Eastbourne :- Sunshine yesterday 9.0 hours.

WEATHER CHARTS

FOR Saturday, 1st JUNE, 1895.

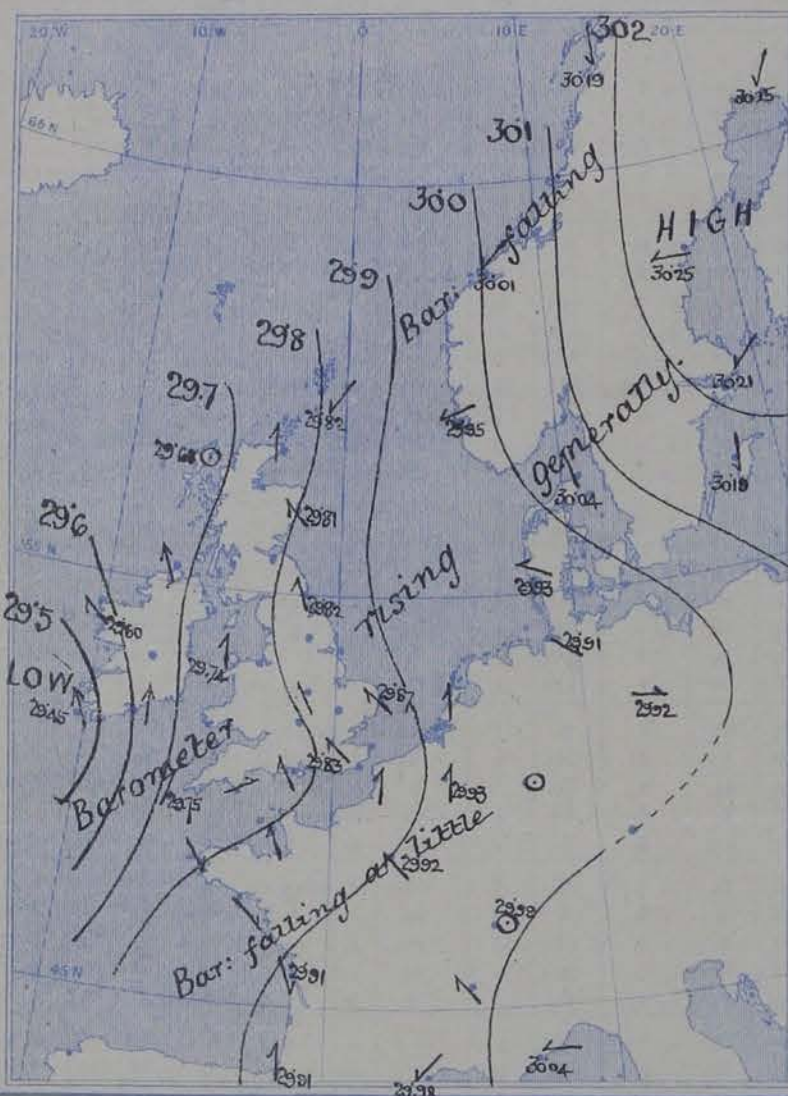

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 →→→ ; Force 5 to 7 →→→ ; Force 8 to 10 →→→ ; Force 1 to 4 →→→ ; Calm ☉

SEA—Rough ≡≡≡ ; High ≡≡≡

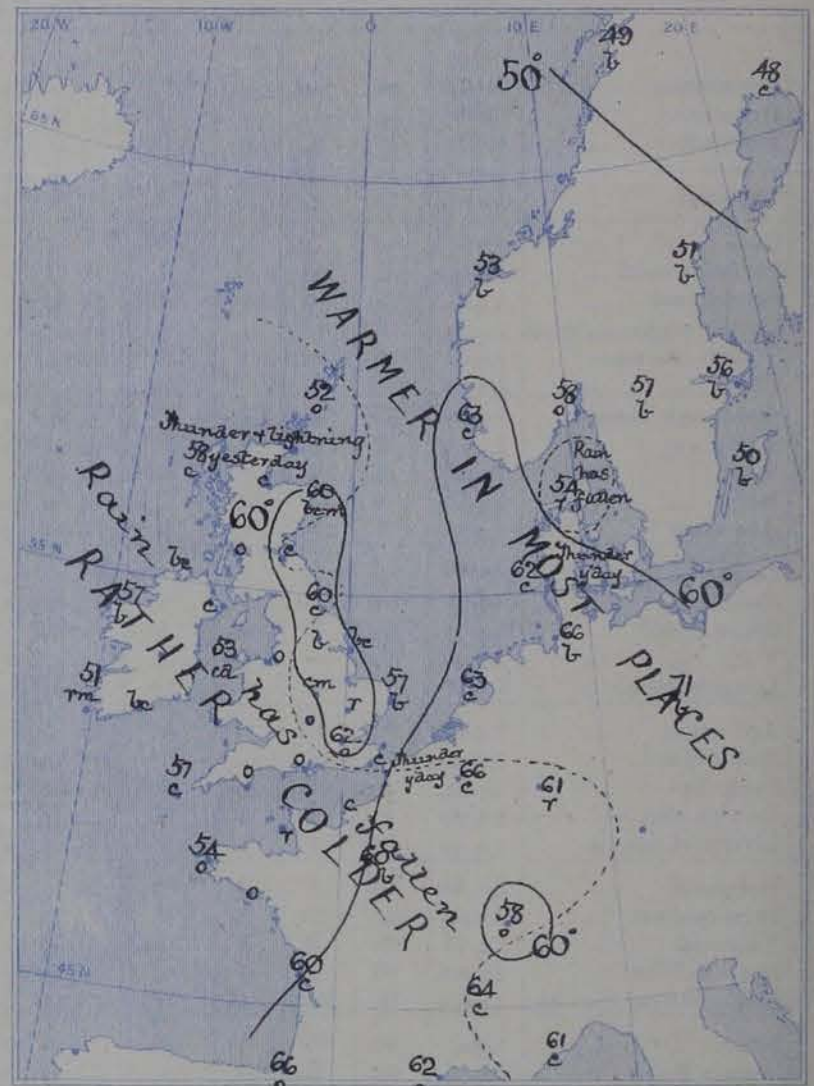

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.2 m: and upwards, in Sweden; 30.1 m: and upwards, in the south of Portugal.

Lavent, 29.5 m: and lve, in a depression lying off the southwest of Ireland.

Gradient slight. Barometer rising generally, but falling a little in France and also in the west of Norway.

TEMPERATURE

Highest, 71° at Berlin, 66° at Cuthaven, Brussels and Bessitz, 64° at Lyons and 63° at Skudermass and the Helder.

The highest maxima registered over our Islands yesterday were 73° in London and at Cambridge, and 72° at Kew, York, ^{and Newark B.} Loughborough.

The highest maxima registered over our Island yesterday were 73° in London and at Cambridge, and 72° at Kew. ^{and Buxton B.} York, Loughborough

WIND

SE³ over the greater part of our Islands, but SW⁵ in the southwest of England, fresh in force at the Irish stations.

NW' in the east of France, but variable in the south of that country.

E^2 at most of the Scandinavian and Danish stations, but W^3 in North Germany.

A strong gale from the S^W was experienced last evening at the mouth of the Channel.

WEATHER

Fine in Ireland and the eastern parts of Great Britain, as well as at most of the Scandinavian stations. Cloudy or overcast elsewhere, with rain in a few isolated places.

Rain fell yesterday in France, the west and southcoast of our Islands, and the north of Scotland, the largest amounts being 0.8 inch at Valencia (Ireland) and 0.6 in. at Carrontown. Thunderstorms or thunder only occurred in the north of Scotland, and a severe hailstorm was experienced at Malvern.

being 0.8 inch at Valencia (Ireland) and 0.6 in. at Carrontown. Thunderstorms or thunder only occurred in the north of Scotland, and a severe hailstorm was experienced at Malvern.

SEA

Moderate to smooth.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

A small secondary depression which has appeared over the southwest of England seems likely to move northwards, and to occasion thundershowers in many parts of Great Britain.

FORECASTS

For the 24 hours ending at NOON on 2nd JUNE, 1895

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning, cloudy, over Ireland and England, with showers in one or two places. Fine over Scotland and the greater part of the Continent, but cloudy in France, with rain at Paris and Le Mans. Sky clearing later over the eastern and central part of England, but rain falling at several of our western and extreme northern stations; heavily in the south of Ireland and at Jersey. Thunderstorms or thunder only experienced in the north of Scotland, and a severe hailstorm at Malvern.

Temperature risen over the northern part of our Islands, as well as over the northern, eastern, and central parts of the Continent, but fallen elsewhere. Morning readings highest (1) 72° at L'Isle, 71° at Tunis, and 69° at Trieste and Algiers; (2) 70° at Munster and 68° at the Hilder; above 60° at several of our own central stations, and just reaching that point in the west of Scotland. Lowest 41° at Kuopio, 45° at Röö, 46° at Kuopio, and 47° at Haparanda and Archangel. Rising during day to 70° and upwards over the central parts of Great Britain, and reaching 73° in London and at Cambridge. Exceeding 75° over Germany, and the southern part of France, and reaching 88° at Berlin.

Wind S³ over our Islands and France, light in force at the eastern stations, but fresh or strong in the west. SE³ in Germany, E³ on the eastern shores of the North Sea. Moderate from the N² over Sweden and Finland; light from the W² over the central and southern parts of Russia. Variable in Italy and Algeria. W¹ over the greater part of the Spanish Peninsula. Strong gale from the S² springing up in evening at the mouth of the Channel. No important change occurring elsewhere.

Barometer highest 30.2 in: and upwards, in an anticyclone over southeastern Europe, 30.1 in: and upwards, in another system over the north-west of Norway. Lowest 29.4 in: and less, in a depression lying off the coast of Ireland; 29.7 in: and less, in another disturbance over Central Ireland. Brief fall of barometer taking place later on our southwest coasts, and a secondary disturbance advancing from southward.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.
N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " £1 10 0 "

NOTE: The Sunshine for London given in this Table is now recorded on the tower of the Wesleyan Training College, Westminster.

WEATHER CHARTS

FOR SUNDAY, 2ND JUNE, 1895.

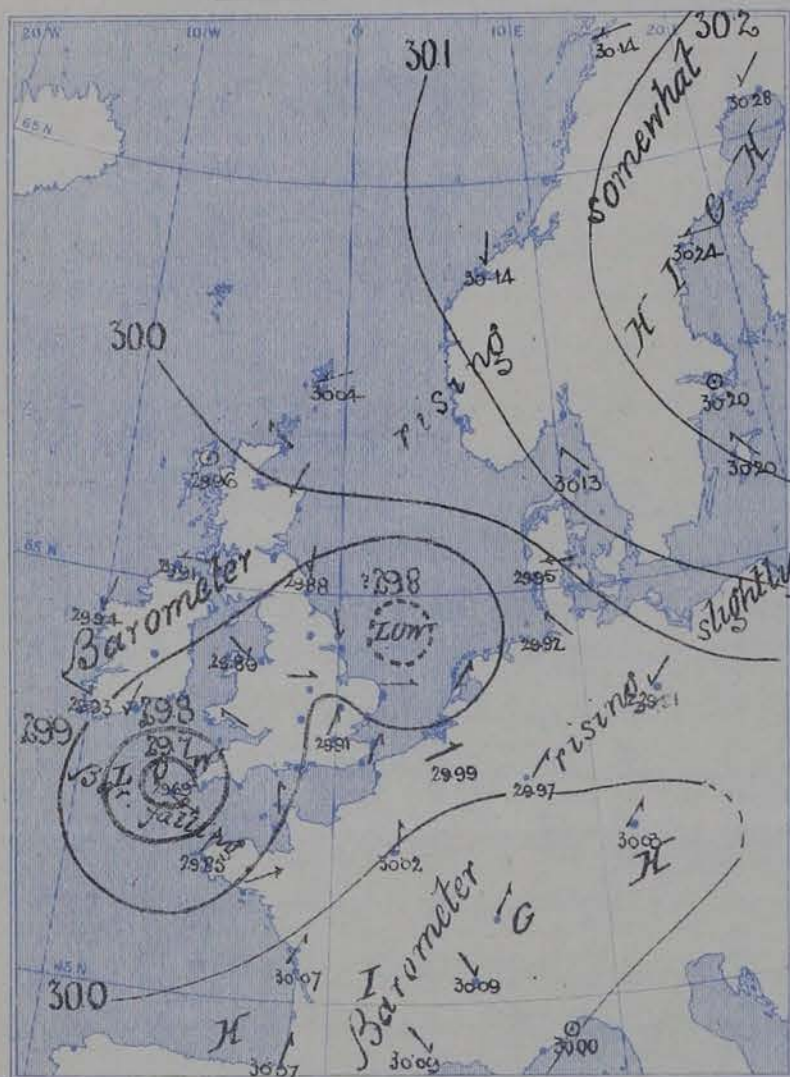

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 → : Force 5 to 7 → : Calm ○
Force 8 to 10 → : Force 1 to 4 → :

SEA—Rough ≡ : High ≡

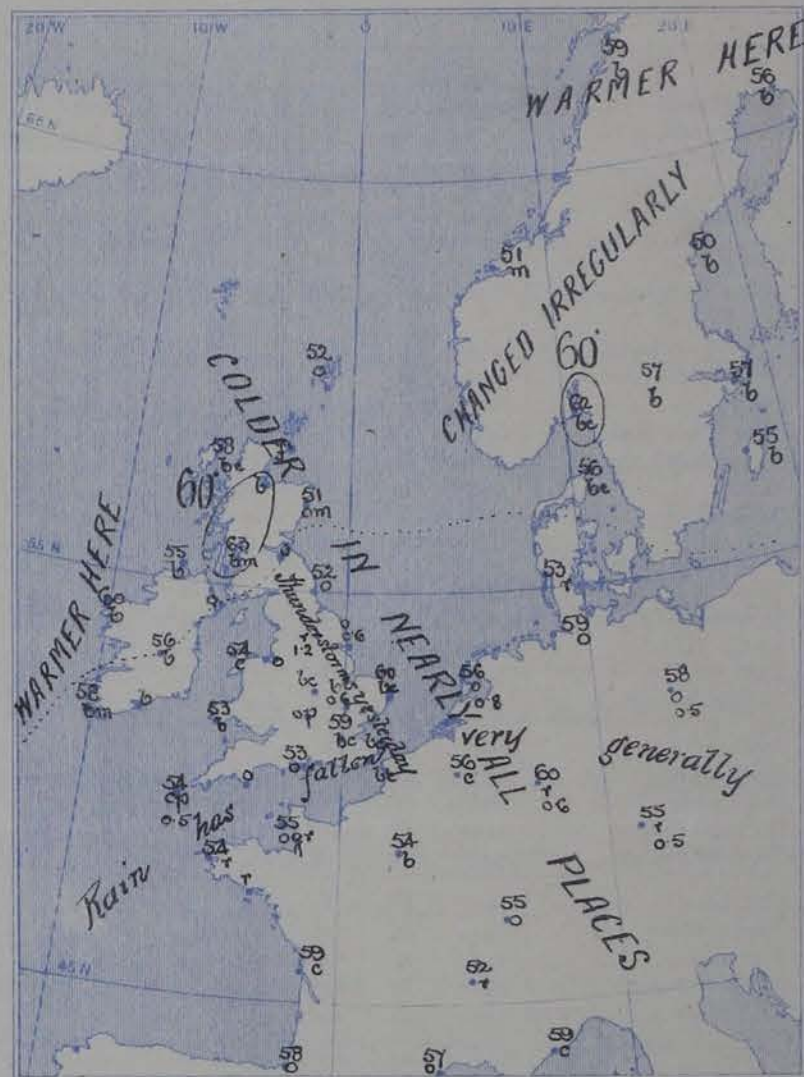

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.5.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, (1) 30.2 in: and more to 30.0 in: over Scandinavia, the Baltic, and the northern half of Scotland; (2) 30.1 in: and more over Spain and exceeding 30.0 in: over France.
Lowest, 29.7 in: and less, in a depression having its centre close to the Scilly Islands, and about 29.8 in: in another off the Lincolnshire coast.

Gradients slight to moderate and very variable in direction.

Barometer falling over Brittany and the Netherlands, rising over our Islands - most in the north.

TEMPERATURE

Highest, 63° at Andersonau, 62° at Tander, 61° at Nairn, 60° at Linton, 59° at Nise, London and Copenhagen

Lowest, 50° at Wick, 51° at Aberdeen, 52° at Shields and Liverpool.

Maxima recorded yesterday were 72° at Nairn, 71° at York, 70° at Cambridge, 73° at Paris, 81° at Berlin.

WIND

Light and anticyclonic over Scandinavia; light to moderate from NE and N. over the northern and western parts of our Islands, but from SW. over France, and from S. over the southeastern counties of England - E³ over Denmark.

WEATHER

Clear over Ireland, foggy over the east of Scotland, clear over Scandinavia, raining in many parts of Denmark, England and Brittany. Rainfall has been heavy (1.24 in:) at York, and has exceeded half an inch at the Helder, Cambridge, Spurn Hd. and Scilly. In London the fall has been trifling. Thunder has occurred at York and the North Foreland.

SEA

Moderate at Scilly and Lorient, slight or smooth elsewhere

Note.—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over Scandinavia, central and southeastern Europe, as well as over the north-east of Great Britain, and the greater part of Ireland, cloudy and rather unsettled elsewhere, with rain at Valencia (Ireland) Jersey, Cambridge, Wiesbaden, Marseilles, and Capri. Rain later, more or less, over almost the whole of the western and north-western countries, with thunderstorms in some places. Rainfall very heavy at York, and heavy at the Helder, Cambridge, Spinn Head and Scilly.

Temperature not changing much in our Islands, fallen over France. Morning readings highest 75° at Barcelona, 72° at Algiers, 71° at Berlin, 68° at Venice and Patras, and exceeding 60° at many of the European stations, as well as over the inland and north-eastern parts of England. Lowest 42° at Archangel, 46° at St. Petersburg, 48° at Moscow and Haparanda, 49° at Rode; below 60° at many of the stations in central and southeastern Europe. Rising later to 70° and more at several of our central and European stations, to 81° at Berlin, 86° at Lisbon.

Wind NE³ to E³ over Northern Europe and the Baltic, SE² to S³ over the United Kingdom (SW¹ in Devon and Cornwall). Very variable over France and Central Europe. Veering to W. or SW. in the south of Ireland and England later, and backing to E. in the north.

Barometer highest 30.2 ins: to 30.0 ins: (1) over Scandinavia, and (2) over the Iberian Peninsula and southwest of France. Lowest, 29.7 ins: and less, in a small depression over the southern half of Ireland, below 29.8 ins: in a secondary over the east of England, and below 29.9 ins: near Berlin. Irish depression moving southwards later, and barometer rising at our western and northern stations generally.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
 „ Weekly „ „ „ £1 10 0 „

DAILY WEATHER REPORT

for 8 a.m. on

Monday, 3rd June,

1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

NOTE: The Sunshine for London given in this Table is now recorded on the tower of the Wesleyan Training College, Westminster.

WEATHER CHARTS

FOR *Monday, 3rd June.* 1895.

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 \rightarrow ; Force 5 to 7 \rightarrow ; Force 8 to 10 \rightarrow ; Force 1 to 4 \rightarrow ; Calm \odot

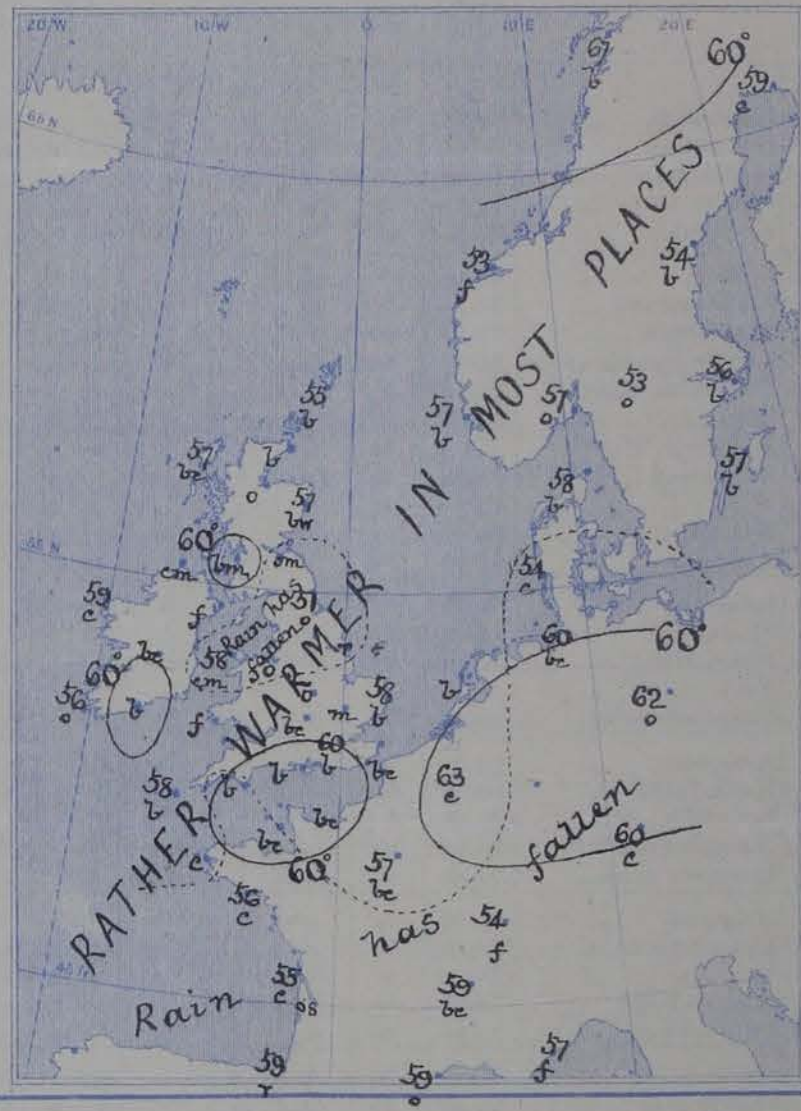

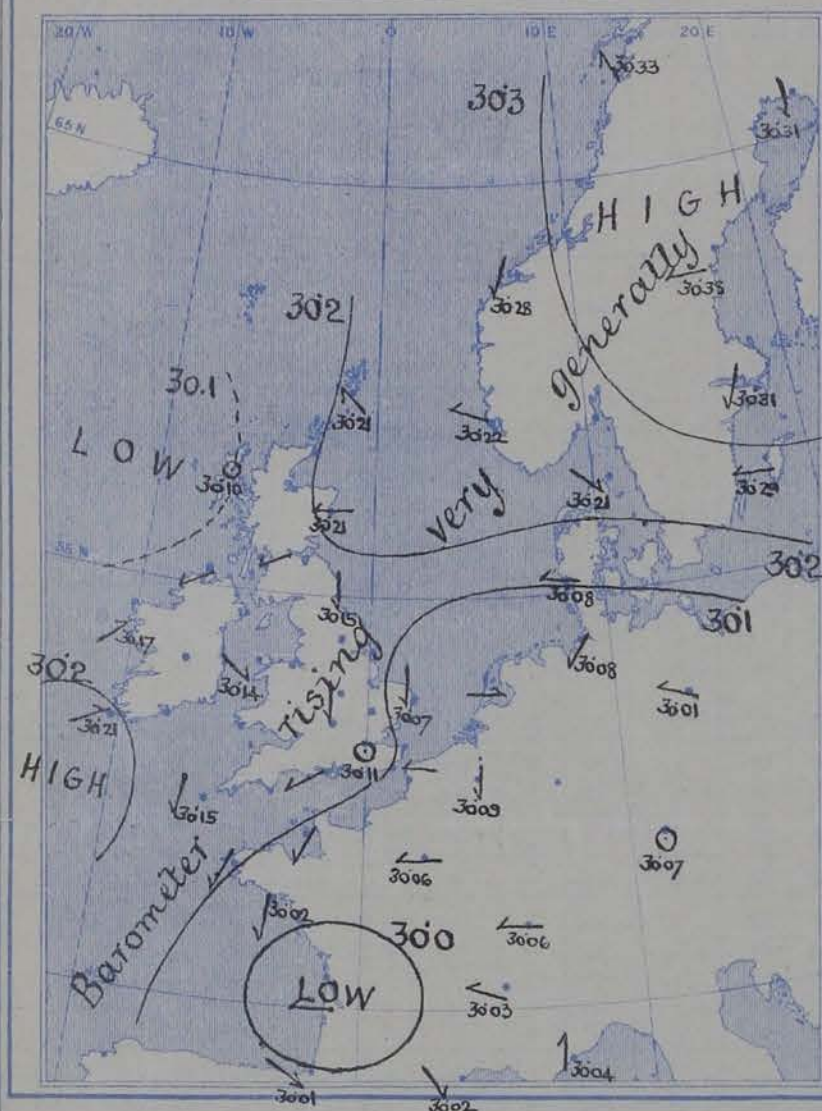

SEA—Rough \equiv ; High \equiv

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, (1) 30.3 in. and more to 30.2 in. over Scandinavia and the northern part of the German Ocean; (2) 30.2 in. and more over the southwest of Ireland and the neighbouring part of the Atlantic.

Lowest, Below 30.0 in. in two shallow depressions—one over the southeast of France, the other over North Germany.

Gradients slight and very variable. Barometer rising generally, but not quickly.

TEMPERATURE

Highest, (1) 64° at Louth, 63° at Rock Point, 62° at Jersey and Berlin, 60° in London and at Carcassonne; (2) 67° at Bodo.

Lowest, 51° to 52° along the northeast coast of England.

The maxima recorded yesterday were (1) 74° at Hornøya, 73° at Andover, 72° at Loughborough; (2) 72° at Perpignan and Nice, 70° at Berlin and Bismarck, 67° at Bodo.

WIND

Very light generally; very variable over Ireland and Scotland, and calm in some localities, N^{ly} over England.

NE^{ly} light over the Channel, N^{ly} at Lorient, NW^{ly} and strong at Biarritz.

WEATHER

Very fine over Sweden, Germany, France, and the south of England, dull in the west and north, slightly rainy at Spurn Head. There has been a little rain on our northeastern coast during the night, a considerable fall in the Channel Islands and the west and south of France yesterday, and a moderate fall over Denmark and Germany.

SEA

Very little disturbed.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The depressions over France and Germany seem to be filling up. There is a very slight secondary system off the Lincolnshire coast and moving Sth. Some little rain is therefore likely to fall at some of our eastern stations today, but very little. Fine weather is probable in most places, with haze at times.

FORECASTS

For the 24 hours ending at NOON on 4th JUNE 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	Calms and SW ^{ly} airs; fine.
1	SCOTLAND EAST	
2	ENGLAND N.E.	
3	ENGLAND EAST	NE ^{ly} airs and Calms; fair but hazy or foggy at times.
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	NE ^{ly} airs and Calms; fine, hazy.

