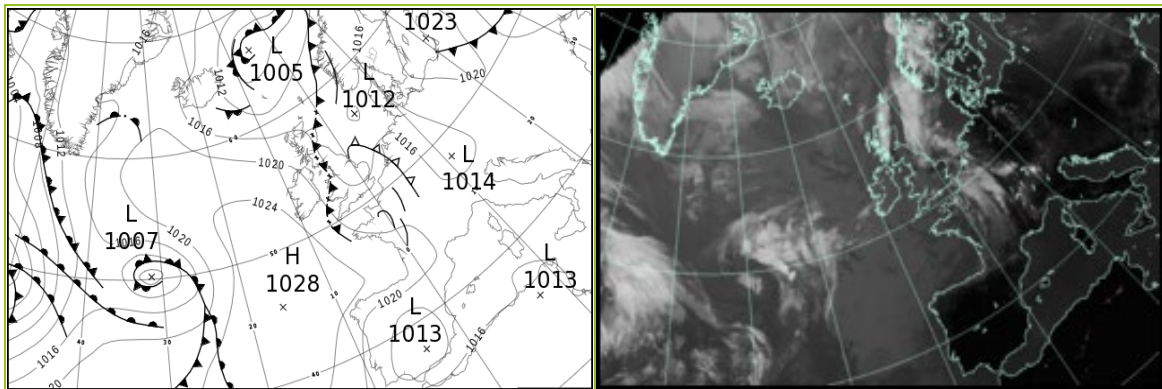

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 20 July 2022

Daily Weather Summary for Wednesday 20 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 21 July 2022

This day's summary created 28/07/2022 03:03

Summary of the UK Weather for Thursday 21 July 2022

It was a rather cloudy night across the UK, with most areas remaining dry. A weakening cold front moved eastwards bringing scattered showers across northern England, the southeast of England and the north of Scotland. Thunder and lightning struck Devon a few hours after midnight. Winds were light throughout the night. It was a cloudy but dry start for most, with just some light rain in northern England. This dissipated by midday. Some more light rain broke out in the southeast in the afternoon, but only briefly. Winds were generally light to moderate northerlies, the strongest of which were in coastal areas. Into the evening the weather stayed benign as most places stayed dry.

Daily Extremes

<i>Highest Maximum</i>	26.3°C Herstmonceux, West End (East Sussex, 52mAMSL)
<i>Lowest Maximum</i>	13.5°C Loch Glascarnoch (Ross & Cromarty, 269mAMSL)
<i>Highest Minimum</i>	18.9°C Cambridge, Botanic Garden (Cambridgeshire, 13mAMSL)
<i>Lowest Minimum</i>	5.1°C Swyddffynnon (Dyfed, 178mAMSL)
<i>Lowest Grass Minimum</i>	0.7°C Swyddffynnon (Dyfed, 178mAMSL)
<i>Most Rainfall</i>	11.0mm Cresswell P Sta No 2 (Staffordshire, 164mAMSL)
<i>Most Sunshine</i>	11.5hr Bude (Cornwall, 15mAMSL)
<i>Highest Gust</i>	27Kt 31mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	23Kt 26mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

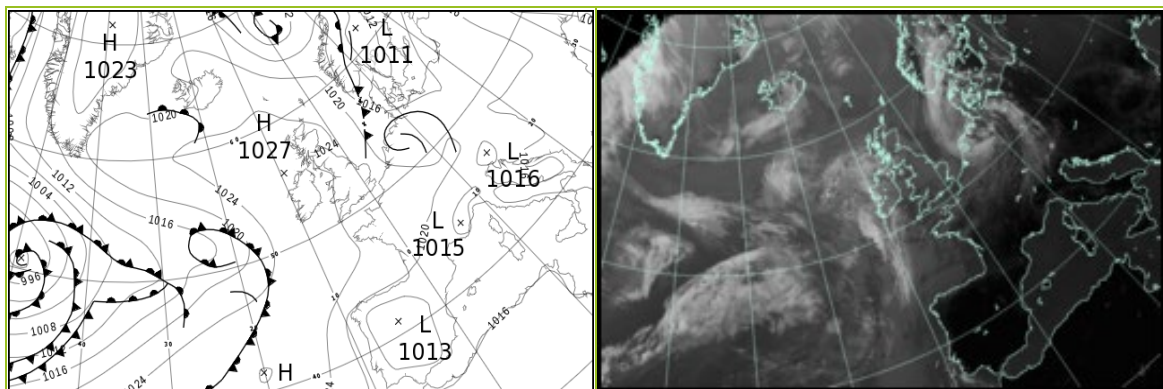

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 21 July 2022

Daily Weather Summary for Thursday 21 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 22 July 2022

This day's summary created 29/07/2022 03:05

Summary of the UK Weather for Friday 22 July 2022

It was another rather cloudy picture for the UK to start, with slack flow and any frontal remnants clearing through the night. Low pressure approaching from the southwest in the early hours destabilised the airmass over the UK, bringing some showery rain for northern and western England through the morning, with the focus over the Pennines. Spherics were reported in western Wales and the Irish Sea near dawn. The rain over Northern England intensified for a time before easing by midday. By this time showers had broken out in northern Somerset and Wales. There was also some heavy rain for a time over the coast of west Sussex, with thundery spells. Early afternoon brought heavy rain and thunderstorms to the southwest and Wales. Northern England and southern Scotland also had their fair share of rain, but not as heavy as elsewhere. Northern Ireland and Cornwall remained mainly dry. Into the evening it dried out in almost all areas, except for northeast England where some heavy showers persisted until midnight.

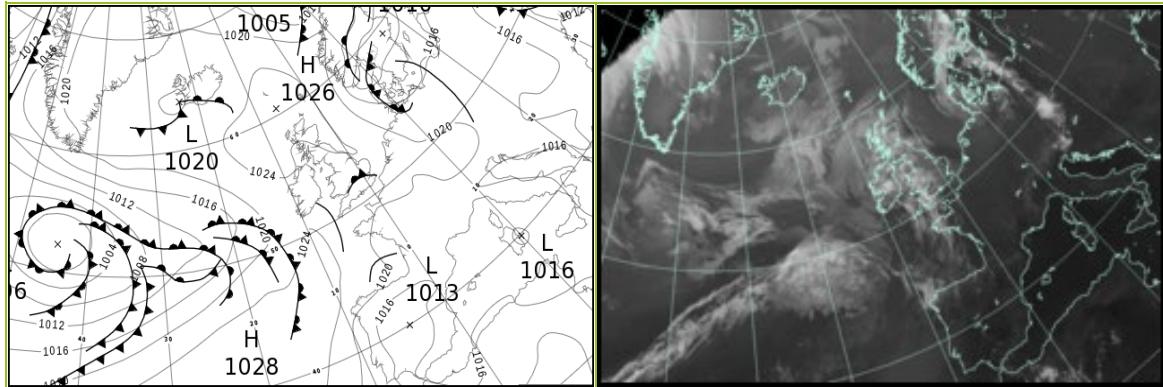

Daily Extremes

<i>Highest Maximum</i>	25.4°C Fontmell Magna (Dorset, 90mAMSL)
<i>Lowest Maximum</i>	12.6°C Lerwick (Shetland, 82mAMSL) also Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Minimum</i>	18.0°C Bognor Regis (West Sussex, 7mAMSL)
<i>Lowest Minimum</i>	6.9°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Lowest Grass Minimum</i>	2.9°C Kirkwall (Orkney, 26mAMSL)
<i>Most Rainfall</i>	23.8mm Bath, Claverton (Avon, 202mAMSL)
<i>Most Sunshine</i>	11.4hr Bude (Cornwall, 15mAMSL)
<i>Highest Gust</i>	25Kt 29mph Bedford (Bedfordshire, 85mAMSL) also Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Highest Gust (mountain)</i>	18Kt 21mph Bealach Na Ba No 2 (Ross & Cromarty, 773mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

