

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Thursday 07 Aug 2008

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
It will be cloudy with outbreaks of patchy light rain across central and
southeastern parts of the UK at first but it should soon become largely dry.
Elsewhere will see a generally dry day with variable cloud and some bright or
sunny spells. The risk of an isolated light shower. Fresher feeling.

Outlook for Saturday and Sunday:

A dry and bright start across the east on Saturday, although locally heavy rain
edging in from the west and breezy too. This will push eastwards through the day
across all areas. This will clear away overnight with scattered showers
following on Sunday, some locally heavy and thundery.