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	Same as No 0
7	ENGLAND N.W.	
8	ENGLAND S.W.	Varying airs; fine generally.
9	IRELAND NORTH	NE ^{ly} and N ^{ly} breezes; light; fine.
10	IRELAND SOUTH	Varying airs and Calms; fine generally, hazy.
	WARNINGS	
		None issued.

Note.—The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone. The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Continental Information not received.

SUMMARY OF CHANGES IN THE WEATHER OVER THE BRITISH ISLANDS AND THEIR NEIGHBOURHOOD FROM THE 26TH MAY TO THE 1ST JUNE 1895.

At the commencement of this week anticyclonic conditions prevailed over our Islands; the weather was very fine, but hazy in places, and temperature sank to below 50° at the inland stations during the night, but rose to above 70° in the day. Along our southeastern coast, however, a thick cold fog prevailed, and the maximum temperatures at the stations in those parts were many degrees lower than those in London and the neighbouring part of the country.

After the middle of the week the anticyclone moved eastwards to Germany and Central Europe, and as the wind in our Islands drew into SE. and S. the thermometer rose rapidly, so that on Thursday maxima ranging from 80° to 87° were recorded over our inland counties, and thunderstorms soon spread over us from the southward and westward, and brought heavy rain to Cambridge. The following days were showery at times in most regions, and in a few localities situated more especially over the northern and western parts of the Kingdom, the rain was heavy.

At the close of the week a new depression had appeared in the west and began to move away to France, causing a strong gale from the S.W. at the mouth of the Channel.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.

„ Weekly „ „ „ „ £1 10 0 „

NOTE: The Sunshine for London given in this Table is now recorded on the tower of the Wesleyan Training College, Westminster.

Eastbourne: Sunshine yesterday 6.0 hrs.

WEATHER CHARTS

FOR TUESDAY, 4TH JUNE, 1895.

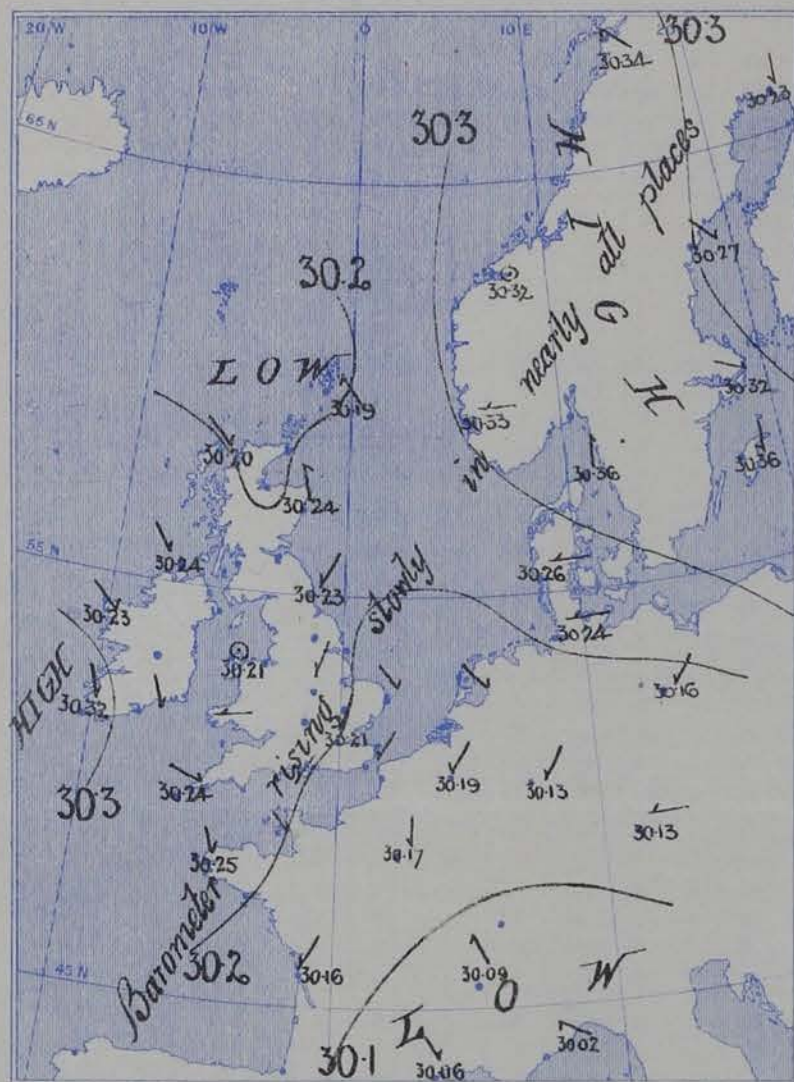

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 \rightarrow ; Force 5 to 7 \rightarrow ; Force 8 to 10 \rightarrow ; Force 1 to 4 \rightarrow ; Calm \odot

SEA—Rough \equiv ; High \equiv

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest 30.3 ins. and upwards in a large anticyclone over Scandinavia and the Baltic, and also in another system extending from the Atlantic over the southwest of Ireland.

Lowest 30.1 ins. and less in a shallow area over the southern part of France.

Gradients very slight. Barometer rising slowly in most places.

TEMPERATURE

Highest (1) 67° at Paris, 64° at Wiesbaden, 63° at Berlin, and 62° at Brussels; (2) 63° at Helsingfors and Skudenes, and 61° at Haparanda and Naaim.

Lowest 50° at Whisky, 52° at Christiansund, and 53° at Sumburgh H., Spurn H. and de N. Foreland.

The highest maxima reported over our Islands yesterday were 73° at Stornoway and Parsonstown, 72° in London, and 69° at Hurst Castle.

WIND

Light to moderate from the End or NEnd over Germany, Denmark and the south of Norway.

Light from the Nnd over the greater part of Ireland, England and France, but calm or variable over the Irish Sea and the S. Georges and Bristol Channels, as well as in Scotland.

Nnd or NWnd in Sweden; variable in the south of France.

WEATHER

Cloudy or overcast in most parts of the United Kingdom, with fog at some of the English coast stations and with rain at Wick and Parsonstown.

Fine at most of the Continental stations, but dull in the south of France.

Showers fell yesterday in a few isolated parts of our Islands and thunder was heard in London. A mirage was seen in the evening at de Nord Foreland.

SEA

Slight to smooth generally.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

With two high pressure areas in existence, - one to the northward, and the other to the southwestward of our Islands, the conditions are favourable for the development of shallow local disturbances over Great Britain. Thunder showers are therefore probable in many districts.

FORECASTS

For the 24 hours ending at NOON on 5TH JUNE, 1895.

DISTRICTS.

FORECASTS.

- 0 SCOTLAND NORTH
- 1 SCOTLAND EAST
- 2 ENGLAND N.E.
- 3 ENGLAND EAST
- 4 MIDLAND COUNTIES
- 5 ENGLAND SOUTH

Calms and variable airs, cloudy, thunder showers locally.

Same as No. 5.

Light breezes, chiefly Nnd, cloudy. Thunder showers locally.

DISTRICTS.

FORECASTS.

- 6 SCOTLAND WEST
- 7 ENGLAND N.W.
- 8 ENGLAND S.W.
- 9 IRELAND NORTH
- 10 IRELAND SOUTH

Same as Nos 0 and 1.

Light variable airs, fair generally, but some mist or fog.

NWnd winds, light, fair generally.

WARNINGS

None Issued.

Note - The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.

The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning rather variable over the United Kingdom; fine at several of our northern and southern stations, but cloudy and misty in most of the intermediate districts. Fine and bright over the greater part of Scandinavia and Russia, as well as in the south of Italy, but cloudy in most other parts of the Continent, with rain at some of the German stations, and also in the extreme south of France, and a thunderstorm at Palma. Showers falling during day in isolated parts of our Islands, with thunder in London; a mirage seen at the North Foreland in evening. Rain falling over the southern parts of France and Germany.

Temperature changed rather irregularly, but risen in most places. Morning readings highest 72° at Patras, 71° at Trieste and Algiers, and 70° at Lesina, Brindisi and Palermo; above 65° at the Mediterranean and Adriatic stations generally, and also at Rodò; above 60° over central Europe, and also on some parts of our own western and southern coasts. Lowest (1) 35° at Archangel, 46° at Moscow, and 50° at St. Petersburg; (2) 51° at Shields, and 52° at Lath and Spurn Head. Rising during day to 65° and upwards in many parts of the United Kingdom and the neighbouring countries, and reaching 72° in London, and 73° at Stornoway, but remaining below 60° on our east and southwest coasts.

Wind light to moderate from the End or NEnd over Denmark, North Germany and the south of Scandinavia, as well as over the Channel and the north of France; Nnd or NWnd over the Bay of Biscay and the Spanish Peninsula. Variable in Ireland and Scotland, and also in the north of Scandinavia; chiefly Nnd in Russia. Variable over Italy, Austria and the south of France. SWnd breezes setting in later on our extreme W. coasts; no important change occurring elsewhere.

Barometer highest 30.3 ins. and upwards in a large anticyclone over Scandinavia, 30.2 ins. and upwards in another system lying off the southwest of Ireland. Lowest 30.0 ins. and less in shallow depressions lying respectively over northern Austria and the neighbouring parts of Germany, over the west of France, and over the northeast of Spain. No important change occurring over western Europe during day.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on

Wednesday, 5th June,

1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

Eastbourne: - Sunshine yesterday 9.3 hrs.

WEATHER CHARTS

FOR WEDNESDAY, 5TH JUNE. 1895.

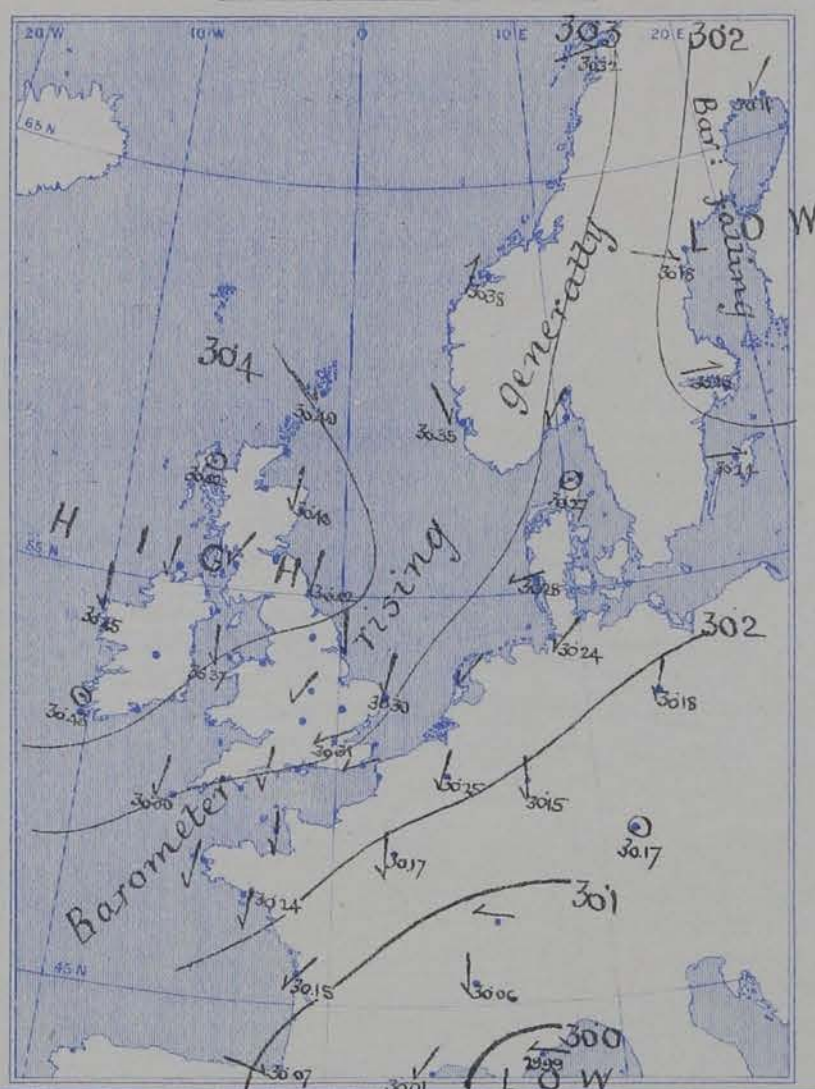

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 \Rightarrow ; Force 5 to 7 \Rightarrow ; } Calm \odot
Force 8 to 10 \Rightarrow ; Force 1 to 4 \Rightarrow ; }

SEA—Rough \equiv ; High \equiv

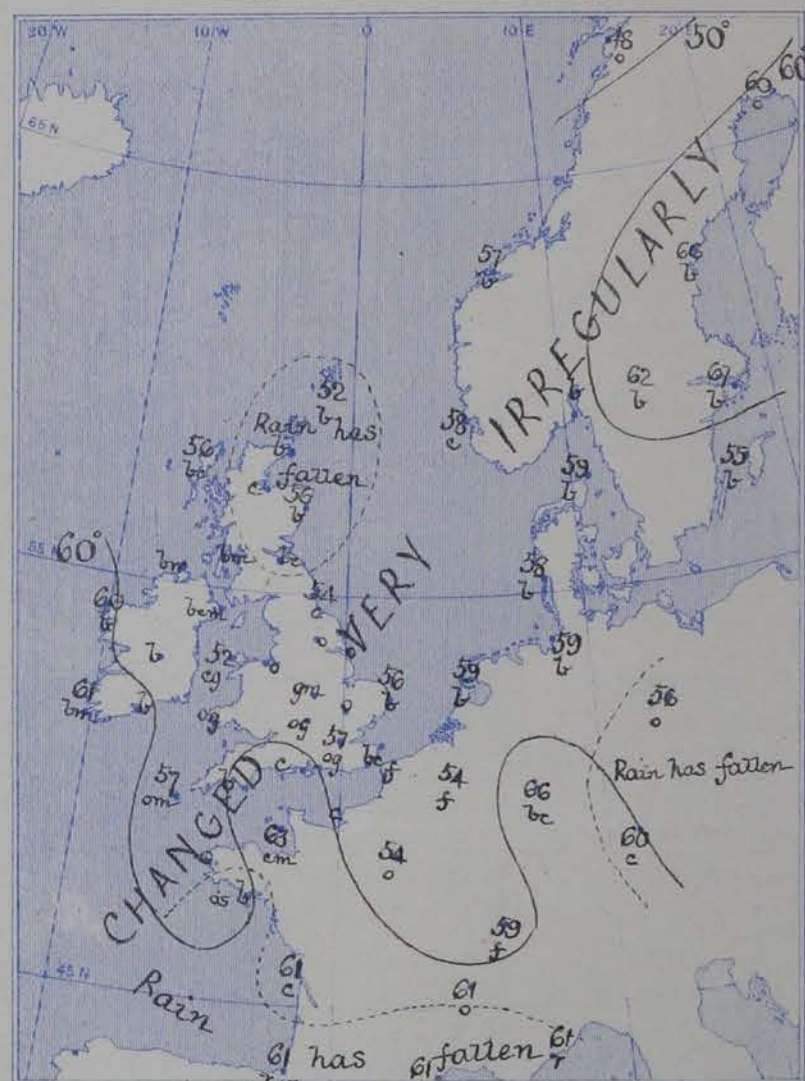

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.4 ins: and upwards in an anticyclone stretching from the Atlantic over Ireland and the northern parts of Great Britain.
 Lowest, 30.0 ins: and less, in the south of France; 30.2 ins: and less in Sweden.
 Gradients slight. Barometer rising generally, but falling a little in Sweden and the south of Norway.

TEMPERATURE

Highest, (1) 67° at Stockholm, 66° at Helsingfors, and 62° at Carlstad; (2) 66° at Wiesbaden, 63° at Liège, and 62° at Antwerp and Brussels.
 Lowest, 48° at Bordeaux, 51° at Cape Gris Nez, 52° at Lumburg H. and Holyhead, and 54° at Lills, Combs, the North of Ireland, Russia, & Paris.
 The highest maxima reported over our Islands yesterday were 69° at Rock's P. and Oxford, and 66° at Loughborough and Hest Castle.

WIND

Light to moderate from the N^W or NE^W over the greater part of Western Europe, but calm or variable in the north of Scotland.
 W at most of the Swedish stations, but NE at Haparanda.

WEATHER

Fine and bright in Ireland and Scotland, as well as in Scandinavia, Denmark, and Holland.
 Cloudy or overcast at most of the English, French, and German stations, with fog or haze in places, and with rain at Bismarck and Nise.
 Rain fell yesterday in the north and east of Scotland, as well as at some of the French and German stations; at Bismarck there was as much as 1.7 ins: A thunderstorm occurred at Lyons last evening.

SEA

Slight or smooth generally.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

There are at present no signs of any important change in the weather.

FORECASTS

For the 24 hours ending at NOON on 6th JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	} Light variable airs; fine, warmer.
1	SCOTLAND EAST	
2	ENGLAND N.E.	} N ^W winds, light; fair generally.
3	ENGLAND EAST	
4	MIDLAND COUNTIES	} NE ^W winds, light or moderate; fair generally.
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	} N ^W and NE ^W winds, light; fair generally.
7	ENGLAND N.W.	
8	ENGLAND S.W.	} Same as Nos 3 to 5.
9	IRELAND NORTH	
10	IRELAND SOUTH	} Same as Nos 6 and 7.
	WARNINGS	
		None issued.

Not.—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather cloudy or dull over the United Kingdom generally, with fog on many parts of our east and southwest coasts, and with rain at Wick and Barronston. Fine and bright over the greater part of the Continent, but dull in the south of France, with rain at Biarritz; dull also in the western and central parts of Russia with rain at Moscow. Rain falling during day in the north and east of Scotland, as well as at some of the French and German stations, — heavily at Biarritz. Thunderstorm occurring at Lyons in evening.

Temperature changed rather irregularly, but risen in Scandinavia. Morning readings highest 75° at Rindisi, 73° at Athens, and 71° at Trieste, Lissina, and Constantinople; above 60° over central and southern Europe generally, as well as in Lapland, Lowest (1) 38° at Archangel and 44° at Moscow; — (2) 52° at Christiansund, and 53° at Sumburgh. H^d. Spurn H^d. and the North Foreland. Rising during day to 65° and upwards at many of the English and Irish stations, but remaining below 60° on our east coast. Exceeding 70° in France and Germany, and reaching 75° at Nice.

Wind light to moderate from the E^W or NE^W over Germany, Denmark, and the south of Norway, and from the N^W over the greater part of England, Ireland, France and the Spanish Peninsula. Calm or variable in Scotland and also over the Irish Sea and the St. George's and Bristol Channels. Moderate from the N^W or NW^W in Sweden and Russia, variable in Austria, Italy, and the extreme south of France. No important change occurring over Western Europe during day.

Barometer highest 30.3 ins: and upwards in an anticyclone over Scandinavia and also in another system lying to the southward of our Islands. Lowest 29.8 ins: and less, in a depression over Central Russia, 30.0 ins: and upwards over Algeria and the western part of the Mediterranean. Atlantic high pressure system spreading northwards during day, and barometer rising in most parts of Western Europe.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on *Thursday, 6th June,* 1895
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

Eastbourne :- Sunshine yesterday 4.0 hrs.

WEATHER CHARTS

FOR Thursday, 6th June, 1895.

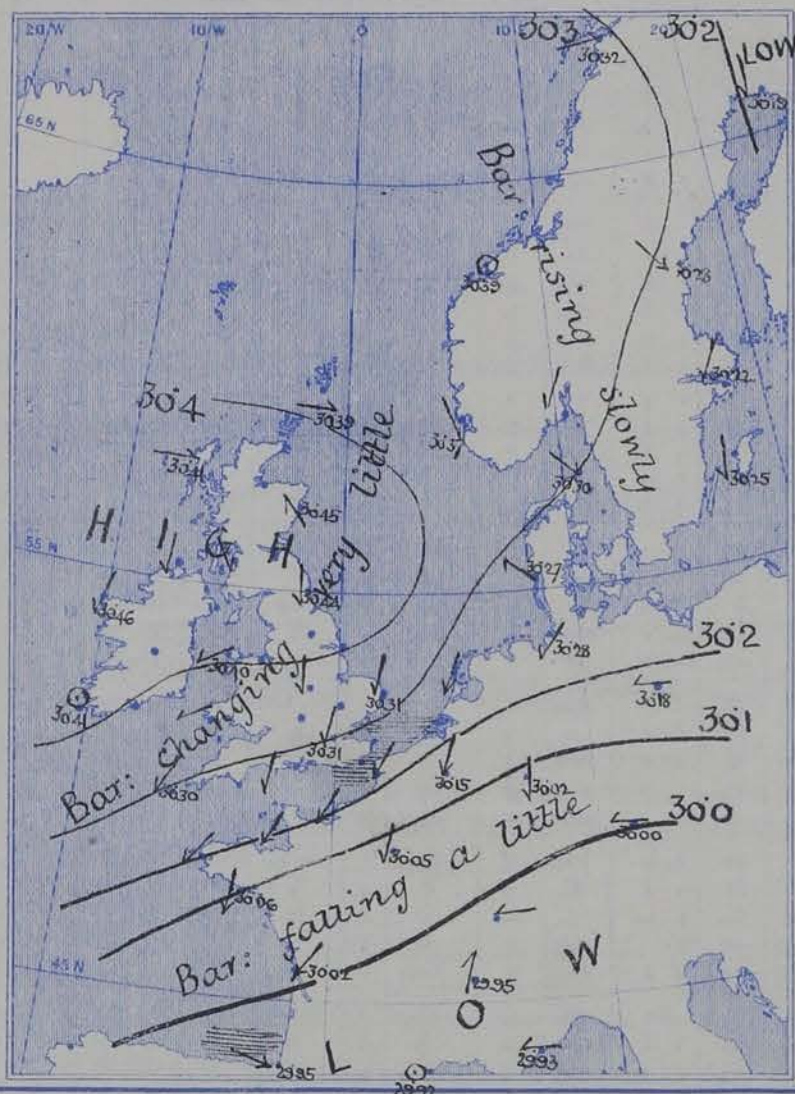

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 \Rightarrow ; Force 5 to 7 \Rightarrow ; Force 8 to 10 \Rightarrow ; Force 1 to 4 \Rightarrow ; Calm \odot

SEA—Rough \equiv ; High \equiv

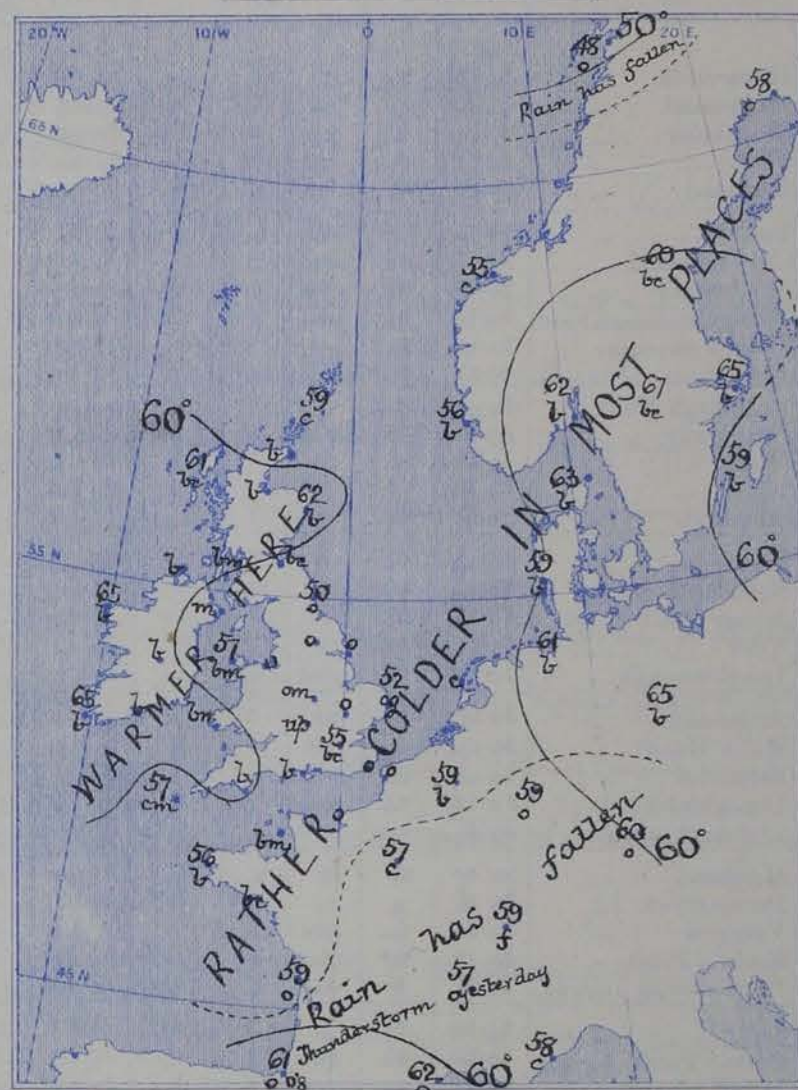

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.4 in. and upwards, in an anticyclone lying over Ireland and the northern parts of Great Britain.
Lowest, 30.0 in. and less, in a large shallow depression over the Spanish Peninsula and the southern parts of France.
Gradients slight generally, but moderate over the Channel and the north of France.
Barometer almost steady in our Islands, falling a little in France and south Germany, rising in Scandinavia and Denmark.

TEMPERATURE

Highest, (1) 71° at Dublin; (2) 67° at Carlsbad, 65° at Stockholm and Berlin and 63° at St. Petersburg; (2) 65° at Kilmallack and Valencia (Ireland), and 60° at the mountains.
Lowest, (1) 48° at Brest and 55° at Christiansund; (2) 50° at Shields, 51° at Spurn Head and the North Foreland, and 52° at Yarmouth.
 The highest maxima reported over our Islands yesterday were 72° at Ramstouen, and 70° at Androssau and in London; on some parts of our east and southeast coasts the thermometer did not reach 60°.

WIND

N³ or NE³ over Ireland, England, the Netherlands and the north and west of France, fresh or strong in force over the Channel and Bay of Biscay.
 Calm or variable in Scotland; N³ at most of the Scandinavian stations, E³ in Germany, Variable in the south of France.

WEATHER

Fine over Western Europe generally, but dull over the eastern and central parts of England and the southern parts of France, with rain fell yesterday at several of the French and German stations, heavily at Biarritz, where a thunderstorm occurred, slight rain at Oxford. Lightning was seen at Lyons. A solar halo was seen at Jersey.

SEA

Rough at Cape Fin Key and rather rough at the North Foreland and Biarritz, but moderate to smooth elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

There are at present no signs of any important change in the weather.

FORECASTS

For the 24 hours ending at NOON on 7th JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	} Light Variable airs; fine, warm.
1	SCOTLAND EAST	
2	ENGLAND N.E.	} N ³ and NE ³ winds, moderate; fair generally.
3	ENGLAND EAST	
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	NE ³ winds, fresh on coast; fair generally.