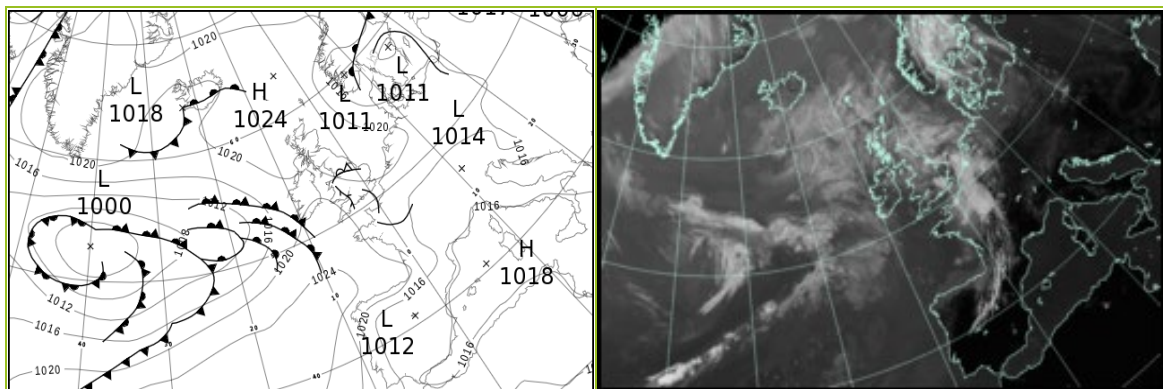

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 23 July 2022

This day's summary created 30/07/2022 03:03

Summary of the UK Weather for Saturday 23 July 2022

A series of fronts and troughs travelling northeastwards overnight brought unsettled conditions this morning, resulting in in the north of England, southern Scotland, and Northern Ireland seeing some early lingering showers. These spread further north and east through the morning, becoming more dynamic as they did so. While an occluded front pushed into Northern Ireland and brought cloud, breezy conditions, and modest rainfall totals here and into western Scotland. Mist and fog were reported in various parts of western England and Scotland. Further into the morning, another occlusion brought a more organised band of rain stretching from northwest Scotland down to south Wales, with the southwest seeing some light patchy rain. Although overcast, the southeast remained dry. As midday approached, rain associated with the occlusion became more broken, and continued travelling eastwards, reaching Newcastle upon Tyne. Cloud cover and patchy rain, locally heavy in places, persisted into the afternoon, spreading across the UK, and edging into the far southwest. Mist continued into the afternoon, particularly in the northwest. Temperatures remained above average for most, resulting in quite humid conditions for many. This continued into the evening, with most regions seeing precipitation, and the southeast remaining dry. Northern Ireland and southwest Scotland experienced heavy and thundery showers in the evening.

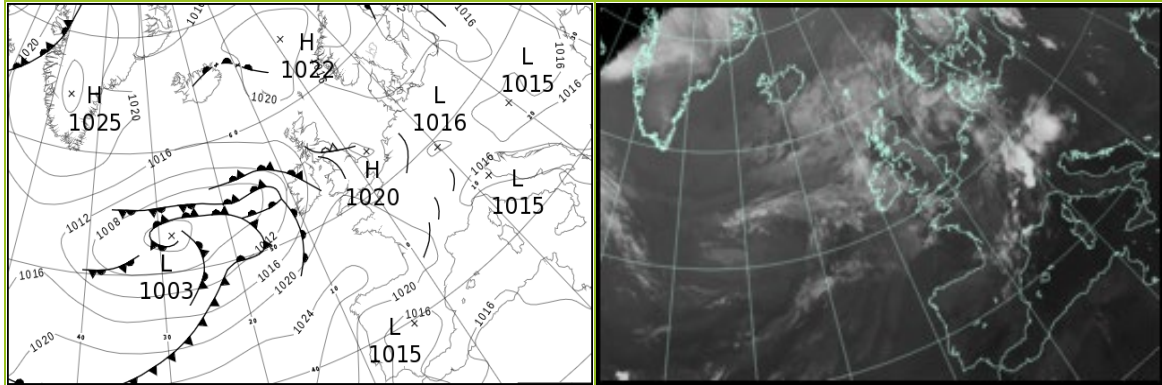

Daily Extremes

<i>Highest Maximum</i>	28.5°C Cavendish (Suffolk, 55mAMSL)
<i>Lowest Maximum</i>	13.7°C Lerwick (Shetland, 82mAMSL) also Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Minimum</i>	16.5°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	7.2°C Sennybridge No 2 (Powys (south), 307mAMSL)
<i>Lowest Grass Minimum</i>	3.2°C Holne, Priddons Farm No 2 (Devon, 280mAMSL)
<i>Most Rainfall</i>	70.6mm Magilligan No 2 (Londonderry, 6mAMSL)
<i>Most Sunshine</i>	13.1hr Hastings (East Sussex, 45mAMSL)
<i>Highest Gust</i>	49Kt 56mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	60Kt 69mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

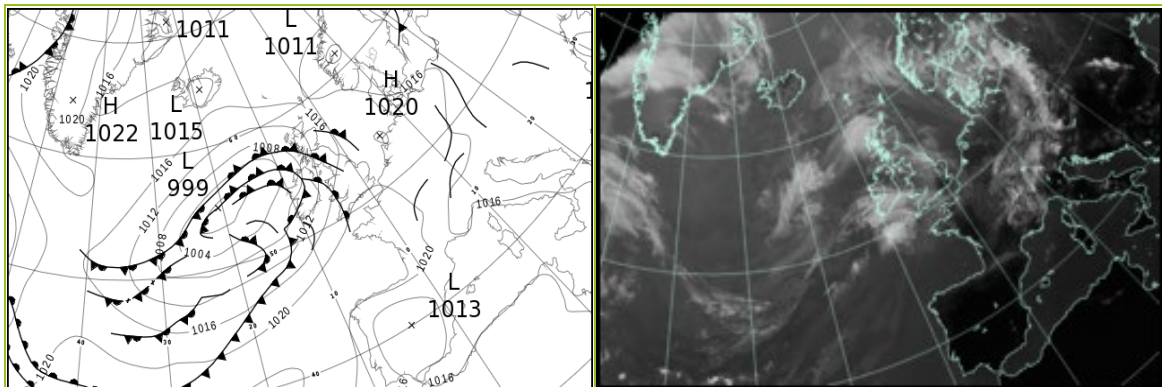

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 23 July 2022

Daily Weather Summary for Saturday 23 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 24 July 2022

This day's summary created 31/07/2022 03:03

Summary of the UK Weather for Sunday 24 July 2022

Heavy rain over much of Scotland cleared a few hours after midnight, but several fast moving frontal systems brought rain to much of the UK in the early hours. Only Northern Ireland and the far south remained dry. Winds were moderate southwesterlies, strongest in coastal regions, especially around north Wales. Over the course of the day, two fronts brought significant precipitation to the UK. A cold front brought a band of rain to southern Wales during the morning, which spread northeastwards through the afternoon. An occluded frontal system brought heavy rain to Northern Ireland and western areas of Scotland; the former of which also saw thunderstorms and lightning in the afternoon. The Highlands and Scottish isles experienced heavy showers throughout the day. In contrast, the southeast of England remained dry and after a cloudy start, experienced some sunshine in the afternoon. These conditions generally prevailed throughout the evening, although cloud began to build in the southeast and the thunderstorms also gradually moved northeast into Scotland. Winds remained moderate southwesterlies, with some strong gusts in places.

