

FPUK86 EGRR 271745
Forecast for the UK.
Issued by the Met Office
at 1945 on Monday 27 March 2006

** Valid for Broadcast at 2159 **

Here is the forecast for the United Kingdom for daytime tomorrow :
Scotland and Northern Ireland: Starting cloudy with outbreaks of rain, some heavy. Drier weather with sunny spells pushing across from west through the afternoon. Turning breezy. England and Wales: Mostly cloudy and wet in north, but rain clearing to drier, brighter conditions later. Mainly dry start further south, but showery rain pushing down from the north. Some heavy and thundery showers likely. Becoming rather warm in east. Windy.

Outlook for Wednesday and Thursday:
Unsettled, with further outbreaks of rain or showers. Although many places starting dry on Wednesday. Often windy, especially in the south. Temperatures near or a little above normal.