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	} N ³ and NE ³ winds, light; fine, warm.
7	ENGLAND N.W.	
8	ENGLAND S.W.	Same as N° 5
9	IRELAND NORTH	} Same as N° 6 and 7.
10	IRELAND SOUTH	
WARNINGS		None issued

Note—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright in Ireland and Scotland, as well as over Scandinavia, Denmark, Holland and the southern parts of Russia and Italy. Cloudy or overcast in most other regions, with rain at some of the southern French stations, as well as at Vienna, and a thunderstorm at Turin; fog reported in the Straits of Dover and at Brussels. Sky clearing later in many parts of England, but rain falling at several of the French and German stations, - heavily at Briantz. Thunderstorm occurring at Briantz and lightning at Lyons. Solar halo seen at Jersey.

Temperature changed very irregularly. Morning readings highest 74° at Constantinople, 73° at Trieste and Lighorn, and 72° at Lerma and Naples, above 65° in many parts of southern Europe and also in Central Sweden, and above 60° on some parts of our western coasts. Lowest (1) 37° at Archangel, 39° at Moscow, and 48° at Kharkov; (2) 48° at Rode; (3) 51° at Cape Fis Neg, and 52° at Sumburgh Head and Holyhead. Rising during day, to between 65° and 70° in most parts of the United Kingdom, but remaining below 60° on some parts of our east and southeast coasts. Exceeding 70° at several of the French and German stations, and reaching 77° at Lisbon.

Wind light to moderate from the N^W or NE^W over the greater part of Western Europe, but variable in the north of Scotland and the west of Norway. NW^W or W^W over Sweden and Central Russia, NE^W in the south of Russia. Calm or variable in Austria and Italy. No important change occurring during day.

Barometer highest 30.4 ins: and upwards, in an anticyclone stretching from the Atlantic over Ireland and the northern parts of Great Britain. Lowest 29.9 ins: and less, in a large shallow depression over northern and central Russia; 30.0 ins: and less, in three areas lying over the western and central parts of the Mediterranean. Latter systems spreading northwards during day, and becoming rather more pronounced; barometer falling rather decidedly in France.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.
N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.

" Weekly " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on Friday 7th June 1895
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

NOTE: The Sunshine for London given in this Table is now recorded on the tower of the Wesleyan Training College, Westminster.

WEATHER CHARTS

FOR

Friday, 7th JUNE.

1895.

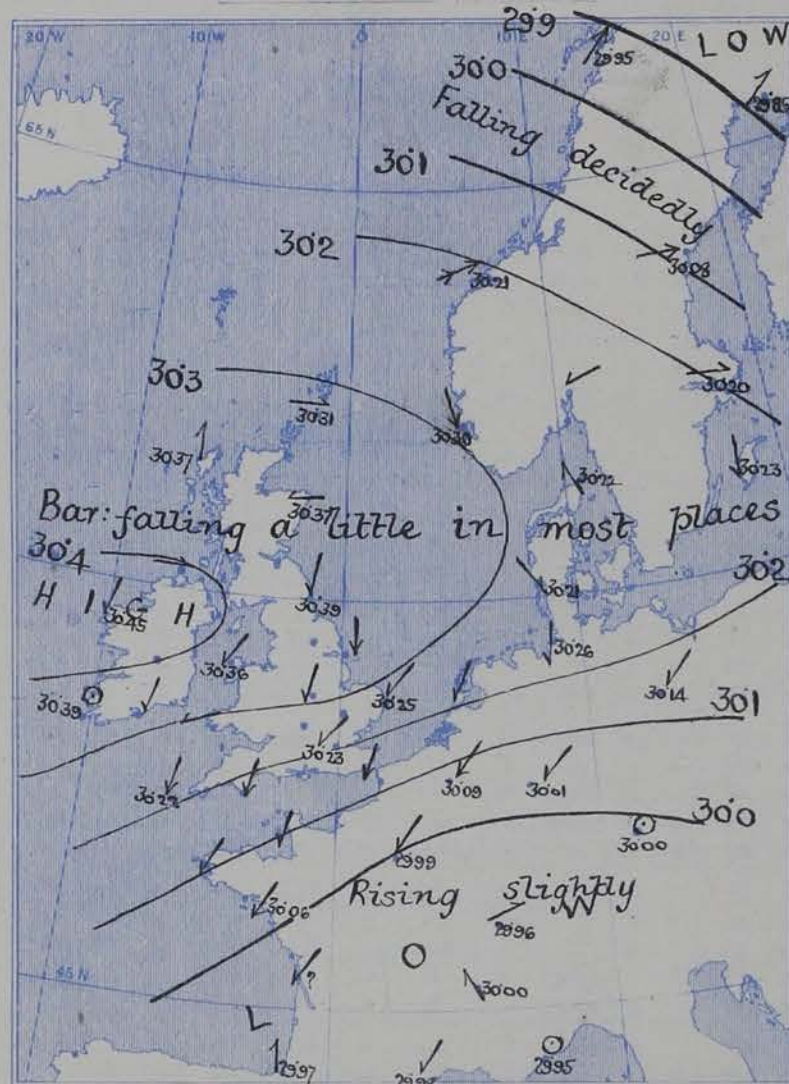

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 →→→ ; Force 5 to 7 →→→ ; Force 8 to 10 →→→ ; Force 1 to 4 →→→ ; Calm ○

SEA—Rough ≡≡≡ ; High ≡≡≡

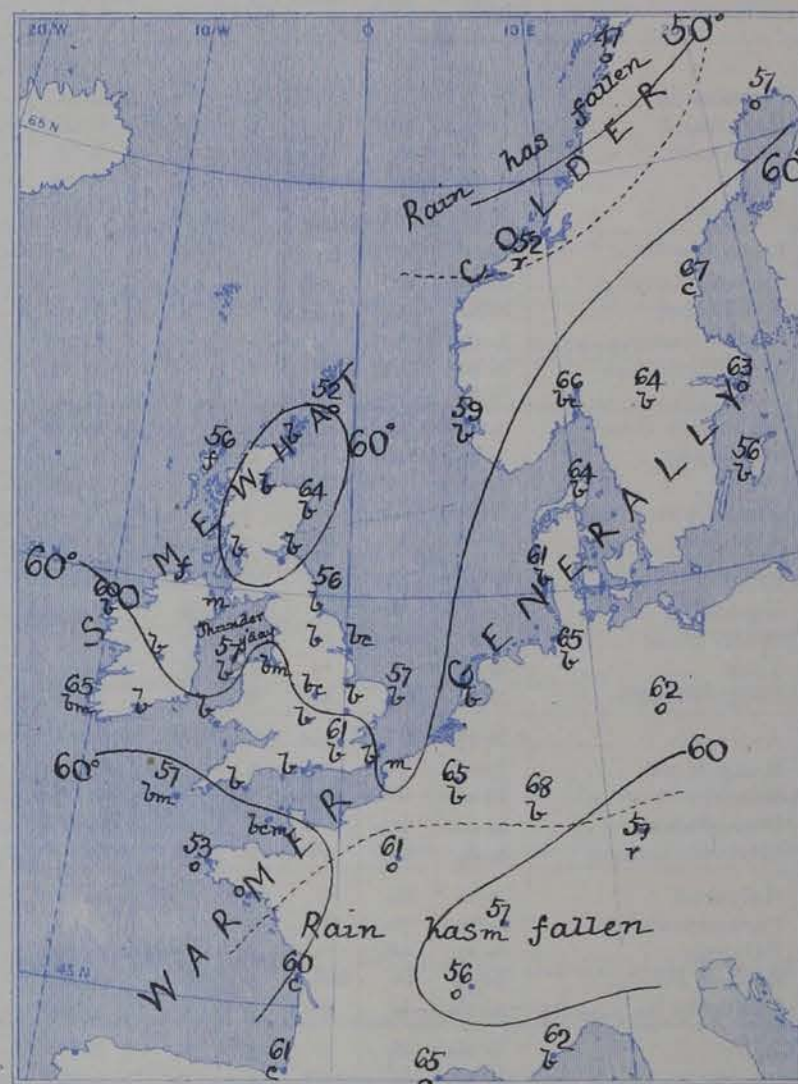

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest 30.4 ins. and upwards over the northern and central parts of Ireland.
Lowest 29.9 ins. and less in Lapland, and also over the south of Portugal.

Gradients slight generally, but moderate over the Channel and north of France.

Barometer falling at all but the French stations - rather decidedly over the N^m parts of Scandinavia.

TEMPERATURE

Highest (1) 68° at Wiesbaden, 67° at HERNÖSAND, and 66° at FAERDEN, (2) 66° at ANDRÖSSON, and 65° at NAIN and VALONIA (Ireland); (3) 65° at PERPUIGNAN.

Lowest (1) 47° at Bodo, and 52° at Christiansund and Sunnbjørgh N^m. (2) 53° at Brest, and 55° at ZORIENT, (3) 51° at SPARNH^m.

The highest maxima reported over our Islands yesterday were 75° at NAIN, and PARSONSTOWN, and 72° at VALONIA (Ireland); on our east and southeast coasts the thermometer did not reach 60°.

WIND

N^m or NE^m over Ireland, England, the Netherlands and the northern parts of France, fresh or strong in force at some of the Channel stations.

Variable in Scotland, and also in Denmark and the south of Scandinavia. W^m or SW^m? over the northern parts of Scandinavia, with a gale at Christiansund.

WEATHER

Fine over our Islands, Denmark, the Netherlands and the S. of Scandinavia, but foggy at Stromøysund and Malin Head.

Cloudy or overcast in the N^m parts of Scandinavia, and also at most of the French and German stations, with rain at Christiansund and Munich.

A little rain fell yesterday in many parts of France and S. Germany, and a considerable amount in the W. of Norway. Distant thunder was heard at Holyhead.

SEA

Moderate on our S. and SE. coasts, and also off the W. of Norway, but light or smooth elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

There are at present no signs of any important change in the weather. The anticyclone over the northern parts of our Islands is inclined to spread southwards, and a further rise of temperature is probable over England.

FORECASTS

For the 24 hours ending at NOON on 8TH JUNE, 1895.

DISTRICTS.

FORECASTS.

- 0 SCOTLAND NORTH
- 1 SCOTLAND EAST
- 2 ENGLAND N.E.
- 3 ENGLAND EAST
- 4 MIDLAND COUNTIES
- 5 ENGLAND SOUTH

SW^m and W^m winds, light; cloudy, rain locally.

Light variable airs, fine, warm.

Same as N^o. 5.

N^m winds, light or moderate, fine, warm.

DISTRICTS.

FORECASTS.

- 6 SCOTLAND WEST
- 7 ENGLAND N.W.
- 8 ENGLAND S.W.
- 9 IRELAND NORTH
- 10 IRELAND SOUTH

Same as N^o. 1.

NE^m to variable breezes, fine warm.

NE^m winds, moderate or fresh, fine, warm.

Light breezes, chiefly N^m, fine generally.

WARNINGS

None Issued.

Note - The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine over the greater part of our Islands and the Continent, but dull over eastern and central England, and also over France, northern Italy and the southern parts of Germany and Austria, with rain at Turin and Trieste. Sky clearing later over England, but distant thunder heard at Holyhead in evening. A little rain falling in several parts of France and south Germany, and a considerable quantity in the west of Norway.

Temperature risen in Ireland and Scotland, as well as in Denmark, Germany and Russia, changed irregularly elsewhere. Morning readings highest 79° at Brindisi, 73° at Oporto, 72° at Lisbon, and 71° at Lisbon, Naples and Algiers; above 65° over the Mediterranean and Adriatic generally, as well as at Carlstadt; above 60° at several of our own western and northern stations. Lowest (1) 41° at Archangel, 43° at Moscow, 47° at St. Petersburg, and 48° at Bodo; (2) 50° at Shields, and 51° at Spurn Head and the North Foreland. Rising during day to 70° and upwards in many parts of Ireland and Scotland, and reaching 75° at Nain and Parsonstown, but remaining below 60° on the east and southeast coasts of England. Exceeding 70° over Germany and the south of France, and reaching 79° at Berlin.

Wind NE^{ly} over England, the Netherlands, Germany and the greater part of France; fresh or strong in force over the Channel and Bay of Biscay. Light from the N^W in Ireland; variable in Scotland and the W. of Norway; N^W over Sweden and Russia, variable over the whole of southern Europe. Gale from W. or NW. springing up later on the west coast of Norway; no important change occurring elsewhere.

Barometer highest 30.4 ins. and upwards in an anticyclone lying over Ireland and the northern parts of St. Britain. Lowest 29.8 ins. and less in a depression over central Russia, 30.0 ins. and less in a large shallow area covering the greater part of southern Europe, with the western portions of the Mediterranean. Slight fall taking place over western Europe during day, but general distribution of pressure remaining unchanged.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on *Saturday, 8th June,*

1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

Eastbourne :- Sunshine yesterday 14.5 hrs.

WEATHER CHARTS

FOR *Saturday, 8th JUNE,* 1895.

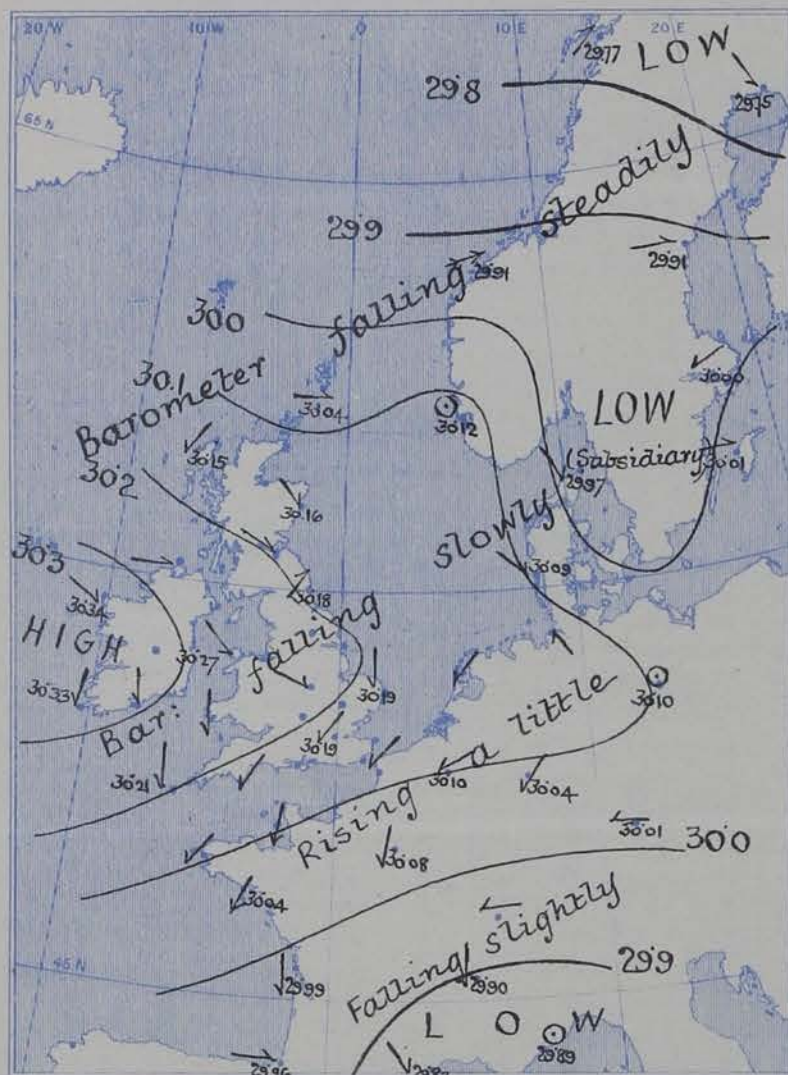

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 \Rightarrow : Force 5 to 7 \Rightarrow : } Calm \odot
Force 8 to 10 \Rightarrow : Force 1 to 4 \Rightarrow :

SEA—Rough \equiv : High \equiv

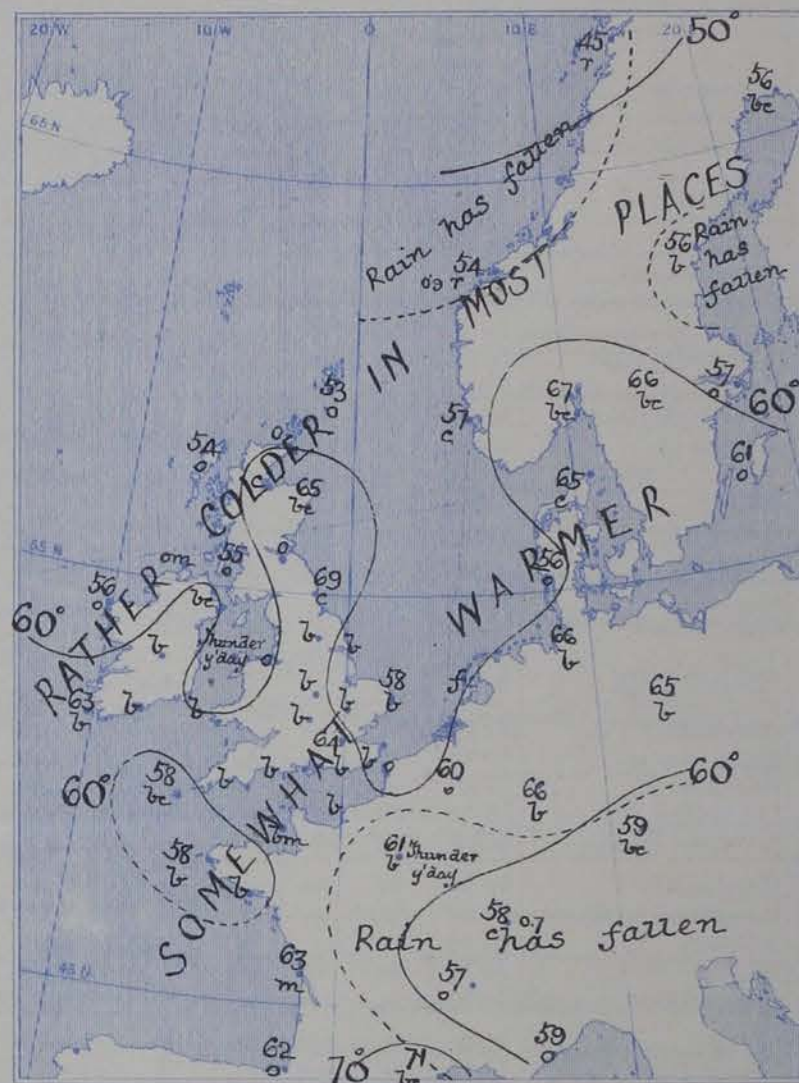

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.3 ins. and upwards, in an anticyclone lying over and to the westward of Ireland.

Lowest, 29.8 ins. and less, over the north of Scandinavia; 29.9 ins. and less, in the south of France.

Gradients slight. Barometer rising a little over Germany and the north of France, falling elsewhere, — most in the north.

TEMPERATURE

Highest (1) 71° at Perpignan; (2) 69° at Shields, 67° at Hawk Point and 65° at Aberdeen; (3) 67° at Færevær and 66° at Carlsbad.

Lowest, (1) 45° at Bodø, 53° at Lumburgh H^d and 54° at Christiansund and Hornøya; (2) 51° at the North Foreland and Cape Fris H^g, and 55° at the Helster.

During yesterday the thermometer rose to 70° and upwards in many parts of the United Kingdom, to 76° at Naum, 77° at Parsonstown and 78° in London; at the North Foreland it did not exceed 57°.

WIND

Rather variable over the northern parts of our Islands, but chiefly W^{ly} or NW^{ly}.

Light to moderate from the N^W or NE^W on our southern coasts, as well as over the Netherlands and the greater part of France. W over the northern parts of Scandinavia, with a moderate gale at Christiansund; variable in the south of Scandinavia.

WEATHER

Dull at many of our own northern stations, and raining in the west of Norway.

Fine and bright in many other parts of Western Europe, but dull at some of the southern French stations.

Rain fell yesterday in many parts of France and South Germany, the largest amount being 0.7 in. at Belfort. Thunder was heard in the evening at Paris and, also, at Holyhead.

SEA

Moderate in the extreme north, but slight or smooth elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The distribution of pressure is now becoming rather irregular. Shallow depressions are appearing to the southward of the large disturbance over the north of Scandinavia, and cloudy weather seems likely to spread over Great Britain from the northward, with showers at some of our northern stations.

FORECASTS

For the 24 hours ending at NOON on 9th JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	NW ^{ly} winds, light or moderate; cloudy some showers, cooler.
1	SCOTLAND EAST	
2	ENGLAND N.E.	W ^{ly} winds, light; fine and warm at first, cloudy later and cooler, possibly local showers.
3	ENGLAND EAST	N ^{ly} to NW ^{ly} or W ^{ly} winds, light, fine and warm today, cloudy tomorrow and cooler.
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	NW ^{ly} winds, light; cloudy, local showers.
7	ENGLAND N.W.	
8	ENGLAND S.W.	N ^{ly} winds, light; fine generally.
9	IRELAND NORTH	Same as N ^{os} 6 and 7.
10	IRELAND SOUTH	Same as N ^o 8
WARNINGS		None issued.

Note — The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine over our Islands, Denmark, the Netherlands and the south of Scandinavia, as well as in Italy and the extreme south of France. Cloudy, or overcast elsewhere, with rain at Christiansund and also at Munich and Vienna, and with a thunderstorm at Cagliari. Rain falling during day in many parts of France and South Germany, as well as in the west of Norway, - amount large in places. Weather remaining fine and dry over our Islands generally, but thunder heard at Holyhead and also at Paris in evening.

Temperature risen over Great Britain, the Netherlands and France, but fallen in most other parts of Europe. Morning readings highest 83° at Patras, 80° at Brindisi, 77° at Athens, and 70° at Malta and Algiers; above 65° over Western Germany, central Sweden, and the southeast of Scotland, and above 60° in many parts of the United Kingdom. Lowest 47° at Rode, 48° at Moscow, 50° at Kharkov, and 51° at Archangel. Rising during day to 70° and upwards in most parts of Western Europe, and reaching 77° at Paris, Berlin, and Perpignan; not exceeding 57° at the North Foreland.

Wind NE³ over England, the Netherlands, Germany, and the northern parts of France; fresh or strong in force at the Channel stations. Light from the N² in Ireland; calm or variable in Scotland. Moderate to strong from the W² or SW² over the northern parts of Scandinavia, with a gale at Christiansund, light from the NW² or N² in Russia. Light and variable over the whole of southern Europe. W¹ or NW¹ breezes setting in later at several of the English stations; no important change occurring elsewhere.

Barometer highest 30.4 ins. and upwards over the northern and central parts of Ireland, 30.2 ins. and upwards, in an anticyclone stretching from the Atlantic over the whole of our Islands, the North Sea, Denmark, and the southern half of Scandinavia. Lowest 29.9 ins. and less, over Lapland, Central Russia, and the eastern part of the Mediterranean, as well as in a small area lying over the southwest of Portugal. Fall taking place over Northwestern Europe during day, and anticyclone beginning to break up.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE I.

WEATHER.—*Beaufort Scale* is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on Sunday 9th June, 1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.1 ins. and upwards in an anticyclone stretching from the Atlantic over Ireland and the St. George's Channel.
 Lowest, 29.3 ins. and less, in a depression over the North of Norway.
 Gradients slight generally, but moderate to rather steep over the northern part of Scandinavia.
 Barometer falling at all but the French and German stations, briskly in the north of Scandinavia.

TEMPERATURE

Highest, 69° at Brussels, 68° at Berlin and Wiesbaden, 67° at Harle Point, and 66° in London.
 Lowest, (1) 49° at Bodo, 52° at Lumburg Hed, 53° at Haparanda, Christiansund and Storoway and 54° at Hudesmao; (2) 50° at Cape Fris Key.
 During yesterday the thermometer rose to 75° and upwards in many parts of Great Britain and to 80° in London; at the North Foreland it did not exceed 57°.

WIND

Light to moderate from Wnd over the northern parts of our Islands and also in the south of Scandinavia; strong to a gale from the same quarter or from SW. in the west of Norway.
 Light from the End over the Netherlands; Nnd over the south of our Islands and the north of France, calm or variable in the south of France.

WEATHER

Bell at most of the Irish and Scotch stations, with rain in the Shetlands and Hebrides, as well as in the west of Norway.
 Fine and bright in nearly all other parts of Western Europe.
 Since yesterday morning a little rain has fallen in the extreme north and northwest of our Islands, and a considerable quantity at Bodo. Thunderstorms and rain have occurred at Lyons and Biarritz. A Solar halo was seen at Oxford yesterday.

SEA

Slight or smooth generally.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

WARNINGS

None issued.

None issued.

Note.—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning dull at most of our own northern stations, and rainy in the west of Norway. Dull also over the Baltic, Central Russia and the greater part of southern Europe, with rain at Yola and Khendisi; fine over the central and southern parts of our Islands and all the more central part of the Continent. Sky clearing later at many of our northern stations, but rain setting in at night in the Shetlands and Hebrides. Thunderstorms, with rain, occurring at Lyons and Biarritz. Solar halo seen at Oxford.

Temperature risen over England, France, Germany, and the south of Russia; changed rather irregularly elsewhere, but fallen in most places. Morning readings highest (1) 75° at Patras, 74° at Barcelona, 72° at Malta, and 71° at Palermo; (2) 69° at Shields, and 67° at Newcastle, (3) 67° at Aberdeen and 66° at Carlisle. Lowest (1) 45° at Rode, 50° at Archangel and 51° at Moscow; (2) 51° at the North Foreland and C. Fri. Vig. Rising during day to 75° and upwards in many parts of Great Britain, and reaching 80° in London, but not exceeding 57° at the North Foreland. Rising to 80° at Kiev and 81° at Berlin.

Winds rather variable over the northern parts of our Islands, but chiefly W¹ or NW¹. Light to moderate from the N² or NE² in the south of our Islands, as well as in the Netherlands and north of France; light and variable over the greater part of southern Europe SW¹ in the west of Norway with a moderate gale at Christiansund; NW¹ over the northern and central parts of Russia. No important change occurring during day, but gale at Christiansund increasing somewhat in strength.

Barometer highest 30.3 ins. and upwards in an anticyclone lying over and to the westward of Ireland. Lowest 29.6 ins. and less, in a depression over northern Russia; 29.9 ins. and less, in an elongated area extending from the northeast of Spain to the Balkan Provinces, and also in another area over Asia Minor and the eastern parts of the Mediterranean. Barometer falling over Western Europe during day, but general distribution of pressure remaining unchanged.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " " £1 10 0

DAILY WEATHER REPORT

for 8 a.m. on *Monday, 10th June, 1895*
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.1 in. and upwards in an anticyclone stretching from the Atlantic over the central and southern part of Ireland.
Lowest, 29.7 in. and less, over the northern part of Scandinavia.

Gradient slight. Barometer rising over the west and south of our Islands, and the greater part of France, as well as in the north of Scandinavia, falling slightly elsewhere.

TEMPERATURE

Highest, 71° at Stockholm and Berlin, 70° at Brussels, 65° at Cuthbert, Wiesbaden and Lyons, and 64° at Dungeness, Paris, and Rochefort.
Lowest, 48° at Bodo, 50° at Christianaund, 52° at Sumburg Head and 54° at Barrahead and Holyhead.