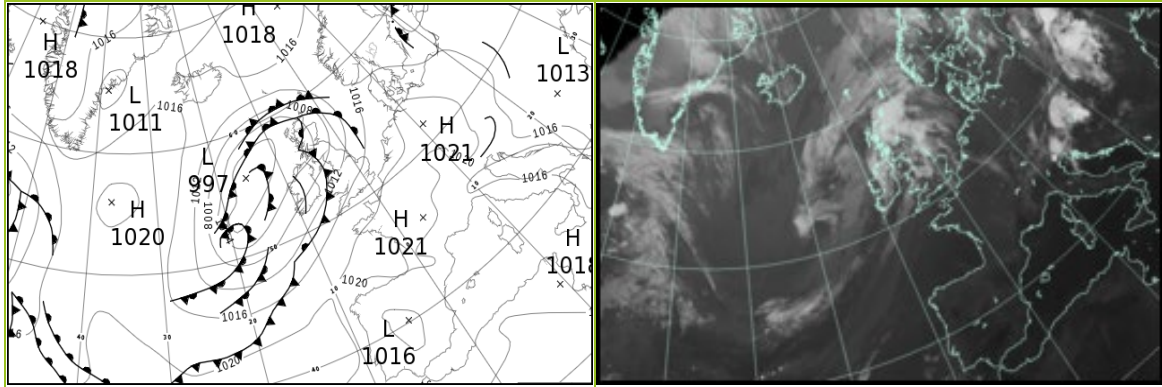

Daily Extremes

<i>Highest Maximum</i>	31.7°C Weybourne (Norfolk, 21mAMSL)
<i>Lowest Maximum</i>	13.3°C Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Minimum</i>	18.0°C Pershore College (Hereford & Worcester, 37mAMSL) also Thornes Park (West Yorkshire, 35mAMSL)
<i>Lowest Minimum</i>	9.9°C Lerwick (Shetland, 82mAMSL)
<i>Lowest Grass Minimum</i>	9.4°C Lerwick (Shetland, 82mAMSL)
<i>Most Rainfall</i>	39.2mm Abergorlech S Wks (Carmarthenshire, 119mAMSL)
<i>Most Sunshine</i>	11.1hr Hastings (East Sussex, 45mAMSL)
<i>Highest Gust</i>	49Kt 56mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	63Kt 72mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

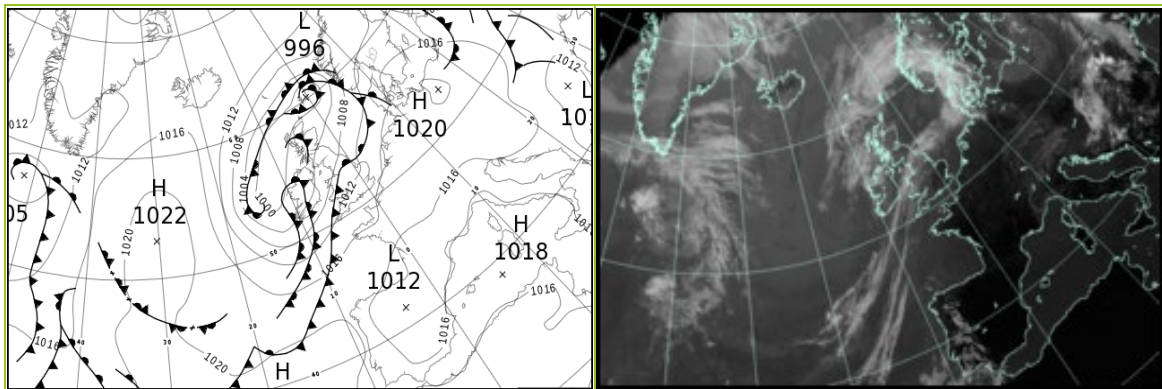

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 25 July 2022

This day's summary created 01/08/2022 03:03

Summary of the UK Weather for Monday 25 July 2022

A series of fronts travelling southeastwards brought bands of patchy light showers for many through the early hours, being locally heavier for some particularly in northern Scotland. Northern and western Scottish coastal areas also reported early mist. Cloud cover was variable across the UK, resulting in some bright spells amongst isolated showers throughout the morning. Winds were light to moderate but coastal regions experienced a keener breeze. It was a very messy picture across the UK today, with many cold and occluded fronts moving generally southeastwards. The largest band of rain moved south down the east coast of Scotland and the north of England, gradually getting heavier and thundery with some lightning through the day. Patchy cloud covered most other areas providing sunny spells and some scattered showers, which primarily appeared across most of Northern Ireland, Wales and most of England. Winds were still fairly strong in places, particularly around western coasts. It was still warm and humid in the southeast, but fresher under the rain further north.

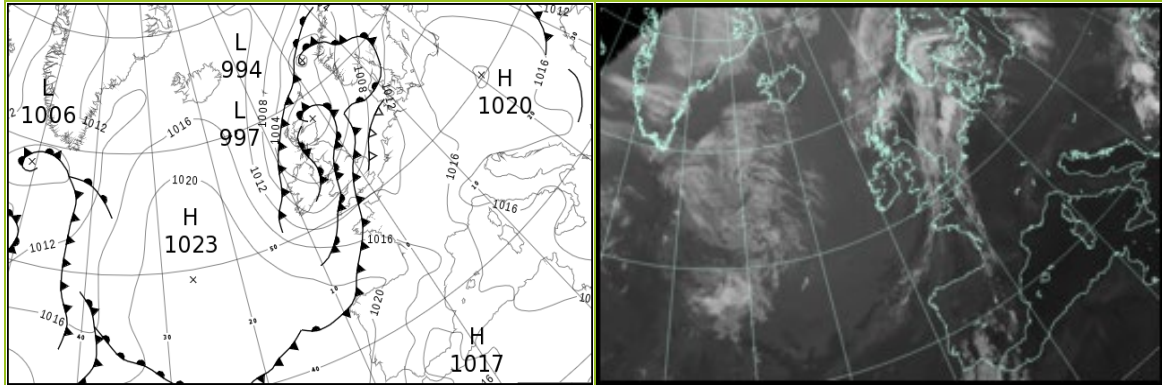

Daily Extremes

<i>Highest Maximum</i>	24.9°C Heathrow (Greater London, 25mAMSL) also Weybourne (Norfolk, 21mAMSL) also Cardington (Bedfordshire, 27mAMSL)
<i>Lowest Maximum</i>	11.8°C Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Minimum</i>	19.0°C Bognor Regis (West Sussex, 7mAMSL)
<i>Lowest Minimum</i>	10.6°C Lerwick (Shetland, 82mAMSL) also Baltasound No 2 (Shetland, 15mAMSL)
<i>Lowest Grass Minimum</i>	8.9°C Balmoral (Aberdeenshire, 283mAMSL)
<i>Most Rainfall</i>	20.0mm Bowhill (Selkirkshire, 168mAMSL)
<i>Most Sunshine</i>	6.1hr Hastings (East Sussex, 45mAMSL) also Bute: Rothesay No2 (Buteshire, 36mAMSL)
<i>Highest Gust</i>	42Kt 48mph Islay: Port Ellen (Argyll (in Strathclyde Region), 17mAMSL)
<i>Highest Gust (mountain)</i>	53Kt 61mph Bealach Na Ba No 2 (Ross & Cromarty, 773mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