During yesterday the thermometer rose to 75° at York and Hurst Castle, to 76° at Loughborough, to 79° at Cambridge, and to 80° in London and at Oxford.

WIND

Light to moderate from the Wnd over the northern part of our Islands, as well as at most of the Scandinavian and Danish stations.
Nnd over the south of our Islands, the Netherlands and the north of France, and fresh in force on our southwest coasts.

Variable in Germany; light from the Snd or SEnd over the central parts of France; calm in the south of that country.

WEATHER

Fair or fine over Western Europe generally, but dull in many parts of England and France, as well as on our extreme northwest coasts. Rain was falling at Tromsø and Christianaund. Solar halos are reported at Oxford and Jersey.

A little rain fell yesterday over the northern parts of Ireland and Scotland and on the west coasts of Norway. Rain fell also in many parts of France and in South Germany, heavily at Rochefort, where a thunderstorm occurred. Thunder was heard at Lyons, and lightning was seen in the evening at Jersey.

SEA

Slight or smooth generally.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The anticyclone in the west is inclined to spread eastwards again; and although a little rain may possibly occur on our extreme north and northwest coasts the weather over the United Kingdom ^{generally} is likely to remain fair and dry.

FORECASTS

For the 24 hours ending at NOON on 11th JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	W nd winds, freshening; cloudy, some rain.
1	SCOTLAND EAST	W nd winds, light; fine at first, then changeable and showery.
2	ENGLAND N.E.	W nd and NW nd winds, light; fair generally.
3	ENGLAND EAST	} N nd winds, light; fair generally
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	Same as N° 1
7	ENGLAND N.W.	Same as N° 2.
8	ENGLAND S.W.	N nd winds, moderate or fresh; fair generally.
9	IRELAND NORTH	W nd or NW nd winds, moderate; cloudy, local showers.
10	IRELAND SOUTH	Same as N° 8.
WARNINGS		None issued.

Note.—The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Continental Information not received.

SUMMARY OF CHANGES IN THE WEATHER OVER THE BRITISH ISLANDS AND THEIR NEIGHBOURHOOD. FROM THE 2nd TO THE 8th JUNE 1895.

At the beginning of the week when a large anticyclone ruled over Northern Europe the weather ^{in our Islands} was affected by a complex depression which had spread from the westward over the more southern parts of the Kingdom. NE³ winds were prevalent in the north, but variable or S² breezes in the south, the weather being in a changeable unsettled state, with thunder showers in many places. Temperature was generally high over the inland parts of Great Britain, and unusually high in the west of Scotland, but low on our east and southeast coasts where fog was again reported.

The low pressure system soon moved away, however, to the southward, the barometer rose generally, and while the northern anticyclone gave way a new area of high readings began to extend over our Islands from the Atlantic. The latter system eventually spread over all the more western and northern parts of the Kingdom, and fine dry weather set in generally, with variable airs on our northern coasts, but with NE³ winds over Ireland and England. Temperature rose steadily and during the last few days of the week maximum readings of 70° and upwards were registered in most places, while on the 8th the thermometer exceeded 80° in London.

At the end of the period the anticyclone began to give way, and a large depression which originally appeared over the north of Scandinavia spread down in a southerly and southwesterly direction. NW³ breezes consequently set in over the northern parts of the Kingdom, with cloudy unsettled weather, and with a considerable fall of temperature. Over the country generally, however, the weather remained fair and dry.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE I.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
„ Weekly „ „ „ „ £1 10 0 „

DAILY WEATHER REPORT

for 8 a.m. on Tuesday 11th JUNE, 1895
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

WEATHER CHARTS

FOR

Tuesday, 11th JUNE,

1895.

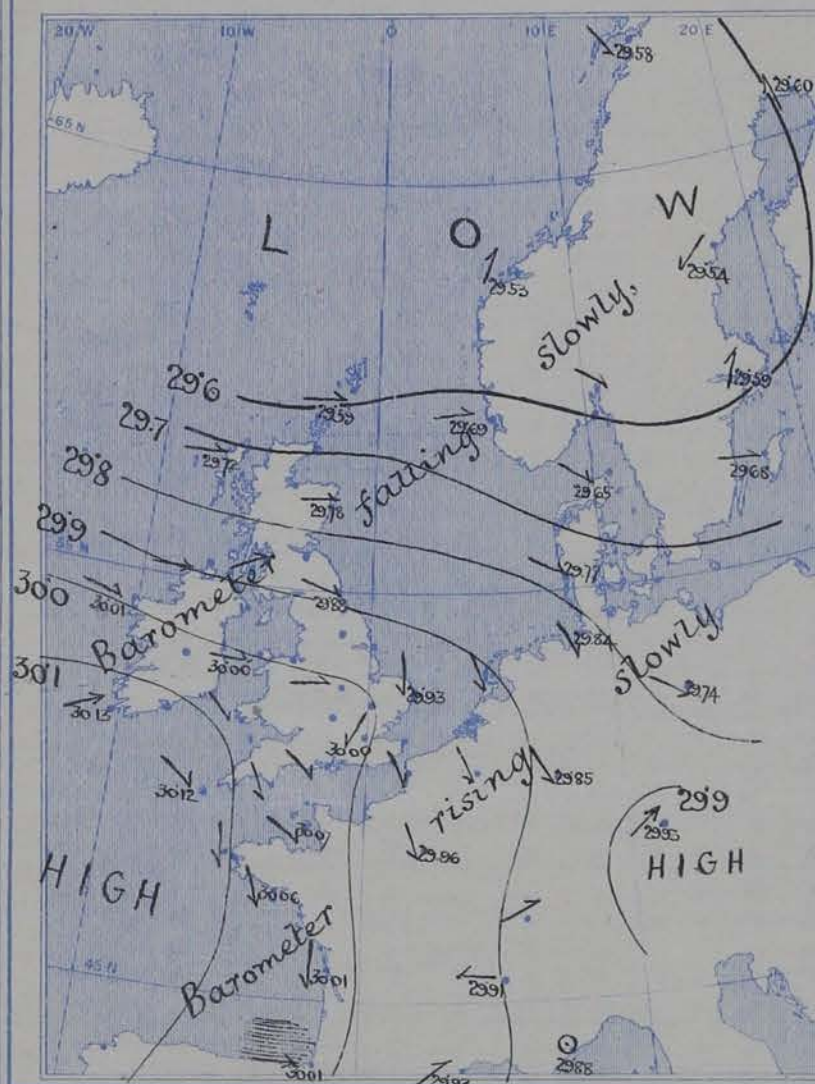

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 → : Force 5 to 7 → : } Calm ○
Force 8 to 10 → : Force 1 to 4 → :

SEA—Rough : High

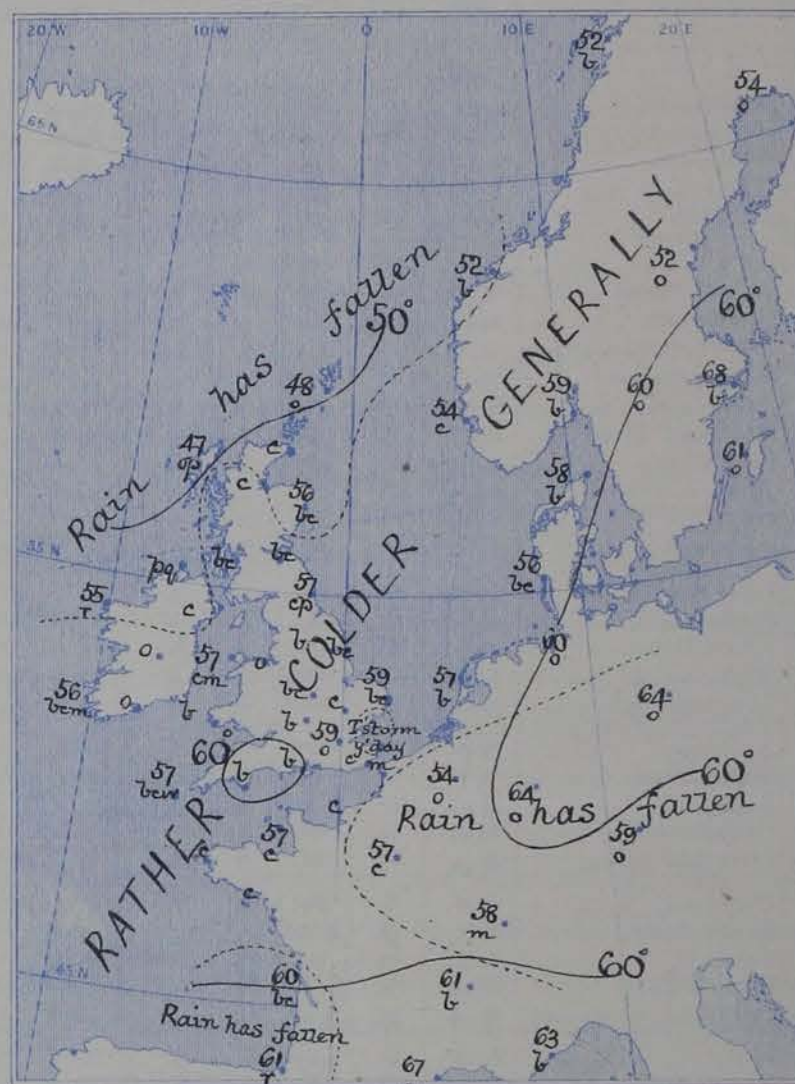

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

STATIONS.	PRESSURE AT 8 A.M. (20 years 1871—90). (Inches.)	TEMPERATURE. (20 years 1871—90).				RAINFALL. (25 years 1866—90). (Inches.)	BRIGHT SUNSHINE. (10 years 1881—90).

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest 30.1 ins. and upwards in an anticyclone lying off our southwest coasts.
Lowest 29.6 ins. and less in a large shallow depression over Scandinavia and the adjacent parts of the Atlantic.
Gradients slight. Barometer rising over France, Germany, the Netherlands and the S. of England, but falling elsewhere.

TEMPERATURE

Highest (1) 68° at Stockholm, 64° at Berlin and Wiesbaden, and 61° at Wisby, (2) 67° at Perpignan, 63° at Nice, and 62° at Prawle Point and Hurst Castle.
Lowest 47° at Stornoway, 48° at Sumburgh H^d, and 52° at Hernösand, Bodö, Christiansund & Malin H^d.
The highest maxima reported over our Islands yesterday were 73° at Prawle Pt., 72° at Hurst Castle, and 71° at Loughborough and Oxford.

WIND

Light to moderate from the Wnd over all the more Nth parts of our Islands, and also in Denmark and the south of Scandinavia.

NW^{ly} over the south of England, the Netherlands and the north and west of France.
Variable or SW^{ly} over the southern parts of France and Germany.

Fair or fine over western Europe generally, but showery on our extreme NW. coasts, and also at Shields.
Dull at the Swedish and German stations.

WEATHER

Rain fell yesterday in the extreme N. and NW. of our Islands, as well as at several of the French and German stations. A thunderstorm with rain occurred at the N. Foreland at 1 pm.
A solar halo was seen at Jersey yesterday, and at Oxford this morning.

SEA

Moderate to smooth generally, but rather rough at Biarritz.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The low pressure system in the north is inclined to spread southwards, and is likely to occasion some extension of showery weather. Over the southern parts of our Islands, however, no material change is anticipated within the ensuing 24 hours.

FORECASTS

For the 24 hours ending at NOON on 12TH JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	W ^{ly} winds, moderate, cool, changeable, some showers.
1	SCOTLAND EAST	
2	ENGLAND N.E.	
3	ENGLAND EAST	NW ^{ly} to W ^{ly} winds, light, fair generally.
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	Same as Nos 0 to 2.
7	ENGLAND N.W.	W ^{ly} winds, moderate, fair at first, then cloudy and showery.
8	ENGLAND S.W.	Same as Nos 3 to 5.
9	IRELAND NORTH	Same as Nos 0 to 2.
10	IRELAND SOUTH	
WARNINGS		None Issued.

Not —The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over the Continent as a whole, as well as in many parts of our Islands, but dull and unsettled in the extreme W. and NW. rainy at Stornoway and Christiansund. Rain falling later in moderate quantity over the Shetlands and Hebrides, and in small quantities in the N. of Ireland and W. of Norway. Thunderstorm reported at N. Foreland, local showers over Germany and France.

Temperature highest 74° to 70° over Greece, at Malta and at Algiers, and exceeding 60° at all but the most N. and NW. stations. Lowest 48° at Bodo, 50° at Christiansund, 52° at Sumburgh N., 54° at Holyhead. Rising later to between 70° and 78° over France, and to 84° at Berlin; to 71° at Loughborough and Oxford, and 77° at Stockholm.

Wind (1) Light and variable over the Continent generally, (2) anticyclonic W. over the N. parts of Ireland and England, N. in the S. and over the channel (3) cyclonic W. in the N. of Scotland, SW. to S. in Norway.

Barometer highest 30.1 ins. and more to 29.9 ins. (1) over the British Islands and neighbouring parts of the Atlantic (2) over the Black Sea, S. of Russia, Austria and E. Germany. Lowest below 29.5 ins. over the N. of Russia, below 29.7 ins. off the NW. of Norway, and below 29.9 ins. over the Netherlands, France and the NE. of Spain. A shallow depression approaching Norway from the westward later.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 6 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on

Wednesday, 12th June,

1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

WEATHER CHARTS

FOR Wednesday, 12th JUNE, 1895.

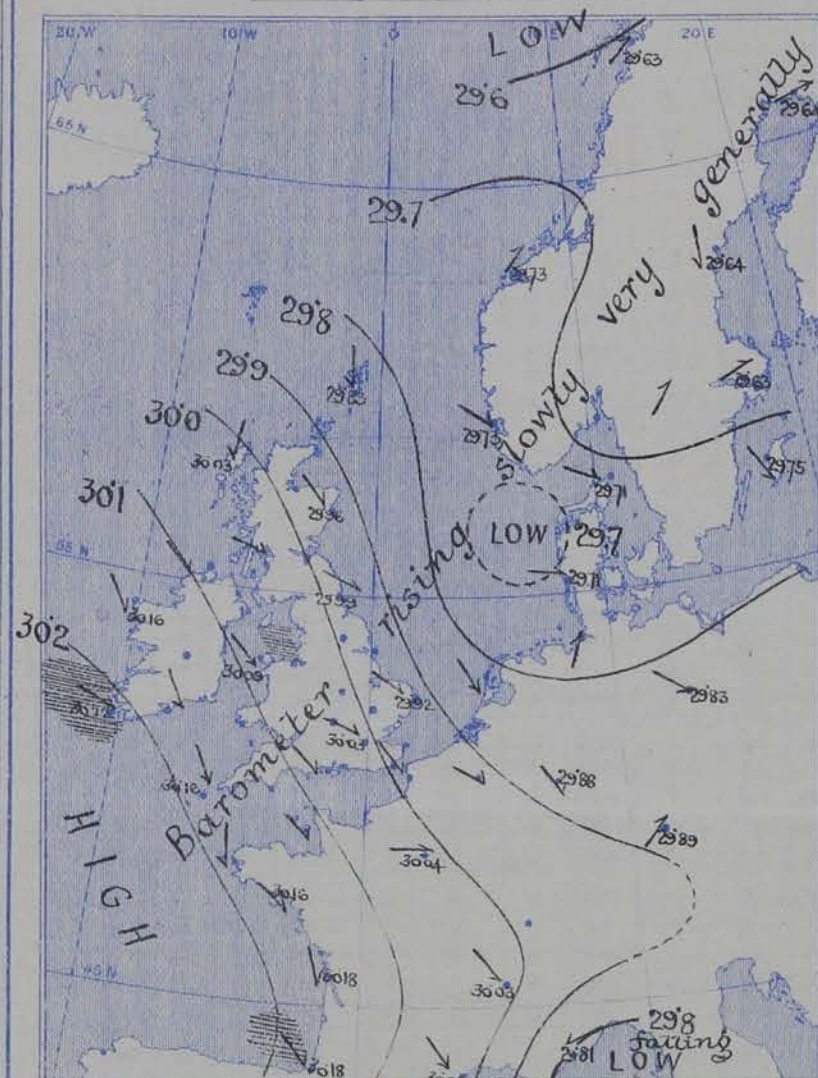

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each 1/10th of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 \rightarrow ; Force 5 to 7 \rightarrow ; Force 8 to 10 \rightarrow ; Force 1 to 4 \rightarrow ; Calm \odot

SEA—Rough \equiv ; High \equiv

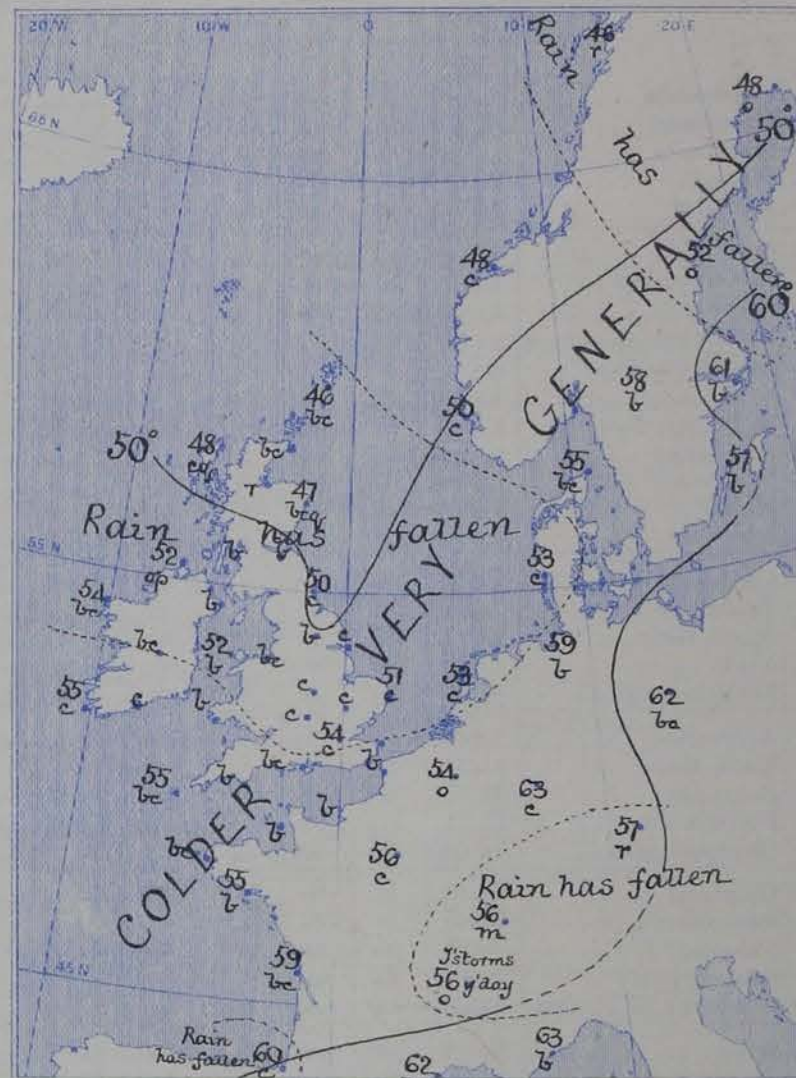

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest 30.0 in. to 30.2 in. and more over the British Islands, France, Spain, and adjacent parts of the Atlantic.
 Lowest, 29.7 in. and less, over Sweden and the greater part of Norway, and in a small depression off the west coast of Denmark.
 Gradient moderate and mainly favourable for NW winds over the British Islands.
 Barometer rising in our Islands generally.

TEMPERATURE

Highest, 66° at Lisbon, 63° to 60° in the south of France, 62° at Berlin, 61° at Stockholm.
 Lowest, 43° to 47° at the northern Scotch stations, 46° to 48° over Lapland and the northern parts of Norway.
 Maxima were recorded yesterday as high as 72° to 70° at a few of our southern stations, but those in the north of England were from 5° to 8° lower; in the extreme north of Scotland the thermometer did not rise above 55° all day.

WIND

(1) SW³ in the north of Norway, and SSW³ at Copenhague. (2) NW³ moderate to fresh, over the British Isles generally, as well as over the Channel and Bay of Biscay; SW at Belfast and Munich.

WEATHER

Rather showery at our northern stations, fair elsewhere, and in many places clear - rainy at Munich.
 Rain has fallen in the northwest, north and east, but except in the north of Scotland the falls reported have been slight.
 Much thunder and lightning have occurred at Lyons.

SEA

Rather rough at several western stations, moderate or slight elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The disturbances which lay over Scandinavia and the North Sea yesterday are moving eastwards and filling up.
 Fair cool weather is probable over England and Ireland as a whole.

FORECASTS

For the 24 hours ending at NOON on 13th JUNE, 1895.

DISTRICTS.

FORECASTS.

- 0 SCOTLAND NORTH
- 1 SCOTLAND EAST
- 2 ENGLAND N.E.
- 3 ENGLAND EAST
- 4 MIDLAND COUNTIES
- 5 ENGLAND SOUTH

NW³ breezes, fresh or moderate, slight passing showers, bright intervals. Cold tonight.

DISTRICTS.

FORECASTS.

- 6 SCOTLAND WEST
- 7 ENGLAND N.W.
- 8 ENGLAND S.W.
- 9 IRELAND NORTH
- 10 IRELAND SOUTH

Same as Nos 0 to 5.

NW³ breezes, moderate; fine, cold tonight.

WARNINGS

None issued.

Note - The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over northern, eastern, and southeastern Europe, and also in many parts of the British Isles, dull, unsettled and showery, however, on our northwestern coasts, rainy at Biarritz. Considerable rain in the north of Scotland later, and smaller quantities in the northwest, north, and east of the British Isles generally, as well as in Lapland, the north of Sweden, and south of France; much thunder and lightning at Lyons.

Temperature falling in north of British Isles. Morning readings highest 81° at Athens, and exceeding 70° at Athens, Malta, Algiers and Barcelona, 70° at Stockholm, 69° at Moscow, and above 60° over all but the northwestern countries. Lowest 47° at Stornoway, 48° at Sumburgh Head, and 52° at Malin Head, Wick, and Christiansund. The fall in north spreading southwards later, but maxima recorded of 75° at Stockholm, 72° at Hurst Castle, 74° at Lyons; no reading above 52° at Sumburgh Head and Stornoway.

Wind (1) NW to W over the United Kingdom, NW and N over France — light in most places, but strong at Malin Head; (2) NW over Denmark, but S over the Baltic Provinces and Finland. Shifting to NW more generally over our Islands later, and freshening somewhat.

Barometer highest (1) 29.9 ins. to 30.1 ins. over Ireland, England, France, Spain, and adjacent parts of the Atlantic; (2) 29.9 ins. to 30.0 ins. and more over the southeastern countries and the southern half of Russia. Lowest about 29.5 ins. to 29.6 ins. in a complex depression over Scandinavia and the Shetlands, and below 29.8 ins. in a "V" stretching southwards across the Baltic to Germany. Northern disturbances moving southwards later.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.
N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on *Thursday, 13th June,* 1895
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest 30.2 ins. and more to 30.1 ins. in an anticyclone of irregular form, covering the British Isles, France, Spain and the Bay of Biscay.
 Lowest: Below 29.7 ins. over the Gulf of Bothnia and the southern parts of Scandinavia.
 Gradients very slight within the anticyclonic system, still moderate for NW winds over the North Sea.
 Barometer commenced to fall over Ireland and the N. of Scotland, but rising over England and the North Sea.

TEMPERATURE

Highest 69° at Lisbon, 68° at Nice; 64° at Haparanda, below 60° elsewhere.
 Lowest 45° to 47° in the N.W. of Norway and over the Shetlands, 48° at Skudenes, 49° at Stornoway.
 The maxima recorded over our Islands yesterday were all below 65°. The minima, early this morning were low, and on the grass the thermometers fell to 35° in London, and 34° at Oxford.

WIND

NW²; - strong, on the eastern shores of the North Sea, light on our northeast and east coasts.
 In Ireland, however, it was shifting to the SE² and S², but was light.
 Over the Bay of Biscay it was NE², and light.

WEATHER

Still fine in most places, but had become unsettled in Ireland, with rain at Rock's Pt. and Valencia.
 Showers fell yesterday at the northern and some western stations, thunder occurred in parts of our Midland and southeastern counties, and halos were seen in London and at Oxford.

SEA

Moderate at our extreme northern and western stations, slight or smooth elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

A new low-pressure area is apparently advancing towards Ireland. Fine weather is probable over England today, but showery conditions, with thunder in places, are probable shortly.

FORECASTS

For the 24 hours ending at NOON on 14TH JUNE. 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	Very variable winds, weather fine, then unsettled and rainy.
1	SCOTLAND EAST	
2	ENGLAND N.E.	
3	ENGLAND EAST	Variable airs and fine, then S ² winds, unsettled, showery, thundery.
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	}	Same as Nos 0 to 2.
7	ENGLAND N.W.		
8	ENGLAND S.W.	}	Same as Nos 3 to 5.
9	IRELAND NORTH		
10	IRELAND SOUTH	}	SE ² and S ² winds, weather becoming rainy & thundery.
WARNINGS			
			None Issued.

Note.—The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning still fine and bright on the shores of the Black Sea, as well as at most stations in southwestern and western Europe; cloudy and unsettled, however, on our own northwestern and northern coasts and in the northwest of Norway, with rain at several of the stations. Showers falling later at our northern and several of the western stations, thunder occurring locally over our Midland and southeastern countries; halos seen at Oxford and in London.

Temperature fallen decidedly over the British Islands, France and North Germany. Morning readings exceeding 70° at the stations in southeastern Europe, at Algiers, Palma and Oporto, touching 70° at Moscow, and exceeding 60° over northern and central Europe and the N. of Russia. Lowest 43° to 47° over the northern half of Scotland, 46° at Sumburgh Head and Bodø, 48° at Haparanda and Christiansund. Failing to reach 65° over our Islands during the day, but touching 73° at Nice, 72° at Berlin, and 66° at Paris.

Wind (1) NW², fresh to moderate over the United Kingdom, the west of France and North Sea, but SW⁴ to S² over many parts of northern Europe, and the Baltic; NE⁴ over the north of Italy, NW² over the Mediterranean, SE⁴ to S⁴ over the south of Russia and Hungary. Becoming variable over our Islands later — the wind backing to SW. in a few localities, but decreasing in force generally.

Barometer. Highest (1) 30.2 ins. and more to 30.0 ins. in a large low pressure area spreading in from the Atlantic over the British Islands and western Europe; (2) 30.0 ins. and more to 29.9 ins. over the south of Russia. Lowest below 29.7 ins. in a large shallow area of low pressure lying over Scandinavia and Finland, and below 29.8 ins. in another over Italy, the Adriatic and the E^m half of the Balkan Peninsula. Rising slowly in our Islands till midnight.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on *Friday, 14th June,* 1895
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

WEATHER CHARTS

FOR

Friday, 14th JUNE.

1895.