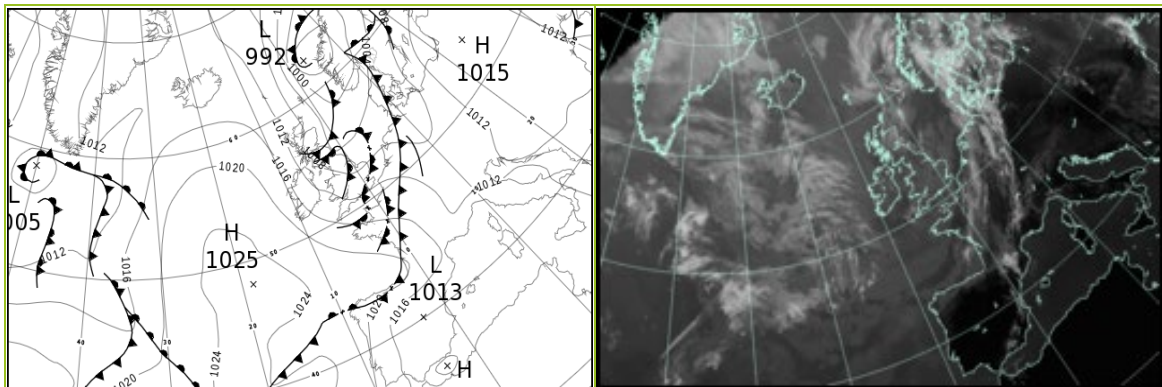

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 25 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 26 July 2022

This day's summary created 02/08/2022 03:03

Summary of the UK Weather for Tuesday 26 July 2022

After the passing of a cold front in the early hours, northern and western regions of the UK saw significant cloud cover. Northwestern England and northern Scotland also saw light patchy rain, this being locally heavier across Merseyside. This weather travelled southeastwards behind the cold front, reaching the northeast by dawn. Early mist was reported along parts of the southeast coast. It was a rather cloudy start to the day for most, with sunny spells developing into late morning. Scattered showers continued in parts of northeast Scotland, northern England, and Northern Ireland through the morning. They began to gradually weaken around midday, leaving only traces of precipitation by late afternoon. Some showers emerged over southeast England shortly after midday, reaching East Anglia by the late afternoon. The southwest saw the best of sunshine through the afternoon. Any showers became isolated by the end of the day, leaving a dry evening with variable cloud and clear spells for most areas.

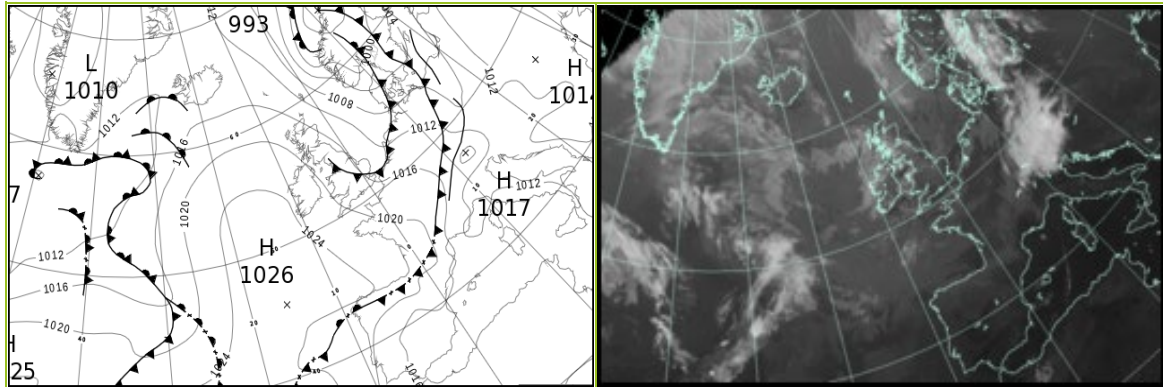

Daily Extremes

<i>Highest Maximum</i>	24.2°C Preston, Cove House (Dorset, 44mAMSL)
<i>Lowest Maximum</i>	11.9°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	15.6°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	5.8°C Sennybridge No 2 (Powys (south), 307mAMSL)
<i>Lowest Grass Minimum</i>	1.9°C Fettercairn, Glensaugh No 2 (Kincardineshire, 171mAMSL)
<i>Most Rainfall</i>	20.6mm Kiln Wood Resr (Kent, 88mAMSL)
<i>Most Sunshine</i>	12.8hr Camborne (Cornwall, 87mAMSL)
<i>Highest Gust</i>	30Kt 35mph Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Gust (mountain)</i>	40Kt 46mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

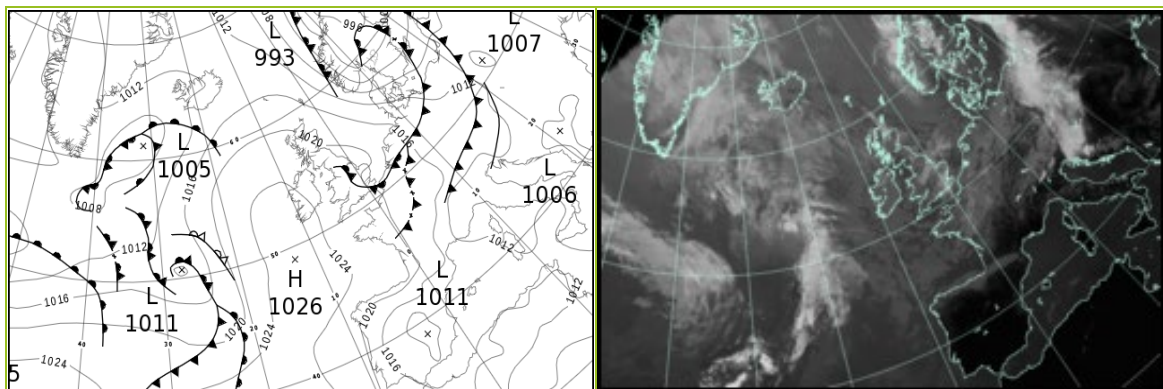

mAMSL refers to station elevation in metres above mean sea level

This day's summary created 03/08/2022 03:03

Summary of the UK Weather for Wednesday 27 July 2022

It was a calm night for most with variable amounts of cloud and clear spells. It was dry across most of the country, with the only areas seeing any noticeable precipitation being parts of Lincolnshire and Northern Ireland, while the odd shower also passed over northern areas of Scotland and the far southeast. Lightning briefly struck in Wales and some areas of central England reported fog around dawn. The morning was dry and clear for many with only some isolated showers seen in northern Scotland and southeast England. As a thickening cloud moved southwestwards towards England and Wales, some light showers developed over Somerset and Gloucester in the afternoon, spreading to Midlands and central Wales into the evening. Meanwhile, a band of frontal rain approached Northern Ireland from the southwest. Showers continued over parts of Wales and central England towards the end of the day. Elsewhere, it was a dry evening with clear intervals.