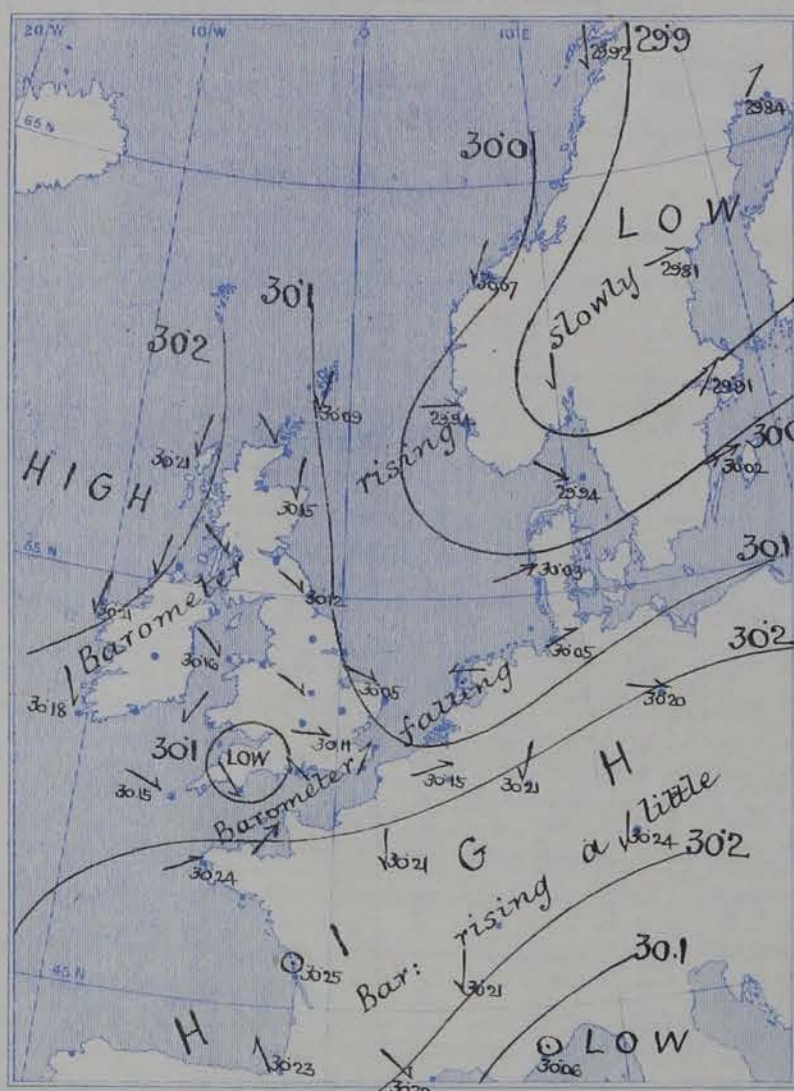

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 →→→ : Force 5 to 7 →→→ : } Calm ☉
Force 8 to 10 →→→ : Force 1 to 4 →→→ :

SEA—Rough ≡≡≡ : High ≡≡≡

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.2 in: and more (1) over the Bay of Biscay and the central part of France and Germany; (2) off the extreme northwest coast of our Islands.
Lowest, 29.9 in: and less over Lapland and Sweden, and below 30.1 in: in a very shallow disturbance over Dorsetshire.

Gradients slight and variable in direction.

Barometer inclined to rise in the north, but changing very little elsewhere.

TEMPERATURE

Highest, 64° to 65° in the south of France, but below 60° over our Islands and Germany.

Lowest, 45° to 47° in the northwest of Norway, 45° at Aberdeen, 48° at Sumburgh Head and 49° at Naerø.

The maxima recorded over England yesterday did not exceed 67° at any of our stations. The night was cold over the Midlands, Loughborough reporting 40° in the shade and 39° on the grass.

WIND

(1) Very light and variable from the N^W over Ireland, Scotland, and the north of England. S^W to SW^W in the English Channel, very light and variable over France and the Bay of Biscay.

(2) N^W at the Norwegian stations, SW^W in Sweden. A gale from WSW is reported at Helsingfors.

WEATHER

Fine in Norway and the extreme north and west of our Islands, but rainy at several of the southern stations, and rather showery at Shields.
A little rain has fallen at most of the northern stations, and a larger quantity over the southern part of Ireland and England. Thunderstorms have occurred off our southeast coasts.

SEA

Moderate in the north and at Jersey, slight or smooth elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The distribution of pressure is of a type liable to produce rather unsettled weather, and some rain is probable in most parts of England during the coming twenty-four hours, with thunder in places.

FORECASTS

For the 24 hours ending at NOON on 15th JUNE, 1895

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	} N ^W and NE ^W breezes; fair as a whole
1	SCOTLAND EAST	
2	ENGLAND N.E.	NE ^W airs and light breezes; some rain.
3	ENGLAND EAST	} Varying breezes, light to moderate; rain at times, perhaps thunder.
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	} Same as Nos 0 and 1.
7	ENGLAND N.W.	
8	ENGLAND S.W.	N ^W and NW ^W breezes, light; fair.
9	IRELAND NORTH	} Same as Nos 0 and 1.
10	IRELAND SOUTH	
WARNINGS		None issued.

Note—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over Spain, France, and England, as well as on the Norwegian coast and at several of the Baltic stations, cloudy, and rather unsettled elsewhere, with rain locally in the west of Ireland and in Hungary and several parts of Italy. Rain falling later in small quantities over the northern parts of our area, and in considerable quantity in the extreme south of Ireland and England. Thunderstorms occurring at Yarmouth and the North Foreland.

Temperatures highest 70° to 75° at the stations in southeastern Europe, 72° at Algiers, 71° at Palma and Lissina, 70° at Leshorn. Below 60° over the British Islands, northwestern and central Europe generally, and lowest of all 45° at Christiansund and Wick, 46° at Sumburgh Head, 47° at Rodø. Rising to between 65° and 67° over our Ireland counties later, to 75° at Nice, and 82° at Lisbon, and touching 70° even at Capasaunda. Night very cold over our north-midland counties.

Wind light and anticyclonic over the British Islands, France, and Spain, (2) NW, and strong on the eastern shores of the North Sea, W, a gale, at Nisby, SSW, light on the eastern shores of the Baltic, (3) NE to N in the north of Italy (but S at Sanquiniere) NW at Cagliari, Palermo, and Malta, SW over Greece. Becoming cyclonic and freshening slightly over England later.

Barometer highest 30.2 ins. and more to 30.1 ins. in an anticyclone covering the British Isles and Western Europe. Lowest (1) 29.7 ins. and less, in a depression over Sweden and the Gulf of Bothnia, (2) 29.8 ins. and less, over Aria Minor, over Hungary, and over the Adriatic, (3) 29.9 ins. and less over Corsica. Falling a little over Ireland and England later, owing to the advance of a small shallow depression from the westward.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.
N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on

Saturday, 15th June,

1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

NOTE The Sunshine for London given in this Table is now recorded on the tower of the Wesleyan Training College, Westminster.
Eastbourne: Sunshine yesterday 3 hrs.

WEATHER CHARTS

FOR *Saturday 15th JUNE, 1895.*

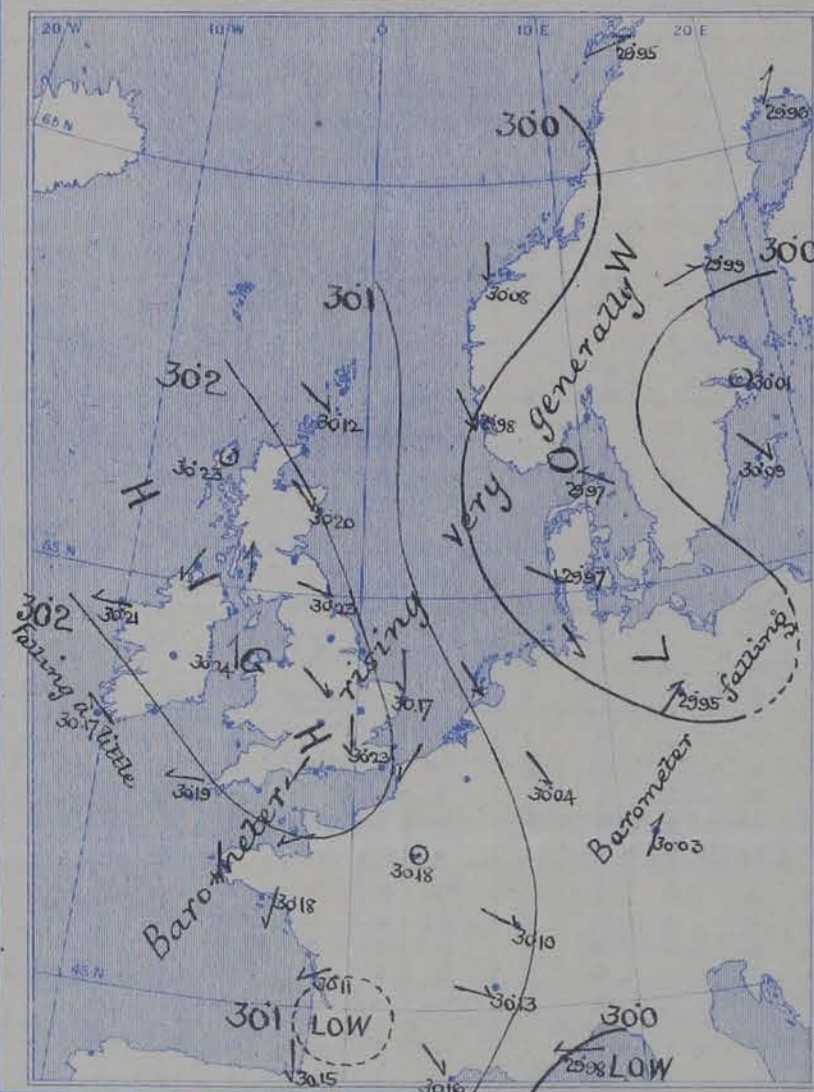

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 \rightarrow ; Force 5 to 7 \rightarrow ; Force 8 to 10 \rightarrow ; Force 1 to 4 \rightarrow ; Calm \odot

SEA—Rough \equiv ; High \equiv

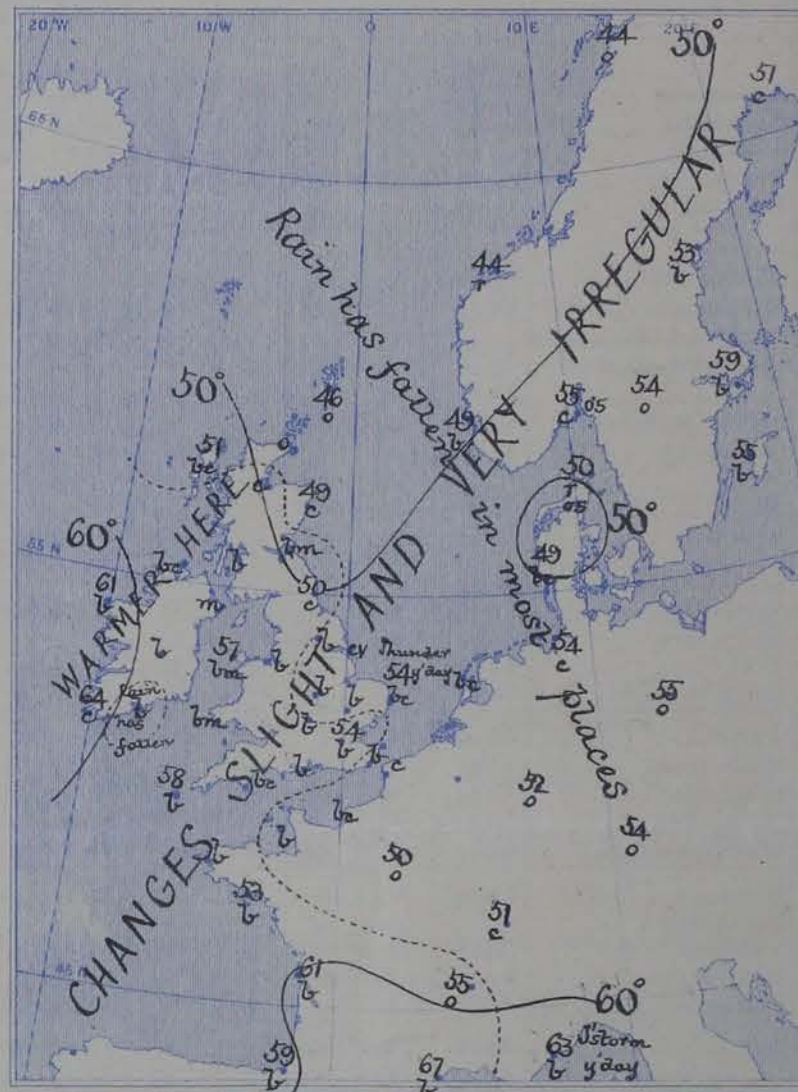

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.5.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, (1) 30.2 ins: and more in an anticyclone covering the British Islands, and exceeding 30.1 ins: over France; (2) 30.1 ins: and more in another high pressure system over Central Europe.

Lowest, Below 30.0 ins: over the greater part of Scandinavia, Denmark, Holstein, and Saxony.

Gradients very slight over the United Kingdom and France, moderate for N¹ winds over the North Sea. Barometer inclined to fall in the west of Ireland, rising a little elsewhere.

TEMPERATURE

Highest, 64° at Lisbon and Valencia (Ireland), 63° at Nice, 60° at Jersey, and 59° at Stockholm.

Lowest, 44° in the northwest of Norway, 48° at Wick and Kairn.

Sharp frost occurred on the ground over our midland counties during the night - the minima recorded being 32° in the shade and 26° on the grass at Loughborough, and 29° on the grass at Oxford.

WIND

Very light to moderate over our Islands and their neighbourhood - NW at the eastern stations, NE to E in the south and SE in the west. On the eastern shores of the North Sea there is a cyclonic circulation of light breezes.

WEATHER

Very fine over our Islands, fair over France; sunny at the Scour; dull at Berlin and Karlstad.

Light showers have fallen both at our northern and our southern stations and larger quantities of rain on the eastern shores of the North Sea.

SEA

Moderate at Lumburgh Head and at Cape Gris Nez, slight to smooth elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The new anticyclone over our Islands seems inclined to give way a little on its western side, and some freshening of the southeasterly wind in the west, and the easterly wind over the Channel is probable.

FORECASTS

For the 24 hours ending at NOON on 16TH JUNE, 1895.

DISTRICTS.

FORECASTS.

- 0 SCOTLAND NORTH
- 1 SCOTLAND EAST
- 2 ENGLAND N.E.
- 3 ENGLAND EAST
- 4 MIDLAND COUNTIES
- 5 ENGLAND SOUTH

NW^{1/4} airs and Calms, followed by S^{1/4} breezes; fair generally.

N^{1/4} and NE^{1/4} breezes, light or moderate; fine, cold tonight.

DISTRICTS.

FORECASTS.

- 6 SCOTLAND WEST
- 7 ENGLAND N.W.
- 8 ENGLAND S.W.
- 9 IRELAND NORTH
- 10 IRELAND SOUTH

SE^{1/4} and S^{1/4} breezes, light; fine at first, some showers later.

SE^{1/4} breezes, light or moderate; fine, warmer.

SE^{1/4} and S^{1/4} winds, light to moderate; showers in southwest; fine in northeast.

WARNINGS

None issued.

Note - The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over the Spanish Peninsula and Central Europe, and in several of the western and northern parts of the British Islands; rainy along the south coast of England and the Channel, as well as at Christiansund - rainy also over southeastern Europe, thunder prevalent at the Helder. Considerable rain later over the countries lying to the eastward of the North Sea, and slight falls over the northern and extreme southern part of our Islands, thunder occurring at Yarmouth.

Temperature fallen fast over England and less quickly, over Russia. Morning readings highest 75° at Athens, 70° or more at Constantinople, Palermo, Algiers, Palma, and on the southeast coast of Spain; 69° at Moscow, and exceeding 60° over the southern part of Russia. Lowest 45° to 47° in the northwest of Norway, 45° at Aberdeen, 48° at Sumburgh Head, 50° at York and Ardrossan. Not touching 70° in any part of our Islands later, and falling very low over the midland counties at night - where sharp frosts occurred on the grass.

Wind (1) N over Norway, W over Denmark, (WSW gale at Moby) SW over the Gulf of Bothnia and Finland; (2) N and NW over the United Kingdom as a whole, but SW over the eastern parts of the Channel and SE at Hurst Castle; (3) light and anticyclonic over Spain, France and Germany. N wind becoming still more general over the United Kingdom later.

Barometer highest 30.2 ins. and more to 30.1 ins. in an anticyclonic system covering Spain, France and Germany, and in another lying off our northern coasts. Lowest 29.8 ins. to 29.9 ins. in a depression lying over Lapland and Sweden; below 29.8 ins. in another over the south of Russia, and below 30.1 ins. in a small and very shallow one over Dorsetshire. Rising over our Islands later as the northern anticyclone spread southwards, and the small depression over England travelled away to the North Sea.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.

„ Weekly „ „ „ £1 10 0 „

DAILY WEATHER REPORT

for 8 a.m. on Sunday 16th June, 1895
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

NOTE: The Sunshine for London given in this Table is now recorded on the tower of the Wesleyan Training College, Westminster.

WEATHER CHARTS

FOR SUNDAY, 16th JUNE, 1895.

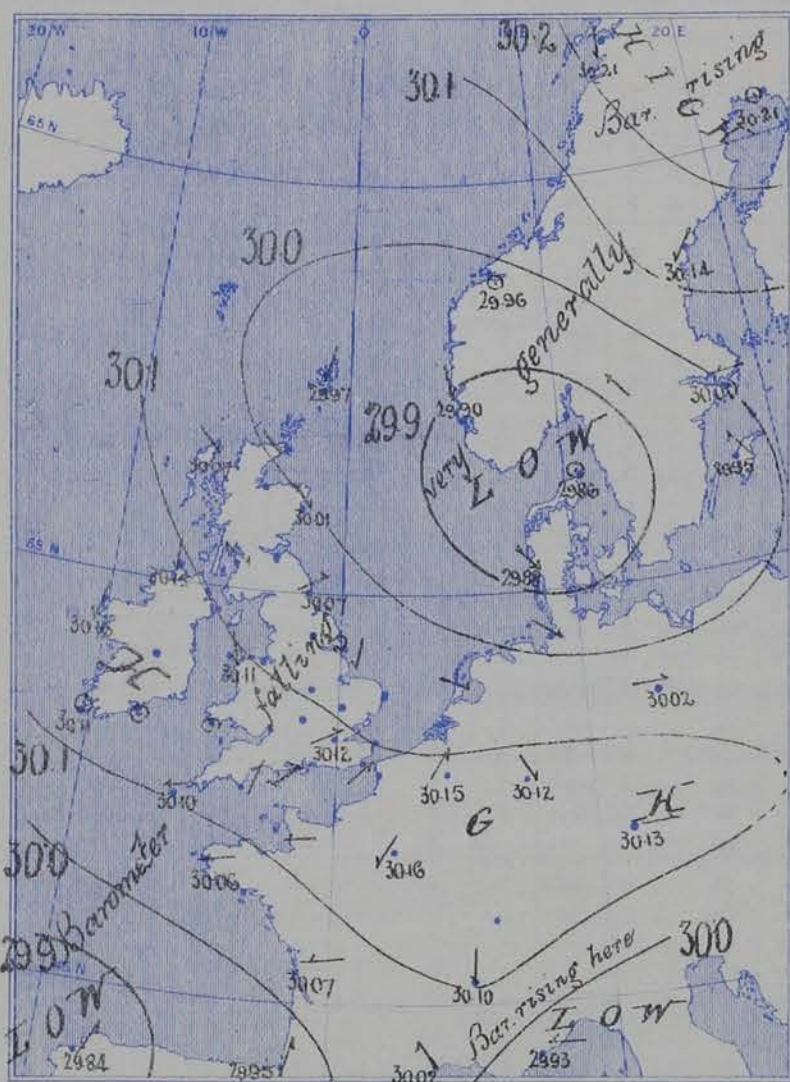

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 \rightarrow ; Force 5 to 7 \rightarrow ; Force 1 to 4 \rightarrow ; Calm \odot

SEA—Rough \equiv ; High \equiv

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest (1) 30.2 ins: and more to 30.1 ins. over Lapland and the north of Scandinavia; (2) 30.1 ins: and more over Ireland, the south-western half of England, the north and east of France, and Western Europe; (3) 30.0 ins: and more in the south of Spain.
Lowest (1) 29.9 ins: and less, in a depression over Denmark and in another near Cuxhaven; (2) Below 30.0 ins: over the rivers of Spain.
Gradients very variable in direction and slight.
Barometers have risen decidedly over Lapland and slightly at Lisbon, but falling elsewhere.

TEMPERATURE

Highest, 66° to 69° at the Spanish and southern French stations; 62° at Stockholm, 61° at Wiesbaden and Mainz, 60° at Rochefort, Valencia (Ireland).
Lowest 48° at Porto, 49° at Lumburg Head, 50° at the Velder, 51° at York and Berlin.
The maxima recorded over Great Britain yesterday were nearly all below 66°, but 70° was reached at Barnstaple. The past night has again been very cold inland, the minima in the shade being 34° at Loughborough, 38° at Dungeness, 39° at York; at Loughborough the thermometer on the grass fell to 29°.

WIND

(1) NE light to calm, over the northern part of Scandinavia, NW fresh over the North Sea, W over North Germany, SE at Wiesbaden.
(2) NW at our northern and eastern stations, E over the western part of English Channel and over the Bay of Biscay, SW to W over Spain.
(3) Calm over the greater part of Ireland.

WEATHER

Fine and bright over the greater part of France, England and Ireland, also over Lapland and the north of Scandinavia; cloudy or overcast at the stations in Scotland, Denmark, and the southeast of Norway, with rain at Trondheim. Rain has fallen in the north of Scotland, and in the countries lying to the eastward of the North Sea, at Christiansund, Trondheim and Munich the fall was about a quarter of an inch. Elsewhere the weather has remained dry.

SEA

Slight in the north and northeast and at Jersey, smooth or very smooth elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

Note—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning very fine over the British Isles, Spain, and the west of France, also over several parts of Russia, and central Europe; cloudy more or less elsewhere, and somewhat unsettled, raining at Christiansund. Rain later over Scandinavia, Denmark and Germany, and a little in the north of Scotland; weather very fine over Ireland and England.

Temperature fallen decidedly over England and France. Morning readings highest 70° and more at Brindisi, over Greece, central Russia, and on the western shores of the Mediterranean, 64° at Valencia (Ireland) and Belmullet, but below 60° over by far the greater part of our Islands and the Continent. Lowest 44° at Vodo and Christiansund, 46° at Sumburgh Head, 48° at Naivis, 50° at Shields. Rising to between 60° and 66° over Great Britain later, and to between 70° and 80° over the southern half of France. Falling greatly over England at night, and touching 34° at Loughborough, 38° at Cambridge, and 39° at Spurn Head.

Wind Light and anticyclonic over the British Islands (NW¹ in the east, SE² in the west); extremely variable over northern and Central Europe, but a cyclonic circulation of light winds prevailed over the south of Russia, another over the southeast of France, and a third over Denmark. Little change later.

Barometer highest 30.2 ins: and more in an anticyclone over the British Islands, and exceeding 30.1 ins: over France, the east of Spain, and also over the Baltic Provinces. Lowest 29.7 ins: and less, in a depression over the south of Russia; about 29.9 ins: in another over Denmark, and about 30.0 ins: in another over the southeast of France. Very little change later.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on

Monday, 17th June,

1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest (1) 30.1 ins. and more to 30.0 ins. over Central Europe and the east of France; (2) 30.0 ins. and more over the extreme northwest of our Islands; (3) 30.1 ins. to 30.0 ins. over Lapland.
 Lowest, about 29.8 ins. in a shallow depression over the North Sea, and about 29.9 ins. in another over the southwest of France.
 Gradients slight and mainly favourable for NW winds in the east, and for E in the southwest.
 Barometer after falling generally, was changing little and irregularly over England.

TEMPERATURE

Highest, 65° at Jersey, 64° at Lisbon, Nice, and Biarritz, and also at Bodø, 62° at Stockholm, 59° at Brussels, 57° in London.
 Lowest, 48° at Lumburgh Head, 50° at Hornaway and Aberdeen.
 The maxima recorded over England yesterday ranged between 73° and 70°. Brest had a maximum of 75°. Biarritz 81°, and Rochefort 86°, but at Paris the thermometer did not rise above 66°.

WIND

(1) Light, but cyclonic, over the North Sea - viz NW off the English coast, SW at the mouth of the Elbe, SE to E over the Skager Rack and south of Norway.
 (2) Anticyclonic NE and E over the English Channel and Bay of Biscay.

WEATHER

Very fine generally, but cloudy on our northwest coasts, dull in Scotland and in the north of Sweden, with rain at Helsingfors.
 Very light rain has fallen over the Netherlands and the north of Scotland, rather larger quantities in the Shetlands and some parts of Scandinavia.

SEA

Moderate at Lumburgh Head, slight or smooth elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The shallow depression now lying over the North Sea was observed over Denmark yesterday, and now shows signs of filling up shortly. Fair weather is still probable over our Islands.

FORECASTS

For the 24 hours ending at NOON on 18th JUNE, 1895.

FORECASTS.

- 0 SCOTLAND NORTH
- 1 SCOTLAND EAST
- 2 ENGLAND N.E.
- 3 ENGLAND EAST
- 4 MIDLAND COUNTIES
- 5 ENGLAND SOUTH

NW^{ly} breezes, light or moderate; fine.

N^{ly} and NW^{ly} airs; fine, hazy.
 Very cold again tonight.

DISTRICTS.

FORECASTS.

- 6 SCOTLAND WEST
- 7 ENGLAND N.W.
- 8 ENGLAND S.W.
- 9 IRELAND NORTH
- 10 IRELAND SOUTH

NW^{ly} breezes, moderate; fine.

NE^{ly} breezes, light; fine.

Same as Nos 6+7.

Varying E^{ly} breezes, light; fine, very cold inland tonight.

WARNINGS

None issued.

Not - The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Continental Information not received.

SUMMARY OF CHANGES IN THE WEATHER OVER THE BRITISH ISLANDS AND THEIR NEIGHBOURHOOD FROM THE 9TH TO THE 15TH JUNE 1895

At the beginning of this week an anticyclonic system lay over the Bay of Biscay, and neighbouring parts of the Atlantic, its eastern part stretching thence over Ireland, England, and the greater part of France. The depressions which showed themselves in our neighbourhood were confined to the northern parts of our area, the primaries being situated over Scandinavia, while secondaries moved from northwest to southeast from the northern parts of the Atlantic across the Shetlands to the North Sea and Germany; other shallow systems appeared over the Mediterranean and south of France. Our northern districts consequently had showers from day to day, and thunderstorms and rain occurred over France and Germany, while over Ireland and England the weather, as a whole, was very dry.

Thursday, however, brought a change; during that day and Friday a small shallow depression moved eastwards over the southern part of England and Ireland, considerable quantities of rain fell over the extreme southern counties, and thunderstorms occurred in places. London and its suburbs, however, escaped with only a slight sprinkling although the clouds were heavy, and Paris on the southern side also escaped.