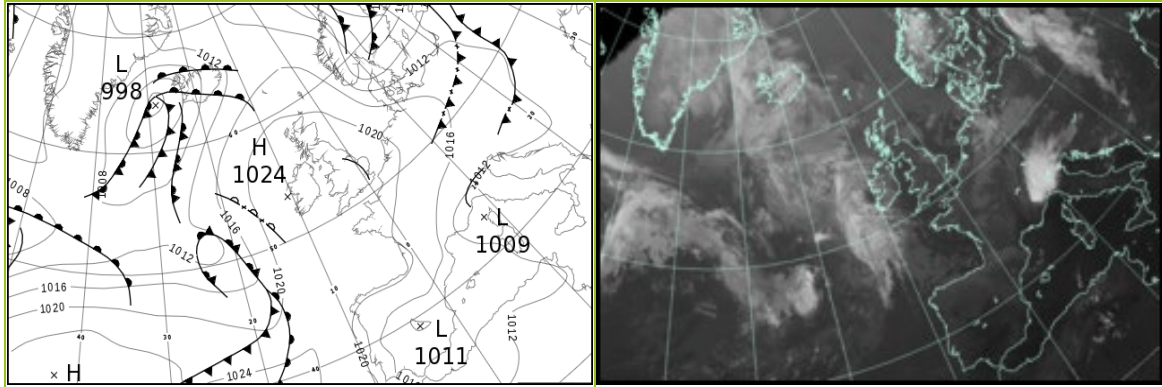

Daily Extremes

<i>Highest Maximum</i>	24.7°C Pitsford (Northamptonshire, 114mAMSL)
<i>Lowest Maximum</i>	14.6°C Wick Airport (Caithness, 36mAMSL)
<i>Highest Minimum</i>	15.6°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Minimum</i>	2.3°C Tyndrum No 3 (Perthshire (in Central Region), 168mAMSL)
<i>Lowest Grass Minimum</i>	-1.1°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Most Rainfall</i>	8.4mm Maulds Meaburn (Cumbria, 183mAMSL)
<i>Most Sunshine</i>	11.3hr Baintown (Fife, 123mAMSL)
<i>Highest Gust</i>	24Kt 28mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL) also Donna Nook No 2 (Lincolnshire, 8mAMSL)
<i>Highest Gust (mountain)</i>	22Kt 25mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

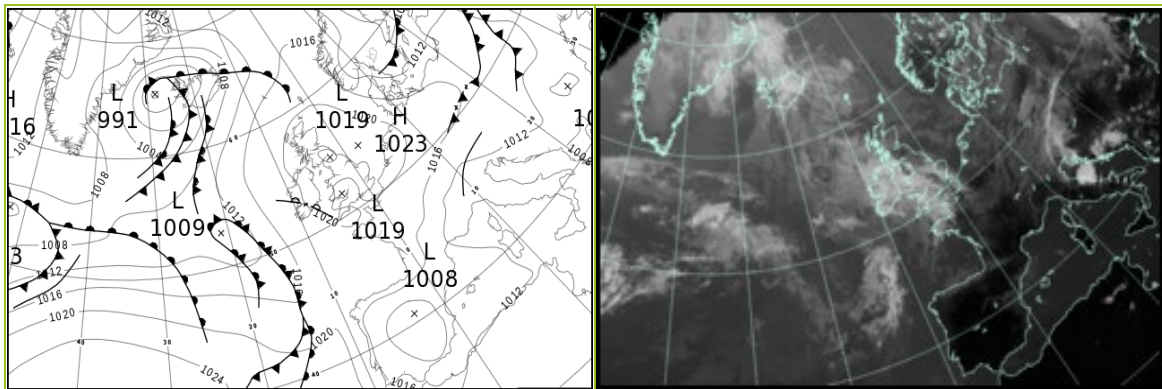

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 27 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 28 July 2022

This day's summary created 04/08/2022 03:03

Summary of the UK Weather for Thursday 28 July 2022

A trough passed over the north of England overnight, bringing a wide band of rain to this area. Scattered showers also hit Northern Ireland, the Western Isles of Scotland and north parts of Wales. Over the latter area, these became thundery at times, also producing lightning. Elsewhere it was dry, and although the night started with clear intervals, cloud built over most of the country towards dawn. Winds were light. The trough continued to push northwards throughout the day, becoming more convective and thus giving more showery rain to northern England, eastern Northern Ireland, and southern Scotland, where it was particularly heavy. Parts of Wales and the West Country also saw showers due to upper level forcing, but these were mostly light. Elsewhere there was a lot of fine weather, with temperatures creeping up under southerly flow. Showers in the north continued overnight, with heavier bursts and spherics around the Isle of Man. There was a mix of stratus and clear spells elsewhere with gentle winds.

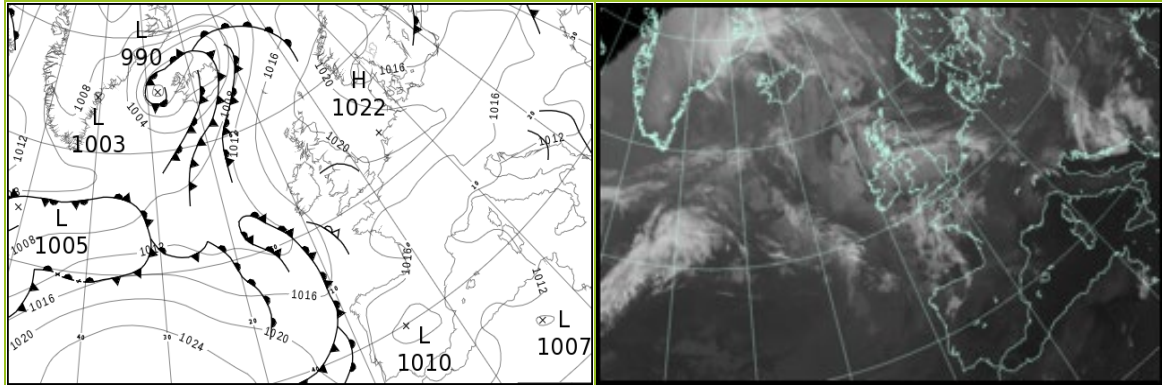

Daily Extremes

<i>Highest Maximum</i>	26.5°C Charlwood (Surrey, 67mAMSL) also Wiggonholt (West Sussex, 28mAMSL)
<i>Lowest Maximum</i>	14.8°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	17.1°C Wight: Shanklin (Isle Of Wight, 55mAMSL)
<i>Lowest Minimum</i>	4.9°C Braemar No 2 (Aberdeenshire, 327mAMSL)
<i>Lowest Grass Minimum</i>	1.7°C Whitechurch (Dyfed, 129mAMSL)
<i>Most Rainfall</i>	18.3mm Far Gearstones (North Yorkshire, 314mAMSL)
<i>Most Sunshine</i>	13.9hr Tiree (Argyll (in Strathclyde Region), 9mAMSL)
<i>Highest Gust</i>	28Kt 32mph Wainfleet No 2 (Lincolnshire, 3mAMSL)
<i>Highest Gust (mountain)</i>	28Kt 32mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

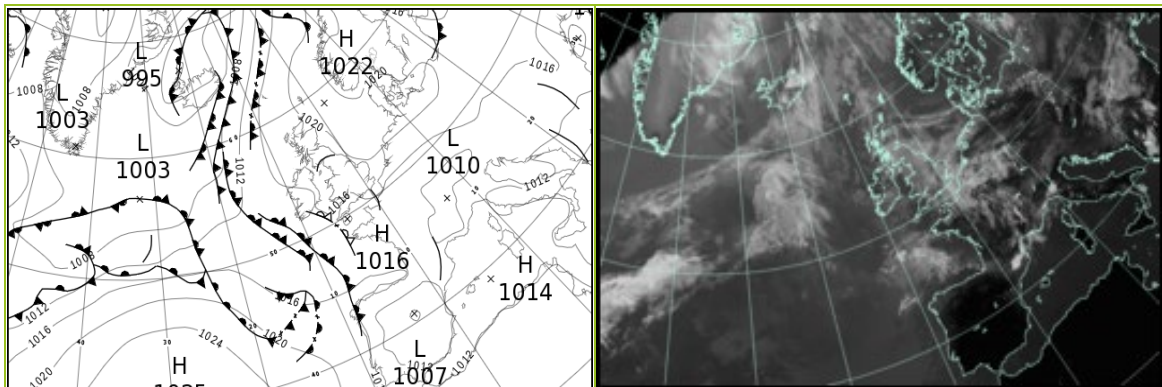

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 28 July 2022

Daily Weather Summary for Thursday 28 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 29 July 2022

This day's summary created 05/08/2022 03:03

Summary of the UK Weather for Friday 29 July 2022

A band of showery rain associated with an eastward-moving trough affected northern England, northern Wales, and southeast Scotland in the small hours. The precipitation intensified as the trough travelled further inwards, bringing heavy showers to parts of northeast England by the early morning. It was a dry start under medium level cloud in the south east, and low cloud elsewhere. Some lightning strikes were reported along the south coast of Wales. The day began with rain for northern England, which slowly eased to nothing by midday. It was a dry morning for the rest of the UK, with the best of any sunny spells in the south and east. By the afternoon more cloud encroached from the west, with the odd patch of rain breaking out in northern England, Scotland and Northern Ireland. An occlusion moved in from the West, bringing some more organized rainfall, reaching Northern Ireland by late afternoon and western Scotland by the early evening. This continued its eastward progress, reaching more central areas by midnight. The south, however remained dry.

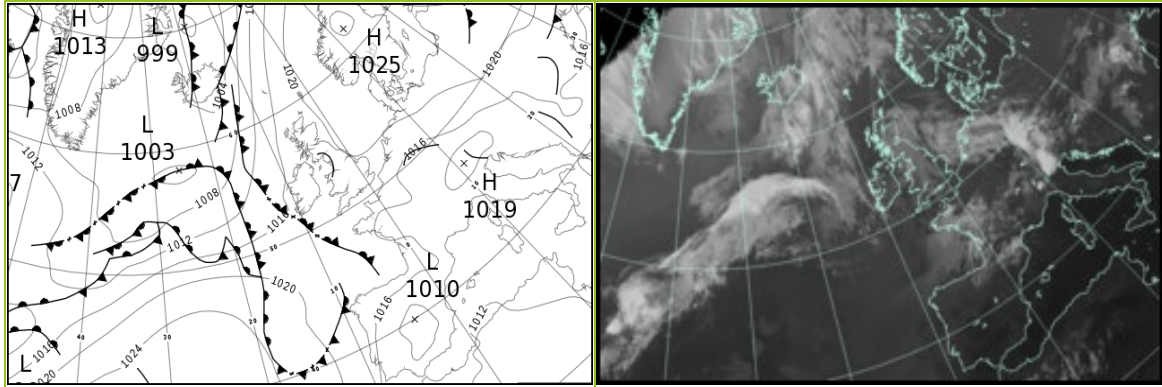

Daily Extremes

<i>Highest Maximum</i>	28.4°C Heathrow (Greater London, 25mAMSL)
<i>Lowest Maximum</i>	15.8°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	16.1°C Cromer (Norfolk, 37mAMSL)
<i>Lowest Minimum</i>	4.2°C Katesbridge (Down, 91mAMSL)
<i>Lowest Grass Minimum</i>	2.2°C Katesbridge (Down, 91mAMSL)
<i>Most Rainfall</i>	19.4mm Albemarle (Northumberland, 142mAMSL)
<i>Most Sunshine</i>	13.3hr Lyth No 2 (Caithness, 24mAMSL)
<i>Highest Gust</i>	30Kt 35mph Inverbervie No 2 (Kincardineshire, 134mAMSL) also South Uist Range (Western Isles, 4mAMSL)
<i>Highest Gust (mountain)</i>	46Kt 53mph Bealach Na Ba No 2 (Ross & Cromarty, 773mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

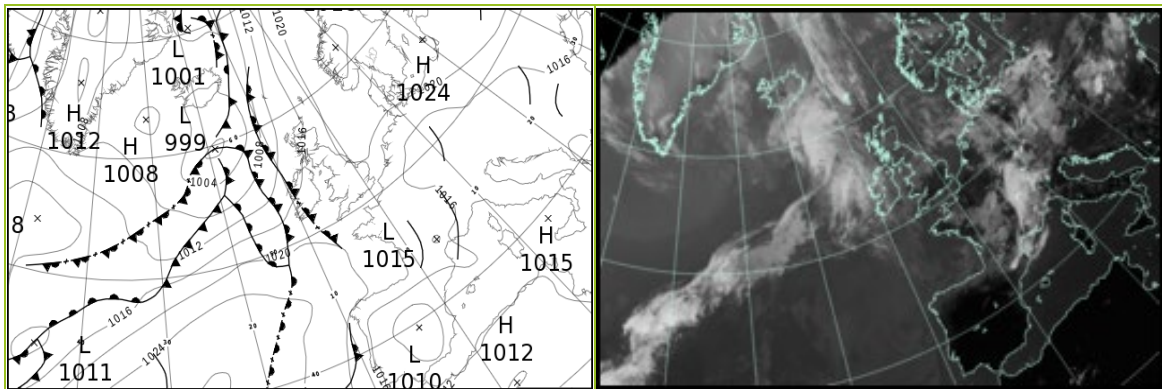

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 30 July 2022

This day's summary created 06/08/2022 03:03

Summary of the UK Weather for Saturday 30 July 2022

An occluded front continued to push eastwards over the UK through the early hours and into the morning, followed by another frontal wave. These frontal systems brought rainfall for eastern Northern Ireland and the northern half of Great Britain, with particularly heavy bursts for western and southern Scotland after dawn. With the fronts also came freshening southwesterlies, the strongest of which were felt across the western coast of Scotland. Elsewhere, more cloud with milder air edged further south and eastwards, and some mist was reported in Kent, Sussex, Dorset and Cornwall. The frontal rain continued to move eastwards through the morning, clearing the east coast by mid-morning. By this time however, another occlusion moved into Wales and northern England, bringing more rainfall. Scotland had a mainly dry and sunny morning, whilst there was widespread cloud for the south of the UK. Although the rain continued for northern England in the afternoon, it was less widespread. There were also breaks in the cloud along the south coast of England and in the southwest, with sunny spells continuing in Scotland, especially the north. The rain returned in the evening for Northern Ireland, north Wales and the north of England.