At the close of the week all these disturbances had passed off, and dry anticyclonic weather was again general.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.

„ Weekly „ „ „ £1 10 0 „

DAILY WEATHER REPORT

for 8 a.m. on Tuesday 18th June, 1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest 30.0 ins. and upwards over the northern parts of Scandinavia, and also over the S. of Germany.
Lowest 29.7 ins. and less in a depression over Scotland, and also (apparently) in another disturbance over the Bay of Biscay.
Gradients slight. Barometer falling generally, but rising in the Shetlands, as well as at many of the Scandinavian stations.

TEMPERATURE

Highest (1) 70° at Biarritz, 68° at Perpignan, 66° at Lyons, 64° at Rochefort, and 63° at Paris; (2) 64° at Stockholm, and 61° at Wisby.
Lowest (1) 42° at Bodø; (2) 46° at Nain and Aberdeen, 48° at Leith and Shields, and 50° at Stornoway, Horta, Malin Head and Donaghadee.

WIND

During yesterday the thermometer rose to 65° and upwards at many of the English and Irish stations, and to 70° at Jersey and Oxford, on some parts of our N. and N.E. coasts, however, it did not reach 55° E. or SE in the north of Scotland; N. in Ireland, W. or SW. over Wales and the northern and central parts of England; light or moderate in force generally, but fresh or strong in the N. of Ireland.
Light to moderate from the S. over the greater part of France, and from the E. over the English Channel, W. or SW. in Denmark, S. in the S. of Sweden; E. over Norway and the north of Sweden.

WEATHER

Fine over the southern parts of the United Kingdom, as well as in the Netherlands, Denmark, N. Germany and the south of Scandinavia.
Cloudy or overcast in most other localities, with rain at several of our own N. stations as well as at Palsodown & Nica.
Since yesterday morning rain has fallen over the N. parts of our islands generally, the largest amounts being 1.1 in at Nain and 0.6 in at Stornoway and Aberdeen. A solar halo was seen yesterday at Jersey. Thunderstorms occurred at Karlstad and Lyons, and lightning was seen at Biarritz.

SEA

Slight or smooth generally, but rather rough at Aberdeen.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The depression over Scotland seems likely to move southwards and to occasion unsettled rainy weather over the greater part of England and Ireland, with a fall of temperature in the south.

FORECASTS

For the 24 hours ending at NOON on 19TH JUNE. 1895.

²₄ W. to variable breezes, unsettled, some rain.
Wind shifting to the W. fine at first, unsettled later, with some rain.
²₄ N. winds moderate or fresh, fair at first, unsettled later with some rain.

WARNINGS

None Issued.

Note.—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over the greater part of western, central and southern Europe, but dull over Scotland and the north of Ireland, as well as on the Portuguese coast. Dull over Russia and the northern parts of Sweden, with rain at Uleaborg and Harnosand. Rain falling later over Scotland and the north of Ireland (heavily in places) as well as in Denmark and North Germany. Thunderstorms occurring at Karlsruhe and Lyon, and lightning seen at Biarritz.

Temperature risen in France and the extreme south of our Islands, as well as in Norway and Russia, changed irregularly elsewhere. Morning readings highest 77° at Brindisi, 76° at Athens and Patras, 75° at Tunis, and 73° at Bilbao; above 65° in most parts of southern Europe, and as high as 64° at Porto, and 62° at Kaspio and Stockholm. Lowest 48° at Sumburgh Head, 50° at Stornoway and Aberdeen, and 51° at Shields and Malin Head; below 55° over the northern parts of our Islands generally. Rising during day to between 65° and 70° at several of the English and Irish stations, and reaching 80° or more in the south of France, but remaining below 55° on some parts of our north and northeast coast.

Wind light to moderate from the N^W or NW^W over all the more northern and eastern parts of our Islands, from the SW^W in Denmark, and from the E^W over Norway and the N^W parts of Sweden and Russia. E^W or NE^W on our own extreme south and southwest coasts, and also over the greater part of France, but S^W or SW^W over the Spanish Peninsula. Light and variable over Germany, but chiefly N^W over Poland, Austria and Italy. Subsequently shifting to the S^W over Scotland, and to the E^W over the eastern parts of England; no important change occurring elsewhere.

Barometer highest 30.1 ins. and upwards over the extreme northern parts of Russia and Scandinavia; 30.0 ins. and upwards in a large area covering the more central parts of Europe and the Mediterranean, as well as in a smaller system off our extreme northwest coasts. Lowest 29.8 ins. and less in two depressions lying respectively over the southwest of Finland and over the eastern parts of the North Sea; 29.9 ins. and less in a shallow system over the southwest of France. New disturbance forming later in the neighbourhood of the Shetlands; barometer falling over W^W Europe generally, and the distribution of pressure becoming very complex.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on

Wednesday, 19th June,

1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

STATIONS.		YESTERDAY EVENING. (See note at bottom of last page.)					THIS MORNING. (See note at bottom of last page.)										PAST 24 HOURS.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.3 in. and upwards in the north of Sweden.

Lowest, 29.7 in. and less, in a large and complex depression covering the greater part of our Islands, France, the Netherlands and the North Sea.

Gradients slight generally, but moderate over Denmark and the south of Scandinavia.

Barometer rising in Scandinavia, but changing slightly and irregularly elsewhere.

TEMPERATURE

Highest, 72° at Lyons, 70° at Stockholm and Berlin, 69° at Vicks and Perpignan, and 67° at Brussels.

Lowest, 49° at Kairi and Donaghadee, 50° at Wick, and 51° at Aberdeen, York, Loughborough, Ardrossan and Malin Head.

During yesterday the thermometer rose to 70° and upwards at several of our southern stations, and reached 74° in London; on some parts of our extreme north and northwest coasts it did not reach 55°.

WIND

Light to moderate from the E.^W over Scotland and the eastern shores of the North Sea, and from the N.^W over Ireland and the southern part of England; variable in the north of England.

S.^W over the Netherlands and Central France; variable in the south of France; moderate from the S.E.^W in Sweden.

Fine at most of our western and northern stations, but with showers in places.

Rainy in the southeast of England, dull over France, the Netherlands, Denmark and the south of Norway, with rain at Kairi, Malin Head, and bright over Germany, Sweden, and the northern parts of Norway.

Since yesterday morning rain has fallen in many parts of Great Britain, as well as in Denmark, the Netherlands, and the north of France, the largest amounts being 1.3 in. at Kairi, 0.6 in. at Kairi, and 0.5 in. at Aberdeen. Thunderstorms or thunder only have occurred at Aberdeen, Jersey, the Hebrides, and several of the French stations.

WEATHER

SEA

Slight or smooth generally, but rough at Kairi and rather rough at Stormont.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The large depression over our Islands and France shows at present very little indication of dispersing, and changeable weather is therefore likely to prevail generally, with thunder showers in places.

FORECASTS

For the 24 hours ending at NOON on 20th JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	E. ^W winds, moderate or fresh; changeable, some showers.
1	SCOTLAND EAST	
2	ENGLAND N.E.	Light Variable airs; changeable, some showers, possibly thunder.
3	ENGLAND EAST	N. ^W to Variable breezes; changeable, some showers, possibly thunder.
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	Same as N ^o 2.
7	ENGLAND N.W.	
8	ENGLAND S.W.	N. ^W winds, light or moderate; changeable, some showers.
9	IRELAND NORTH	
10	IRELAND SOUTH	
WARNINGS		None issued.

Note.—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.

The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine in the southern part of the United Kingdom, as well as over the greater part of central and southern Europe. Rainy at several of our own northern stations, dull in France with rain at Nice, dull also over the greater part of Russia with rain at St Petersburg as well as at Lemberg. Showers falling during day over the northern part of Ireland and England, and rain setting in at night over the southeast of England. Thunderstorms or thunder only occurring at Aberdeen, Jersey, the Velder, and many of the French stations, with heavy rain at Paris.

Temperature fallen in the northern parts of our Islands and also over the Spanish Peninsula, risen in most other localities. Morning readings highest 80° at Brindisi, 78° at Tunis, 74° at Valparaiso, and 73° at Trieste, Palma, and Athens, above 65° in most parts of Southern Europe, and also in some parts of Finland and Central Russia. Lowest (1) 42° at Rode, 46° at Kain and Aberdeen, and 48° at Leith and Shields. Rising during day to between 70° and 74° at several of our own southern stations, and to 80° or more over the central and southern part of France, but remaining below 55° in many parts of our north and northwest coasts.

Wind light to moderate from the End in Norway, and from the same quarter or from SE. in Scotland, Nth or NWth in Ireland, light from the Wnd or SWnd over Wales and the northern and central parts of England. SWth over the Spanish Peninsula and south of France, but light from the End or NEnd over the Channel and north of France. SWth in Denmark; SEth in Germany. Variable in Russia and Austria, chiefly NWth in Italy. Subsequently shifting to the Wnd over the English Channel; no important change occurring elsewhere.

Barometer highest 30.2 in: and upwards in the extreme north of Russia; 30.0 in: and upwards over the Baltic Provinces, Poland, Austria, Italy, and the greater part of southeastern Europe. Lowest 29.7 in: and less, in two shallow depressions, one lying over Scotland and the other over the Bay of Biscay. Large complex area of low pressure developing later over England and France, and barometer falling at all but our extreme northern stations.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.4 in: and upwards over the Gulf of Bothnia and the north of Sweden; 30.1 in: and upwards over the Bay of Biscay and the west of France.
 Lowest, 29.8 in: and less, in a shallow but well marked depression over the Netherlands; 29.9 in: and less in a still shallower system over Scotland.
 Gradients slight generally. Barometer rising in most places, but falling a little over Central Denmark and the south of Sweden.

TEMPERATURE

Highest, 71° at Porto, Stockholm, and Berlin, 68° at Copenhagen, 67° at Visby, and 66° at Christiansund, Karlstad and Munich.
 Lowest, (1) 51° at Lumburgh Head, 52° at Tromsø, and 54° at Nauris, Donaghadee and Pembroke; 53° at Nice and 57° at Paris and Lyons.
 The highest maxima registered over our Islands yesterday were 69° at Loughborough and 68° at Oxford; on many parts of our north and east coasts the thermometer failed to reach 60°.

WIND

Light to moderate from the NW² over the greater part of England and France; SE¹ over North Germany; E⁴ over Denmark and the south of Scandinavia.
 A cyclonic circulation of very light breezes is reported over Scotland, light W¹ winds in the north of Ireland, and calms or variable air in the south of that country.

WEATHER

Fine over Western Europe generally, but dull over the Netherlands and Central France, with rain at Brussels as well as at Rotterdam. Thunder is reported at Nice.
 Showers fell yesterday in many parts of Great Britain, and heavy rain (1.2 in:) at Tromsø. Thunderstorms occurred in Scotland.
 Considerable quantities of rain fell at some of the French, Belgian and German stations, - as much as 1.1 in: at Brussels, and 0.8 in: at Wiesbaden and Nice. Thunder occurred at Belfort.

SEA

Light or smooth generally.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The distribution of pressure is still rather complex, but fine weather seems likely to continue for a time over the greater part of England. There are some slight indications of the formation of a shallow depression off our southwest coasts.

FORECASTS

For the 24 hours ending at NOON on 21st JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	Light Variable breezes; fair generally, but perhaps local showers
1	SCOTLAND EAST	
2	ENGLAND N.E.	Same as No 5.
3	ENGLAND EAST	
4	MIDLAND COUNTIES	NW ¹ winds, light; fair generally.
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	W ¹ and NW ¹ winds, light; fair generally.
7	ENGLAND N.W.	
8	ENGLAND S.W.	W ¹ to S ¹ winds, light; fair generally.
9	IRELAND NORTH	
10	IRELAND SOUTH	Variable breezes, finally SE ¹ , fair at first, unsettled later, probably some rain.
WARNINGS		None issued.

Note - The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning rainy in the east and southeast of England, as well as at Wick and Skudesnaes, cloudy over Denmark, France, and the northern parts of Spain and Italy, with rain at Biarritz. Fine in nearly all other parts of Europe, but showery at one or two of our own western stations. Weather clearing later over England, but thunderstorms occurring in Scotland and heavy rain falling at Stornoway. Considerable quantities of rain reported in some parts of France, Belgium, and Western Germany, with thunder at Brest.

Temperatures fallen in the south of our Islands and the north and west of France, but risen in most other localities. Morning readings highest (1) 84° at Tunis, 80° at Brindisi, 79° at Algiers; (2) 75° at Moscow; (3) 70° at Stockholm and Minsk; above 65° at many of the Continental stations. Lowest 49° at Kain and Donaghadee, 50° at Wick, and 51° at Aberdeen, York, Loughborough, Ardrossan and Malin Head. Rising during day to between 65° and 69° over the central and southern parts of England, but remaining below 60° on many parts of our western, northern, and eastern coasts. Exceeding 80° in Germany and the south of France, and reaching 84° at Berlin and Perpignan.

Winds light to moderate from the End or NEnd in Scotland and from the Nnd over Ireland, the southern parts of England and the north of France, but variable on our northeast coasts. Wnd or SWnd over Spain and the southwest of France; Snd over Central France and the Netherlands. SEnd or End over Germany, Denmark and Scandinavia. Light from the NWnd in Finland; variable over the central and southern part of Russia, as well as in Austria and Italy. Becoming rather variable later in the south of England; no important change occurring elsewhere.

Barometer highest 30.2 ins. to 30.4 ins. in an anticyclone over the northern parts of Sweden and Russia. Lowest 29.7 ins. and less, in a large complex depression covering the greater part of our Islands, France, the Netherlands, and the North Sea. Depression beginning to fill up gradually during day, and barometer rising slowly at all but our extreme northern stations.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on Friday, 21st June, 1895
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

WEATHER CHARTS

FOR *Friday, 21st June, 1895.*

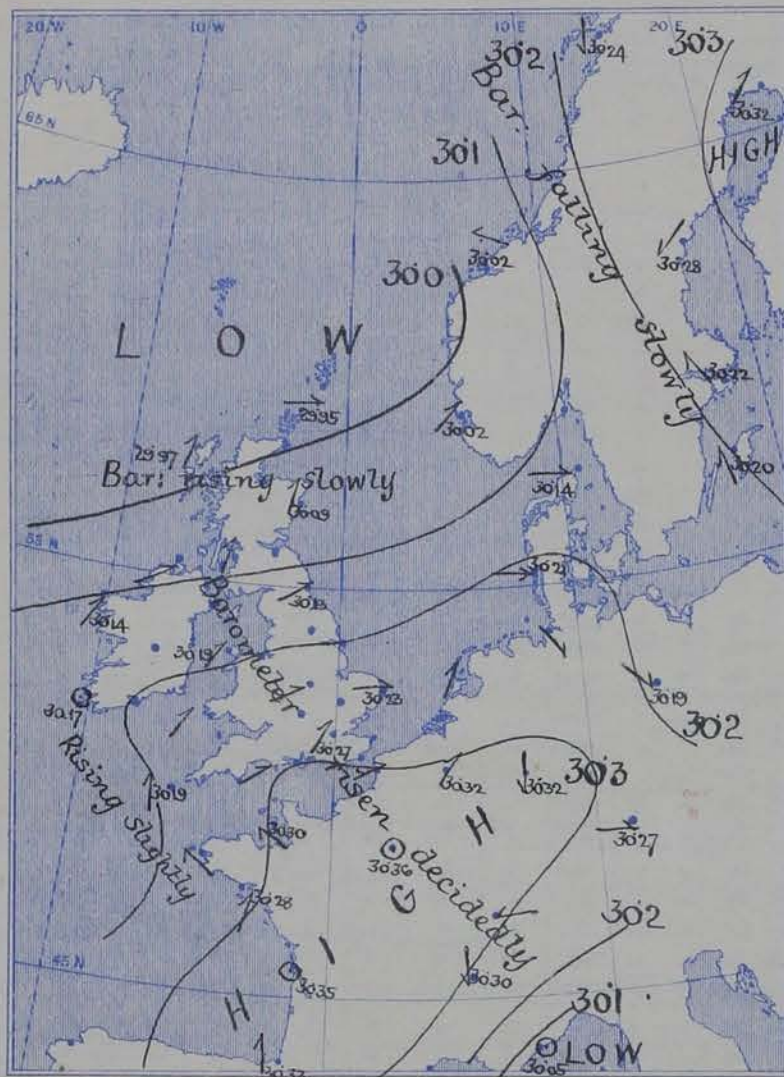

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 →→→ ; Force 5 to 7 →→→ ; } Calm ☉
Force 8 to 10 →→→ ; Force 1 to 4 →→→ ; }

SEA—Rough ≡≡≡ ; High ≡≡≡

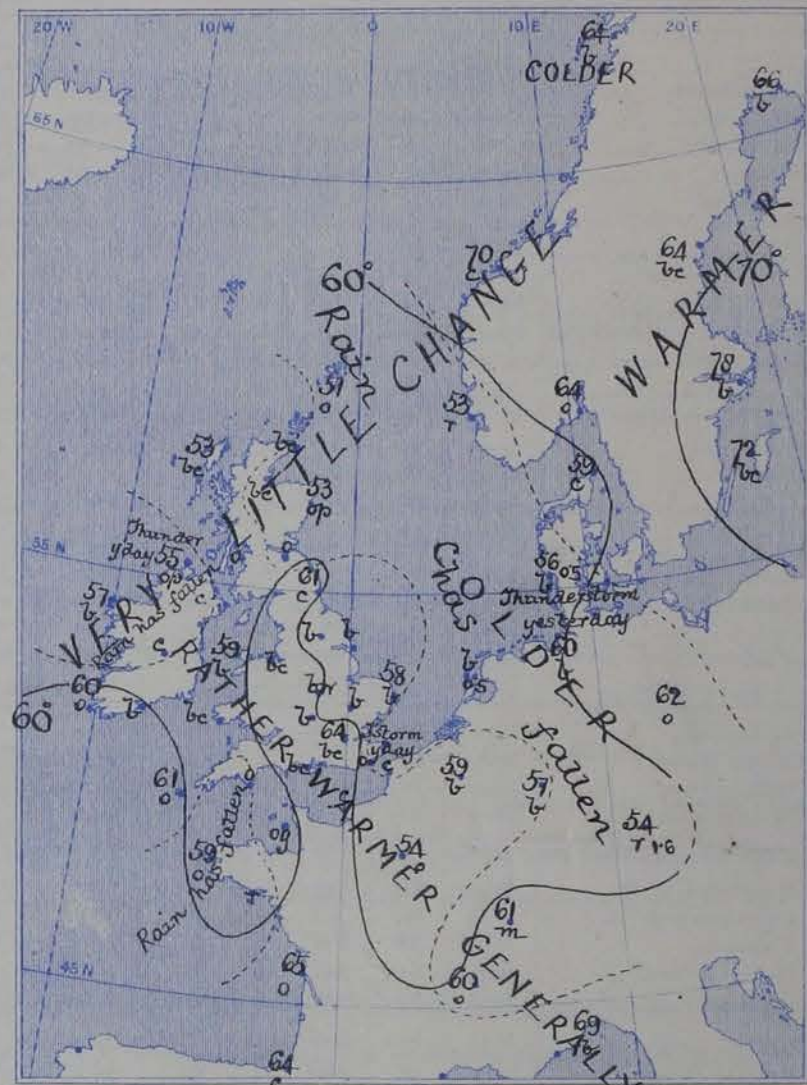

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus —0.6.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest 30.3 ins. and upwards in an anticyclone lying over France and the eastern parts of the Channel, and also in another area over the north of Sweden.

Lowest 30.0 ins. and less in a large shallow depression lying to the N. of our Islands, 30.1 ins. and less over the G. of France.

Gradients slight. Barometer rising at all but the Scandinavian stations, - very slightly on our extreme SW coasts.

TEMPERATURE

Highest (1) 78° at Stockholm, 72° at Wisby, and 70° at Christiania; 69° at Nice and Lisbon, 65° at Rangoon, and 64° in London and at Biarritz.

Lowest (1) 51° at Bumbury Head, 53° at Skudesnaes, Stornoway and Aberdeen, and 54° at Nuim, (2) 54° at Paris and Munich, and 55° at Plover Point and Dungeness.

The maximum registered yesterday were above 65° in many parts of the United Kingdom, and above 70° at several of the inland stations over England.

WIND

Light to moderate from the SW over the greater part of our Islands, but S. or SE on our extreme southwest coasts, and also in the northwest of France.

Calm or variable over the central and southern parts of France.

N. in Denmark; rather variable at the Scandinavian stations, but chiefly from the E.

WEATHER

Fine over the United Kingdom generally, but dull in the south and east of Scotland, with showers at Aberdeen and Malin Head; dull also at the Channel stations, and over France & Germany, with rain at Orient & Munich.

Fine over the greater part of Scandinavia and Denmark, but dull in the S. of Norway, with rain at Skudesnaes.

Showers fell yesterday in many parts of W. Europe, - heavily in the N. of Ireland. A thunderstorm occurred at the N. Foreland, and also at Faro, and thunder only was reported at Malin H. & Cuckhaven.

SEA

Slight or smooth generally.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The slackening of the barometric rise on our southwest coasts, accompanied as it is by a backing of the wind to S. or SE, and an increase of cloud, seems to indicate the formation of a small depression near the mouth of the Channel. The disturbance may possibly advance eastwards, and occasion rain and thunder over the southern parts of England generally.

FORECASTS

For the 24 hours ending at NOON on 22ND JUNE 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	SW ² winds light; fair generally, but perhaps local showers.
1	SCOTLAND EAST	
2	ENGLAND N.E.	SW ² to S ² winds light; fine at first, some showers later.
3	ENGLAND EAST	
4	MIDLAND COUNTIES	SW ² to S ² winds light; fine at first, cloudy later, with some rain and possibly thunder.
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	Same as N ^{os} 0 and 1.
7	ENGLAND N.W.	Same as N ^o 2.
8	ENGLAND S.W.	SE ² winds shifting to the W ² or NW ² ; dull at first with some rain, but improving later.
9	IRELAND NORTH	
10	IRELAND SOUTH	SW ² and S ² winds moderate, fine at first, then cloudy and showery.
WARNINGS		None Issued.

Notes. - The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.

The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine over the greater part of our Islands and the Continent, but dull in the Netherlands, western Germany and central France, with rain at Brussels. Dull also over the Baltic Provinces; rain and fog reported at Skudesnaes; thunder at Nice. Showers falling later in several parts of western Europe, - heavily in the north of Ireland. Thunderstorms reported at Tunis and the N. Foreland, and thunder only at Malin Head and the Helder. Heavy rain (1.6 in.) falling at Munich.

Temperature risen over our Islands and northern Europe generally, as well as in Italy, changed irregularly elsewhere. Morning readings: highest 82° at Brindisi, 77° at Tunis and Sfax, and 76° at Trieste and Rome. A little above 70° in several parts of southern and southeastern Europe, as well as over the Gulf of Finland and some parts of Scandinavia. Lowest (1) 51° at Sumburgh Head, 52° at Stornoway, and 54° at Naun, Donegal and Pembroke, (2) 53° at Nice, and 57° at Paris and Lyons. Rising during day to 65 and upwards in several parts of our Islands, and to 70° at the inland stations over England. Reaching 75° at Nice and Biarritz, and 91° at Berlin.

Wind: light to moderate from the NW over the greater part of England and France, but SE in Germany and E over Denmark, the Baltic and the southern parts of Scandinavia. Cyclonic circulation of light winds reported over Scotland; light W breezes in the north of Ireland, calm or variable over Austria and the S. of Russia; chiefly S in Italy; W over the greater part of Spain. SW breezes setting in later over the western parts of the United Kingdom generally. No important change occurring elsewhere.

Barometer highest 30.4 ins. and upwards in an anticyclone lying over the northern parts of Sweden and Russia, 30.2 ins. and upwards in another system over the western parts of the Spanish Peninsula. Lowest 29.8 ins. in a shallow, but well marked depression over the Netherlands, 29.9 ins. and less in a still shallower system over Scotland. Both depressions filling up gradually during day, barometer rising over W. Europe generally, and Spanish high pressure system spreading northwards.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. equally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.4 in. and upwards, in an anticyclone over Germany, the Netherlands, and all the more northern parts of France.
 Lowest, 30.1 in. and less, in a shallow depression lying to the northward of our Islands and also over the Gulf of Bothnia.
 Gradients slight. Barometer rising slowly, at all but the Swedish stations.

TEMPERATURE

Highest, (1) 76° at Lisbon, 70° at Perpignan, and 67° at Brussels and Nice; (2) 69° at Stockholm and 68° at Helsingfors; (3) 65° at Yarmouth.
 Lowest, (1) 51° at Bodø and Lumburgh N., 54° at Tromsø, and 55° at Rudmose, Wick, and Ardrossan; (2) 51° at Munich.
 During yesterday the thermometer rose to 71° at Larne, 72° at Loughborough, 75° in London, and 77° at Cambridge.

WIND

Light from the S. or S.W. over the greater part of our Islands and also on the eastern shores of the North Sea, but W. in the extreme north of Scotland, and strong in force in the Hebrides.
 Light to moderate from the N. over the southern parts of France and also at some of the Swedish stations.

WEATHER

Dull at most of the English and Irish stations, with fog or mist on several parts of our western and southern coasts.
 Fine in many parts of Scotland, as well as at most of the Continental stations, but dull in the west of Norway, and also in Germany, with rain at Bodø and Munich.
 Since yesterday morning a little rain has fallen over the northern and extreme southern parts of the United Kingdom; and a further large amount at Munich. A solar halo was seen yesterday at Jersey. A thunderstorm occurred at Rarstad.

SEA

Light or smooth generally, but rough at Tromsø.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

There are at present no signs of any important change in the weather.

FORECASTS

3	ENGLAND EAST		
4	MIDLAND COUNTIES	} SW. winds, light; fair, warm.	}
5	ENGLAND SOUTH		

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	} Same as No. 5
7	ENGLAND N.W.	
8	ENGLAND S.W.	} S. and S.W. winds, moderate; fair generally.
9	IRELAND NORTH	
10	IRELAND SOUTH	} S. winds, moderate; cloudy, slight rain locally.
	WARNINGS	
		None issued.

Note.—The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine over the United Kingdom generally, but dull in the south and east of Scotland, with showers at Aberdeen. Dull over the English Channel, France, northern Italy and some parts of Germany and Austria, with rain at Munich and Trieste, fine in most other parts of the Continent, but cloudy in the south of Norway, with rain at Skudenes. A little rain falling later over the northern and extreme southern parts of the United Kingdom, and wet fog settling in at some of the Channel stations. Heavy rain again reported at Munich; a thunderstorm occurring at Karlsbad.

Temperature changed very irregularly. Morning readings highest (1) 81° at Rhindia, 79° at Athens, and 76° at Palma; above 70° over the Mediterranean and Adriatic generally, as well as over Finland and the Baltic, and as high as 78° at Stockholm. Lowest (1) 51° at Sumburgh Head, and 53° at Skudenes, Stornoway, and Aberdeen; (2) 53° at Munster and 54° at Munich. Rising during day to 70° and upwards at many of the central stations in England and Ireland, and reaching 75° in London and 77° at Cambridge. Rising to 77° at Berlin and Nice, and to 80° at Perpignan.