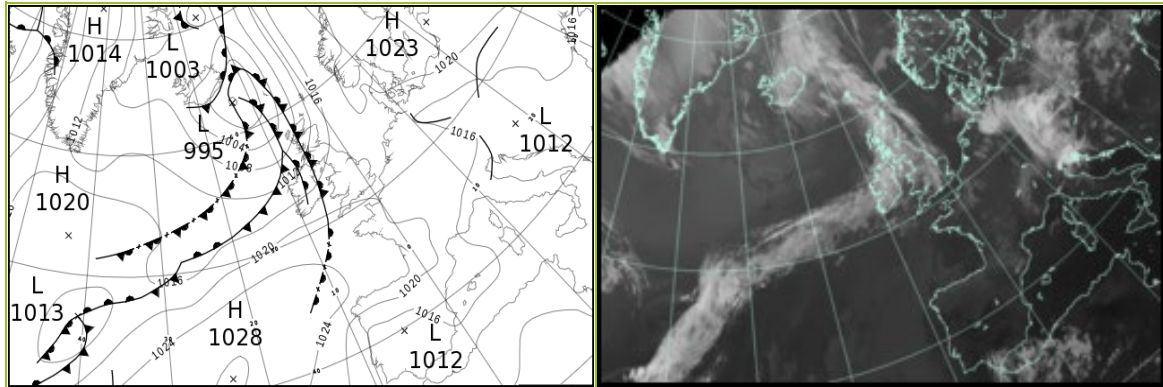

Daily Extremes

<i>Highest Maximum</i>	28.2°C Lingwood, Strumpshaw Hill (Norfolk, 33mAMSL)
<i>Lowest Maximum</i>	12.5°C Strathy East (Sutherland, 68mAMSL)
<i>Highest Minimum</i>	17.2°C Colwyn Bay (Clwyd, 36mAMSL)
<i>Lowest Minimum</i>	10.1°C Exeter Airport No 2 (Devon, 27mAMSL)
<i>Lowest Grass Minimum</i>	6.4°C Goudhurst (Kent, 85mAMSL) also Wisley (Surrey, 38mAMSL)
<i>Most Rainfall</i>	50.6mm Dinas Resr (Dyfed, 258mAMSL)
<i>Most Sunshine</i>	10.0hr Baintown (Fife, 123mAMSL)
<i>Highest Gust</i>	32Kt 37mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	57Kt 66mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

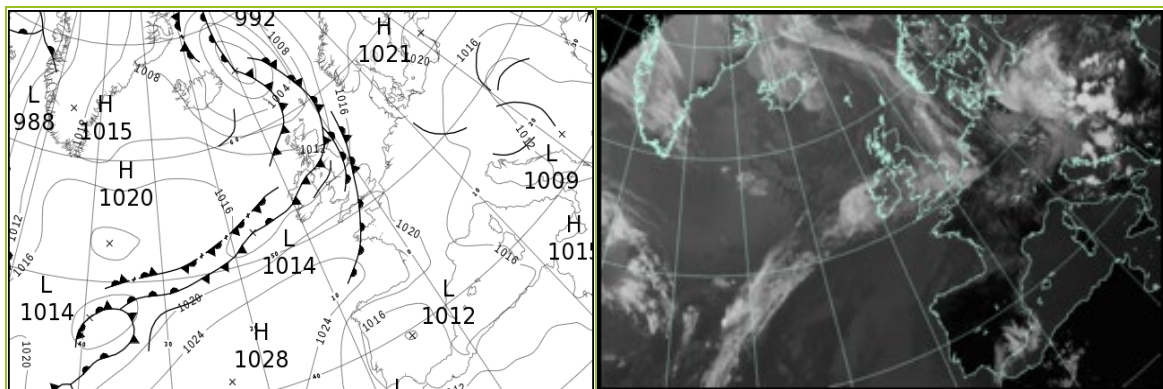

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 30 July 2022

Daily Weather Summary for Saturday 30 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 31 July 2022

This day's summary created 07/08/2022 03:03

Summary of the UK Weather for Sunday 31 July 2022

A series of Atlantic frontal zones brought rain that was largely warm advection driven to many places through the morning, including southeastern Northern Ireland, Wales, and central and northern England. It was mostly dry for Scotland and southeastern England, though there was still quite a lot of cloud cover here, as well as some mist and fog. There was a slight squeeze in winds in the Bristol channel through the early hours, but otherwise winds were light and variable in direction. A low pressure system moved over the UK during the day, bringing several fronts across the country. These brought bands of rain to much of the north of England, the Midlands and Wales in the later part of the morning. As these bands moved southeastwards they fragmented, and became scattered showers by the afternoon, when they hit East Anglia and the south of England. It was still particularly warm and humid in these regions. In contrast, the northwest of Scotland and Northern Ireland saw the best of the sunshine, with patchy cloud covering most of the country by the late afternoon. By the evening, much of the precipitation had faded, leaving many areas dry with clear spells.

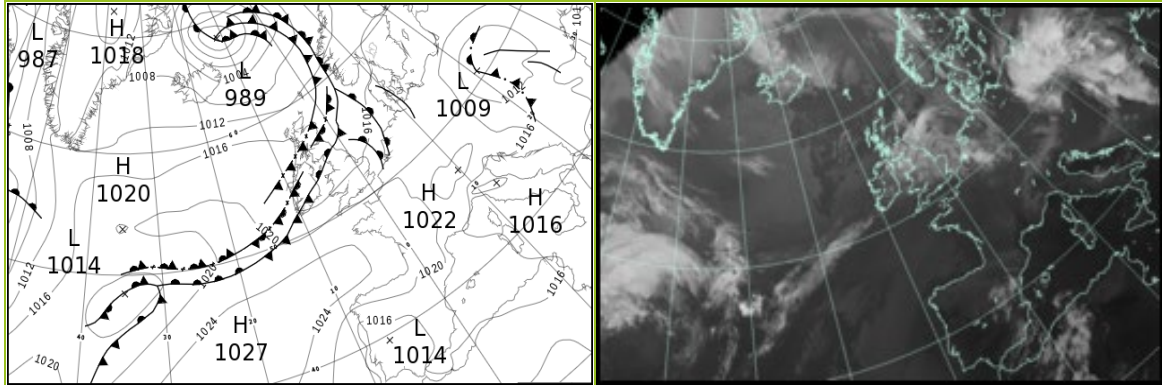

Daily Extremes

<i>Highest Maximum</i>	27.6°C Heathrow (Greater London, 25mAMSL)
<i>Lowest Maximum</i>	14.3°C Strathy East (Sutherland, 68mAMSL)
<i>Highest Minimum</i>	19.9°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Minimum</i>	3.7°C Kinbrace, Hatchery (Sutherland, 103mAMSL)
<i>Lowest Grass Minimum</i>	0.3°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Most Rainfall</i>	14.2mm Fawkham P Sta (Kent, 51mAMSL)
<i>Most Sunshine</i>	12.4hr Orkney: Loch Of Hundland (Orkney, 28mAMSL)
<i>Highest Gust</i>	40Kt 46mph Wight: Needles Old Battery (Isle Of Wight, 80mAMSL)
<i>Highest Gust (mountain)</i>	20Kt 23mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

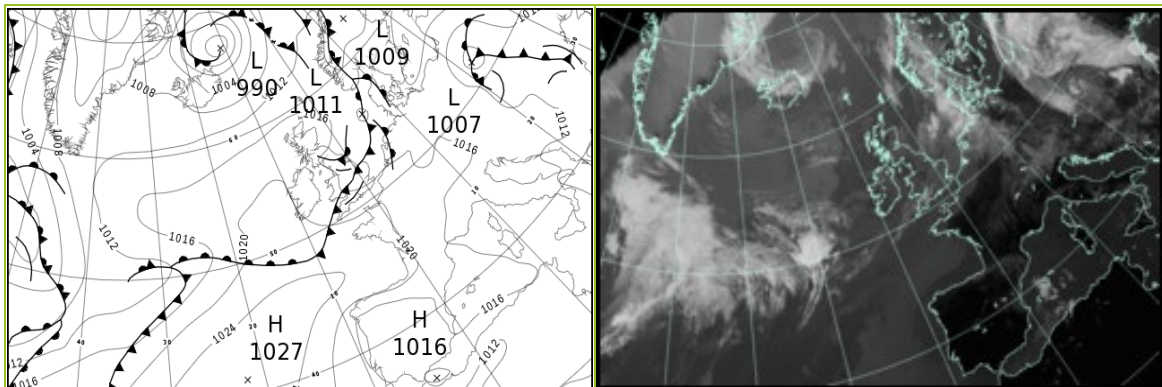

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 31 July 2022

North Atlantic and Europe analysis charts and satellite images at 0000 UTC

North Atlantic and Europe analysis charts and satellite images at 1200 UTC

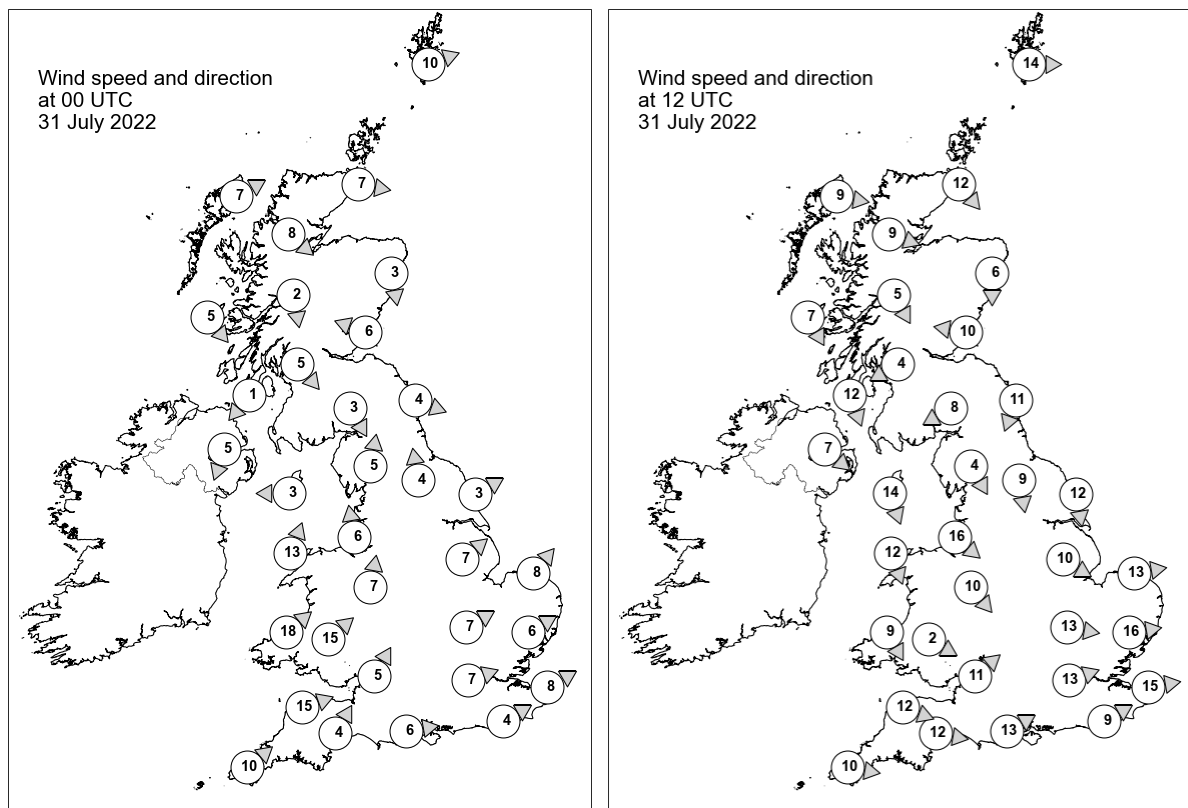

All satellite imagery copyright Met Office and EUMETSAT (European Organisation for the Exploitation of Meteorological Satellites). These show infra-red images from the geostationary MSG satellite. The rainfall rates are derived from both rain-radar and satellite data.

Daily Weather Summary for Sunday 31 July 2022

Daily Weather Summary for Sunday 31 July 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Guidance Notes

UTC = Universal Coordinated Time. For the UK UTC is the same as GMT (Greenwich Mean Time).

National boundaries shown on the European station map are for illustrative purposes only.

Daily extremes

- Daily extremes have been manually confirmed by Met Office Observations Quality Management as valid observations from the live database at the time of checking. However, more extreme values may still be possible if they occur after the time of production.
- Mountain stations above 500 masl are excluded from lowest temperatures, highest gust speeds and greatest snow depths at 0900 UTC. This is because they are not considered representative of low level areas.
- Counties quoted against each station are based on historical county boundaries pre-1974 and may not reflect current administrative boundaries.

Analysis charts and satellite imagery

- The satellite imagery is infra-red imagery from the geostationary MSG satellite.
- The rainfall image is derived from satellite data from MSG and rain-radar data. This represents a snapshot of instantaneous rain-rates at 0000 UTC and 1200 UTC and so does not necessarily reflect daily accumulations in the rainfall station map.
- Any analysis charts or satellite images which are unavailable will be displayed as white space.

Station maps

- The UK maps show station data for the same set of stations presented UK data table. These stations are selected to provide good spatial coverage across the UK; they represent only a fraction of the overall UK observing network.
- Wind speed maps show wind speed in Kt and direction both averaged over the hour up to the time of observation. 1 Kt = 1.151 mph.

Hourly station data

- The data tables provide spot hourly observations from synoptic messages at 0000 and 1200 UTC. Missing data are denoted by '-'.

- Pressures are mean sea level pressure in hPa.
- For UK stations, Gibraltar and Jersey, the wind speeds and directions are both averaged over the hour up to the time of observation. However, for European stations wind speeds and directions are both averaged over a 10-minute period up to the time of observation.
- Wind speeds are in Kt. Wind directions are stored in the database every 10 degrees and have been converted to the nearest point of the compass. These give the direction the wind is blowing from, not to.
- Cloud amounts are in Oktas from 0 (clear) to 8 (overcast). 9 indicates sky obscured (eg by fog).
- Air temperature and dew point temperature are in Celsius.

Temperature maps

- Daily maximum, minimum and grass minimum temperatures are in Celsius.
- The period for the daily maximum temperature on day D is defined from 0900 UTC day D to 0900 UTC day D+1.
- The period for the daily minimum and grass minimum temperatures on day D is defined as 0900 UTC day D-1 to 0900 UTC day D.
- On any given day D the minimum will typically occur in the early hours of the morning and the maximum in early afternoon.

Rainfall, sunshine and max gust speed maps

- Daily rainfall is in mm from 0900 UTC day D to 0900 UTC day D+1.
- Daily sunshine is in hours from Kipp and Zonen CSD1 automatic sunshine records. Bright sunshine is defined as exceeding 120 W/m².
- Max gust speeds are the daily max gust in Kt from 0000-0000 UTC

Snow maps

- The day of snow falling map displays data from present weather sensors, showing stations which have recorded sleet or snow falling at any point in the day (0000-0000 UTC).
- The snow lying map shows level snow depth as recorded by the automatic snow depth sensors at 0900 UTC. These snow depth sensors do not record snow depth if this is less than 1cm.
- Snow depth sensors are normally operational from October to April, in the event of snow falling outside this period data availability may be limited.
- Snow maps will only be displayed if one or more of the selected stations on that date have recorded either snow falling or non-zero snow depths. If snow maps are not

displayed it is still possible that other stations in the network have recorded a day of sleet or snow falling or non-zero snow depth.