Wind light to moderate from the S^W or S^W^W over the greater part of our Islands, but S^W or SE on our extreme southwest coasts and also in the northwest of France. W^W in Denmark and NW^W in Germany, but SE^W over the Baltic, Finland, and the greater part of Scandinavia. Variable over Italy and the Mediterranean, E^W or NE^W over the Spanish Peninsula. No important change occurring during day.

Barometer highest 30.3 ins. to 30.4 ins. in an anticyclone over France, Western Germany, and the eastern part of the English Channel, as well as in another system over northern and Central Russia. Lowest 30.0 ins. and less, in a large shallow area lying to the northward of our Islands, and also in a rather well marked depression over the Adriatic. Barometer rising slowly on all but our extreme southwest coasts where pressure was rather unsteady.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b, blue sky; c, detached clouds; d, drizzling rain; f, fog; g, dark, gloomy; h, hail; l, lightning; m, misty (hazy); o, overcast; p, passing showers; q, squally; r, rain; s, snow; t, thunder; u, ugly, threatening; v, visibility, unusual transparency; w, dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning cloudy or dull over Ireland and England, with mist or fog on many parts of our western and southern coasts. Fine in Scotland as well as at most of the continental stations, but dull in some parts of Germany, with rain at Munich. Sky clearing later in many parts of England, but a little rain falling at several of our western and northern stations, and a considerable quantity at Sumburgh Head and Bodo.

Temperature risen in Ireland and Scotland, fallen several degrees in Scandinavia; changed irregularly elsewhere. Morning readings highest 81° at Oporto and Athens, 79° at Patras, 78° at Brindisi, and 76° at Lisbon and Constantinople; above 70° at most of the Mediterranean, Adriatic, and Spanish coast stations, as well as in Finland. Lowest (1) 51° at Bodo and Sumburgh Head and 54° at Stornoway, (2) 51° at Munich. Rising during day to between 70° and 75° in many parts of our Islands, and reaching 77° in London. Exceeding 80° over southern Europe as a whole and rising to 91° at Lisbon.

Wind light from the S^W or S^Wnd over the greater part of our Islands and also on the eastern shores of the North Sea, but W³ in the extreme north of Scotland, and strong in force in the Hebrides. N² or NW³ at most of the Swedish stations, as well as over Eastern Germany, but light from the S^W over the Baltic Provinces. Rather variable, but chiefly N², in Italy; E² or NE² over the Spanish Peninsula and the south of France. Subsequently increasing to a fresh gale from the W² in the Hebrides; no important change elsewhere.

Barometer highest 30.4 ins: and upwards in an anticyclone lying over Belgium, Western Germany, and all the more northern parts of France; 30.3 ins: and upwards, in another system over the south of Russia. Lowest 30.0 ins: and less, in a small depression over Finland, 30.1 ins: and less, in a large shallow area lying to the northward of our Islands and also in another system over Turkey and Asia Minor. Well marked depression subsequently approaching Scotland from the Northward, and barometer falling rather decidedly in the Hebrides.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.
N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on Monday 24th June, 1895
Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest 30.4 ins. & upwards in an anticyclone covering the whole of our islands, with the adjacent parts of the North Sea, the Netherlands & France.
 Lowest 29.7 ins. & less in a well marked depression over Sweden, with its centre near Carlstadt.
 Gradients slight over our islands & France, but steep over Norway and rather steep over Scandinavia & Denmark generally.
 Barometer rising at all but the Swedish, Danish and North German stations.

TEMPERATURE

Highest (1) 44° at Perpignan, 45° at Lisbon & 69° at Biarritz; (2) 40° at Parsonstown, Brawle Point & Jersey & 69° at Llandudno.
 Lowest 49° at Haparanda 50° at Helsingfors, 51° at Rode and Christianmunde, and 52° at Skudesnaes, Lueder, Wick & Alfordham.
 During yesterday the thermometer rose to 44° at Leith & Oxford, to 48° at Harat Castle, to 80° at Cambridge & to 82° in London.

WIND

Light from the N^W or N^W on the east coast of Great Britain; strong to a gale from the same quarter on the eastern shores of the North Sea.
 S^W in the south of Sweden, N^E over the northern parts of Scandinavia, with a gale at Helsingfors.
 Light from the N^E over the English Channel and France; variable or S^W in the western parts of our islands.

WEATHER

Fair or fine over Western Europe generally, but dull at some of our own Central and southeastern stations, with showers at Loughborough. Fog prevailed on many parts of our western coast.
 Dull in Sweden and the extreme south of Norway, with rain at Lueder.

SEA

Since yesterday morning rain has fallen at most of the Scandinavian & Danish stations, and slight amounts over Germany & the north & east of England.

Slight or smooth generally, but rather rough at Skudesnaes.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

There are at present no signs of any important change in the weather.

FORECASTS

For the 24 hours ending at NOON on 25th JUNE 1895.

DISTRICTS.

FORECASTS.

- 0 SCOTLAND NORTH
- 1 SCOTLAND EAST
- 2 ENGLAND N.E.
- 3 ENGLAND EAST
- 4 MIDLAND COUNTIES
- 5 ENGLAND SOUTH

N^W winds, light; fair generally.

N^W and N^E winds, light; fair generally; cooler.

DISTRICTS.

FORECASTS.

- 6 SCOTLAND WEST
- 7 ENGLAND N.W.
- 8 ENGLAND S.W.
- 9 IRELAND NORTH
- 10 IRELAND SOUTH

Light variable airs; fair generally.

N^E winds, light or moderate, fair generally.

Light breezes, chiefly S^W; fair generally.

WARNINGS

NONE ISSUED.

Note—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Continental Information not received.

SUMMARY OF CHANGES IN THE WEATHER OVER THE BRITISH ISLANDS AND THEIR NEIGHBOURHOOD FROM THE 16th TO THE 22nd JUNE 1895.

The weather of the past week was of a somewhat variable nature, but with the exception of the north and east of Scotland, where heavy falls occurred between the 17th and 19th, very little rain was experienced in any part of the Kingdom.

At the commencement of the week the western and southern districts were under the influence of an anticyclone of slight intensity, which extended from the Atlantic across the Southwest of our islands and the north of France to Germany, while the northern and eastern districts were affected in some slight degree by a shallow, but well marked, depression lying over Denmark and the south of Norway. The winds were rather variable and the weather mostly fine, but a little rain was reported in the north and east of Scotland.

The depression to the eastward of us soon filled up, but on the 17th and 18th a general fall of the barometer resulted in the formation of a large and complex area of low pressure directly over our islands and France, the principal minima being situated respectively over Scotland and over the Bay of Biscay. Thundery weather, with heavy rain in places, now set in over North Britain and also over France, while slight falls of rain occurred in many parts of England and Ireland, the wind being mostly E^{ly} in the extreme north, but N^{ly} in the west and south of our islands.

On the 19th and 20th, however, the low pressure system gradually filled up, the barometer rose generally and an anticyclone spread from Spain over all the more southern parts of the Kingdom. W^{ly} to SW^{ly} winds now set in generally, but the weather remained rather changeable, with slight rain in the north and also in the extreme southern parts of the Kingdom on the 21st.

Until the close of the week temperature was rather low in the northern and northwestern districts and early on the 16th a sharp frost was experienced over Central England. With these exceptions the weather has been fairly warm, and on the 21st and 22nd the thermometer at some of the inland English stations rose above 45°.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on *Tuesday 25th June, 1895*
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

 Eastbourne: Sunshine yesterday 2 hours.

WEATHER CHARTS

FOR Tuesday, 25th JUNE, 1895.

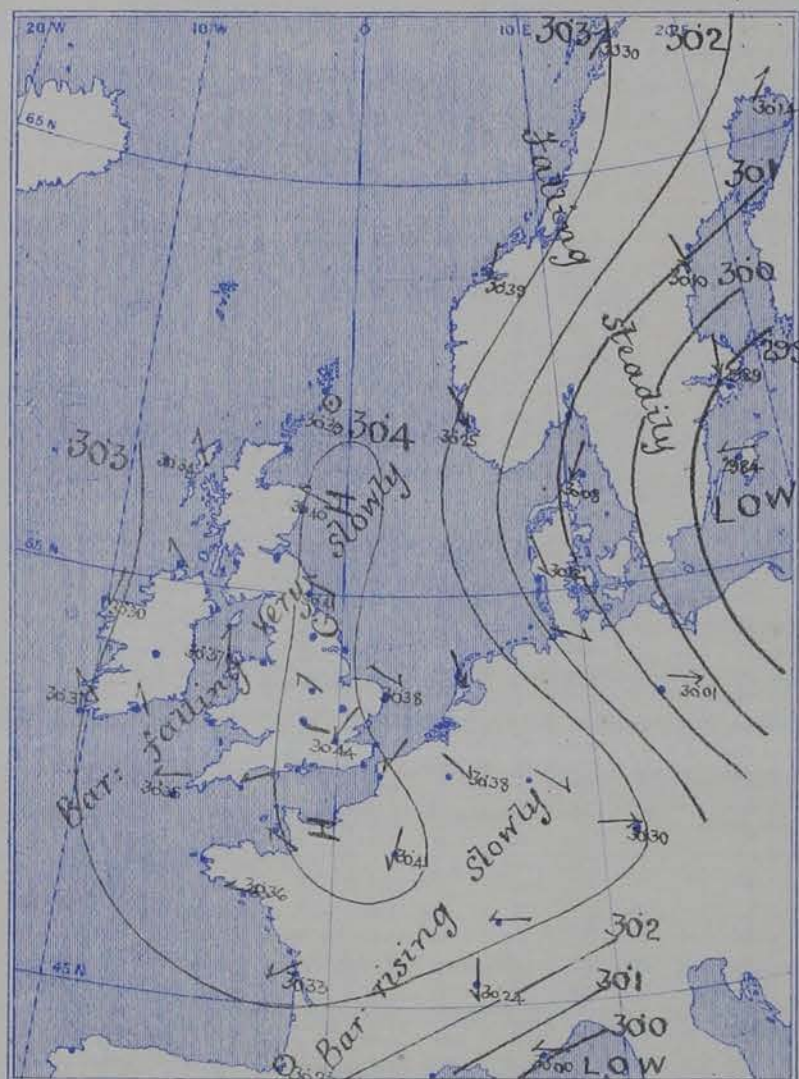

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 →→→ ; Force 5 to 7 →→→ ; }
Force 8 to 10 →→→ ; Force 1 to 4 →→→ ; } Calm ○

SEA—Rough ≡≡≡ ; High ≡≡≡

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest 30.4 ins. & more to 30.3 ins. in an anticyclone covering the British Islands, the northern half of France, the greater part of the North Sea, & the west of Norway.
Lowest 29.9 ins. & less over the Baltic.

Gradients very slight & variable over our islands, moderate for N.W. winds over the eastern side of the North Sea.
Barometer rising quickly over Scandinavia & Denmark, falling a little over the British Islands, most in the west.

TEMPERATURE

Highest 71° at Nice, 70° at Biarritz; 69° at Melin Head, 68° at Holyhead, Prawle Point and Rochefort.
Lowest 49° at Stockholm, 50° at Christiansund, 52° at Narvik, 54° at the Helder, 55° at Brussels.

It has been low over the inland districts generally during the night, but is apparently rising fast again.
Highest of the maxima yesterday were 82° at Parsonstown, 79° at Oxford; 80° to 84° over the southern parts of France.

WIND

(1) Strong to a gale from the N.W. over the southern half of Scandinavia, moderate N.W. over Holstein;
(2) E. over France, the Bay of Biscay & the Channel; (3) S.E. light on our western coasts as a whole, but moderate at Valencia (Ireland).
It blew a strong gale from N.W. at Skudesnaes yesterday & a strong breeze from the N.W. on the Danish coast.

WEATHER

Fine generally & in most places clear and bright; a little haze, however, prevailed at our inland stations.
No rainfall reported from any of our own stations. Bright Sunshine yesterday, however, was only London 2 hrs., Eastbourne 2 hrs., but 14 hrs. at Valencia, 10 hrs. at Scilly, Pembroke and Aberdeen.

SEA

Moderate at Valencia, smooth generally elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

- (1) The depression which lay over the south of Sweden yesterday has reached Eastern Russia, and the barometer is rising fast in its rear.
- (2) The anticyclone over our islands is moving eastward slowly & is inclined to decrease in intensity.

FORECASTS

For the 24 hours ending at NOON on 26th June 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	SE ³ breezes, light; fine to showery
1	SCOTLAND EAST	Variable to SE ³ airs; fine, very warm inland.
2	ENGLAND N.E.	
3	ENGLAND EAST	Same as N° 5.
4	MIDLAND COUNTIES	SE ³ airs; fine, very warm.
5	ENGLAND SOUTH	NE ³ and E ³ breezes, light, fine, warm.

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	SE ³ winds, inclined to freshen; fine, warm.
7	ENGLAND N.W.	
8	ENGLAND S.W.	SE ³ winds, freshening; fair to showery.
9	IRELAND NORTH	
10	IRELAND SOUTH	

WARNINGS

NONE ISSUED.

Note.—The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine over the British Islands and France, and in most places clear and bright - dull, however, over the southeast of England, and foggy off our southwestern coasts. Rain at Stockholm, Leno, the German stations and at Nice, and a slight sprinkling in London; weather fine elsewhere.

Temperature in morning, highest 81° at Barcelona, 78° at Petras, 77° at Perpignan and above 70° on the southeastern, southern and southwestern coasts of Europe generally, 70° at Jersey, Hawle Point and at Parsonstown. Lowest 42° at Archangel, 46° to 50° over the northern part of the Swedish coasts, 52° in the east of Scotland. Rising later to 82° at Parsonstown 79° at Oxford and Jersey; to 84° at Biarritz, 81° at Nice; not touching 60° at some of the Scotch stations; night cold over east of England.

Wind (1) Strong to a strong gale from the N^W over Scandinavia; W^{ly} moderate over the Baltic, SE^{ly} and S^{ly} light on the eastern shores of the Baltic; (2) Very light and anticyclonic over the British Islands, light E^{ly} over the Bay of Biscay. Very little change later.

Barometer highest 30.4 ins. and more over the British Islands and the northern half of France, lowest below 29.7 ins. in a well marked depression lying over the southern parts of Sweden. Falling a little over the British Islands later, but rising over Scandinavia as the Swedish depression moved southeastward over the Baltic.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.

WEATHER CHARTS

FOR *Wednesday, 20 June, 1895.*

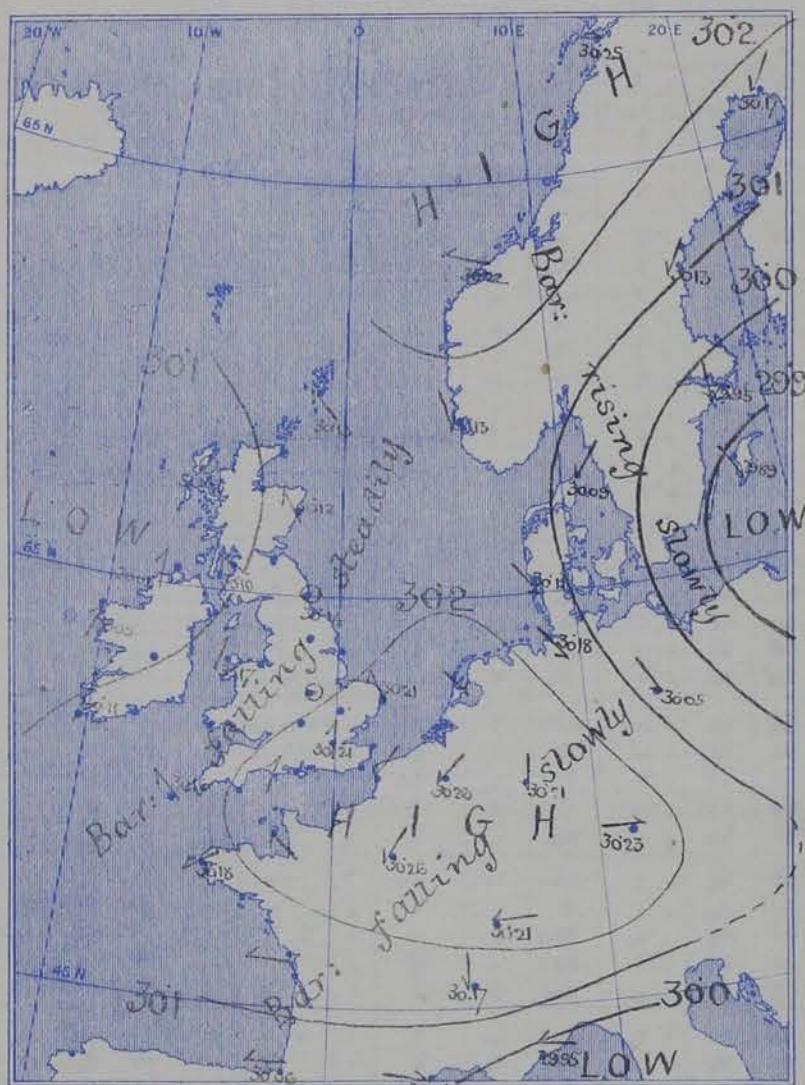

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows shew Directions and Force, flying with the wind.

Force above 10 \rightarrow ; Force 5 to 7 \rightarrow ; } Calm \odot
Force 8 to 10 \rightarrow ; Force 1 to 4 \rightarrow ;

SEA—Rough \equiv ; High \equiv

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.2 in: and more over the Netherlands, the southeast of England, and the northeast of France and also over the northern half of Norway.
Lowest, below 29.9 in: over the Baltic Provinces, and below 30.1 in: over the northwestern parts of our Islands.

Gradients slight and becoming favourable for S¹ winds all over our Islands.

Barometer falling over the United Kingdom, rising over Sweden, the Baltic and Germany; the fall however, is spreading eastwards.

TEMPERATURE

Highest, 75° to 72° in the south of France, 73° at Liverpool, 69° in London, 67° at Larnacstown.

Lowest, 50° at Rode, 52° at Stockholm and Rudesnaes; 58° at Aberdeen, 59° at Yarmouth, 52° at Brussels, 55° at Paris, 56° at Munich.

Maxima were recorded yesterday of 80° at Loughborough and Oxford, 79° in London and at Larnacstown.

It appears to be rising quickly over England this morning.

WIND

Very light from the S¹ over the greater part of our Islands, E¹ over the Bay of Biscay, NE¹ over France.
On the eastern shores of the North Sea and over the Baltic it is still N¹ to NW¹, but moderate in force.

WEATHER

Fine and light in most places; in Ireland, however, the sky is becoming overcast, and the general condition less fair than of late.

Thunderstorms occurred at Valencia and Malin Head last night.

SEA

Very little disturbed — in most places quite smooth.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

A large shallow low-pressure system is spreading over our Islands from the Atlantic, and will probably cause showers and thunder in the west and north shortly.

FORECASTS

For the 24 hours ending at NOON on 27th JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	SE ¹ airs; fine and warm, then showery, cloudy, and close.
1	SCOTLAND EAST	
2	ENGLAND N.E.	Varying and SW ¹ airs; fine and very warm today, cloudy tomorrow and possibly showery.
3	ENGLAND EAST	
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	Varying S ¹ and SW ¹ airs; fine, very warm today, less fair tomorrow.

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	SW ¹ breezes, light; some showers.
7	ENGLAND N.W.	
8	ENGLAND S.W.	Same as N ^o 5.
9	IRELAND NORTH	S ¹ and SW ¹ breezes; some showers, becoming cooler.
10	IRELAND SOUTH	
WARNINGS		None issued.

Note. — The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.

The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over the western countries generally, but dull over the Baltic, central and northern Russia, with rain at some stations. Rain falling later over the Baltic and Germany; weather very fine over the British Islands till night, when thunderstorms and rain began to spread over the west of Ireland.

Temperature rising in the west of the British Islands. Morning readings highest 82° at Lisbon, 81° at Barcelona, 78° at Perpignan and Ispah, exceeding 70° at nearly all stations over the southern and southeastern part of Europe, 70° at Kiev; 68° at Chauls Point, 66° at Brest; 64° at Looe; 47° at Archangel, 50° to 52° in the west of Norway; 52° at Munich, 53° at Münster, Berlin, and Breslau. Rising later to between 75° and 80° over the inland part of the British Islands, to between 80° and 89° in the south of France, but not exceeding 71° at Paris and 61° at Berlin.

Wind (1) N³ strong to a gale over the southern half of Scandinavia, Denmark, and at Lwimunde, W³ over Germany, SE³ over Central and northern Russia (2) Very light and anticyclonic over the United Kingdom, E and moderate over the coast of France. The SE³ (anticyclonic) wind becoming more general on our western coast late, and veering more to the S³ with a cyclonic tendency, little change elsewhere.

Barometer highest 30.4 ins: and more to 30.3 ins: in a large anticyclonic system covering the British Islands and neighbouring countries, including the west of Norway. Lowest (1) below 29.9 ins: all over the central and western part of Russia, and below 29.8 ins: in a depression having its centre over the Gulf of Riga; (2) below 29.8 ins: in a large shallow system over Asia Minor. Falling in our Islands all day, rising over the Baltic, as the depression there began to fill up.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.

WEATHER CHARTS

FOR Thursday, 27th June, 1895.

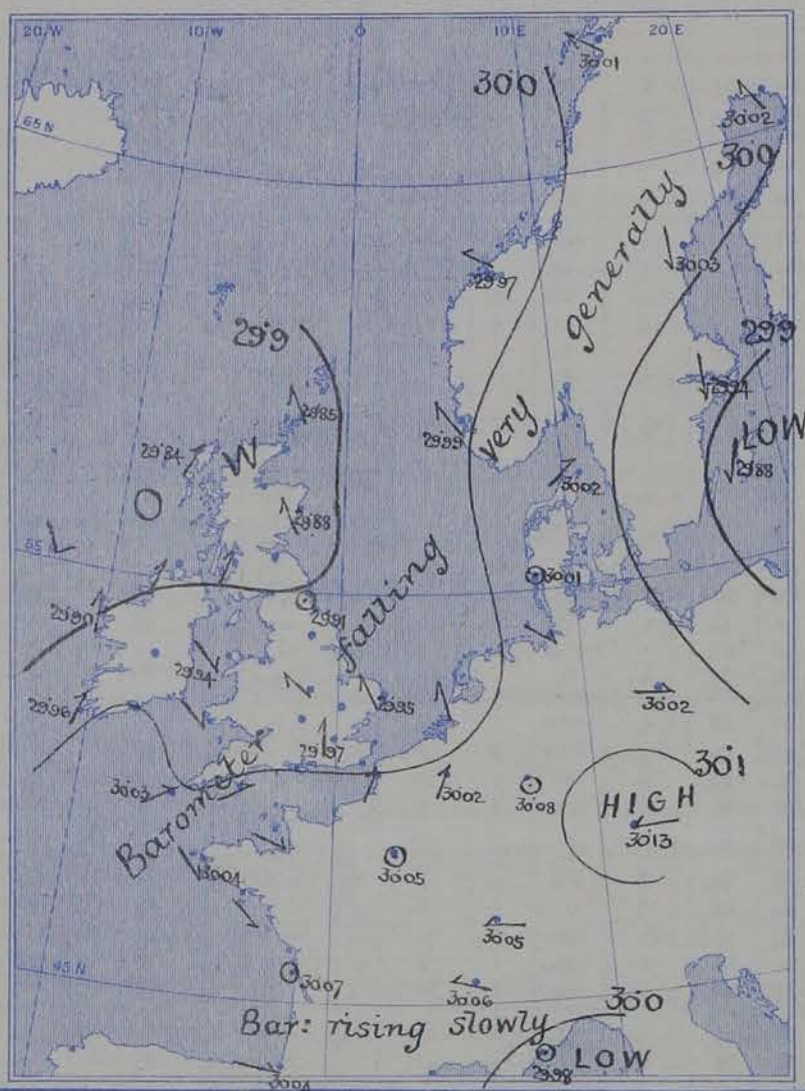

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 →→→ ; Force 5 to 7 →→→ ; Force 8 to 10 →→→ ; Force 1 to 4 →→→ ; Calm ○

SEA—Rough ≡≡≡ ; High ≡≡≡

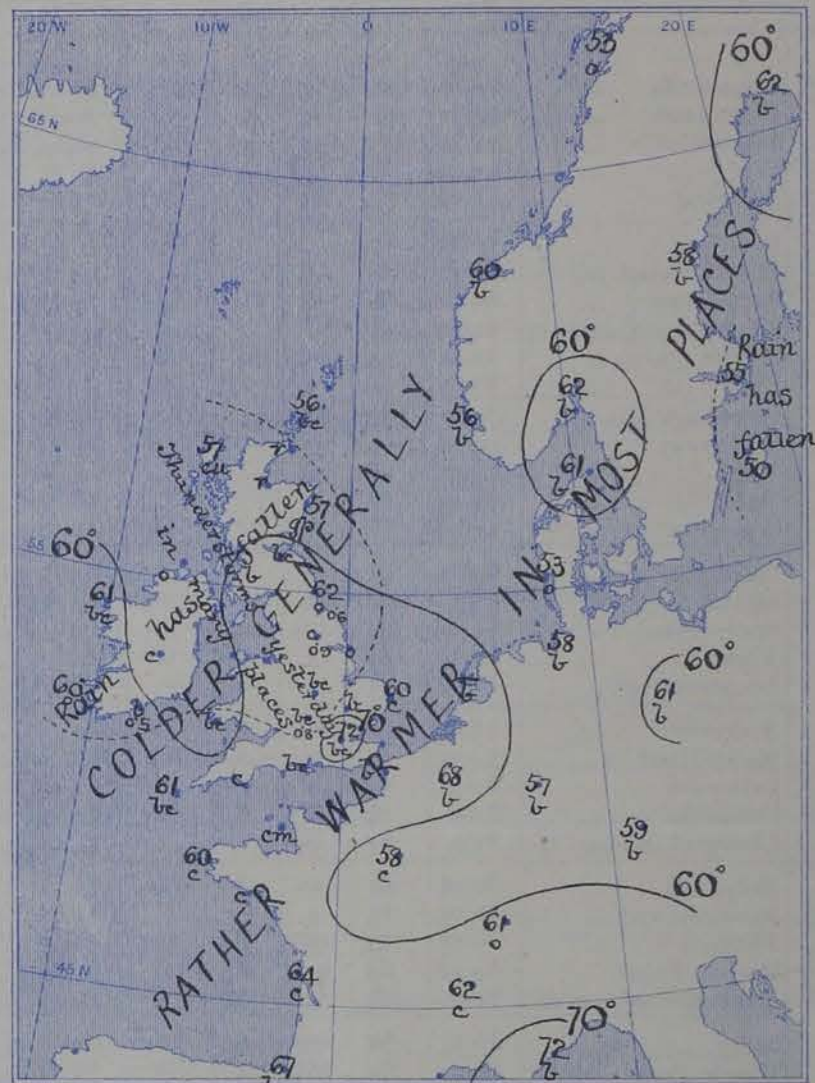

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.1 in; and upwards over South Germany.
 Lowest, 29.9 in; and less in a large shallow area lying over Scotland and to the westward of Ireland and also in another system lying over the Baltic.
 Gradients slight. Barometer falling generally, but rising a little in the south of France.

TEMPERATURE

Highest, (1) 72° in London, 68° at the North Foreland and Brussels, and 67° at Cambridge; (2) 71° at Nice, 69° at Lisbon and 67° at Biarritz.
 Lowest, 50° at Wisby, 53° at Bodø and Farsø, 55° at Stockholm, and 56° at Skutumpah, Loughbeg Head, and Aquir.
 During yesterday the thermometer rose to 80° at Loughborough, to 81° at Cambridge, and to 82° in London.

WIND

Light to moderate from the Snd over the greater part of Ireland and Scotland, and from the SEth in the coast of Norway.
 Light from the NWth in Wales and also in the northwest of France; SWth in the south of England; SEth over our eastern countries.
 Calm or variable over Germany and the south of France; strong from the Nth in the south of Sweden.

WEATHER

Fair or fine over the greater part of Western Europe, but rainy in the north of Scotland.
 Since yesterday morning thunderstorms, accompanied in many instances by heavy rain and hail have occurred over the northern and central parts of our Islands generally, as well as at some of our western stations. The largest amounts of rain reported this morning are 0.9 inch at York, 0.8 inch at Oxford, and 0.6 inch at Shields.

SEA

Slight or smooth generally.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

Small shallow depressions are apparently forming over various parts of our Islands, and unsettled thundery weather seems likely to become general, with heavy rain in places.

FORECASTS

For the 24 hours ending at NOON on 28th JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	Variable breezes, finally S th ; unsettled, some rain, thunder locally.
1	SCOTLAND EAST	
2	ENGLAND N.E.	Light Variable airs; changeable, thunderstorms locally.
3	ENGLAND EAST	S th and SW th to Variable breezes; weather becoming cooler and unsettled, with thunderstorms in many places.
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	S th winds, moderate; fair at first, then unsettled, with some rain, and possibly thunder.
7	ENGLAND N.W.	
8	ENGLAND S.W.	Same as N ^o 2.
9	IRELAND NORTH	W th to S th winds, light; fair at first, then unsettled, with some rain, and possibly thunder.
10	IRELAND SOUTH	
WARNINGS		None issued.

Note.—The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over Spain, France, and Scandinavia, as well as in many part of Great Britain, cloudy and unsettled over Ireland and the west of Scotland, as well as over the Baltic; rain falling at Neufahrwasser. Heavy thunderstorms later over the western, northern and midland parts of our Islands, lightning in the southeast. Rainfall exceeding half an inch at Oxford, York and Shields, but weather remaining very fine on the Continent.

Temperature rising decidedly over England, falling over France and southern Europe. Morning readings highest, 77° at Algiers and Barcelona, and exceeding 70° at nearly all the Mediterranean and Adriatic stations; 73° at Liverpool, 69° in London, 67° at Larne, 72° at Moscow, 70° at Kharkov. Lowest 50° at Bodo, 52° at Skudermø, 53° at Munich, 55° at Paris and Breslau. Rising later to between 70° and 82° in the inland parts of England, but not touching 70° over the greater parts of Ireland and Scotland.

Wind still NE to NW over Finland and the Baltic, but moderate to light in force; light and anticyclonic over France, the Netherlands, and the southeastern part of England; chiefly S over Ireland and Scotland. Turning to W. at our western stations later, and becoming very variable elsewhere.

Barometer highest 30.2 ins. and more (1) over Lapland and the north of Norway; (2) in the Netherlands, the northeast of France and the southeast of England. Lowest (1) about 29.8 ins. to 29.9 ins. in a complete depression over central and western Russia; (2) below 30.1 ins. in a large but shallow disturbance advancing over the northern parts of our Islands from the westward. Last named disturbance spreading over our northern districts later and barometer falling generally.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.

WEATHER CHARTS

FOR *Friday, 28th JUNE,* 1895.

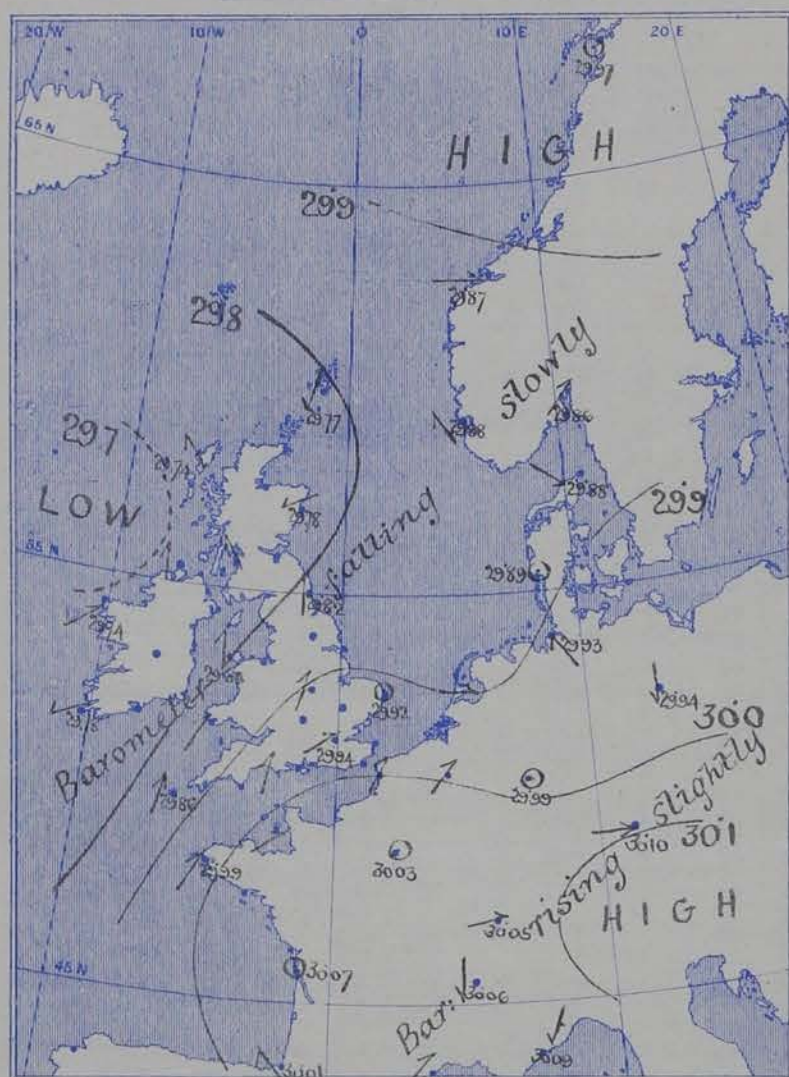

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows show Directions and Force, flying with the wind.

Force above 10 \Rightarrow ; Force 5 to 7 \Rightarrow ; }
Force 8 to 10 \Rightarrow ; Force 1 to 4 \Rightarrow ; } Calm \odot

SEA—Rough \equiv ; High \equiv

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

MEAN VALUES FOR PRESSURE, TEMPERATURE, RAINFALL, AND BRIGHT SUNSHINE IN THE MONTH OF JUNE.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.1 in: and more over the north of Italy, and exceeding 30.0 in: over France and Western Germany.
 Lowest, about 29.7 in: off our extreme north-west coasts, and below 29.75 in: off the southeast of Ireland.
 Gradients slight - somewhat variable, but mainly favourable for S¹ winds over our Islands.
 Barometer falling over the United Kingdom generally, most in the west, but not quickly anywhere.

TEMPERATURE

Highest, 73° at Perpignan, 68° at Lisbon and Lyons, 66° in London, 64° at Loughborough, 61° even at Faeder.
 Lowest, 51° at Bosc, 54° at Lumburgh Head and Aberdeen, 58° at Malin Head, Portoutown, and Valencia (Ireland).
 The maxima recorded yesterday ranged between 70° and 75° at our inland stations as a whole, 78° was the highest in London, 80° at Paris, 83° at Lyons.

WIND

Chiefly S¹ over England and blowing freshly on our south-western coasts, light elsewhere. Variable airs and calms prevail over Ireland and Scotland, moderate SW¹ breezes over the Channel, anticyclonic airs over France.

WEATHER

Very fine and bright over France and the east and southeast of England, cloudy in the north and northwest, rainy on our southwest coasts.
 Considerable rain has fallen again in the west of Ireland and at Hornsey, and small quantities at our western and northern stations generally, thunder occurred in many places.

SEA

Moderate at Brawle Point and Valencia, slight on our south-western coasts generally, slight to smooth elsewhere.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

The secondary disturbance seems likely to cause rain over England generally during the coming day and thunder in some places.

FORECASTS

For the 24 hours ending at NOON on 29th JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	Varying S ¹ winds; changeable, some showers.
1	SCOTLAND EAST	
2	ENGLAND N.E.	SE ¹ and S ¹ winds; fair to showery, perhaps thunder.
3	ENGLAND EAST	Same as N ^o 5.
4	MIDLAND COUNTIES	Same as N ^o 2.
5	ENGLAND SOUTH	S ¹ to W ¹ winds; fine at first, then rainy, with thunder in places.

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	Same as N ^{os} 0 and 1.
7	ENGLAND N.W.	
8	ENGLAND S.W.	SW ¹ , W ¹ , and Variable breezes; changeable, rainy to fair.
9	IRELAND NORTH	Very Variable winds and changeable weather, some rain.
10	IRELAND SOUTH	
WARNINGS		None issued.

Note - The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over southern Europe, England, and the southeast of Ireland, also over Sweden, the south of Norway and North Germany; cloudy, more or less, and unsettled elsewhere with rain at several of our northern stations and at Hangö and Wisby. Rain later at our western and northern stations generally—rather heavy in the extreme west, and at York, thunderstorms in many places, especially in the north and east of England.

Temperatures changing very irregularly, falling rapidly at Liverpool, rising rapidly at Brussels. Morning readings highest 82° at Algiers, and exceeding 70° at most stations on the shores of the Mediterranean, Adriatic, and Black Sea; 72° (locally) in London, and above 60° over the greater part of France and the British Isles; 69° at Moscow, 67° at Charkov. Lowest (1) 49° at Archangel, 53° at Bodo, 55° at Hangö, 56° at Naim; (2) 54° at Prague and Cracow, 55° at Hermanstadt. Rising later to 74° at Loughborough, 78° in London, 80° at Paris and 83° at Lyons.

Winds (1) N⁴ over the Baltic and Sweden, NW¹ over Eastern Germany, SW¹ at Lemberg, SE¹ at Moscow; (2) S¹, light, over Ireland and Scotland; (3) N¹ to NW¹ over the Iberian Peninsula; (4) very light and variable elsewhere. Becoming S¹ over our Islands generally later in the day—no decided change elsewhere.

Barometer highest 30.3 ins. and more over the Azores, and exceeding 30.1 ins. over the northwest of Spain, as well as (locally) at Munich and over the White Sea; exceeding 30.0 ins. over Central Europe, Denmark, and the greater part of Scandinavia. Lowest below 29.8 ins. in a shallow depression over Central Russia, and in another off our extreme northwest coast, and about 29.9 ins. in a small shallow secondary over Wales. Falling slowly in our Islands later, as further shallow disturbances approached our southwestern coast from the Atlantic.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on *Saturday, 29th June,* 1895
 Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

WEATHER CHARTS

FOR *Saturday, 29th June* 1895.

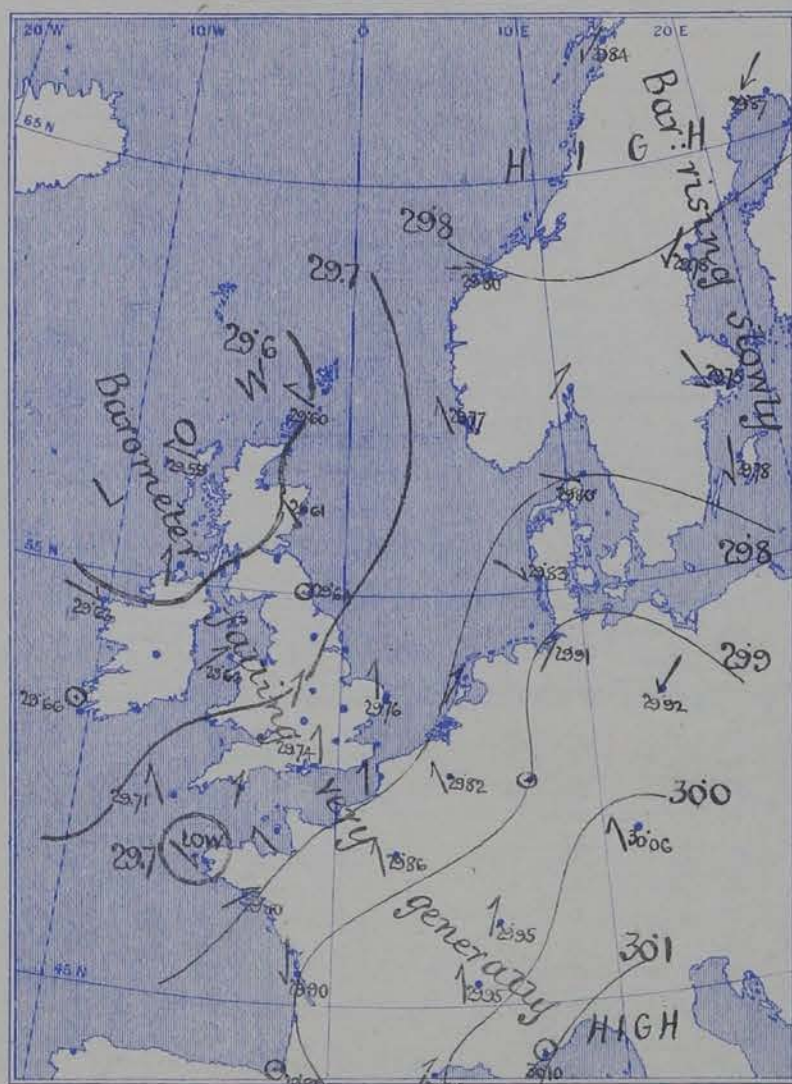

BAROMETER, WIND AND SEA.

BAROMETER—Isobars are drawn for each tenth of an inch.

WIND—Arrows shew Directions and Force, flying with the wind.

Force above 10 \Rightarrow ; Force 5 to 7 \Rightarrow ; }
Force 8 to 10 \Rightarrow ; Force 1 to 4 \Rightarrow ; } Calm \odot

SEA—Rough \equiv ; High \equiv

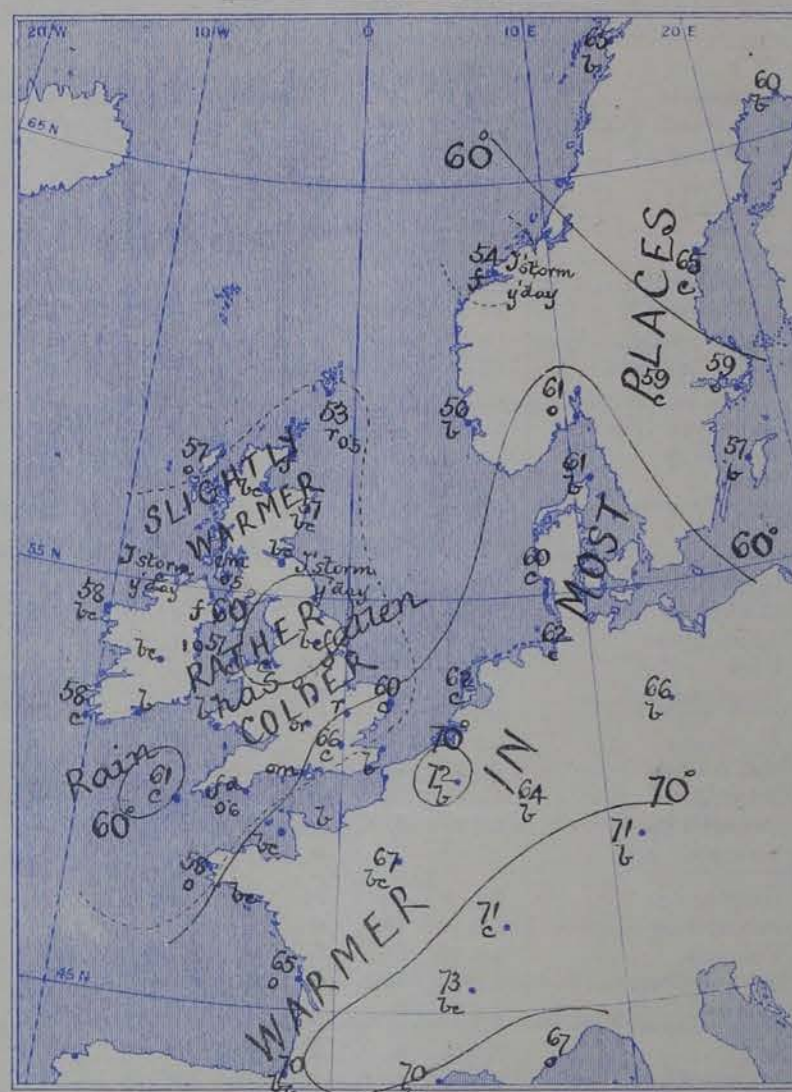

TEMPERATURE & WEATHER.

TEMPERATURE—Isotherms are drawn for each 10°.

WEATHER—Shown by Letters of the Beaufort Scale.

RAINFALL—A dotted line separates areas where rain has fallen from those without rain. The fall in past 24 hours when exceeding half an inch is shown thus—0.6.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.0 in. and upwards in the southeast of France.
 Lowest, 29.6 in. and less, in a large shallow area lying over and to the westward of Scotland; 29.7 in. and less, in a small depression over Brittany.
 Gradients slight. Barometer falling at all but the Swedish stations.

TEMPERATURE

Highest, 73° at Lyons, 72° at Brussels, 71° at Belfort and Munich, 70° at Birsatz and Compiegne, 67° at Paris, and 66° in London.
 Lowest, 53° at Lumburgh H., 54° at Christiansund and Donaghadee, 55° at Wick and Braile Point, and 56° at Kiedernaes.
 The highest maxima registered over our Islands yesterday were 77° at Cambridge, 75° in London and 72° at York.

WIND

Light from the S.W. over the greater part of England and also over Central France; variable in Ireland and Scotland.
 A cyclonic circulation of light to moderate breezes is reported over Brittany and the western part of the Channel.
 Light from the W. in Denmark; N. or N.E. in Sweden.

WEATHER

Dull at several of our own central and southern stations, with rain at Oxford and Cambridge.
 Fair or fine in most other parts of our area, but raining at Lumburgh H.
 Rain fell yesterday over the United Kingdom generally, with thunderstorms over the northern parts of England and Ireland, as well as at Christiansund. At Androssau 0.5 in. of rain was measured this morning, and at Holyhead 1.0 inch, but in the southeast of England the rainfall was either nil or too slight for measurement. Local showers were experienced in London.

SEA

Light or smooth generally.

PROBABLE CHANGES IN SYSTEM NOW PREVALENT

There is still a tendency for the formation of small shallow depressions over various parts of our Islands, and changeable, showery weather is therefore probable in most districts, with thunder in places.

FORECASTS

For the 24 hours ending at NOON on 30th JUNE, 1895.

DISTRICTS.

FORECASTS.

0	SCOTLAND NORTH	S.E. winds, light; fine at first showery later, possibly thunder.
1	SCOTLAND EAST	
2	ENGLAND N.E.	Same as N ^o 5.
3	ENGLAND EAST	
4	MIDLAND COUNTIES	
5	ENGLAND SOUTH	S. winds, light; changeable, some rain, possibly thunder.

DISTRICTS.

FORECASTS.

6	SCOTLAND WEST	Light Variable breezes; fine at first, showery later, possibly thunder.
7	ENGLAND N.W.	
8	ENGLAND S.W.	Same as N ^o 5
9	IRELAND NORTH	Light Variable breezes; fine at first, showery later.
10	IRELAND SOUTH	
WARNINGS		None issued.

Note.—The South Cone, point downwards (), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
 The North Cone, point upwards (), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning changeable and showery at many of our western stations, and rainy at Bally. Fair or fine in most other parts of the Kingdom, as well as at the Continental stations generally, but dull over western and central Russia, with rain in the Baltic Provinces. Rain falling during day in nearly all parts of the United Kingdom, heavily at some of our western stations; thunderstorms occurring at Shields and Malin Head. Showers in southeast of England very slight and partial.

Temperatures fallen slightly in many parts of the United Kingdom and Norway, as well as in Central Russia, risen in most other localities. Morning readings highest 86° at Palma, 82° at Barcelona, and 79° at Prindisi and Algiers; above 70° over southern Europe generally. Lowest 51° at Bodo, 54° at Sumburgh Head and Aberdeen, and 55° at Wick and Donaghadee. Rising during day to 70° and upwards at many of the English stations, and reaching 75° in London and 77° at Cambridge. Exceeding 80° in some parts of France and Germany, and rising to 87° at Lyons.

Wind light to moderate from the S^W over the greater part of the United Kingdom, but NE to N^E in the east of Scotland and the south of Ireland. Variable over the western, central and southern parts of the Continent generally, but chiefly NE^E over the Spanish Peninsula. N^E over Sweden, Finland, and the Baltic, light from the W^W over Austria and the south of Russia. Subsequently veering to the SW^W or W^W in the western parts of our Islands; no important change occurring elsewhere.

Barometer highest 30.1 in. and upwards over Italy; 30.0 in. and upwards over the greater part of central and southern Europe and the Mediterranean. Lowest 29.7 in. and less, in a shallow depression lying to the northward of our Islands, as well as in a large system over Western and Central Russia. Former disturbance subsequently spreading eastwards over the northern parts of our Islands; small secondary depressions appearing over our more southern districts.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark; gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.

" Weekly " " " " £1 10 0 "

DAILY WEATHER REPORT

for 8 a.m. on Sunday 30th June, 1895

Issued by the Meteorological Office, 63, Victoria Street, London. R. H. SCOTT, Secretary.

GENERAL SITUATION AT 8 A.M.

PRESSURE

Highest, 30.1 in. and more over the north of Italy, and exceeding 29.9 in. over South Germany and the southeast of France.
Lowest, Below 29.5 in. over Scotland, and also in a small disturbance approaching the southwest of Ireland from the Atlantic.
Gradients moderate, and mainly favourable for SW winds.
Barometer falling generally, most on our southwest coast.

TEMPERATURE

Highest (1) 75° at Berlin, 73° to 70° in South Germany and the south of France, 72° at Belfast, (2) 66° at Rome, 68° at Havre and London.
Lowest, 52° at Lumburg Head, 54° at Wick, 56° at Valencia, and 58° at Rocher Point and Malin Head.
Maxima recorded yesterday, were 84° at Paris, 82° at Perpignan and Belfast, 76° at the Hall of Ireland, 72° at York, 70° at Loughborough and in London.

WIND

Variable air and Calms in Scotland; SW to SE breezes in Ireland, SW over England and the North Sea, S over the south of Sweden, E on the coast of Norway.

WEATHER

Fine over France, Germany, and the east and southeast of England, as well as at the Swedish stations; changeable over Ireland, Scotland and Norway, with fog at some northern stations, thunder at Rudesdal.
Rain has fallen at almost all sea and coast stations, but in small quantities over all but our southwestern district.

SEA

Light in the southwest and south, smooth elsewhere, very smooth on our northern coast.

NONE ISSUED.

Note.—The South Cone, point downwards (↓), means that gales, or strong winds, are probable, at first from the Southward (from S.E. round by S. to N.W.). Should it appear likely that a gale beginning from between W. and N.W. is likely to veer towards N. or N.E., the North Cone is hoisted in preference to the South Cone.
The North Cone, point upwards (↑), means that gales, or strong winds, are probable, at first from the Northward (from N.W. round by N. to S.E.). Should it appear likely that a gale beginning from between E. and S.E. is likely to veer towards S. or S.W., the South Cone is hoisted in preference to the North Cone.

GENERAL REMARKS ON THE WEATHER OVER EUROPE DURING THE PAST 24 HOURS.

Weather in morning fine and bright over France, Germany, and the greater part of Southern Europe; very changeable over the British Islands, with showers at all but the southeastern counties, dull and raining over Central Russia, thunderstorms locally at home. Rain falling at times during the day in nearly all parts of our Islands and France, thunderstorms occurring in the north and northeast of England and in Denmark; amounts of rainfall not large.

Temperature changing very fitfully. Morning readings highest (1) 30° at Oren, 84° at Tunis, 81° at Barcelona, 80° at Khairi, and exceeding 70° at almost all stations in southern Europe; (2) 70° at Archangel, 68° at Uleaborg, 65° at Rodo. Lowest 53° at Sumburgh Head, 55° at Wick, 58° in the extreme west and northwest of Ireland; 57° at Wisby, 59° at Stockholm and Karlstad. Rising later to between 65° and 76° over various parts of our Islands, and touching 82° at Perpignan and Belfort, and 84° at Paris.

Wind (1) SW to S over France and the north of Ireland, S over England, SE over Scotland and the southwest of Norway, and light generally; (2) NE over Ireland and the north of Sweden, N to NW over the Baltic, SW at Kharkov and Moscow; (3) very variable over the Mediterranean. No marked change later.

Barometer highest (1) 30.1 in. and more over Italy and southeastern Europe, and exceeding 29.9 in. over Central Europe, the south of France, and the western parts of the Mediterranean; 29.8 in. to 29.9 in. over Lapland and the north of Norway. Lowest below 29.6 in. over the extreme north of Ireland and the northwestern half of Scotland, and below 29.4 in. in a well-marked depression over Central Russia. Falling over the British Islands and France all day.

EXPLANATION OF THE COLUMNS GIVEN ON PAGE 1.

WEATHER.—Beaufort Scale is b. blue sky; c. detached clouds; d. drizzling rain; f. fog; g. dark, gloomy; h. hail; l. lightning; m. misty (hazy); o. overcast; p. passing showers; q. squally; r. rain; s. snow; t. thunder; u. ugly, threatening; v. visibility, unusual transparency; w. dew.

* AN ASTERISK is inserted in all places for which information is not usually received.

N.B.—The morning observations are made at 8 a.m. in the British Islands, Germany, Sweden, and Norway, 7 a.m. in France, Spain and Portugal, and 9 a.m. in Belgium. The evening observations are made at 6 p.m. in the British Islands (as a rule) and France, 8 p.m. at Oxford, in Sweden, Norway and Germany, and 9 p.m. in Belgium. The time at each Station is the Standard Time of its Country.

Subscriptions both for the Daily and Weekly Weather Reports may be paid, in advance, to the Meteorological Office.

TERMS: For Daily Weather Report, forwarded by Book Post, £1 0 0 per annum.
" Weekly " " " " £1 10 0 "
